The national exposition of Peru was thrown open to the public, July 1st. The ceremony of inauguration by the President was postponed until the anniversary of Peruvian independence, on the 28th of the same month. In spite of this disappointment, large numbers of people flocked to the opening, and the popular curiosity, concerning the manner in which nearly \$2,000,000 had been expended on the edifice, was fully satisfied: Nothing more complete, elegant, and convenient, could be desired. Covering about 206,000 square yards of ground, the exposition was composed of a series of imposing buildings, beautiful parks, gardens, lakes, and rivulets; valuable statues, grottos, every imaginable description of edifices for the reception of the animals on exhibition; conservatories filled with the rarest and most interesting specimens of the Peruvian flora; aviaries containing numerous representatives of the feathered tribe, from the far interior of the republic; machine-sheds, in which unfortunately the negligence of American manufacturers was painfully evident, and of a nature to confirm the presumption that their favorite enterprise had been usurped by their English rivals; galleries of works of art, collected by special commissioners abroad; in a word an extent of notable, useful, and beautiful objects which it would require the limits of a book to properly describe. The foreign articles on exposition were comparatively few in number; but the exhibition of Peruvian products was gratifying in the extreme. Cotton that ranks only second to the famed Sea Island; rice, so highly esteemed in the republic that its exportation is almost impossible; sugar that is always in demand in the Californian and European markets; tobacco of superior quality; specimens of the vast mineral wealth of Peru, gold, silver, iron, and coal—coal which in a short time will prove to be a most important element in the prosperity of the country; manufactures of woollen and cotton cloth from Cuzco and Huaraz; silk fabricated within thirty miles of Lima; alpaca and vicuña wool of many qualities; chocolate, coffee, and cochineal, from the north and east; the varied fruits and grains of Piura and Lambayeque; the various manufactures of Lima, the work of the great foundries of Bellavista and Piedra-Liza, with innumerable other objects of value and promise, gave to the inspector a most exalted idea of the progress of the country and of its indefinable resources. Never before had even Peruvians such an opportunity of judging of the wealth of their land; and for foreigners the spectacle was equally interesting.

The cove of Tambo de Mora was, by governmental decree, raised to the rank of a seaport in July.

The coolie question came, in the same month, more prominently forward in consequence of a loss of 31 per cent. of the immigrants by a French ship, which arrived at Callao from Macao on June 20th, with 181 Chinese out of 263 originally embarked. From another statement prepared by the captain of the port, of vessels entered and cleared in the six months previous, it was seen that in fifteen coolie voyages there was an average loss of close upon 10 per cent. It is noteworthy that neither a North American nor English vessel appears in the list of traffickers.

The events of the week preceding the 27th of July will long be remembered by the Peruvians, presenting as they did the spectacle of a constitutional President deposed and imprisoned by a military usurper; of a Congress dispersed at the point of the bayonet, after the members, irrespective of partisan feeling, had united in signing a solemn protest, declaring the new officers of the so-called government criminals and outlaws; of an entire country gathering together its strength to repel the attack made upon its liberties and legal rights; of the rising of the people when their indignation could no longer be restrained on the news of the cowardly assassination of Balta by the dictator; of the triumph of moral force and justice over bayonets; of the terrible vengeance of the population on their tyrants; of the final reestablishment of peace, order, and good government. This wonderful series of events was witnessed by Lima in the space of five days.

The contest for the presidency had resulted in two parties—the administration party, whose candidate was Dr. Arenas, and the popular party, whose candidate was Don Manuel Pardo. Both Houses of Congress held their preliminary meetings on the 13th of the month, and, although all their sessions were held in secret from that time up to the hour of their forced dissolution, it was quite apparent that Pardo would be the choice of the legislative branch. So well founded were these impressions that a general understanding seemed to exist that the President, Don José Balta, would quietly turn over the insignia of his office to his successor, Pardo.

General Gutierrez, the Minister of War under Balta's administration, had, however, for a long time been endeavoring to induce the President to enter into a plan for the annulling of the recent elections; to declare them void, in a word, to effect a *coup d'état*, and to assume the power of a dictator over the republic. It would appear that for some few days Balta listened to the wily insinuations of his counsellor, but, speedily becoming convinced, from the attitude of Congress, that the majority of that body were decidedly in favor of the election of Don Manuel Pardo to the presidency, the opponent of the Administration, he decided to withdraw from the project. No sooner had this determination been

made known to Gutierrez, than he filled the square in front of the Government Palace with troops and artillery, forcibly took the President prisoner, sent him to close confinement in a military barracks, declared himself supreme chief, and placed the city under martial law. To say that this most arbitrary step took the people utterly by surprise would be under the truth. Paralyzed, without a leader, and uncertain as to the strength of the usurper, the populace resolved to await further development, and to bide their time. That time was not long in arriving; Gutierrez first failed in forming a cabinet, no respectable man wishing to be associated with him; the diplomatic corps refused to recognize him as the President of the country; the army every moment was diminished by continual and heavy desertions; the navy stood out to sea and protested against the monstrous usurpation. Banks and commercial establishments were all closed; Gutierrez strove by every means in his power to obtain funds, but none were forthcoming. The newspapers, fearful of prosecution, closed their offices; the people, peaceful citizens, and even those intent on resistance, were fearful of traversing the streets, and, indeed, a perfect reign of terror existed in Lima. Revolts took place in several barracks, and in Callao with varying success; the great want appeared to be some guiding mind to lead to victory. Pardo and other distinguished men had fled to the legations or to the ships-of-war. Thus did matters proceed until the morning of the 26th. The roar of cannon in Callao, distinctly heard in Lima, announced that at last some steps were being taken to assert the people's cause, the excitement grew apace in the capital; Colonel Silvestre Gutierrez, the brother of the dictator and his Minister of War, was assailed with shouts and imprecations in the railway-depot; replying to the threats with his revolver, he was instantly attacked with the same weapon, and in a moment lay dead on the pavement. The people mutilated the corpse in a shocking manner, and only through the efforts of the employes of the railway was it rescued from their hands. The news was immediately carried to the dictator in the palace. Furious with rage at the loss of his chief support, he dispatched orders to the barracks, where Balta was confined, to kill him there and then. The command was carried into effect without loss of time; the unfortunate President was discovered ill in bed, when the assassins entered. The principal of these murderers drew his pistol and shot the President three times, each ball inflicting a fatal wound, and, by order of the assassin, the soldiers accompanying him pierced the inanimate body with their bayonets. The citizens gathering hastily together, with such indifferent arms as could be procured, an attack was resolved upon the bloody monster who had slain their chief. At this moment providentially appeared many of the prominent men of the popular party, unable to

further contain their indignation, and quick to improve the favorable moment for action. But Gutierrez, awed and terrified at the great roar of the people's cry heard in every part of the city, "Death to the murderer!" called his few remaining troops together, and on foot, in their midst, marched with pistol in hand to the fort of Santa Catalina, in the suburbs of the city, and there turned at bay. Colonel Herencia Zevallos, the first Vice-President of the republic, now put himself at the head of the masses, and was hailed with *vivas* and acclamations. "Constitution and the law!" was the rallying-cry of the populace. Proceeding to the Government House, Colonel Zevallos assumed the formal direction of public affairs, appointed a Cabinet composed of some of the most distinguished men of the country—Ribeyro, Riva-Agüero, Morales, Canseco, and Tejeda—and speedily took the necessary steps to reestablish public order. There was hardly any necessity for this. The people, although intensely excited, only had one object, the summary punishment of Gutierrez. But the dictator still defied his pursuers. Later in the evening it became evident to him that the remnants of his followers were deserting his cause. There was but one mode left—escape. Wrapped in a cloak, and with a slouched hat, he emerged alone from the fortress, and had proceeded through the city to the main street, when he was recognized. He rushed into a druggist's shop, where he was speedily surrounded by the crowd. A few moments later, all that was left on earth of Tomas Gutierrez was a bloody and disfigured mass of human flesh. The people, exulting in their victory, dragged the body to the principal square, and hung it to a lamp-post. On the morning of the 27th, the corpses of the dictator, and of his brothers, naked, covered with gore and mud, were swinging from the high towers of the great cathedral, gazed at and reviled by twenty thousand people. Thence, they were lowered and burnt to ashes in the principal square. The loss of life probably did not exceed two hundred, and the city remained perfectly tranquil.

Throughout the movement the greatest order was observed; the very masses placing guard over the public Treasury, and the principal establishments in the city. The only incident of note in this respect was the forcible opening of a shop in search of arms. With a popular administration conducted by the able men who surround Pardo, the country is destined to progress as few have dreamed of.

The life of Balta may be said to have been brought to a premature end by the false political measures he adopted, as well as the principles he abandoned. The counsels of false friends led him astray, and the assaults he permitted them to make on the constitution and rights of the people undermined the wall which fell upon and crushed them. The public life of Don José Balta before he was elected to

the presidency, and which consisted of a long list of services to his country, still offers many points of view that are at once warning and instructive. At the beginning of his public career, when he took part in the military operations brought about by the invasion of Peru by Santa Cruz, young Balta was remarked as much for his subordination and discipline as for his bravery and intelligence in the field of battle. What convictions were strengthened and principles adopted for the future, during his period of retirement after the battle of La Palma, we are left to judge more or less from the color of the events of his subsequent career. His patriotic exertions, in repelling the attack of the Spaniards on the 2d of May, entitle him still more to the regards and regrets of his countrymen. He expressed his dislike of dictators, and proved it by aiding in the overthrow of Prado, and the restoration of the Constitution of 1860. But the hour of his own temptation had not yet arrived. Elected President himself, he did, and allowed to be done, things which, in the quiet moments of his previous life, he probably did not believe himself capable of.

Congress, in October, authorized the Government to grant a subsidy of \$20,000, for the extension of telegraphic communication from Payta to Samaná, to form a union with the submarine cable just laid between Aspinwall and Jamaica.

POLLARD, EDWARD A., a Virginian journalist, *litterateur*, and historian, born in Richmond, Va., in 1827; died in Lynchburg, Va., December 12, 1872. He was a son of Major Richard Pollard, a soldier and diplomatist. He received his early education in Richmond, and subsequently in the University of Virginia. He entered upon the journalistic profession while still young, and distinguished himself as a vigorous and caustic though not a very polished writer. He held an official position in Washington during President Buchanan's Administration, but was, in 1859 and 1860, an avowed secessionist. From 1861 to 1867 he was principal editor of the *Richmond Examiner*, and, while an earnest advocate for the Confederate cause during the war, he was a merciless critic of Mr. Jefferson Davis, the President of the so-called Confederacy. Toward the close of the war he was taken prisoner and confined for eight months, when he was released on parole. In 1867 he became editor of a weekly, the *Southern Opinion*, published in Richmond. He maintained this for two years, when the assassination of his brother, who was also a journalist, in November, 1868, led him to abandon the South for a time. He resided for the next two years in Brooklyn and New York, and contributed to the various magazines. In 1872 he returned to Virginia, and made Lynchburg his residence. But he was already suffering from the formidable disease which has of late years carried off so many literary men—albuminuria—and succumbed

to it near the close of the year. Mr. Pollard had published a volume of letters descriptive of Southern life, entitled "Black Diamonds, gathered in the Darkey Homes of the South," in 1859, and during the war he was actively engaged, in addition to his journalistic duties, in preparing a contemporaneous "Southern History of the War," which was published in Richmond and New York, in 3 vols., 1863-1865. His subsequent works were "Eight Months in Prison," 1865; "The Lost Cause," 1866; "Lee and his Lieutenants," 1867; "The Lost Cause Regained," 1868; "Life of Jefferson Davis," 1869; "The Virginia Tourist." Mr. Pollard's magazine articles were, for the most part, either on incidents of the war, or some phase of Southern life. He had abated much of his old rancor in them, and was evidently convinced that the South could best recover her lost prestige by the general diffusion of education, and the development of her great industrial advantages. He had, indeed, for three or four years before his death, advocated very heartily a recognition of the national authority in the South, and had warmly supported the Liberal movement and its candidates.

PORK-PACKING. During the last year, complete statistics of pork-packing in the West, for the seasons of 1871-'72 and 1870-'71, were collected, under the authority of the Cincinnati Chamber of Commerce, by Sidney D. Maxwell, Esq., Superintendent of the Merchants' Exchange. Mr. Maxwell accomplished this work by an extensive correspondence with all the pork-packing cities, towns, and villages of the West and South, and the results obtained and carefully digested are believed to be the most comprehensive and accurate exhibit of this most important industry yet given to the public.

"It is proper to say," says Mr. Maxwell, "that I have sought in this work to procure the best information, and to base the report upon returns actually made from the various localities. The statements received have generally been full, and where, in either weight, yield of lard, or price, satisfactory information has not been obtained, the averages in the remainder of the particular State in which the point is located, or in adjacent localities similarly situated, have been adopted. Where lard has been returned, leaf and trimmings alone, ten pounds per head have been added for head and gut, for the purpose of securing the total average yield per hog. This has been done after consultation with the most experienced slaughterers and packers of the country. It should be remarked, however, that the reports were generally made in compliance with my request for all kinds of lard, so that the number of instances in which the whole yield had to be so procured was comparatively small."

The following tables show by States, for the seasons of 1870-'71 and 1871-'72, the number of hogs packed, the average and aggregate

gross weight, average yield per head of lard price paid per hundred pounds gross, and the of all kinds, total product of lard, the average aggregate cost:

West Virginia	7.808	1.755	13.69
In the West.	9.917875	13.674

A great majority of the hogs are slaughtered and packed during the winter season, which extends from November 1st to March 1st. Recently, however, summer-packing has greatly increased, and is destined to perform an important part in this department of trade. In October, 1871, 26,540 hogs were packed in Cincinnati, 10,350 in Chicago, and 2,187 in Indianapolis. Only in these three cities has October-packing prevailed to any considerable extent the last season.

The amount of green meats produced was estimated as follows:

	Pounds.
Green sides, 1870-'71.....	330,598,454
Green sides, 1871-'72.....	451,361,905
Green shoulders, 1870-'71.....	132,239,382
Green shoulders, 1871-'72.....	172,753,769
Green hams, 1870-'71.....	115,709,458
Green hams, 1871-'72.....	151,158,667
Total, green sides, shoulders, and hams, 1870-'71.....	578,547,294
1871-'72.....	755,273,334
Increase.....	177,346,040

From the above it appears that there have been packed in the entire West (not including the October packing, amounting to about 46,077 hogs in 1871-'72, and 67,423 in the

preceding season), during the winter season, 3,623,404 hogs in 1870-'71, and 4,782,403 in 1871-'72, showing an increase of 1,158,999 in favor of the latter year. The aggregate net weight, obtained by making the usual deduction of twenty per cent. from the gross weight, will be 826,496,135 pounds for 1870-'71, and 1,079,704,764 pounds for 1871-'72.

The last season, in the magnitude of its operations, has been one of the most remarkable in the history of pork-packing. The extent of the increase is indicated in the following statement:

Increase in whole number of hogs, according to count.....	1,158,999
Increase, per cent., in number.....	31.98
Increase in whole number of hogs, according to weight.....	1,110,088
Increase, per cent., in aggregate gross weight.....	30.63
Increase in the aggregate yield of lard—lbs.....	47,999,446
Increase, per cent., in aggregate yield of lard..	35.05

The two great points in the United States for this industry are Chicago and Cincinnati. Formerly Cincinnati ranked first, but the supremacy is now held by Chicago. The extent of operations in Cincinnati, during the last two seasons, has been as follows:

WINTER-PACKING.		
	1870-'71.	1871-'72.
Whole number of hogs packed.....	481,560	630,301
Average gross weight, lbs.....	298.8	280
Aggregate gross weight, lbs.....	143,909,390	183,283,061
Average yield per head of lard of all kinds, lbs.....	43.6	41.09
Aggregate yield of lard, lbs.....	20,534,087	25,857,468
Average price paid, gross.....	\$6 65	\$4 86
Aggregate cost.....	\$9,574,004	\$7,956,836

SUMMER-PACKING.		
Whole number packed in October, 1870.....	18,506	
Whole number packed in October, 1871.....	26,540	
Whole number packed between March 1 and November 1, 1871.....	67,515	

Included in the last item are those packed in October of the same year.

According to the report of the Board of Trade of Chicago, the number of hogs packed in that city, during the season of 1871-'72, was 1,225,236, including 10,350 packed in October, and 1,214,886 between November 1st and March 1st, of which 1,107,885 were live, and 107,001 were dressed. The average net weight was 232.54 pounds; average yield of lard per hog, 43.77 pounds; total number of tierces of lard (300 lbs.), 167,592; barrels of pork, 149,040; pounds of green hams, 27,702,599.

The following table exhibits the number of hogs packed in Cincinnati and Chicago, during the winter season, for a series of years:

YEARS.	Cincinnati.	Chicago.
1860-'61.....	433,799	271,805
1861-'62.....	474,467	505,991
1862-'63.....	608,467	970,364
1863-'64.....	370,622	904,659
1864-'65.....	350,800	760,514
1865-'66.....	354,079	507,365
1866-'67.....	462,610	689,353
1867-'68.....	366,831	736,236
1868-'69.....	355,555	587,354
1869-'70.....	337,390	668,140
1870-'71.....	481,560	919,197
1871-'72.....	630,301	1,225,236

The whole number of hogs packed in the West, for a series of years, has been:

Years.	No. of Hogs.	Years.	No. of Hogs.
1849-'50.....	1,653,230	1861-'62.....	2,808,006
1850-'51.....	1,332,967	1862-'63.....	4,000,520
1851-'52.....	1,123,846	1863-'64.....	3,361,105
1852-'53.....	2,301,110	1864-'65.....	2,422,779
1853-'54.....	2,534,770	1865-'66.....	1,725,955

PORTUGAL,* a kingdom in Europe. King, Luis I., born October 31, 1838; succeeded his brother, King Pedro V., November 11, 1861. Heir-apparent, his son, Carlos, born September 28, 1863.

The ministry, which came into office on September 18, 1871, was, at the close of the year 1872, composed as follows: President of the Council, A. M. de Fontes Pereira de Melho; Minister of Finance, E. de Serpa Pimentel (appointed October 11, 1872); Minister of the Interior, A. Rodrigues de Sampaia; Minister of Justice and Public Worship, A. F. Barjona de Freitas; Minister of War, A. M. de Fontes Pereira de Melho (*ad interim*); Minister of Marine and Colonies, F. C. de Freitas Maniz; Minister of Foreign Affairs, F. d'Audrade de Corvo; Minister of Public Works, of Commerce and Industry, A. Cardajo Avelino. The area and population, according to the latest official dates, were as follows:

PROVINCES.	Square Miles.	Inhabitants, 1868.
Minho.....	2,807	268,955
Tras-os-Montes.....	4,288	370,144
Beira.....	9,245	1,235,994
Estremadura.....	6,672	587,451
Alentejo.....	9,416	333,337
Algarve.....	1,573	177,363
Total.....	34,502	3,906,159
Azores Islands.....	996	223,480
Madeira Islands.....	315	113,341
Total in Europe.....	35,813	4,240,974

The Portuguese colonies, in 1871, contained an area of 740,288 square miles, and a population of 3,880,227.

The length of railroads in operation, in September, 1872, amounted to 487 miles. The budget of the postal administration, from 1868 to 1869, reports the revenue at 407,609 milreis. Number of post-offices, in 1870, on the continent, 561; the isles, 35; total, 596. In September, 1871, the length of the telegraph-lines in operation was 1,763; that of the wire, 3,506 miles.

The standing army is to consist, in time of peace, of 31,893 men, and, in time of war, of 70,687 men. The colonial troops of the first line numbered 9,453, and the troops of the second line, 21,411 men. The navy, in 1871, was composed of 34 armed and 11 non-armed

* For latest information concerning finances of the kingdom, see AMERICAN ANNUAL CYCLOPEDIA for 1871.

vessels, with 336 guns; the marine troops, of 3,121 men.

The imports and exports of the kingdom, during the years 1868 and 1869, were as follows:

DATE.	Milrds.	Milrds.
1869.....	Imports—22,590,000	Exports—17,810,000
1868.....	“ 24,890,000	“ 18,040,000

The movements of shipping in the ports of Portugal, during the year 1869, were as follows:

FLAGS.	ENTERED.		CLEARED.
	Vessels.	Steamers.	Vessels.
PORTUGUESE:			
Sea-going vessels.....	856	56	718
Coasting vessels.....	5,051	460	5,136
Others.....	4,525	1,092	4,426

The Roman Catholic Church is the state religion, but all other forms of worship are tolerated. It is under the special jurisdiction of a Patriarch, with extensive powers, two archbishops, and four bishops. Under the Patriarch, who is always a cardinal, are five continental and five colonial bishops; under the Archbishop of Braga, who has the title of Primate, are six; and under the Archbishop of Evora, three bishops. There are 3,769 parishes, each under the charge of a *presidente* or incumbent. The number of Protestants in Portugal, mostly foreigners, does not exceed 500; they have chapels at Lisbon and Oporto.

Public instruction is under the control of a Superior Council of Education, at the head of which is the Minister of the Interior. It is entirely free from the supervision of the Church, and, since 1844, compulsory; but the law, compelling parents to send their children to school, is not enforced. In 1865 Portugal had 1,788 public elementary schools, with 79,172 pupils (70,720 boys and 8,452 girls). In 1844, two normal schools were established at Lisbon and Oporto, which are in a flourishing condition. The number of lyceums, which impart secondary instruction, is 182, with (on an average) 3,000 scholars. The clergy are educated in six seminaries and eight training-schools. The University of Coimbra, which was founded in 1290, has five faculties, 46 professors and lecturers, and from 800 to 900 students.

The new session of the Portuguese Cortes was opened by King Luis, on January 2, 1872. The speech from the throne announced that steps had been taken for punishing the persons who had recently conspired against the Government, and that the public Treasury was in a prosperous condition.

In March, the Emperor and the Empress of Brazil paid a visit to the royal family of Portugal, and remained until the 18th, when they reëmbarked at Lisbon for Brazil. On the 2d of April the Portuguese Government made a contract with the British Telegraph Mainte-

nance and Sustenance Company for laying a submarine cable between Portugal and Brazil, *via* Madeira and the Cape Verd Islands.

The new treaty of commerce between Portugal and Germany became effective July 10th, and, on the 17th of the same month, a treaty of commerce and navigation was signed, at Lisbon, between Italy and Portugal.

On July 24th the fortieth anniversary of the liberation was celebrated throughout the kingdom with great enthusiasm. The day was generally observed as a holiday, and the celebration was considered as a popular protest against the Carlist and Miguelist movements. At Lisbon a parade of the troops was held, and a *Te Deum*, at which the King was present, was sung in honor of the event.

In the latter days of September, the founderies of Lisbon, with a few exceptions, closed their doors, locking out some 200 workmen, whose demands the proprietors refused to grant. This movement of the workmen was believed to be supported, if not ordered, by the International Society, which, on this occasion, attracted, for the first time, general attention. The Society began its operations in Portugal in November, 1871, with 32 members. In January, 1872, it numbered 327, in August, 2,750 members. It does not expressly call itself a branch of the International, but, as in Germany and other countries, has assumed a different name. The leaders, however, are in communication with the General Council of London, which has sanctioned its statutes. In October, 1872, the Portuguese Society consisted of 28 sections of different trades, embracing 2,880 men and 446 women. At the head of the Society in Lisbon is J. Futana, who, as secretary, attends to the foreign correspondence, and is in constant communication with the Spanish socialists. A number of societies had also been established outside of Lisbon, which were soon to be connected with the 28 sections of the capital.

In October, the Duke de Loulé, President of the Chamber of Peers, sent in his resignation, on the ground that, in his opinion, the special convention of the Chamber of Peers to try the Marquis d'Anjeja, a leader of a recent insurrectionary movement, was illegal. On October 15th the Government appointed the Marquis d'Avila President of the Chamber of Peers. The ordinary tribunal had acquitted the Marquis of high-treason, but convicted him of complicity in the late conspiracy. The Marquis addressed a communication to the Chamber, of which he is a member, protesting against its being constituted as a judicial tribunal, and declaring such a proceeding to be illegal. His communication points out the anomaly of the Chamber of Peers being called upon to act as judge in an affair in which it stands in the position of accused.

PRESBYTERIANS. I. PRESBYTERIAN CHURCH IN THE UNITED STATES OF AMERICA.—The following are the statistics of this Church:

The number of presbyteries is 166; of licentiates, 323; of candidates for the ministry, 767; of members of Sunday-schools, 485,762; amount of contributions for home missions, \$419,388; for foreign missions, \$345,870; for education, \$176,962; for the Board of Publication, \$48,454; for church erection, \$178,696; for the relief fund, \$76,896; for the freedmen, \$46,685; for the General Assembly, \$31,441.92; for ministers' salaries, \$2,597,342; for congregational purposes, \$5,012,907; for miscellaneous purposes, \$1,110,816.

The General Assembly of the Presbyterians met at Detroit, Mich., June 16th. The Rev. Dr. Nicolls, of St. Louis, was elected moderator. The committee on the memorial fund made their final report, which stated that the total amount subscribed up to August 1, 1871, was \$7,883,988.85. Deducting special gifts to boards and all that was expended in the payment of church debts, and the amount estimated at \$500,000 probably spent on repairs of churches, there would remain \$6,162,269.54 for strictly memorial objects. The expenses of the committee were \$18,081.50. The committee appointed by the previous General Assembly to prepare a new basis of representation presented a report, proposing that the synods elect commissioners to the Assembly upon the nomination of the presbyteries. The presbyteries were to make as many nominations as there were commissioners provided for under the old plan, and in the same manner as the commissioners were elected. From the number thus presented, the synods were to select as commissioners to the Assembly one pastor

and one elder for every three thousand members of the Church. The object of this proposition was to reduce the number of members, which had been greatly enlarged by the union of the Old and New School Churches. The whole subject was referred back to the same committee, to be again reported on at the succeeding General Assembly.

Relative to the perpetuity of the office of minister, and of a release from the same, the following resolutions were adopted as an overture to be sent down to the presbyteries:

The office of a minister of the gospel is perpetual. No one can lay it aside at his own pleasure, or be deprived of it, but by deposition, yet for reasons not calling for discipline—

1. A minister may, on his own request, and with permission of his Presbytery, cease to be an acting minister; or—

2. If the presbytery is convinced that a minister is permanently disqualified for the ministerial work (except by age, sickness, or other accidents), it may, with consent of the synod, obtained after three months' notice to such minister, require him to demit the exercise of the duties of his office, it being understood that he will still be a member of the Church, and eligible to the office of ruling elder or deacon:

Provided, That if any one, in either of these ways, ceases to be an acting minister, he shall not be permitted to sit as a minister in any of our ecclesiastical judicatories; and if he is not connected as a member with some particular church, he shall still be responsible to his presbytery, and he may by it be restored to the exercise of the functions of his office, and to all the rights incident thereto.

The reports from the boards showed the number of contributing churches and the aggregate amount of the gifts to be greater than ever before. The receipts of the Committee on Benevolence and Finance, for the year, were \$80,140.64; their expenditures were \$78,380.04.

The Board of Education reported \$31,013 of receipts in a little over eleven months, against \$77,006 for the thirteen months previous. It, however, owed for borrowed money \$15,000. The board had aided in all 722 students studying at 134 different institutions.

The receipts of the Board of Publication were \$313,167.19; its disbursements were \$289,169.34. It had published thirty-one bound volumes, and eighteen tracts and Sunday-school pamphlets, and had employed 156 men as colporteurs. It had issued 578 grants to missions, amounting to \$14,764. The presbyteries were advised to appoint committees to cooperate with this board. The committee on ministerial sustentation, who had been appointed by the previous General Assembly, in connection with the adoption of the new scheme for securing an adequate support for the clergy, had organized on the 18th of September, 1871.

In the six months of the committee's operations seventy-two ministers had been taken off the hands of the Board of Home Missions, and sixty-one had been made pastors under the scheme. The receipts from all sources, for this cause, for the year ending April 20, 1872, were \$41,073.52, and the expenditures \$18,212.92. The number of contributing churches

was 748; of applications received, 156; of applications granted, 114. The balance in the treasury was \$22,000. The pastors were asked to aim to secure for this cause each an amount equal to at least one-tenth his salary. The Board of Home Missions reported total receipts of \$331,043.08, and expenditures of \$331,030.47. The number of ministers under commission during the year was 1,154; of churches and stations supplied, 3,500; of schools under the care of the missionaries, 1,282; of members in the churches, 56,709. The Committee on Union with the United Presbyterian Church reported that they had met the committee of that Church at Pittsburg, Pa., April 30, 1872; that the committee from the United Presbyterian Church did not feel authorized to consent to any action modifying the basis which had been already prepared on their part, and that the joint committee had then adjourned *sine die*. The committee was continued. The Board of Foreign Missions reported total receipts of \$457,212.85; expenditures, \$487,969.42. This was in the first year in which both branches of the Church had given their entire contributions to this board; therefore, it was explained that the gain in funds was more apparent than real. The whole number of laborers in the field was 710, of whom 450 were natives of the countries in which they were working. The number of communicants in the churches of the missions was 4,203, and of scholars in the mission schools 10,581. The increase from the previous year was, in laborers, 49; in communicants, 631; in scholars, 622. A beginning had been made of important operations in Mexico; several additional Indian missions had come under the care of the board, and great interest had been taken in the African missions, particularly those of Liberia. The Assembly resolved to attempt to raise, in the ensuing year, \$550,000 for missionary purposes, or \$50,000 more than the amount set for the year before.

The receipts for the Freedmen's Fund were \$56,195.13; the expenditures, \$50,081.58. One hundred and seventeen laborers were employed, of whom 66 were colored. The committee had 100 churches under their care, with 8,003 members, 85 Sunday-schools, and 5,271 scholars. Fifty-one of these churches had contributed \$1,195.50 to the support of their ministers. The number of scholars in the day and night schools was 3,333. A committee on vacant churches and unemployed ministers reported that 799 ministers, or nearly one-fifth of the whole number of ministers in the Church, were without charge, and that about 980 of the 4,616 churches were without pastors, while 1,729 other churches were served by "stated supplies" that is, temporarily. This condition was recognized as an evil. To remedy it, the committee offered a proposition recommending that the presbyteries appoint committees on vacant churches and unemployed ministers, who shall obtain

information and coöperate in bringing such ministers and churches into communication. This report, and the proposition it embodied, were referred to the succeeding General Assembly. The Board of Church Erection reported that they had received \$105,888.39, or \$50,411 less than during the preceding year, and had appropriated, to 211 churches, \$118,783. The committee appointed to consider the case of certain church property in Louisville, Ky., the title to which had been in dispute, reported that the Supreme Court of the United States had decided in the suit concerning this property that the decisions of the General Assembly on questions in its purview purely ecclesiastical must be held final and conclusive, and that it had confirmed the title of the Assembly to the property. The income of the fund for the relief of disabled ministers was \$70,568.54. The permanent fund amounted on April 1, 1872, to \$97,771.24. The disbursements for relief of ministers, their widows and orphans, were \$69,784.07, applied to 334 cases. The rule, requiring ministers coming to the United States from the Presbyterian Churches of Great Britain to submit to one year's probation, before being admitted to ministerial standing, was repealed. No action was taken on the subject of union with the General Assembly South, beyond the adoption of an expression of willingness to resume fraternal relations. A similar expression was made, in general terms, with especial application to the Independent Synod of Missouri. A committee was appointed to visit this synod. The General Assembly declared it not in accordance with Presbyterian usage to invite persons, not members of evangelical churches, to partake of the Lord's Supper. In reply to an overture from the Presbytery of Brooklyn, asking the adoption and transmission of such rules as would prevent women from preaching and teaching in the pulpits and in public and promiscuous religious meetings, the General Assembly declared that there was no necessity for a change in the constitution of the Church on this question, and referred to the "deliverance" of the Assembly of 1832 as expressing its judgment. In a letter to the ministers and churches under its care, that Assembly, after expressing its cordial approval of the meeting of women by themselves for purposes of prayer and conference, had thus declared: "To teach and exhort, or to lead in prayer in public promiscuous assemblies, is clearly forbidden to women in the Holy Oracles."

The second meeting of the Synod of China was held in 1871. A prominent part was taken by natives in the discussions. A committee was appointed to correspond with the missionaries of the Reformed Church in America and the missionaries in China of the Presbyterian bodies of England with reference to uniting to form one Presbyterian Church in China. The meeting of the synod was at-

tended by thirteen European missionaries, seven native pastors, and ten native elders. It represented a church-membership of about 1,000 persons. The next meeting will be held in Che-foo, in August, 1874.

II. PRESBYTERIAN CHURCH IN THE UNITED STATES.—The following is a general summary of the statistics of the Southern Presbyterian Church for 1872:

Synods in connection with the General Assembly.	11
Presbyteries.....	56
Ministers and licentiates.....	957
Candidates.....	205
Churches.....	1,545
Whole number of communicants.....	91,908
Churches not reporting number of communicants.....	87
Children in Sunday-school and Bible-classes.....	55,943

MONEYS CONTRIBUTED.

To Sustentation and Presbyterian Domestic Missions.....	\$51,899
To Foreign Missions.....	41,004
To Education.....	47,523
To Publication.....	10,479
To Invalid Fund.....	8,518
To Pastors' salaries.....	433,050
To Congregational purposes.....	415,955
To Miscellaneous.....	76,363
Total.....	\$1,068,799

The General Assembly of this Church met in Richmond, Va., May 16th. The Rev. T. D. Welch, D. D., was elected moderator. The organization was announced of the Presbytery of San Paulo, in Brazil. The committee on sustentation reported that the receipts for the year ending April 1, 1872, were \$28,961.37. This amount includes \$6,508.42, which were contributed to the invalid fund. Estimates based upon reports received from twenty-five presbyteries indicated that the average salary of ministers was between \$650 and \$700. The receipts for the Educational Fund were \$19,661. The amount of \$19,715.97 had been paid to 180 students. A deficit of \$4,421.98, charged to the previous year's account, had been cancelled. The receipts during the year for foreign missions had been, including special contributions, \$35,876.55. A debt of \$5,505.09 had been reduced one half. The increase in contributions over those of the previous year had been more than 70 per cent. The force of missionary laborers consisted of 14 ordained ministers, of whom four were natives of the countries in which they were employed; four missionary assistants; and eight native assistants. The General Assembly decided to undertake to raise \$60,000 for missions during the ensuing year. The Rev. Dr. Van Zandt was introduced as the corresponding delegate from the Reformed Church in America. He was formerly connected with the Southern Presbyterian Church, and settled as a pastor at Petersburg, Va. He addressed the Assembly at considerable length, and developed propositions for the organic union of the two bodies, and explained how their common interests would be greatly promoted by union. His remarks were received with evident favor. The Rev. W. W. Trimble was received as a delegate from the Independent

Synod of Missouri. He explained the position of that body, and the nature of the obstacles which hindered union between it and the Southern Presbyterian Church. When the synod first separated from the Presbyterian Church North, it became involved in lawsuits for church property which it would have lost if it had connected itself with the Southern General Assembly. Since the close of the war many Northern Presbyterians had moved into Missouri and joined the churches of the synod. These members would now be lost to the synod if it formed an organic union with the Southern Church. At the time of its separation from the Northern Church, this synod counted on its rolls 40 ministers, 50 churches, and 6,000 communicants; it now numbered 90 ministers, 130 churches, and 8,000 communicants. A resolution looking to the preparation of a liturgy with responses was rejected. The question was submitted whether it is proper for Presbyterians to administer baptism by immersion. The General Assembly decided that such a method of baptism is a departure from the standard, and should be discouraged. The Union Theological Seminary had been attended by 62 students, of whom 20 had completed their course. The property of this institution was valued at \$229,846.03. Thirteen students had been graduated from the Theological Seminary at Columbia, S. C. An increase of \$5,570.94 was reported in the business transactions of the publishing house. The net assets of this establishment were appraised at \$40,255.05. Several works are to be published in Portuguese for the use of the churches in Brazil. Reports on Sunday-schools were received from forty-four out of the fifty-five presbyteries. There were in these presbyteries 682 schools, 6,658 teachers, and 46,972 scholars. The Sunday-schools had contributed to the funds of the Church \$26,678. Little Rock, Ark., was selected as the place for the meeting of the next General Assembly.

III. INDEPENDENT SYNOD OF MISSOURI.—The Independent Synod of Missouri, at its meeting in 1871, adopted the following overture, with reference to union with the Southern Presbyterian Church, to be transmitted to the presbyteries, in order that their sense might be taken upon it: "Shall an organic union be formed between this body and the Presbyterian Church in the United States, whose General Assembly held its sessions in Huntsville, Ala., in May, 1871?" The vote was taken at the meeting of the presbyteries in 1872. Two presbyteries voted for the overture, three presbyteries voted against it, and one presbytery gave a tie-vote. The overture, having failed to receive the approval of a majority of the presbyteries, was lost. The synod met at Columbia, Mo., October 8th. The report of the result of the vote in the presbyteries was referred to a special committee, who made a report expressing the hope of ultimate union.

IV. UNITED PRESBYTERIAN CHURCH.—The following are the statistics of this Church:

SYNODS.	Ministers.	Congregations.	Communicants.
New York.....	97	93	14,390
First Synod of the West.....	90	193	14,663
Pittsburg.....	86	117	14,063
Ohio.....	51	82	7,400
Second Synod.....	73	95	8,596
Illinois.....	73	90	6,813
Iowa.....	58	83	5,336
Kansas.....	34	37	1,703
Presbyteries not in synods (4)	22	18	1,034
Total.....	564	755	73,698

The entire number of presbyteries is 55; of the ministers, 429 are pastors of churches, and 155 are "without charge." The number of licentiates is 61; of students, 63; of "unorganized stations," 41; of Sunday-schools, 593; of Sunday-school scholars, 53,288. Contributions: for home missions, \$22,895; for foreign missions, \$38,840; for freedmen's missions, \$3,118; for education, \$8,569; for the Board of Publication, \$5,125; for church extension, \$14,937. Total contributions, including those for congregational purposes, payment of salaries, etc., \$823,276; average contributions per member, \$11.09; average salary of pastors, \$898.

The General Assembly of the United Presbyterians met at Washington, Iowa, May 16th. The Rev. J. Van Easton was chosen moderator. The Committee on Union with the Presbyterian Church reported that one of their members had met with the committee of the General Assembly of that Church; but "was unwilling, in the circumstances, to proceed further with the negotiations, than to join in a renewed request for instructions. The members of the Presbyterian committee thought this inadvisable, and the result was that, while there was a very pleasant conference, nothing of formal negotiation was effected." The General Assembly adopted the following resolutions on the subject:

Resolved, That, in the judgment of this General Assembly, there do not appear to be encouraging grounds for a further prosecution of this work at present.

Resolved, That this Assembly hereby declares again its desire for union with sister churches on any ground that will be mutually satisfactory, and that it is ready to coöperate, especially with the Presbyterian Church, in any proper efforts to secure such a union, to the glory of our common Saviour, and the greater prosperity and good of His cause in the world.

Resolved, With this suggestion on the general subject of union, and of the facts in the case as they are understood by this Assembly, the Committee on Union shall be continued, to meet any similar committee that may be appointed by the General Assembly of the Presbyterian Church, to engage in any further conferences that may be called for on this subject.

The obstacles to the proposed union are understood to be radical differences, in the views of the two churches, on the subjects of psalmody, secret societies, and church-fellowship.

Delegates were appointed to open a correspondence with the Presbyterian and Scottish Presbyterian Churches, of the Eastern British Provinces. The use of paraphrases, as songs of praise in worship, was declared to be not consistent with the principles and usages of the Church. Reports were submitted from a committee, which had been appointed to inquire what should be held as proper grounds of divorce, which expressed two different opinions. One report held that the only justifiable ground for divorce is unfaithfulness to the marriage vow; the other held that wilful desertion is a sufficient ground. The subject was referred to the next General Assembly. The previous General Assembly had granted aid, through the Board of Home Missions, to 151 stations. From 187 of these stations were reported a membership of 9,581, an average church attendance of 17,956, and additions of 665 persons by profession of faith, and of 912 by certificate. A decrease in membership was shown of 545. The agent of the fund for building mission buildings in China had received \$2,492.12, of which amount, \$4,000 were given by the Sunday-schools, and the children. An increase in contributions to the Church Extension Society was reported. The net assets of the Board were \$78,183.16. The Board were directed to have published a set of the standard, "in as cheap and convenient a form as possible."

The receipts of the Board of Foreign Missions were \$51,694.89, of which \$10,327.50 were legacies and bequests, and \$2,675 special donations outside the Church, leaving the actual contributions of the Church only \$38,692.39. The contributions to the China building fund are not included in these amounts. Four missions are under the care of the board, situated in Syria, in India, in Egypt, and in China. Connected with them are 19 stations, 35 missionaries, 88 native helpers, and 18 schools, with 2,253 scholars. The amount of contributions by the native churches in Egypt was \$1,444. The sum of \$619 had been realized for tuition fees in Egypt, and \$60 from the same source in India. Two hundred thousand pages of printed matter had been issued from the mission press in Egypt. The mission of this Church in Egypt has been very successful. It is the largest carried on by any society in that country. The next meeting of the General Assembly is to be held in Philadelphia.

V. REFORMED PRESBYTERIAN CHURCH.—The General Synod of the Reformed Presbyterian Church met in Brooklyn, N. Y., May 16th. The Rev. James F. Morton, of Ohio, was chosen moderator. The Rev. Thomas C. Baggs was received as a corresponding delegate from the Reformed Presbyterian Synod (O. S.), on the subject of union. He spoke of the friendly feeling existing between the two churches, and was appropriately responded to.

The collections for foreign missions amounted to about \$2,000. The receipts of the susten-

tation fund were \$2,561.41; the expenditures for sustentation were \$570.58. The endowment fund of the theological seminary was reported to be \$30,409.89; income of the seminary during the year, \$2,622.40; payments, \$1,625.20. Seven presbyteries were represented in the General Synod. Its next meeting will be held at Pittsburg, Pa.

VI. REFORMED PRESBYTERIANS (Old Side).—The statistical reports show that there are connected with this Church: 1 synod, 9 presbyteries, 221 deacons, 8,385 families, 8,782 communicants, 516 Sabbath-school teachers, and 4,581 Sunday-school scholars. The total contributions of the Church were \$201,534.11; making nearly \$23 for each communicant.

The Reformed Presbyterian Synod (Old Side) met at York, Livingston County, N. Y., May 29th. One hundred and eighteen delegates attended. Nearly all the congregations of the Church had formally ratified the covenant which had been subscribed by the synod at its meeting the previous year in Pittsburg. The synod decided to erect the building for its theological seminary at Wilksburg, Pa. A foreign mission is sustained by this Church in Syria. The reports show that there are connected with it: 9 missionaries and assistants, "15 or 20" native helpers, 82 baptized converts, 4 theological students, and 200 children under instruction.

VII. ASSOCIATE REFORMED SYNOD OF THE SOUTH.—This body has nine presbyteries, and sixty-five ministers, as follows:

Presbyteries.	Ministers.
First.....	16
Second.....	13
Georgia.....	3
Tennessee.....	5
Alabama.....	4
Kentucky.....	2
Memphis.....	10
Virginia.....	3
Arkansas.....	6
Ohio.....	3

The synod met at Pisgah, Gaston County, N. C., on the 12th of September. The congregations were, by vote, allowed to use Rouse's Version of the Psalms, as heretofore, or the revision of that version made by the United Presbyterians, as they should choose. The action of the last synod concerning the property in Kentucky, which had been lost to the synod, through a number of churches in that State joining the Southern Presbyterian Synod, was reaffirmed, and the Presbytery of Kentucky were advised "to prosecute their claims, in a peaceful way, until all reasonable efforts to secure an amicable adjustment of the matter have been exhausted," with the understanding that, "then, if a civil suit should be necessary to secure the property, the synod will sustain the presbytery in the prosecution of the same."

The Theological Seminary and Erskine College, at Due West, S. C., give instruction to a moderate number of students. The effort to raise an endowment of \$100,000 for the lat-

ter institution has met with only partial success.

VIII. CUMBERLAND PRESBYTERIAN CHURCH.—The following is a summary of the latest statistics of this Church: Synods, 24; presbyteries, 103; of these, 29 have made no report. The remaining 74 presbyteries report: Ministers, 842; licentiate, 183; candidates, 161; pastors, 91; supplies, 514; ministers without charge, 228; congregations, 1,509; communicants, 68,996; Sunday-school teachers and scholars, 37,682; contributions—to home missions, \$17,897; to foreign missions, \$1,520; to education, \$17,579; to publication, \$6,791; to church-building and repairing, \$195,081; to presbyterial purposes, \$4,723; to ministers' salaries, \$160,508; to miscellaneous objects, \$10,681; to charity, \$4,188. Adding estimates for the non-reporting presbyteries, there would be in the whole Church, about: ministers, 1,085; congregations, 1,948; communicants, 89,092; persons in Sunday-schools, 48,657; total contributions, \$561,800.

The General Assembly met at Evansville, Ind., May 16th. The Rev. C. H. Bell, D. D., of Mississippi, was elected moderator. A correspondence was submitted which had taken place between the permanent clerk of the General Assembly and prominent members of the Evangelical Union of Scotland. The correspondence included an address from the committee of the Evangelical Union to the General Assembly, in which occurred the remark that "the two bodies are agreed on the great doctrines of fatality and the atonement, and could not differ materially on minor points." Provisions were made for communicating, officially, a response on behalf of the General Assembly to this address.

The receipts of the Board of Missions were \$14,060.10; the further sum of \$10,942.01 had been expended in missionary work not connected with the Board of Missions, making a total of \$24,002.11 spent for missionary purposes. An indebtedness of \$1,500, which existed at the beginning of the year, had been nearly all provided for. The home work of missions had been prosecuted with energy in the central States of the Mississippi Valley, in Colorado, and among the Indians. The establishment of missions among the colored people was recommended. Favorable reports were received from the Cumberland University, McGee College, and Trinity University. A proposition was offered for the establishment of a separate theological seminary; but it was not acted upon. In order the better to secure property held for the Church, weak congregations, about to become extinct, were advised to convey the title to their property through their presbyteries to the General Assembly. No full and accurate report of the statistics of this Church has yet been prepared.

IX. PRESBYTERIAN CHURCHES IN THE BRITISH PROVINCES.—The synod of the *Presbyterian Church of Canada in connection with the*

Church of Scotland met at Kingston, June 5th. The session was much occupied with the discussion of the basis of the projected union with the Canada Presbyterian Church and with the Presbyterian Churches of the Lower Provinces. The committee to whom the subject had been referred made a report of their meetings and conferences, and submitted the basis which had been agreed upon by the joint committee, with the amendments which had been proposed by the Canada Presbyterian Church. The synod first took up the report of the name which was proposed for the church to be formed by the union, and approved as the name "The Presbyterian Church in British America." The "doctrinal basis" offered by the committee was then adopted unanimously. It is as follows:

1. That the Scriptures of the Old and New Testaments, being the Word of God, are the only infallible rule of faith and manners.

2. That the Westminster Confession of Faith shall be the standard of this Church, and that the larger and shorter catechisms shall be adopted by the Church, and appointed to be used for the instruction of the people, it being distinctly understood that nothing contained in the aforesaid confession or catechisms, regarding the power and duty of the civil magistrates, shall be held to sanction any principles or views inconsistent with full liberty of conscience in matters of religion.

3. That the government and worship of this Church shall be in accordance with the recognized principles and practice of the Presbyterian Church, as laid down generally in the form of Presbyterian church government, and in the directory for the public worship of God.

4. That this Church, while entertaining Christian affection toward the whole Church of God, and desiring to hold fraternal intercourse with the several branches as opportunity offers, shall at the same time regard itself as being in such ecclesiastical relations to churches holding the same doctrine, government, and discipline with itself, as that ministers and probationers from these churches shall be received into this Church, subject to such regulations as shall from time to time be adopted.

Some other less important resolutions were adopted, and the Committee on Union were reappointed, with instructions to govern themselves by the conclusions at which the synod had arrived. The revenue of the "Temporalities Board" for the year amounted to \$30,071.25. The amount received from congregations, private contributions, etc., was \$8,970.30. The receipts of the General Board of Sustentation were \$8,900. The funded capital of the Widows and Orphans' Fund amounted to \$67,500, and had yielded a revenue of more than \$4,000. The total revenue of this fund, including congregational collections, was \$7,861.08.

The Synod of the *Canada Presbyterian Church* was formed in 1861, by the union of the bodies in Canada, which represented the Free and the United Presbyterian Churches of Scotland. The General Assembly was formed in 1870, with four distinct synods and one presbytery. The following are the statistics of this Church:

PRESBYTERIES.	Number of Stations supplied.	Ministers on the Roll.	Communicants.
1. Montreal.....	79	34	4,402
2. Ottawa.....	29	16	2,695
3. Brockville.....	13	8	1,245
4. Kingston.....	47	18	1,449
5. Coburg.....	45	17	2,734
6. Ontario.....	33	18	1,332
7. Toronto.....	53	23	4,618
8. Simcoe.....	38	10	1,212
9. Hamilton.....	53	23	4,583
10. Paris.....	23	15	3,209
11. Guelph.....	39	27	5,498
12. London.....	55	27	3,306
13. Chatham.....	33	13	1,706
14. Stratford.....	30	16	2,544
15. Huron.....	49	23	4,243
16. Owen Sound.....	35	8	1,561
17. Durham.....	23	9	1,246
18. Manitoba.....	10	5	210
Total.....	685	307	48,872
Not reported.....	1,400
Totals.....	675	307	49,772

Of the "stations supplied," 615 are classified as "in regular charge," and 70 as "not in regular charge." The members for 43 non-reporting stations are calculated from the reports of previous years and from other data. The number of families connected with the church is 28,564; number of Sunday-school teachers, 3,802; of scholars in Sunday-schools and Bible-classes, 41,590; of missionary associations, 155; of sittings in churches, 128,210. The year's increase in the number of communicants was 1,886. Amount of contributions for congregational purposes, \$398,891.39½; for college fund, \$10,601.17; for home mission fund, \$12,570.97½; for foreign mission fund, \$3,641.57; for widows and orphans' and aged ministers' funds, \$3,144.06; for French evangelization, \$4,652.21; for Kankakee Mission (in Illinois), \$2,741.41½; Sunday-school contributions for missions, \$3,877.44; contributions for benevolent objects not otherwise specified, \$19,504.03. The total contributions for congregational purposes, schemes of the Church, and benevolent objects, were \$473,115.43½. Average stipend of ministers, \$728; average contribution per member for congregational purposes, \$8.38; for missionary and benevolent purposes, \$1.

The General Assembly of the Canada Presbyterian Church met at Hamilton, June 4th. The returns of the vote of the presbyteries, on the question of the approval of the proposed basis of union with the other Presbyterian Churches of British America, showed that six presbyteries had approved *simpliciter* of the basis, eight presbyteries had approved generally of it, but proposed modifications, one presbytery had disapproved of it, and one presbytery had suggested that the consideration of the question be deferred. The four articles proposed as the doctrinal basis of union were then considered. [These articles have been given above in the review of the proceedings of the Synod of the Church in connection with the Church of Scotland.] The Committee on

Union were instructed to endeavor to secure, in addition to these articles, an expression recognizing the Headship of Christ over His Church. A clause, providing for the adjustment of the relations of the literary and theological seminaries in harmony with the plan of union, yet so that they shall preserve their separate existence, government, and functions, was adopted. Another clause in the basis, as presented to the General Assembly, in reference to the endowment of the institutions, was omitted. A declaration was added by the General Assembly expressing opposition to state grants for denominational colleges in the Provinces. The Committee on Home Missions reported that their receipts had been \$14,992.46, and their expenditures, \$15,202.12. One hundred and twenty mission-fields had been supplied, or twenty-six more than had been supplied during the previous year. The mission-stations were growing. The ministers' and orphans' fund amounted to more than \$69,000. The number of annuitants was twenty-one. Knox College reported forty-five students in theology, and twenty-seven in the literary course. Montreal College reported forty-five students.

The Synod of the *Church of Scotland in the Maritime Provinces* of British America met at Charlottetown, Prince Edward Island, June 25th. The subject of union with the Presbyterian Churches of British America was discussed with much interest, upon the presentation of the report of the representatives of the synod in the joint committee which had met at Montreal the previous autumn. The desire for union, *on equal terms*, was expressed by every one who participated in the debate. The committee were reappointed, with instructions to continue the negotiations. The report of the Board of Home Missions showed continued progress. The income for the year was larger than it had been in any previous one. About \$1,600 had been drawn, in the whole synod, from the Colonial Committee. The sum of \$3,000 had been raised within the synod for foreign missions. A fund for the benefit of the widows and orphans of ministers was established, for which \$8,000 are to be raised. The roll of the synod showed a list of forty ministers, and more than forty elders.

The Synod of the *Presbyterian Church in the Lower Provinces of British America* represents the Presbyterian Church in New Brunswick, Nova Scotia, and Prince Edward Island. Its meeting for 1872 was held at Halifax, N. S., during the last week in June. The Committee on Union reported progress in the negotiations. The answers of the several presbyteries and sessions, to the propositions in relation to union which had been submitted to them, were generally favorable to the scheme. The foreign missions of the synod were represented as in a flourishing state. Four ordained missionaries are stationed on the New Hebrides Islands, and two on the island of Trinidad. A fifth mis-

sionary is to be sent to the New Hebrides. The Board of Home Missions presented a full and satisfactory report. The supplement fund was reported as \$2,000 in debt, with but \$300 in the treasury. A scheme for insuring churches, in sums of not more than \$4,000 each, was prepared and approved. The reports of this synod show that there are under its jurisdiction 118 ministers who are pastors, 180 churches, 116 preaching-stations, and about 18,000 communicants.

The United Presbyterians have thirteen congregations in Ontario, and the Covenanters have two small presbyteries in the Lower Provinces of British America.

X. THE CHURCH OF SCOTLAND.—The Assembly of the Established Church of Scotland met at Edinburgh, in the latter part of May. A motion was offered to confer with the other Presbyterian Churches on the subject of union. This gave way to a substitute expressing the willingness of the Assembly to use all means, in Christian association with other Churches, to promote the religious welfare of the nation, together with peace and harmony among the Evangelical churches. The substitute was adopted. The resolutions on the subject of education expressed, as the views of the Assembly, in substance, that the parochial schools should be retained in the hands of the Established Church, with the teaching of the Bible and shorter catechism, and that the teaching in the other public schools should be denominational. The Assembly resolved also to petition Parliament against the educational bill which was presented by the Lord Advocate. The Committee to promote the Repeal of the Patronage Act of Queen Anne was continued. The funds of the mission in India were reported to amount to £11,081, or £4,658 more than the amount reported for the previous year. The sum of £55,038 had been subscribed toward the general fund for the endowment of one hundred churches within the next ten years. The ordinary receipts of the colonial fund were £4,697 3s. 6d.; receipts from legacies, £385 6s. 11d. The income of the Committee on the Conversion of the Jews was £4,928 11s. 11d. Only a small number of conversions had taken place.

XI. THE FREE CHURCH OF SCOTLAND.—The General Assembly of the Free Church of Scotland met at Edinburgh, toward the end of May. The question of union with other Presbyterian Churches excited a lively debate. A number of memorials were presented asking that the negotiations be dropped. A resolution was finally passed which declared that ministers of the several denominations, which are parties to the negotiations for union, shall be eligible to Free-Church pulpits, upon signing the ordination formula, provided the eligibility is made mutual. A resolution was passed to petition Parliament in favor of the school bill proposed by the Lord Advocate, on condition that no limitation is put upon the kind or amount of

religious instruction that may be given in the time set apart for it. In regard to the relations with the Established Church, a resolution was passed declaring—

That the abolition of patronage in the Scotch Establishment would not affect the grounds of separation between it and the Free Church; that the Free Church had hitherto refrained from promoting any public agitation directed against the Established Church, but that the Assembly were satisfied that questions bearing on the future relations between Church and state in Scotland, if once raised, must be determined, not according to the wishes of the courts and people of the Established Church, but in a manner conducive to the religious well-being of the nation, and to the peace and harmony of the Evangelical Churches.

A committee was appointed to give attention to the proceedings which might be taken in this matter. The contributions to the sustentation fund were reported to have been £138,194 16s. 4d. The total income of the Church, for the year, was £432,623, or nearly twenty thousand pounds more than the income of the previous year.

XII. UNITED PRESBYTERIAN CHURCH OF SCOTLAND.—The following are the numerical statistics of this Church:

Number of congregations.....	608
Number of elders.....	4,804
Members in full communion.....	181,496
Average Sabbath attendance.....	206,306
Number of Sunday-school teachers.....	10,574
Number of Sunday-school scholars.....	81,481

The Synod of the United Presbyterian Church of Scotland met at Edinburgh on May 13th; the Committee on Union with other Presbyterian Churches presented a report, recommending that the ministers of the Churches which are parties with this Church to the negotiations for union (the Free Church of Scotland, the Reformed Presbyterian Church, and the English Presbyterian Church) be regarded as eligible to United Presbyterian pulpits upon their signing the ordination formula—*provided* the privilege is made mutual. An overture was received from the United Presbyterian Synod in England asking that a proposition be considered for the immediate union of the latter body with the English Presbyterian Church, without waiting for the consummation of the union movement in Scotland. The synod, in reply, expressed its satisfaction at the increasing desire for union.

The synod adopted a declaration against the provision of religious education in the schools by the state, and gave its approval to the principal object and main provisions of the educational bill proposed by the Lord Advocate for Scotland. It also resolved to petition Parliament for the disestablishment and disendowment of the Established Churches of England and Scotland, and appointed a committee to promote this measure. The total income of this Church for 1871 was £325,176, or £22,034 more than the income of the previous year. The average stipend to each minister was reported to be £210 8s. 6d. This Church supports seven foreign missions. They

are in Jamaica, Trinidad, Old Calabar, Kaffra-ria, and India. The missionary force consists of 63 European and 118 native laborers. The number of mission-stations is 53; of out-stations, 141; of communicants at the mission-stations and out-stations, 6,296; of inquirers, 694; of week-day schools, 158; of pupils, 8,480.

XIII. REFORMED PRESBYTERIAN CHURCH IN SCOTLAND.—The Synod of the Reformed Presbyterians in Scotland met at Glasgow. Resolutions were adopted in favor of carrying on the further negotiations for the union with the non-established Presbyterian Churches in the way recommended by the joint union committee. The minimum stipend of ministers had reached a higher point than it had ever attained before—viz., £125, and a manse, or parsonage, and £145 without a manse. The amount raised within the Church during the year for all purposes was £10,389, or £944 more than the amount raised during the previous year.

The Synod of the Old Cameronians in Scotland numbers about 7,000 communicants. An advance in contributions and a small increase in membership were reported at its meeting. It is claimed for this body that it does more in foreign missionary work, in proportion to its members, than any branch of the Presbyterian Church. At its last meeting it took action condemnatory of the censure which was passed on Mr. George H. Stuart by the Reformed Presbyterian Synod of the United States in 1869.

XIV. THE IRISH PRESBYTERIAN CHURCH.—The General Assembly of the Irish Presbyterian Church met at Belfast in June. Resolutions were adopted expressing the adherence of the General Assembly to the principle of united non-sectarian education, as opposed to the denominational system, and declaring the determination to maintain that principle in its integrity by every means in the power of the Assembly. Satisfactory reports were given of the condition of the sustentation fund. In all, 519 congregations had contributed to the fund. The total amount subscribed was £24,665. The supplementary stipend from the surplus sustentation fund, in addition to the £69 of commutation money, would be £16 to each minister, instead of £10, as in the previous year.

XV. PRESBYTERIAN CHURCHES IN ENGLAND.—The Synod of the English Presbyterian Church met April 15th. The plan for the formation of a sustentation fund, which had been ordered to be prepared by the preceding synod, having been approved by the presbyteries, was adopted by a vote of 117 to 53. The synod's union committee were instructed to enter into immediate negotiations for union between this body and the United Presbyterians and Reformed Presbyterians of England. The proposal of the joint union committee in Scotland, to recognize the mutual

eligibility of the ministers of the negotiating Churches to calls in the English Presbyterian Church, was approved.

On the evening of April 17th, the commencement of Presbyterianism in England, at Wandsworth, in 1572, was celebrated. Visiting delegates representing the Presbyterian Churches of France and Switzerland were present and addressed the synod. The following statistics were presented: Number of churches, 182 or 183; communicants, 24,500; general receipts, £70,000; average amount of stipend, £224.

The *United Presbyterian Synod of England* met at Birkenhead in October. Two days were occupied with the discussion of a proposal for effecting a union with the English Presbyterian Church, without waiting for the accomplishment of the contemplated union by the Churches in Scotland. A wide difference of views regarding the propriety of such a proceeding was exhibited. The synod determined upon the appointment of a committee of ten ministers, and five laymen, who were instructed, "in conjunction with the special committee appointed by the Supreme Synod in Edinburgh in May, to invite conference with the union committee of the English Presbyterian Church, with the view of ascertaining on what terms union with that Church may be effected, and to report to the Supreme Synod at its meeting in May, 1878."

PRISON DISCIPLINE—PRISON CONGRESSES. The question of the best methods of governing and controlling prisoners is one of great importance, and has received the thoughtful consideration of many of the most eminent statesmen and philanthropists of the past hundred years. It involves, in its larger sense—that of the administration of all punishment of crime, short of the death-penalty—three principles, all of them of great importance, viz.: 1. The removal of the offender from a position or condition where he can commit crime, and the consequent relief and protection of society. 2. The reformation of the offender, and his subsequent possible restoration to society as an honest and worthy citizen. 3. The necessity of deterring others from the commission of the same or similar crimes, by its certainty, promptness, and suitable severity. Imprisonment is the means now universally adopted throughout Christendom for the accomplishment of these results. In former times, the prison was, for the most part, only a place of detention; and though often grievous sufferings, and sometimes death, were inflicted by imprisonment, this was not intentional. The gallows, the headman's block, the guillotine, the stake, or some other still more hideous form of inflicting the death-penalty, were the appointed retribution for all the greater, and some of the lesser, crimes; while, for those more venial, the pillory, the stocks, the whipping-post, or, in more cruel ages, the various forms of torture, scourging,

the bastinado, cropping, branding, putting out the eyes, cutting off the hand, etc., were the approved penalties. The prison was reserved for two classes—political prisoners whose offences did not quite justify the infliction of the death-penalty, and unfortunate debtors. For the political prisoners there were sometimes *oubliettes*, or bottle-shaped dungeons, where, without ventilation, and with scanty and unfrequent food, they were suffered to perish by starvation and suffocation, forgotten, it was pretended, by their jailers. It is now (1873) just a hundred years since the first efforts were made in England by John Howard to improve the character and management of prisons in Great Britain. About the same time the works of Beccaria appeared on the Continent, and Howard was reinforced by the powerful assistance of Sir William Blackstone, Jeremy Bentham, and Sir Frederick Eden. But the abuses were slow of correction; and, notwithstanding the noble and self-sacrificing labors of Howard, and, in the early part of the present century, Mrs. Elizabeth Fry and others, the condition of the prisons in England in 1818 was very little better than in Howard's time, forty-five years before. Mr. (afterward Sir) Thomas Fowell Buxton then commenced agitation for a reform in the management of prisons, which, after twenty-four years of incessant labor, accomplished greatly beneficent results. For many years, however, the British Government resorted to transportation as an alternative for imprisonment—a measure which, however beneficial it may have been to the finances of the mother-country, and perhaps advantageous in reforming some of the criminals transported, was so grossly unjust to the colonies, and so prejudicial to their interests, that it was finally abandoned. There are now penal establishments on the Andaman Islands, in the Bay of Bengal, where are gathered all the criminals under life-sentence from British India. The prison-discipline of Great Britain and Ireland is now conducted on a mixed or eclectic system. The prisoner at first undergoes solitary confinement, with hard labor, at one of the solitary prisons, seeing only the warder or superintendent, the chaplain, etc. This is continued for a longer or shorter time, according to the length of his sentence, but may be materially shortened by his own good conduct. He is next taken to some one of the congregated prisons, where he is allowed to work at farm-labor, quarrying, or at some trade, if he has one, either in the open air or in a large room, but at first remanded to a separate cell at night. By good conduct he can receive merit-marks, which will entitle him to further privileges, of instruction, the acquisition of a trade, gratuities for overwork or good conduct, etc., etc. He is eventually allowed to sleep in a dormitory with other well-behaved convicts; and finally, some time before the expiration of his sentence, is permitted to go out on what

is called a "ticket of leave," being still under the surveillance of the authorities, who do not, however, molest him if he endeavors to obtain an honest livelihood, and behaves with propriety. Many of this class emigrate, and become in a new country honorable and reputable men.

In the United States, the first efforts toward the improvement of our State or convict prisons were made in Philadelphia, in 1787, by the Society of Friends. There resulted from these efforts the erection of a prison, nominally of separate confinement, with steady labor, but so imperfectly was the system carried out that the prisoners found ways and means of communicating with each other constantly. The first impulse to remedy this was by solitary confinement *without labor*, and this was tried at Auburn, N. Y., in 1821-'22, and subsequently in Maine, New Jersey, and Virginia. A short experience demonstrated that either the health, the reason, or the moral nature of the convict was speedily ruined by this system, and it gave place everywhere, except in Pennsylvania, to the *Auburn, silent*, or, as perhaps it is more appropriately called, the *congregate* system. The peculiarity of this system is, that the convicts work in association, congregated in squads in their several work-rooms, but sleep and, in most cases, eat in their separate cells. They are required to preserve silence and to refrain from any communication with each other at their work, but in reality there is pretty free communication. In a few instances, the State furnishes employment, and reaps the advantage of it: in most cases, the labor of the convicts is farmed out to contractors, to the disadvantage both of the State and the prisoners. In two States (Kentucky and Illinois) the prison and prisoners are leased on five-year terms to the warden, who pays a stipulated sum to the State, and makes what he can from the prisoners. In Pennsylvania, a new penitentiary was built in Pittsburgh, in 1826, and another in Philadelphia, in 1829, for the more effectual trial of the separate or solitary system, with labor, and these prisons are still conducted on this system, though it has been abandoned everywhere else in the United States. The State-prisons are all of them far enough from being model institutions, but they are much better managed than the county prisons or jails; and these, in their turn, are greatly superior to the municipal prisons, tombs, station-houses, houses of detention, calabozos, lockups, etc., of our cities and larger towns, which are, almost without exception, disgraceful to humanity.

Several institutions or associations have been engaged, for many years past, in endeavoring to ameliorate the condition of prisoners, and improve the management of the prisons. The oldest of these is the Philadelphia Society for alleviating the Miseries of Public Prisons, founded in 1787, which has accomplished

much good, though less than it would have done but for its strongly partisan advocacy of the "separate" system. The Boston Prison Discipline Society, founded in 1826, is liable to the same censure for its activity in support of the Auburn or "congregate" system. The New York Prison Association, founded in 1844, has been more efficient than either, and has accomplished very much in improving the character of the prisons, both of New York and other States. Having a semi-official character and authority, it has inspected the county, municipal, and State prisons of New York every year, and has done what it could for their improvement. In 1866 it sent out a delegation composed of its then corresponding secretary, Rev. E. C. Wines, D. D., and Prof. Theodore W. Dwight, LL. D., to visit all the prisons and reformatories of the United States and Canada, and report upon them. They actually visited the prisons and reformatories of eighteen States and the Dominion of Canada, and their report was exhaustive, and of very great interest and value. This tour of exploration led to the calling of a prison congress, at Cincinnati, in 1870, at the instance of Rev. Dr. Wines, and eventually to the organization of a National Prison Association, of which he became corresponding secretary. In 1871 Dr. Wines commenced a movement for the assembling of an international penitentiary congress, to be held, in London, in September, 1872, and commissioners were appointed to it by the President, and by the Governors of many of the States, as well as by national and other prison associations. This congress met at the time appointed, and its doings and results were thus summarized by Dr. Wines in his preliminary report to President Grant:

This movement, inaugurated by the United States, has proved a complete success, and is destined to produce results as wide as they will be beneficent. More than twenty nationalities were officially represented in the congress by the delegates named by their respective governments, and fully one-half of the States of the American Union were there through commissioners appointed by their several executives under legislative authority. Besides the official delegates, a large number of commissioners, from many different countries, were present, under appointments from national committees, from boards of directors of prisons and reformatories, from prison societies, from special commissions on penitentiary reform, from societies of jurists, from the law departments of universities, and from the Institute of France, which deputed three of its members to represent that illustrious body of *savants* in the congress. Most of the governments represented in the congress forwarded official reports on the prison system and administrations of their respective countries, in reply to a series of interrogatories prepared and previously submitted to them. These reports embody a larger amount of information on the penitentiary question than has ever heretofore been collected. Information of the highest value and most authentic form, questions of the greatest interest and importance connected with the organization and management of prisons, came before the congress, and were discussed with a broad comprehension of their bearings, and with signal ability, as well as in the best

possible temper. These discussions at the same time supplemented by large additions the information furnished by official reports mentioned in the preceding paragraph. It was not to be expected that a body, coming together literally from the ends of the earth—for the remotest states of South America and the most distant of the British colonies were represented in the congress—could deliberate upon social problems so profound and recondite as those which fall within the purview of penitentiary science, without developing wide differences of opinion, and with a result most remarkable, and as gratifying as it was extraordinary. It was able in the end to agree, and did agree, with scarcely a dissenting vote, upon a declaration of principles, at once comprehensive and fundamental, relating to prison reform and prison discipline. One of the most important results of the Congress of London was the creation of a permanent international committee on penitentiary reform, composed of ten members from as many different nations, including the United States. This committee will hold annual sessions in different countries, and another general congress will probably be called in the course of three or four years, thus giving a character of periodicity to these international reunions, and making of them a regular institution. Dr. Wines is the chairman of this committee, which is to hold its first session at Brussels, in September, 1878.

It should be said that the Prison Congress at Cincinnati, in October, 1870, was, to a considerable extent, international in its character; papers being communicated to it from the manager of the Port Blair Penal Settlement, on Andaman's Island, already referred to, giving an account of that immense establishment, with its nearly 8,000 prisoners; from Miss Mary Carpenter, of Bristol, England, author of "Our Convicts;" from M. Bonneville de Marsangy, a Councillor of the State Imperial Court of Paris, giving an account of his ingenious "Criminal Register," and from other distinguished publicists and philanthropists abroad. Gaylord B. Hubbell, a former warden of Sing Sing Prison, and one of the very best prison-officers in the United States, in an address delivered at this congress, thus portrayed his idea of a model prison:

We will picture to ourselves a neat, plain edifice, built on a dry soil, somewhat elevated, having the means of perfect drainage, an abundant supply of pure water, and supplied with all needful appliances for thorough reformatory work. We will have our arrangements for classification, labor, discipline, rewards, promotions, trades, school-rooms, chapel, lecture-room, and library stocked with useful and entertaining books. Our board of managers is selected from the best men of the State, whose hearts are in the work. Our warden is a man of experience, integrity, humanity, judgment, and firmness. Our clerk is sober, honest, and capable. Our medical officer is kind, gentle, and skilful. Our chaplain is a man of deep-toned piety, and apt to teach, with his whole being absorbed in his work. The corps of assistants is composed of men carefully selected and intelligently and faithfully devoted to their work. And last, not least, our school-master is one of those large-hearted, patient, unselfish, sympathetic men hard to find, but we have found him. Our whole band of officers work so harmoniously together for the reformation of the prisoners that the most ignorant and degraded feel that they have their best welfare at heart. With such forces in operation success is assured, failure impossible. The prisoners must share in their earnings. They must be taught some

useful trade or business. The lectures delivered to them must have a practical bearing. The prisoners must be allowed some liberty in their choice of employment: nothing will tend more than this to develop manhood. When the work of reformation is completed, we will have a well-organized band of Christian men and women to care for the prisoner, shield him from the too violent assaults of temptation, find work for him, and, in every possible way, surround him with good influences. Who can doubt the result under such a system of training and caretaking?

PROTESTANT EPISCOPAL CHURCH.

The general statistics of this Church, in 1872, were as follows:

Dioceses.....	41
Missionary jurisdictions.....	9
Bishops.....	51
Priests and deacons.....	2,505
Whole number of clergy.....	2,505
Parishes, about.....	2,700
Ordinations—Deacons in thirty-three dioceses and one missionary jurisdiction..	123
Priests in thirty dioceses and two missionary jurisdictions.....	60
Total in thirty-six dioceses and two missionary jurisdictions.....	213
Candidates for orders in thirty-one dioceses and two missionary jurisdictions.....	217
Churches consecrated in twenty dioceses and one missionary jurisdiction.....	12
Baptisms—Infants in thirty-two dioceses and five missionary jurisdictions.....	25,599
Adults in thirty-two dioceses and five missionary jurisdictions.....	6,059
Not specified in four dioceses.....	4,369
Total in forty-one dioceses and nine missionary jurisdictions.....	35,739
Confirmations in thirty-nine dioceses and five missionary jurisdictions.....	22,127
Communicants—Number reported in forty-one dioceses and seven missionary jurisdictions.....	247,863
Marriages in thirty-six dioceses and five missionary jurisdictions.....	10,120
Burials in thirty-six dioceses and five missionary jurisdictions.....	18,222
Sunday-school teachers in thirty-seven dioceses and eight missionary jurisdictions.....	25,051
Scholars in forty-one dioceses and eight missionary jurisdictions.....	222,073
Contributions in forty-one dioceses and nine missionary jurisdictions.....	\$6,512,360.40

A special meeting of the Board of Bishops was held on the 31st of October and the 1st of November, for the purpose of electing a missionary bishop of Cape Palmas, Africa, to fill the vacancy caused by the resignation of Bishop Paine, and a bishop of the new Diocese of Niobrara, who should have supervision of the missionary labors among the Indians. The Rev. J. G. Auer, missionary at Cavalla, Africa, was elected to the former station, and the Rev. J. William H. Hare was elected bishop over the work among the Indians.

An application was received at this meeting of the Board of Bishops from a number of ministers of the German Evangelical Church in the West, asking that a German-speaking bishop be elected, who should have diocesan care of German ministers and congregations desiring to become connected with the Protestant Episcopal Church. The petition was referred to a committee of five members of the House of Bishops, who were instructed to make a reply to it, expressing the profound interest felt by the Board of Bishops in the suggestions,

and that the German brethren might for the present avail themselves of the Episcopal services of the newly-elected Bishop Auer, who is of German birth and education, and was expected soon to arrive in the United States.

The following table gives the number of clergymen, parishes, baptisms, communicants, teachers and scholars of Sunday-schools, and the amount of missionary and charitable contributions for each diocese:

No.	DIOCESES AND MISSIONS.	Clergy.	Parishes.	Baptisms.	Communi- cants.	SUNDAY-SCHOOLS.		Contributions.
						Teachers.	Scholars.	
1	Alabama	80	42	391	3,046	273	1,943	\$66,690 47

The anniversary meetings of the Board of Missions were held in the last week in October. The Domestic Committee reported that their receipts to the 30th of September had been \$168,252.67, and their disbursements \$158,821.67. The permanent fund amounted to \$16,000. The liabilities of the committee were \$24,394.77. The sum of \$21,249 had been gathered by means of "mite-chests." The receipts of the Foreign Committee for the year ending October 1st were \$110,732.81, and their expenditures \$115,270.62. The legacies amounted to \$17,594. The amount received from "missionary-boxes" was \$6,934.44, and the amount received from the children of the Church and Sunday-school collections was \$12,638.53. One thousand and sixty-three parishes had contributed to the Foreign Com-

mittee. Encouraging accounts of the missionary work in their several dioceses were given in the reports of the missionary bishops of Nebraska, Colorado, Montana, Dakota, and Oregon.

The foreign missions of the Board are in Africa, China, Hayti, Greece, and Japan. The entire number of missionaries is sixty-two, of whom thirty-five are employed in Africa, nineteen in China, six in Hayti, one in Greece, and one in Japan. Two clergymen were under appointment as missionaries to Japan, and were expected to sail early in December. Bishop Williams had translated the four Gospels and the Prayer-book into the Japanese language.

The receipts of the American Church Missionary Society, for the year ending November 1, 1872, were \$53,938.65. Its expenditures

were \$48,464.35. Fifty missionaries had been in commission during the year. The number of missionaries in the field at the time of making up the report was forty-four. Early in the year the Executive Committee received a communication from the Protestant Episcopal Board of Missions, bearing the date of October 20, 1871, which proposed that the Church Missionary Society terminate its existence and unite again with the Board of Missions in the prosecution of missionary work; or, in case such a step should be impossible, that the society assume the relation of an auxiliary to the Board of Missions, according to one of the provisions of the constitution of the latter organization. "After mature consultation and deliberation," the committee, in their report to the society, "came to the conclusion that neither proposition could be accepted, and therefore were compelled to decline the invitation of the Board." This society coöperates with the Mexican Missionary Association in Mexico. It supports one missionary in Costa Rica. Its other missionaries labor in various parts of the United States.

The receipts of the Evangelical Educational Society, for the year ending November 1, 1872, were \$40,008.27, being more than for any previous year. During the year \$6,500 were added to the endowment fund, making the entire amount \$11,500. The expenditures of the so-

cietiy were \$28,115.82. One hundred and four students were aided and supported. The society has ordained, during the six years of its existence, 122 men.

The receipts of the Protestant Episcopal Society for the Promotion of Evangelical Knowledge, for the year ending September 30, 1872, were \$43,088.02; the expenditures were \$42,598.06. The society has an invested legacy fund which amounts to \$49,885.96. Grants were made during the year to the amount of \$20,000.

The receipts of the Society for the Increase of the Ministry, for the year ending September 1, 1872, were \$28,928.83. Its expenditures were \$40,199.05. Contributions were received from twenty-eight States and Territories, and thirty-five dioceses. One hundred and seventy-six scholars were aided, making the entire number who have been helped to the ministry, through the society since its institution, 650.

PRUSSIA, a kingdom of Europe, forming part of the German Empire. King, William I., German Emperor, and King of Prussia (*see* GERMANY). On December 3, 1871, a new census was taken in Prussia as well as in all the other States belonging to Germany. The area and population of the provinces and districts into which Prussia is divided were, according to the new census, as follows:

PROVINCES.		Square miles.	Population in 1871.
I. PRUSSIA.			
Dist.			
1. Gumbinnen.....	6,809	748,485	
2. Königsberg.....	8,816	1,079,784

Grand total.....	135,987	34,693,066	

According to the budget for the year 1872, the revenue was as follows:

	Thalers.
1. Ministry of Finance.....	192,374,994
2. " of Commerce and Industry.....	67,534,058
3. " of State.....	56,219
4. " of Justice.....	12,988,400
5. " of Interior.....	980,266
6. " of Agriculture.....	1,008,510
7. " of Worship, Instruction, and Medical Affairs.....	111,789
From the Hohenzollern districts.....	164,800
Grand total of revenue.....	187,056,940

The expenditures summed up as follows:

EXPENDITURES.	Ordinary.	Extraordinary.
	Thalers.	Thalers.
Charges on tax-levy and other branches of revenue	64,887,719
Dotations, interest on public debt, and expenses of both Houses of Deputies.....	10
Ministry of State.....	85	40,000
" of Foreign Affairs.....	60
" of Finance.....	88	2,161,430
" of Commerce.....	44	6,899,000
" of Justice.....	55	628,000
" of the Interior.....	18	478,948
" of Agriculture.....	58	446,401
" of Worship, Instruction, and Medical Affairs.....	7,930,469	2,089,401
Administration of Hohenzollern.....	225,922	20,239
Total	174,333,551	12,795,389
Total expenditure.....		187,056,940
Total revenue		187,056,940

The interest-bearing public debt amounted to 428,639,420 thalers; the non-interest-bearing debt to 20,930,403 thalers; the debt in rentes to a capital of 7,527,000 thalers: making a total of 427,096,823 thalers.

The most important subject which engaged the attention of the Prussian Diet, on the opening of the year 1872, was a law on the inspection of public schools. Heretofore, the clergymen of the Evangelical and the Roman Catholic Churches had been, according to Prussian law, the superiors of the primary schools, most of which had a denominational character, and the inspectors were, therefore, chosen by the Government exclusively from among the clergy of the two state Churches. In consequence of the differences which in 1871 had arisen between the Government and the Roman Catholic Church, the Government was anxious to change the law so as to be at liberty to appoint, if necessary, laymen as inspectors. Soon after the opening of the Diet, in October, 1871, the Minister of Instruction, Von Mähler, introduced a bill which declared that the state possessed the right of superintendence over all public and private schools and educational institutions, and that it alone had the right of appointing the inspectors, and of repealing at any time the appointments which had been made. The project of the Government called forth the unanimous protest of the Catholic bishops; and, among the orthodox portion of the Evangelical state Church likewise, an animated opposition to the proposed bill showed itself. The Minister, Von Mähler, who personally sympathized more

with the churches than with the liberal reforms which he had to advocate, and who of all the members of the Prussian ministry was the most unpopular, resigned on January 12th, and was succeeded by Dr. Falk, who was known to be an earnest advocate of liberal reforms. After violent debates, the Government bill was adopted by the House of Deputies by 207 against 171 votes. The Upper House seemed to be determined to reject the bill, but when the Government strongly indicated its purpose to carry it through, and threatened the Upper House with the creation of a sufficiently large number of members to overcome all opposition, the bill was passed on March 8, 1872, by the unexpectedly large majority of 125 against 76.

Besides this bill on the inspection of public schools, it was the proposed *Kreisordnung*, or the new law on the administration of the circles into which the Prussian provinces are divided, which was the subject of violent party strife. On this question also, the Government sided with the Liberal party, while the Opposition consisted of the Ultra-conservatives and the Catholics. On March 21st, the Government bill, which greatly reduces the former privileges of the feudal aristocracy in the administration of the circles, was adopted by a vote of 236 against 61. The Upper House appeared to be almost unanimous in its opposition to the bill, and, when the spring session of the Diet was closed, there was no prospect of the Government being able to secure a majority in the Upper House.

The autumnal session of the Prussian Chambers was opened on October 22d. In the Upper House 167 members were present. On proceeding with the election of a President, Count Otto von Stolberg, a Liberal Conservative, received 84 votes, and Prince Putbus, a staunch Conservative, 81 votes. The House then began to debate the *Kreisordnung* Bill. The Minister of the Interior, Count Eulenburg, stated that the idea of reforming the administration of the circles by means of provincial legislation was antiquated and impracticable. Feudal estates were nowadays impossible, and the Government could not turn a deaf ear to the cry which had made itself heard among the people for self-government. The introduction of self-government was to transmit to the citizens the general obligation to render services to the country, as was already the case in regard to military matters, and which had made Prussia great. This general obligation to national service was the watchword of the Government, which he begged the House also to accept. The Upper House concluded, however, to persist in an uncompromising resistance to the projects of the Government. On October 31st, the Minister of the Interior, Count Eulenburg, stated that the King was fully convinced of the imperative necessity for passing the bill, and that the Government would immediately close the session in case the Upper House should throw out the measure.

A new session would then at once be convoked, and the Kreisordnung Reform Bill would be the first measure brought forward in it by the Government, which would employ all constitutional means to carry it. Notwithstanding Count Eulenburg's announcement, the bill was rejected by 145 votes against 18. On November 1st, General von Roon, Minister of War, read before the Chambers a message from the King of Prussia, proroguing the session of the Landtag. On the same day, the *Official Gazette* promulgated a royal decree, convoking both Houses of the Prussian Diet for November 12th. On November 6th, the semi-official *Provincial Press* announced that the Government, while essentially maintaining the basis of the Kreisordnung Bill, was engaged in remodelling some of its provisions, the practical application of which might be open to objection. The bill would then first be brought again before the Lower House, which it was hoped would pass the measure in its amended form with the least possible delay. During that time, steps would have been taken for insuring the passing of the measure in the Upper House. The King was fully prepared for, and had decided upon, the measures which might be necessary for the passing of the bill.

On November 12th, the session of the Prussian Landtag, which was prorogued at the close of October, was reopened. The King was not present, but the speech from the throne was read by a cabinet minister. It was brief, and to the purpose. A reduction of the income-tax was promised. The relations of the state to the religious societies were alluded to as a subject for legislation. The speech states that the Country Reform Bill would again be submitted, slightly amended, and the necessity and expediency of the measure were demonstrated. The speech concluded with a declaration that the Government was firmly resolved to carry out its intention of improving the local administration of the kingdom, and would avail itself of all the constitutional means at its disposal to effect the object. The Upper House subsequently proceeded to choose a President, and elected Baron Stolberg, a friend of the Government. Only six votes were cast against him. To break the opposition of the Upper House, the Government was not only resolved to create a sufficiently large number of new peers, to secure a majority in the House, but it was even intimated that the Upper House might be entirely reconstructed on a more liberal basis. However, in order to spare, as much as possible, the sensibilities of the landed aristocracy, they concluded to make to them some concessions. The bill was for the first time read in the Chamber of Deputies on November 20th. The Minister of the Interior stated that the reforms contemplated in the bill would not be extended to Posen, because that province was not ripe for them, and had not been dutiful in its conduct toward the Government. The minister concluded by ask-

ing that all the amendments should be withdrawn, and that the compromise offered by the Government should be accepted. The Chamber almost unanimously resolved not to refer the bill back to the committee, but to proceed to the second reading at a full sitting of the House. In accordance with the wish of the Government, the Chamber, by a large majority, rejected the amendments proposed by the Progress party and the Conservatives, and on November 26th passed the entire bill, as framed by the Government, by 288 against 91 votes. The Polish members, the majority of the Centre (Catholic party), and a small portion of the Conservative party, voted against the measure. In view of the determined attitude of the Government, which actually created twenty-five new peers, the Upper House, on December 9th, passed the bill as it had come up from the Lower House.

By a royal decree of December 21, 1872, Prince Bismarck was relieved from the position of President of the Prussian Ministry. A few days later, the Minister of War, Count Roon, was appointed Prime-Minister. Although Count Roon announced that the policy to be pursued by him would not differ from that of Count Bismarck, who remained Chancellor of the German Empire, it was a general belief that Count Roon would be more disposed than Bismarck to conciliate the Ultra-conservatives.

PRUTZ, ROBERT ERNEST, a German poet, historian, and novelist, born at Stettin, May 30, 1816; died there, June 21, 1872. Receiving his early education in Stettin, he studied philosophy at Berlin, Breslau, and Halle, and in 1838 took his degree as Doctor in Philosophy, and soon after entered upon a literary career as assistant-editor of the revolutionary paper, the *Hallische Jahrbucher*. His boldness as a liberal writer caused him to be under the constant surveillance of the police, who gave him no rest. Between 1840 and 1847 he lived successively in Dresden, Jena, Halle, Berlin, and Hamburg. He was finally arrested for publishing a stirring poem entitled "What a King!" After a short period of imprisonment he was liberated by the Prussian Government, but ordered to remain in Halle. Here he wrote several of his best works. During the Revolution of 1848 he was in Berlin, and exerted a powerful influence, as leader of the moderate wing of the democratic party. When the reaction took place, he returned to Stettin, where he met and became acquainted with Bismarck, who, in spite of his past revolutionary record, obtained for him, in 1850, the professorship of History and Literature in the University of Halle. His lectures were largely attended, and added to the reputation of the university until 1859, when he was compelled to resign in consequence of ill health, and returned once more to Stettin, where he gave courses of free lectures on history and literature, which were very popular. But the old democratic fires were not yet

burned out. In 1867 he published two poems, "May, 1866," and "July, 1866," for the first of which he was arrested and punished with a month's imprisonment, in consequence of the severity of its personal reflections on the King. He did not again offend, but retired to private life at Stettin, where his failing health soon prevented his further appearance in public. Herr Prutz was a very popular and prolific writer. His earliest work was "The Poets of Göttingen," 1841; this was followed by a volume of his own "Poems," 1844; "History of German Journalism," 1845; "Political Essays," 1845; "History of the German Theatre," 1847; "German Contemporary Literature," 1847; "Political and Literary Miscellanies," 2 vols., 1847; "Dramatic Works," 4 vols., 1847-'49; "New Poems," 1849; "History of Ten Years," 1840-'50; "The Beautiful Sister," a novel, 1851; "The Little Angel," 3 vols., 1851; "Felix," 2 vols., 1851; and the two poems we have already mentioned.

PUBLIC DOCUMENTS. *Message of President GRANT at the commencement of the third session of the Forty-second Congress, December 2, 1872.*

To the Senate and House of Representatives:

In transmitting to you this, my fourth annual message, it is with thankfulness to the Giver of all good that, as a nation, we have been blessed for the past year with peace at home, peace abroad, and a general prosperity vouchsafed to but few peoples.

With the exception of the recent devastating fire which swept from the earth with a breath, as it were, millions of accumulated wealth in the city of Boston, there has been no overshadowing calamity within the year to record. It is gratifying to note how, like their fellow-citizens of the city of Chicago, under similar circumstances a year earlier, the citizens of Boston are rallying under their misfortunes, and the prospect that their energy and perseverance will overcome all obstacles, and show the same prosperity soon that they would had no disaster befallen them. Otherwise we have been free from pestilence, war, and calamities, which often overtake nations; and, as far as human judgment can penetrate the future, no cause seems to exist to threaten our present peace.

When Congress adjourned in June last, a question had been raised by Great Britain, and was then pending, which for a time seriously imperilled the settlement by friendly arbitration of the grave differences between this Government and that of her Britannic Majesty, which by the Treaty of Washington had been referred to the tribunal of arbitration which met at Geneva, in Switzerland.

The arbitrators, however, disposed of the question which had jeopardized the whole of the treaty, and threatened to involve the two nations in most unhappy relations toward each other, in a manner entirely satisfactory to this Government, and in accordance with the views and the policy which it had maintained.

The tribunal, which had convened at Geneva in December, concluded its laborious session on the 14th day of September last, on which day having availed itself of the discretionary power given to it by the treaty to award a sum in gross, it made its decision, whereby it awarded the sum of \$15,500,000 in gold, as the indemnity to be paid by Great Britain to the United States for the satisfaction of all the claims referred to its consideration.

This decision happily disposes of a long-standing difference between the two Governments, and, in connection with another award made by the German

Emperor, under a reference to him by the same treaty, leaves these two Governments without a shadow upon the friendly relations which it is my sincere hope may forever remain equally unclouded.

The report of the agent of the United States appointed to attend the Geneva tribunal, accompanied by the protocols of the proceedings of the arbitrators, the arguments of the counsel of both Governments, the award of the tribunal, and the opinions given by the several arbitrators, is transmitted herewith.

I have caused to be communicated, to the heads of the three friendly powers who complied with the joint request made to them under the treaty, the thanks of this Government for the appointment of arbitrators made by them respectively, and also my thanks to the eminent personages named by them, and my appreciation of the dignity, patience, impartiality, and great ability with which they discharged their arduous and high functions.

Her Majesty's Government has communicated to me the appreciation by her Majesty of the ability and indefatigable industry displayed by Mr. Adams, the arbitrator named on the part of this Government, during the protracted inquiries and discussions of the tribunal. I cordially unite with her Majesty in this appreciation.

It is due to the agent of the United States before the tribunal to record my high appreciation of the marked ability, unwearied patience, and the prudence and discretion with which he has conducted the very responsible and delicate duties committed to him, as it is also due to the learned and eminent counsel who attended the tribunal on the part of this Government, to express my sense of the talents and wisdom which they brought to bear in the attainment of the result so happily reached.

It will be the province of Congress to provide for the distribution, among those who may be entitled to it, of their respective shares of the money to be paid. Although the sum awarded is not payable until a year from the date of the award, it is deemed advisable that no time be lost in making a proper examination of the several cases in which indemnification may be due. I consequently recommend the creation of a board of commissioners for the purpose.

By the thirty-fourth article of the Treaty of Washington, the respective claims of the United States and of Great Britain, in their construction of the treaty of June 15, 1846, defining the boundary-line between their respective territories, were submitted to the arbitration and award of his Majesty the Emperor of Germany, to decide which of those claims is more in accordance with the true interpretation of the treaty of 1846.

His Majesty the Emperor of Germany, having been pleased to undertake the arbitration, has the earnest thanks of this Government and of the people of the United States for the labor, pains, and care, which he has devoted to the consideration of this long-pending difference. I have caused an expression of my thanks to be communicated to his Majesty. Mr. Bancroft, the representative of this Government at Berlin, conducted the case, and prepared the statement on the part of the United States, with the ability that his past services justified the public in expecting at his hands. As a member of the Cabinet at the date of the treaty which has given rise to the discussion between the two Governments, as the minister to Great Britain when the construction now pronounced unfounded was first advanced, and as the agent and representative of the Government to present the case and to receive the award, he has been associated with the question in all of its phases, and in every stage has manifested a patriotic zeal and earnestness in maintenance of the claim of the United States. He is entitled to much credit for the success which has attended the submission.

After a patient investigation of the case and of the statements of each party, his Majesty the Emperor, on the 21st day of October last, signed his award in

writing, decreeing that the claim of the Government of the United States, that the boundary-line between the territories of her Britannic Majesty and the United States should be drawn through the Haro Channel, is most in accordance with the true interpretation of the treaty concluded on June 15, 1846, between the Governments of her Britannic Majesty and of the United States.

Copies of the "case" presented on behalf of each Government, and of the "statement in reply" of each, and a translation of the award, are transmitted herewith.

This award confirms the United States in their claim to the important archipelago of islands lying between the continent and Vancouver's Island, which for more than twenty-six years (ever since the ratification of the treaty) Great Britain has contested, and leaves us, for the first time in the history of the United States as a nation, without a question of disputed boundary between our territory and the possessions of Great Britain on this continent.

It is my grateful duty to acknowledge the prompt, spontaneous action of her Majesty's Government in giving effect to the award. In anticipation of any request from this Government, and before the reception in the United States of the award signed by the Emperor, her Majesty had given instructions for the removal of her troops which had been stationed there, and for the cessation of all exercise or claim of jurisdiction, so as to leave the United States in the exclusive possession of the lately-disputed territory. I am gratified to be able to announce that the orders for the removal of the troops have been executed, and that the military joint occupation of San Juan has ceased. The islands are now in the exclusive possession of the United States.

It now becomes necessary to complete the survey and determination of that portion of the boundary-line (through the Haro Channel) upon which the commission which determined the remaining part of the line were unable to agree. I recommend the appointment of a commission to act jointly with one which may be named by her Majesty for that purpose.

Experience of the difficulties attending the determination of our admitted line of boundary, after the occupation of the territory, and its settlement by those owing allegiance to the respective Governments, points to the importance of establishing, by natural objects or other monuments, the actual line between the territory acquired by purchase from Russia, and the adjoining possessions of her Britannic Majesty. The region is now so sparsely occupied that no conflicting interests of individuals or of jurisdiction are likely to interfere to the delay or embarrassment of the actual location of the line. If deferred until population shall enter and occupy the territory, some trivial contest of neighbors may again array the two Governments in antagonism. I therefore recommend the appointment of a commission, to act jointly with one that may be appointed on the part of Great Britain, to determine the line between our Territory of Alaska and the conterminous possessions of Great Britain.

In my last annual message I recommended the legislation necessary on the part of the United States to bring into operation the articles of the Treaty of Washington, of May 8, 1871, relating to the fisheries, and to other matters touching the relations of the United States toward the British North American possessions, to become operative so soon as the proper legislation should be had on the part of Great Britain and its possessions.

That legislation on the part of Great Britain and its possessions had not then been had, and during the session of Congress a question was raised which for the time raised a doubt whether any action by Congress in the direction indicated would become important. This question has since been disposed of, and I have received notice that the Imperial Parliament and the Legislatures of the provincial Gov-

ernments have passed laws to carry the provisions of the treaty on the matters referred to into operation. I therefore recommend your early adoption of the legislation in the same direction necessary on the part of this Government.

The joint commission for determining the boundary-line between the United States and the British possessions, between the Lake of the Woods and the Rocky Mountains, has organized and entered upon its work. It is desirable that the force be increased in order that the completion of the survey and determination of the line may be the sooner attained. To this end I recommend that a sufficient appropriation be made.

With France, our earliest ally, Russia, the constant and steady friend of the United States, Germany, with whose Government and people we have so many causes of friendship and so many common sympathies, and the other powers of Europe, our relations are maintained on the most friendly terms.

Since my last annual message the exchange has been made of the ratification of a treaty with the Austro-Hungarian Empire, relating to naturalization; also of a treaty with the German Empire respecting consuls and trade-marks; also of a treaty with Sweden and Norway, relating to naturalization; all of which treaties have been duly proclaimed.

Congress, at its last session, having made an appropriation to defray the expense of the commissions on the part of the United States to the International Statistical Congress at St. Petersburg, the persons appointed in that character proceeded to their destination, and attended the sessions of the congress. Their report will in due season be laid before you. This congress meets at intervals of about three years, and has held its sessions in several of the countries of Europe. I submit to your consideration the propriety of extending an invitation to the congress to hold its next meeting in the United States. The centennial celebration, to be held in 1876, would afford an appropriate occasion for such meeting.

Preparations are making for an international exposition, to be held during the next year at Vienna, on a scale of very great magnitude. The tendency of these expositions is in the direction of advanced civilization, and of the elevation of industry and of labor, and of the increase of human happiness, as well as of greater intercourse and good-will between nations. As this exposition is to be the first which will have been held in Eastern Europe, it is believed that American inventors and manufacturers will be ready to avail themselves of the opportunity for the presentation of their productions, if encouraged by proper aid and protection.

At the last session of Congress authority was given for the appointment of one or more agents to represent this Government at the exposition. The authority thus given has been exercised; but, in the absence of any appropriation, there is danger that the important benefits which the occasion offers will, in a large degree, be lost to citizens of the United States. I commend the subject strongly to your consideration, and recommend that an adequate appropriation be made for the purpose.

To further aid American exhibitors at the Vienna exposition, I would recommend, in addition to an appropriation of money, that the Secretary of the Navy be authorized to fit up two naval vessels to transport between our Atlantic cities and Trieste, or the most convenient port to Vienna, and back, their articles for exhibition.

Since your last session the President of the Mexican Republic, distinguished by his high character and by his services to his country, has died. His temporary successor has now been elected with great unanimity by the people, a proof of confidence on their part in his patriotism and wisdom, which it is believed will be confirmed by the results of his administration. It is particularly desirable that nothing should be left undone by the Government of

either republic to strengthen their relations as neighbors and friends.

It is much to be regretted that many lawless acts continue to disturb the quiet of the settlements on the border between our territory and that of Mexico, and that complaints of wrongs to American citizens in various parts of the country are made. The revolutionary condition in which the neighboring republic has so long been involved has in some degree contributed to this disturbance. It is to be hoped that, with a more settled rule of order through the republic, which may be expected from the present government, the acts of which just complaint is made will cease.

The proceedings of the commission under the convention with Mexico of the 4th of July, 1888, on the subject of claims, have unfortunately been checked by an obstacle, for the removal of which measures have been taken by the two Governments which it is believed will prove successful.

The commissioners appointed, pursuant to the joint resolution of Congress of the 7th of May last, to inquire into depredations on the Texan frontier, have diligently made investigations in that quarter. Their report upon the subject will be communicated to you. Their researches were, necessarily, incomplete, partly on account of the limited appropriation made by Congress. Mexico, on the part of that Government, has appointed a similar commission to investigate these outrages. It is not announced officially, but the press of that country states that the fullest investigation is desired, and that the coöperation of all parties concerned is invited to secure that end. I therefore recommend that a special appropriation be made at the earliest day practicable, to enable the commissioners on the part of the United States to return to their labors without delay.

It is with regret that I have again to announce a continuance of the disturbed condition of the island of Cuba. No advance toward the pacification of the discontented part of the population has been made. While the insurrection has gained no advantages, and exhibits no more of the elements of power or of the prospects of ultimate success than were exhibited a year ago, Spain, on the other hand, has not succeeded in its repression, and the parties stand apparently in the same relative attitude which they have occupied for a long time past.

This contest has lasted now for more than four years. Were its scene at a distance from our neighborhood, we might be indifferent to its result, although humanity could not be unmoved by many of its incidents wherever they might occur. It is, however, at our door.

I cannot doubt that the continued maintenance of slavery in Cuba is among the strongest inducements to the continuance of this strife. A terrible wrong is the natural cause of a terrible evil. The abolition of slavery, and the introduction of other reforms in the administration of government in Cuba, could not fail to advance the restoration of peace and order. It is greatly to be hoped that the present liberal Government of Spain will voluntarily adopt this view.

The law of emancipation, which was passed more than two years since, has remained unexecuted in the absence of regulations for its enforcement. It was but a feeble step toward emancipation; but it was the recognition of right, and was hailed as such, and exhibited Spain in harmony with sentiments of humanity and of justice, and in sympathy with the other powers of the Christian and civilized world.

Within the past few weeks the regulations for carrying out the law of emancipation have been announced, giving evidence of the sincerity of intention of the present Government to carry into effect the law of 1870. I have not failed to urge the consideration of the wisdom, the policy, and the justice of a more effective system for the abolition of the great evil which oppresses a race, and continues a bloody and destructive contest close to our border, as well

as the expediency and the justice of conceding reforms of which the propriety is not questioned.

Deeply impressed with the conviction that the continuance of slavery is one of the most active causes of the continuance of the unhappy condition in Cuba, I regret to believe that citizens of the United States, or those claiming to be such, are large holders in Cuba of what is there claimed as property, but which is forbidden and denounced by the laws of the United States. They are thus, in defiance of the spirit of our own laws, contributing to the continuance of this distressing and sickening contest. In my last annual message I referred to this subject, and I again recommend such legislation as may be proper to denounce, and, if not prevent, at least to discourage American citizens from holding or dealing in slaves.

It is gratifying to announce that the ratifications of the convention concluded under the auspices of this Government, between Spain on the one part, and the allied republics of the Pacific on the other, providing for an armistice, have been exchanged. A copy of the instrument is herewith submitted. It is hoped that this may be followed by a permanent peace between the same parties.

The difficulties which at one time threatened the maintenance of peace between Brazil and the Argentine Republic, it is hoped, are in the way of satisfactory adjustment.

With these states, as with the republics of Central and of South America, we continue to maintain the most friendly relations.

It is with regret, however, I announce that the Government of Venezuela has made no further payments on account of the awards under the convention of the 25th of April, 1866. That republic is understood to be now almost, if not quite, tranquilized. It is hoped, therefore, that it will lose no time in providing for the unpaid balance of its debt to the United States, which, having originated in injuries to our citizens by Venezuelan authorities, and having been acknowledged, pursuant to a treaty, in the most solemn form known among nations, would seem to deserve a preference over debts of a different origin and contracted in a different manner. This subject is again recommended to the attention of Congress for such action as may be deemed proper.

Our treaty relations with Japan remain unchanged. An imposing embassy from that interesting and progressive nation visited this country during the year that is passing; but, being unprovided with powers for the signing of a convention in this country, no conclusion in that direction was reached. It is hoped, however, that the interchange of opinions which took place during their stay in this country has led to a mutual appreciation of the interests which may be promoted when the revision of the existing treaty shall be undertaken.

In this connection I renew my recommendation of one year ago, that, "to give importance and to add to the efficiency of our diplomatic relations with Japan and China, and to further aid in retaining the good opinion of those peoples, and to secure to the United States its share of the commerce destined to flow between those nations and the balance of the commercial world, an appropriation be made to support, at least, four American youths in each of those countries, to serve as a part of the official family of our ministers there. Our representatives would not even then be placed upon an equality with the representatives of Great Britain and of some other powers. As now situated, our representatives in Japan and China have to depend, for interpreters and translators, upon natives of those countries, who know our language imperfectly, or procure for the occasion the services of employes in foreign business-houses, or the interpreters to other foreign ministers."

I renew the recommendation made on a previous occasion, of the transfer to the Department of the Interior, to which they seem more appropriately to belong, of all the powers and duties in relation to

the Territories with which the Department of State is now charged by law or by custom.

Congress, from the beginning of the Government, has wisely made provision for the relief of distressed seamen in foreign countries. No similar provision, however, has hitherto been made for the relief of citizens in distress abroad, other than seamen. It is understood to be customary with other Governments to authorize consuls to extend such relief to their citizens or subjects in certain cases. A similar authority, and an appropriation to carry it into effect, are recommended in the case of citizens of the United States destitute or sick under such circumstances. It is well known that such citizens resort to foreign countries in great numbers. Though most of them are able to bear the expenses incident to locomotion, there are some who, through accident or otherwise, become penniless, and have no friends at home able to succor them. Persons in this situation must either perish, cast themselves upon the charity of foreigners, or be relieved at the private charge of our own officers, who usually, even with the most benevolent dispositions, have nothing to spare for such purposes.

Should the authority and appropriation asked for be granted, care will be taken so to carry the beneficence of Congress into effect that it shall not be unnecessarily or unworthily bestowed.

TREASURY.

The moneys received and conveyed into the Treasury during the fiscal year ending June 30, 1872, were:

From customs.....	\$216,370,286 77
From sales of public lands.....	2,575,714 19
From internal revenue.....	180,642,177 73
From tax on national bank circulation, etc.....	6,593,896 39
From Pacific railway companies.....	749,861 87
From customs fines, etc.....	1,136,442 84
From fees, consular, patent, land, etc.....	2,284,095 92
From miscellaneous sources.....	4,412,254 71

Total ordinary receipts.....	\$364,694,229 91
From premium on sales of coin.....	9,412,637 66

Total net receipts.....	\$374,106,867 56
Balance in Treasury June 30, 1871 (including \$18,228.35 received from "unavailable").....	109,985,705 59

Total available cash.....	\$484,042,573 15
---------------------------	------------------

The net expenditures by warrants during the same period were:

For civil expenses.....	\$16,187,059 20
For foreign intercourse.....	1,839,369 14
For Indians.....	7,061,728 83
For pensions.....	26,533,402 76
For military establishment, including fortifications, river and harbor improvements, and arsenals.....	35,372,157 20
For naval establishments, including vessels and machinery, and improvements at navy-yards.....	21,249,809 99
For miscellaneous civil, including public buildings, light-houses, and collecting the revenue.....	42,958,329 06
For interest on the public debt.....	117,857,559 73

Total, exclusive of principal and premium on the public debt.....	\$370,559,695 91
For premium on bonds purchased.....	\$6,968,266 76
For redemption of the public debt.....	99,960,268 54
	106,918,536 30

Total net disbursements.....	\$377,478,216 21
Balance in the Treasury June 30, 1872.....	106,564,356 94

Total.....	\$484,042,573 15
------------	------------------

From the foregoing statement it appears that the net reduction of the principal of the debt during the fiscal year ending June 30, 1872, was \$99,960,268.54.

The source of this reduction is as follows:

Net ordinary receipts during the year.....	\$364,694,229 91
Net ordinary expenditures, including interest on the public debt.....	270,559,695 91
Leaving surplus revenue.....	\$94,134,534 00
Add amount received from premium on sales of gold, in excess of the premium paid on bonds purchased.....	2,454,370 89
Add the amount of the reduction of the cash balance at the close of the year, accompanied with same at commencement of the year.....	3,371,348 65
Total.....	\$99,960,268 54

This statement treats solely of the principal of the public debt.

By the monthly statement of the public debt, which adds together the principal, interest due and unpaid, and interest accrued to date, not due, and deducts the cash in the Treasury as ascertained on the day of publication, the reduction was \$100,544,491.28.

The source of this reduction is as follows:

Reduction in principal account.....	\$99,960,008 54
Reduction in unpaid interest account.....	3,530,923 96
	\$103,490,932 50
Reduction in cash on hand.....	2,746,465 22
	\$106,237,397 72

On the basis of the last table the statements show a reduction of the public debt, from the 1st of March, 1869, to the present time, as follows:

From March 1, 1869, to March 1, 1870.....	\$87,134,723 64
From March 1, 1870, to March 1, 1871.....	117,619,680 35
From March 1, 1871, to March 1, 1872.....	94,835,348 94
From March 1, 1872, to November 1, 1872 (eight months).....	64,047,237 64
Total.....	\$363,636,989 57

With the great reduction of taxation by the acts of Congress at its last session, the expenditure of the Government in collecting the revenue will be much reduced for the next fiscal year. It is very doubtful, however, whether any further reduction of so vexatious a burden upon the people will be practicable for the present. At all events, as a measure of justice to the holders of the nation's certificates of indebtedness, I would recommend that no more legislation be had on this subject, unless it be to correct errors of omission or commission in the present laws, until sufficient time has elapsed to prove that it can be done and still leave sufficient revenue to meet current expenses of Government, pay interest on the public debt, and provide for the sinking-fund established by law. The preservation of our national credit is of the highest importance; next in importance to this comes a solemn duty to provide a national currency, of fixed, unvarying value, as compared with gold, and, as soon as practicable, having due regard for the interests of the debtor class, and the vicissitudes of trade and commerce, convertible into gold at par.

WAR DEPARTMENT.

The report of the Secretary of War shows the expenditures of the War Department, for the fiscal year ending June 30, 1871, to be \$35,799,991.82, and for the fiscal year ending June 30, 1872, to be \$35,372,157.20, showing a reduction in favor of the last fiscal year of \$427,834.62.

The estimates for military appropriations for the next fiscal year, ending June 30, 1874, are \$33,801,878.78.

The estimates of the Chief of Engineers are submitted separately for fortifications, river and harbor improvements, and for public buildings and grounds, and the Washington Aqueduct.

The affairs of the Freedmen's Bureau have all been transferred to the War Department, and regula-

tions have been put into execution for the speedy payment of bounty, pay, etc., due colored soldiers, properly coming under that bureau. All war accounts, for money and property, prior to 1871, have been examined, and transmitted to the Treasury for final settlement.

During the fiscal year there has been paid for transportation on railroads \$1,800,000, of which \$300,357 was over the Pacific railroads; for transportation by water, \$626,373.52, and by stage, \$48,975.84; for the purchase of transportation animals, wagons, hire of teamsters, etc., \$924,650.64.

About \$370,000 have been collected from Southern railroads during the year, leaving about \$4,000,000 still due.

The Quartermaster has examined, and transmitted to the accounting officers for settlement, \$367,172.72 of claims, by loyal citizens, for quartermasters' stores taken during the war.

Subsistence supplies to the amount of \$89,048.12 have been issued to Indians.

The annual average mean strength of the Army was 24,101 white, and 2,494 colored soldiers. The total deaths for the year reported, were 337 white and 54 colored.

The distribution of the "Medical and Surgical History of the War" is yet to be ordered by Congress.

There exists an absolute necessity for a medical corps of the full number, established by act of Congress of July 28, 1866; there being now fifty-nine vacancies, and the number of successful candidates rarely exceeds eight or ten in any one year.

The river and harbor improvements have been carried on with energy and economy. Though many are only partially completed, the results have saved to commerce many times the amount expended. The increase of commerce, with greater depth of channels, greater security in navigation, and the saving of time, adds millions to the wealth of the country, and increases the resources of the Government.

The bridge across the Mississippi River at Rock Island has been completed, and the proper site has been determined upon for the bridge at La Crosse.

The able and exhaustive report made by the commission appointed to investigate the Sutro Tunnel has been transmitted to Congress.

The observations and reports of the Signal-Office have been continued. Stations have been maintained at each of the principal lake, seaport, and river cities. Ten additional stations have been established in the United States, and arrangements have been made for an exchange of reports with Canada, and a similar exchange of observations is contemplated with the West India Islands.

The favorable attention of Congress is invited to the following recommendation of the Secretary of War:

A discontinuance of the appointment of extra lieutenants to serve as adjutants and quartermasters; the adoption of a code providing specific penalties for well-defined offences, so that the inequality of sentences adjudged by courts-martial may be adjusted; the consolidation of accounts under which expenditures are made, as a measure of economy; a reappropriation of the money for the construction of a depot at San Antonio, the title to the site being now perfected; a special act placing the cemetery at the city of Mexico on the same basis as other national cemeteries; authority to purchase sites for military posts in Texas; the appointment of commissary sergeants from non-commissioned officers, as a measure for securing the better care and protection of supplies; an appropriation for the publication of the catalogue and tables of the anatomical section of the Army Medical Museum; a reappropriation of the amount for the manufacture of breech-loading arms, should the selection be so delayed by the board of officers as to leave the former appropriation unexpended at the close of the fiscal year; the sale of such arsenals east of the Mississippi as can be

spared, and the proceeds applied to the establishment of one large arsenal of construction and repair upon the Atlantic coast, and the purchase of a suitable site for a proving and experimental ground for heavy ordnance; the abrogation of laws which deprive inventors in the United States service from deriving any benefit from their inventions; the repeal of the law prohibiting promotions in the staff-corps; a continuance of the work upon coast defences; the repeal of the seventh section of the act of July 13, 1866, taking from engineer soldiers the *per diem* granted to other troops; a limitation of time for presentation of old war claims for subsistence supplies under act of July 4, 1864; and a modification in the mode of the selection of cadets for the Military Academy, in order to enhance the usefulness of the Academy, which is impaired by reason of the large amount of time necessarily expended in giving new cadets a thorough knowledge of the more elementary branches of learning which they should acquire before entering the Academy. Also an appropriation for philosophical apparatus and an increase in the numbers and pay of the Military Academy band.

The attention of Congress will be called, during the present session, to various enterprises for the more certain and cheaper transportation of the constantly-increasing surplus of Western and Southern products to the Atlantic seaboard. The subject is one that will force itself upon the legislative branch of the Government sooner or later, and I suggest, therefore, that immediate steps be taken to gain all available information to insure equitable and just legislation.

One route to connect the Mississippi Valley with the Atlantic at Charleston, S. C., and Savannah, Ga., by water, by the way of the Ohio and Tennessee Rivers, and canals and slack-water navigation to the Savannah and Ocmulgee Rivers, has been surveyed, and report made by an accomplished engineer officer of the Army. Second and third, new routes will be proposed for the consideration of Congress; namely, by an extension of the Kanawha & James River Canal to the Ohio, and by extension of the Chesapeake & Ohio Canal.

I am not prepared to recommend Government aid to these or other enterprises, until it is clearly shown that they are not only of national interest, but that, when completed, they will be of a value commensurate with their cost.

That production increases more rapidly than the means of transportation in our country, has been demonstrated by past experience. That the unprecedented growth in population and products of the whole country will require additional facilities, and cheaper ones, for the more bulky articles of commerce to reach tide-water, and a market will be demanded in the near future, is equally demonstrable. I would therefore suggest either a committee or a commission to be authorized to consider this whole question, and to report to Congress at some future day for its better guidance in legislating on this important subject.

The railroads of the country have been rapidly extended during the last few years to meet the growing demands of producers, and reflect much credit upon the capitalists and managers engaged in their construction.

In addition to these, a project to facilitate commerce by the building of a ship-canal around Niagara Falls, on the United States side, which has been agitated for many years, will, no doubt, be called to your attention at this session.

Looking to the great future growth of the country, and the increasing demands of commerce, it might be well, while on this subject, not only to have examined and reported upon the various practicable routes for connecting the Mississippi with tide-water on the Atlantic, but the feasibility of an almost continuous land-locked navigation from Maine to the Gulf of Mexico. Such a route along our coast would

be of great value at all times, and of inestimable value in case of a foreign war. Nature has provided the greater part of this route, and the obstacles to overcome are easily within the skill of the engineer.

I have not alluded to this subject with the view of having any further expenditure of public money at this time than may be necessary to procure and place all the necessary information before Congress in an authentic form, to enable it hereafter, if deemed practicable and worthy, to legislate on the subject without delay.

NAVY DEPARTMENT.

The report of the Secretary of the Navy, herewith accompanying, explains fully the condition of that branch of the public service, its wants and deficiencies, expenses incurred during the past year, and appropriations for the same. It also gives a complete history of the services of the Navy for the past year, in addition to its regular service.

It is evident, unless early steps are taken to preserve our Navy, that in a very few years the United States will be the weakest nation upon the ocean, of all great powers. With an energetic, progressive business people like ours, penetrating and forming business relations with every part of the known world, a navy strong enough to command the respect of our flag abroad is necessary for the full protection of their rights.

I recommend careful consideration by Congress of the recommendations made by the Secretary of the Navy.

POST-OFFICE DEPARTMENT.

The accompanying report of the Postmaster-General furnishes a full and satisfactory exhibit of the operations of the Post-Office Department during the year. The ordinary revenues of the Department for the fiscal year ending June 30, 1873, amounted to \$21,915,426.87, and the expenditures to \$26,658,192.31. Compared with the previous fiscal year the increase of revenue was \$1,878,330.95, or 9.37 per cent., and the increase of expenditures \$2,268,088.23, or 9.29 per cent. Adding to the ordinary revenues the annual appropriation of \$700,000 for free matter, and the amounts paid to the subsidized mail-steamship lines from special appropriations, the deficiency paid out of the general Treasury was \$3,817,765.94, an excess of \$389,707.28 over the deficiency for the year 1871.

Other interesting statistical information relating to our rapidly-extending postal service is furnished in this report. The total length of railroad mail-routes on the 30th of June, 1872, was 57,911 miles, 8,077 additional miles of such service having been put into operation during the year. Eight new lines of railway post-offices have been established, with an aggregate length of 2,909 miles. The number of letters exchanged in the mails with foreign countries was 24,862,500, an increase of 4,066,503, or 20 per cent. over the number in 1871; and the postage thereon amounted to \$1,871,257.25. The total weight of the mails exchanged with European countries exceeded 820 tons. The cost of the United States transatlantic mail-steamship service was \$220,301.70. The total cost of the United States ocean-steamship service, including the amounts paid to the subsidized lines of mail-steamers, was \$1,027,020.97.

The following are the only steamship lines now receiving subsidies for mail service under special acts of Congress: The Pacific Mail Steamship Company receive \$500,000 per annum for conveying a monthly mail between San Francisco, Japan, and China, which will be increased to \$1,000,000 per annum for a semi-monthly mail on and after October 1, 1873; the United States & Brazil Mail Steamship Company receive \$150,000 per annum for conveying a monthly mail between New York and Rio de Janeiro, Brazil; and the California, Oregon, and Mexico Steamship Company receive \$75,000 per an-

num for conveying a monthly mail between San Francisco and Honolulu (Hawaiian Islands), making the total amount of mail-steamship subsidies, at present, \$725,000 per annum.

Our postal communications with all parts of the civilized world have been placed upon a most advantageous footing by the improved postal conventions and arrangements recently concluded with the leading commercial countries of Europe and America; and the gratifying statement is made that with the conclusion of a satisfactory convention with France, the details of which have been definitely agreed to by the head of the French postal department, subject to the approval of the Minister of Finance, little remains to be accomplished by treaty for some time to come, with respect either to reduction of rates or improved facilities of postal intercourse.

Your favorable consideration is respectfully invited to the recommendations made by the Postmaster-General for an increase of service from monthly to semi-monthly trips on the mail-steamship route to Brazil; for a subsidy in aid of the establishment of an American line of mail-steamers between San Francisco, New Zealand, and Australia; for the establishment of post-office savings-banks; and for the increase of the salaries of the heads of bureaus. I have heretofore recommended the abolition of the franking privilege, and see no reason now for changing my views on that subject. It not having been favorably regarded by Congress, however, I now suggest a modification of that privilege to correct its glaring and costly abuses. I would recommend also the appointment of a committee or commission to take into consideration the best method (equitable to private corporations who have invested their time and capital in the establishment of telegraph-lines) of acquiring the title to all telegraph-lines now in operation, and of connecting this service with the postal service of the nation. It is not probable that this subject could receive the proper consideration during the limits of a short session of Congress; but it may be initiated, so that future action may be fair to the Government and to private parties concerned.

There are but three lines of ocean-steamers—namely: the Pacific Mail Steamship Company, between San Francisco, China, and Japan, with provision made for semi-monthly service after October 1, 1873; the United States and Brazil line, monthly; and the California, New Zealand, and Australian line, monthly—plying between the United States and foreign ports, and owned and operated under our flag. I earnestly recommend that such liberal contracts for carrying the mails be authorized with these lines as will insure their continuance.

If the expediency of extending the aid of Government to lines of steamers which hitherto have not received it should be deemed worthy of the consideration of Congress, political and commercial objects make it advisable to bestow such aid on a line under our flag between Panama and the Western South American ports. By this means much trade, now diverted to other countries, might be brought to us, to the mutual advantage of this country and those lying in that quarter of the continent of America.

The report of the Secretary of the Treasury will show an alarming falling off in our carrying-trade for the last ten or twelve years, and even for the past year. I do not believe that public treasure can be better expended in the interest of the whole people than in trying to recover this trade. An expenditure of \$5,000,000 per annum for the next five years, if it would restore to us our proportion of the carrying-trade of the world, would be profitably expended.

The price of labor in Europe has so much enhanced within the last few years that the cost of building and operating ocean-steamers in the United States is not so much greater than in Europe, and I believe the time has arrived for Congress to take this subject into serious consideration.

DEPARTMENT OF JUSTICE.

Detailed statements of the disbursements through the Department of Justice will be furnished by the report of the Attorney-General, and, though these have been somewhat increased by the recent acts of Congress, "to enforce the rights of citizens of the United States to vote in the several States of the Union," and "to enforce the provisions of the fourteenth amendment to the Constitution of the United States," and the amendments thereto, I cannot question the necessity and salutary effect of those enactments. Reckless and lawless men, I regret to say, have associated themselves together, in some localities, to deprive other citizens of those rights guaranteed to them by the Constitution of the United States, and to that end have committed deeds of blood and violence; but the prosecution and punishment of many of these persons have tended greatly to the repression of such disorders. I do not doubt that a great majority of the people in all parts of the country favor the full enjoyment by all classes of persons of those rights to which they are entitled under the Constitution and laws; and I invoke the aid and influence of all good citizens to prevent organizations whose objects are by unlawful means to interfere with those rights. I look with confidence to the time, not far distant, when the various advantages of good order and peace will induce an abandonment of all combinations prohibited by the acts referred to, and when it will be unnecessary to carry on prosecutions or inflict punishment to protect citizens from the lawless doings of such combinations.

Applications have been made to me to pardon persons convicted of a violation of said acts, upon the ground that clemency in such cases would tend to tranquillize the public mind, and, to test the virtue of that policy, I am disposed, as far as my sense of justice will permit, to give to these applications a favorable consideration; but any action thereon is not to be construed as indicating any change in my determination to enforce with rigor such acts so long as the conspiracies and combinations therein named disturb the peace of the country. It is much to be regretted, and it is regretted by no one more than myself, that necessity has ever existed to execute the enforcement act. No one can desire more than I that the necessity of applying it may never again be demanded.

INTERIOR DEPARTMENT.

The Secretary of the Interior reports satisfactory improvement and progress in each of the several bureaus under the control of the Interior Department. They are all in excellent condition. The work, which in some of them for some years has been in arrears, has been brought down to a recent date, and in all the current business is being promptly dispatched.

INDIANS.

The policy which was adopted at the beginning of this Administration with regard to the management of the Indians has been as successful as its most ardent friends anticipated within so short a time. It has reduced the expense of their management, decreased their forays upon the white settlements, tended to give the largest opportunity for the extension of the great railways through the public domain and the pushing of settlements into more remote districts of the country, and, at the same time, improved the condition of the Indians. The policy will be maintained without any change, excepting such as further experience may show to be necessary to render it more efficient.

The subject of converting the so-called Indian Territory south of Kansas into a home for the Indian, and erecting therein a territorial form of government, is one of great importance as a complement of the existing Indian policy. The question of removal to that Territory has, within the past year, been pre-

sented to many of the tribes resident upon other and less desirable portions of the public domain, and has generally been received by them with favor. As a preliminary step to the organization of such a Territory, it will be necessary to confine the Indians, now resident therein, to farms of proper size, which should be secured to them in fee; the residue to be used for the settlement of other friendly Indians. Efforts will be made in the immediate future to induce the removal of as many peaceably-disposed Indians to the Indian Territory as can be settled properly, without disturbing the harmony of those already there. There is no other location now available, where a people, who are endeavoring to acquire a knowledge of pastoral and agricultural pursuits, can be as well accommodated as upon the unoccupied lands in the Indian Territory. A territorial government should, however, protect the Indians from the inroads of whites for a term of years, until they become sufficiently advanced in the arts and civilization to guard their own rights, and from the disposal of the lands held by them for the same period.

LANDS.

During the last fiscal year there were disposed of, out of the public lands, 11,864,975 acres, a quantity greater by 1,099,270 acres than was disposed of the previous year. Of this amount, 1,370,820 acres were sold for cash; 889,460 acres located with military warrants; 4,671,332 acres taken for homesteads; 693,613 acres located with college scrip; 3,554,887 acres granted to railroads; 455,347 acres granted to wagon-roads; 714,255 acres given to States as swamp land; 5,760 acres located by Indian scrip. The cash receipts from all sources in the Land-Office amounted to \$3,218,100. During the same period, 22,016,608 acres of the public lands were surveyed, which, added to the quantity before surveyed, amounts to 583,364,780 acres, leaving 1,257,633,628 acres of the public lands still unsurveyed.

The reports from the subordinates of the Land-Office contain interesting information in regard to their respective districts. They uniformly mention the fruitfulness of the soil during the past season, and the increased yields of all kinds of produce. Even in those States and Territories where mining is the principal business, agricultural products have exceeded the local demand, and liberal shipments have been made to distant points.

PATENTS.

During the year ending September 30, 1872, there were issued from the Patent-Office 13,626 patents; 233 extensions; and 556 certificates and registries of trade-marks. During the same time 19,587 applications for patents, including reissues and designs, have been received, and 3,100 caveats filed. The fees received during the same period amounted to \$700,954.86, and the total expenditures to \$623,553.90, making the net receipts over the expenditures \$77,400.96.

Since 1836, 200,000 applications for patents have been filed, and about 133,000 patents issued. The office is being conducted under the same laws and general organization as were adopted at its original inauguration, when only from one hundred to five hundred applications were made per annum. The Commissioner shows that the office has outgrown the original plan, and that a new organization has become necessary. This subject was presented to Congress in a special communication in February last, with my approval and the approval of the Secretary of the Interior, and the suggestions contained in said communication were embraced in the bill that was reported to the House, by the Committee on Patents, at the last session. The subject of the reorganization of the Patent-Office, as contemplated by the bill referred to, is one of such importance to the industrial interests of the country, that I commend it to the attention of Congress.

The Commissioner also treats the subject of the separation of the Patent-Office from the Department of the Interior. This subject is also embraced in the bill heretofore referred to. The Commissioner complains of the want of room for the model-gallery, and for the working force and necessary files of the office. It is impossible to transact the business of the office properly without more room in which to arrange files and drawings, that must be consulted hourly in the transaction of business. The whole of the Patent-Office building will soon be needed, if it is not already, for the accommodation of the business of the Patent-Office.

PENSIONERS.

The amount paid for pensions, in the last fiscal year, was \$30,168,340, an amount larger by \$3,708,484 than was paid during the preceding year. Of this amount, \$2,318,409 were paid, under the act of Congress of February 17, 1871, to survivors of the War of 1812. The annual increase of pensions by the legislation of Congress has more than kept pace with the natural yearly losses from the rolls. The act of Congress of June 8, 1872, has added an estimated amount of \$750,000 per annum to the rolls, without increasing the number of pensioners. We cannot, therefore, look for any substantial decrease in the expenditures of this Department for some time to come, or so long as Congress continues to so change the rates of pension.

The whole number of soldiers enlisted in the war of the rebellion was 2,688,523. The total number of claims for invalid-pensions is 176,000, being but six per cent. of the whole number of enlisted men. The total number of claims on hand, at the beginning of the year, was 91,689; the number received during the year was 26,574; the number disposed of was 39,178, making a net gain of 12,604. The number of claims now on file is 79,085.

On the 30th of June, 1873, there were on the rolls the names of 95,405 invalid military pensioners, 113,518 widows, orphans, and dependent relatives, making an aggregate of 298,923 Army pensioners. At the same time, there were on the rolls the names of 1,449 Navy pensioners, and 1,730 widows, orphans, and dependent relatives, making the whole number of naval pensioners 3,179. There have been received, since the passage of the act to provide pensions for the survivors of the War of 1812, 36,551 applications, prior to June 30, 1872. Of these, there were allowed, during the last fiscal year, 20,126 claims; 4,845 were rejected during the year, leaving 11,580 claims pending at that date. The number of pensions, of all classes, granted, during the last fiscal year, was 38,838. During that period, there were dropped from the rolls, for various causes, 9,104 names, leaving a grand total of 282,229 pensioners on the rolls on the 30th of June, 1872.

It is thought that the claims for pensions on account of the War of 1812 will all be disposed of by the 1st of May, 1873. It is estimated that \$30,480,000 will be required for the pension service during the next fiscal year.

THE CENSUS.

The ninth census is about completed. Its early completion is a subject of congratulation, inasmuch as the use to be made of the statistics therein contained depends very greatly on the promptitude of publication.

The Secretary of the Interior recommends that a census be taken in 1875, which recommendation should receive the early attention of Congress. The interval at present established between the Federal census is so long, that the information obtained at the decennial periods, as to the material condition, wants, and resources of the nation, is of little practical value after the expiration of the first half of that period. It would probably obviate the constitutional provision regarding the decennial census, if a census taken in 1875 should be divested of all political char-

acter, and no reapportionment of congressional representation be made under it. Such a census, coming as it would in the last year of the first century of our national existence, would furnish a noble monument of the progress of the United States during that century.

EDUCATION.

The rapidly-increasing interest in education is a most encouraging feature in the current history of the country, and it is, no doubt, true that this is due, in a great measure, to the efforts of the Bureau of Education. That office is continually receiving evidences, which abundantly prove its efficiency, from the various institutions of learning, and educators of all kinds throughout the country.

The report of the Commissioner contains a vast amount of educational details of great interest. The bill now pending before Congress, providing for the appropriation of the net proceeds of the sales of public lands for educational purposes, to aid the States in the general education of their rising generation, is a measure of such great importance to our real progress, and is so unanimously approved by the leading friends of education, that I commend it to the favorable attention of Congress.

TERRITORIES.

Affairs in the Territories are generally satisfactory. The energy and business capacity of the pioneers who are settling up the vast domains not yet incorporated into States are keeping pace, in internal improvements and civil government, with the older communities. In but one of them, Utah, is the condition of affairs unsatisfactory, except so far as the quiet of the citizen may be disturbed by real or imaginary danger of Indian hostilities. It has seemed to be the policy of the Legislature of Utah to evade all responsibility to the Government of the United States, and even to hold a position in hostility to it.

I recommend a careful revision of the present laws of the Territory by Congress, and the enactment of such a law (the one proposed in Congress at its last session, for instance, or something similar to it) as will secure peace, the equality of all citizens before the law, and the ultimate extinguishment of polygamy.

Since the establishment of a territorial government for the District of Columbia, the improvement of the condition of the city of Washington and surroundings, and the increased prosperity of the citizens, are observable to the most casual visitor. The nation, being a large owner of property in the city, should bear, with the citizens of the District, its just share of the expense of these improvements.

I recommend, therefore, an appropriation to reimburse the citizens for the work done by them along and in front of public grounds during the past year; and liberal appropriations in order that the improvement and embellishment of the public buildings and grounds may keep pace with the improvements made by the territorial authorities.

AGRICULTURE.

The report of the Commissioner of Agriculture gives a very full and interesting account of the several divisions of that department—the horticultural, agricultural, statistical, entomological, and chemical—and the benefits conferred by each upon the agricultural interests of the country. The whole report is a complete history, in detail, of the workings of that department, in all its branches, showing the manner in which the farmer, merchant, and miner are informed, and the extent to which they are aided in their pursuits.

The Commissioner makes one recommendation—that measures be taken by Congress to protect and induce the planting of forests, and suggests that no part of the public lands should be disposed of, without the condition that one-tenth of it should be re-

served in timber, where it exists, and, where it does not exist, inducements should be offered for planting it.

CENTENNIAL CELEBRATION.

In accordance with the terms of the act of Congress, approved March 3, 1871, providing for the celebration of the one-hundredth anniversary of American independence, a commission has been organized, consisting of two members from each of the States and Territories. This commission has held two sessions, and has made satisfactory progress in the organization and in the initiatory steps necessary for carrying out the provisions of the act, and for executing also the provisions of the act of June 1, 1872, creating a centennial board of finance. A preliminary report of progress has been received from the president of the commission, and is herewith transmitted. It will be the duty of the commission, at your coming session, to transmit a full report of the progress made, and to lay before you the details relating to the exhibition of American and foreign arts, products, and manufactures, which, by the terms of the act, is to be held, under the auspices of the Government of the United States, in the city of Philadelphia, in the year 1876.

This celebration will be looked forward to by American citizens with great interest, as marking a century of greater progress and prosperity than is recorded in the history of any other nation, and as serving a further good purpose in bringing together, on our soil, peoples of all the commercial nations of the earth, in a manner calculated to insure international good feeling.

CIVIL SERVICE.

An earnest desire has been felt to correct abuses which have grown up in the civil service of the country, through the defective method of making appointments to office. Heretofore, Federal offices have been regarded too much as the reward of political services. Under authority of Congress, rules have been established to regulate the tenure of office and the mode of appointments. It cannot be expected that any system of rules can be entirely effective, and prove a perfect remedy for the existing evils, until they have been thoroughly tested by actual practice, and amended according to the requirements of the service. During my term of office, it shall be my earnest endeavor to so apply the rules as to secure the greatest possible reform in the civil service of the Government; but it will require the direct action of Congress to render the enforcement of the system binding upon my successors, and I hope that the experience of the past year, together with appropriate legislation by Congress, may reach a satisfactory solution of this question, and secure to the public service, for all time, a practical method of obtaining faithful and efficient officers and employes.

U. S. GRANT.

EXECUTIVE MANSION, December 2, 1872.

PUTNAM, GEORGE PALMER, A. M., an American publisher, author, and art connoisseur, born in Brunswick, Me., February 21, 1814; died in New York City, December 20, 1872. He was of Revolutionary stock, being a grandson of General Joseph Palmer, the brave Massachusetts commander in the attempt to rescue Rhode Island from British aggression, and a grand-nephew of the famous General Israel Putnam. His early advantages of education were but meagre, but his love of reading was intense, and, when at the age of twelve years he went to Boston as a clerk in a store, he employed every leisure moment in reading. In 1828 he came to New York and entered the bookstore of Daniel and Jonathan

Leavitt as a clerk. The same year he commenced a compilation of dates, at first for his own benefit, but finally for publication, which was the foundation of his well-known "The World's Progress," though first issued when he was but nineteen years old as a "Chronology." After remaining with the Messrs. Leavitt for some years, he entered the employ of Mr. John Wiley, then as now an honored publisher and bookseller of New York, and in 1837 or 1838 was sent to Europe on business for Mr. Wiley. On his return he published "The Tourist in Europe." In 1840 he became a partner in the house of Wiley & Putnam, and in 1841 went to London and established there a branch of the firm in Paternoster Row, and a pleasant home in St. John's Wood, which many Americans still remember with delight. During the seven years of his residence in London he built up a fair trade in American books, and at the same time established as a regular business the trade in English books in this country. He published while there "The American Bookseller," 1848, and a compilation intended as a partial reply to Mr. Dickens's "American Notes," with the title of "American Facts." This little book was of great service in giving the English people clearer ideas of our country and its people. Mr. Putnam returned to New York from London in 1848, and soon afterward dissolved the partnership with Mr. Wiley, and engaged in business by himself. He soon began the publication of Washington Irving's works—his most important enterprise, if the character and number of the volumes, their extensive sale and wide influence, are considered, and this proved a very successful venture. Among other various standard works which he subsequently published were the writings of J. Fenimore Cooper, Bayard Taylor, Charles Lamb, Thomas Hood, John P. Kennedy, Edgar A. Poe, and others. One of his early publishing enterprises was a library of choice reading, in 25-cent volumes, selected from the best authors, whereby he hoped to bring them within the reach of all classes. This undertaking was not very successful in a business point of view, but he was partial to the idea till his death. Mr. Putnam early interested himself in the production of fine illustrated books, publishing, among others, the "Artists' Edition of Irving's Sketch Book," the "Book of American Scenery," and "The Homes of American Authors." In 1852, with the assistance of George William Curtis, James Briggs, and some others, he established *Putnam's Magazine*, the aim of which was to be, what no other monthly in this country then was, a strictly American magazine. It met with immediate success, and in 1856, while still prospering greatly, was sold to other publishers, who failed in the financial crisis of 1857, when the publication of the magazine was suspended. In 1868 Mr. Putnam retired from active business, to become Collector of

Internal Revenue, a position which he held till 1866, when, in conjunction with his sons, he formed the publishing house of G. P. Putnam & Sons. The *Magazine* was reestablished in 1867 and continued till 1870, when it was sold to Scribner & Co., and merged in *Scribner's Monthly*. In 1853 Bowdoin College, situated at Brunswick, Maine, the home of his childhood, honored itself by conferring on him the honorary degree of A. M. In social and club life Mr. Putnam had been for many years a leader. His literary receptions in the earlier days at his pleasant home, where any and every one dropped in for a sure and kind welcome, and where Irving, Bryant, and the other leaders of literature were often to be met, will always be remembered. He was one of the early members of the Century and Union League Clubs, serving for many years on the Art Committee of the latter. His art tastes were always strong, and it was to him a labor of love to encourage young and struggling artists, and to procure for them public recognition of their works. It was this feeling, far more than any hope of profit (which was very moderately realized), which led him to undertake the publication of the costly illustrated works which he issued, and prompted him to secure from his friend Tuckerman the preparation of his work on American Artists. He was one of the founders of the Metropolitan Museum of Art, of which he was, during the year 1872, Honorary Superintendent, giving his services freely and largely, without charge. His position in American art clubs was worth-

ly recognized by General Van Buren in his appointment of Mr. Putnam as chairman of the Committee on Art in connection with the Vienna Exposition. He was also the recognized leader in all movements for the progress and extension of literature and literary culture throughout the country, and had done more than almost any other individual to diffuse a love for books among the community. Ever kind and genial, he was perhaps too gentle and too much an optimist to achieve great financial success. It was very hard for him to decline to publish a book when the author appealed to his sympathies; and, when he was compelled to do so, the fear that he might wound the feelings of the author, by what he was wont to call "ungraciousness," was always manifest. No business-man in the city was more universally beloved, and to hundreds, if not thousands, his death was felt as a deep personal affliction. Eminently social in his disposition, he had the gift of facile and forcible utterance, and had long been in the habit of addressing public or festive reunions with dignity and effect. His counsels were always sought on occasions of difficulty, and every intelligent man among his acquaintance attached peculiar value to his opinions. Modest and retiring in his manners, he cherished a singular self-respect, and never receded from his ground but through the force of conviction. He was a man of the rarest purity and sweetness of life, of strong religious sentiment, and a model of excellence in the social and domestic relations.

R

RAMSAY, Very Rev. EDWARD BANNERMAN, M. A., LL. D., F. R. S. E., Dean of St. John's Chapel, Edinburgh, born in Balmain, Scotland, in March, 1793; died in Edinburgh, December 28, 1872. He was the fourth son of the late Sir Alexander Ramsay, Bart., and was educated at St. John's College, Cambridge, whence he graduated B. A. in 1815, and M. A. in 1831. On completing his university course, he entered the Episcopal Church, taking charge of a curacy in Somersetshire, England, from which he was called, in 1831, to St. John's Chapel, Edinburgh, with which he was connected as rector until his decease. He was appointed dean of the diocese in 1849. He was a profound thinker, and a prolific writer. In 1859, on the occasion of the installation of Mr. Gladstone as Lord Rector of the University of Edinburgh, the degree of LL. D. was conferred by it on Dean Ramsay. The Established Church of Scotland is, as is well known, Presbyterian, and the Episcopal Church there, like the Presbyterian in England, is ranked among the dissenting sects. Mr. Ramsay was decidedly Evangelical, and his sympathies with other denominations were very cordial and

hearty. The late Dr. Hunter, and Drs. Lindsay, Alexander, and Candlish, eminent members of the Scottish Kirk, were his warmest and dearest friends, and so intimate was their intercourse that, in 1865, Dr. Alexander dedicated to him his recent work on "St. Paul in Athens." He was the prime mover in the effort to erect a monument to the memory of Dr. Chalmers, and had succeeded in raising over \$20,000 for that purpose. He had also been active in the promotion of charities for the poor, the sick, and the suffering. The following are Dean Ramsay's principal works: "Manual of Catechetical Instruction," about 1845; "Sermons for Advent," 1850; "Two Lectures on Some Changes in Social Life and Subjects," 1857; "Scripture Doctrine of the Eucharist," 1857; "Reminiscences of Scottish Life and Character," First Series, 1857; Second Series, 1861. This, the most admirable of his works, had a most remarkable success, having passed through twenty editions in Great Britain (the last in 1873), and two or three in this country. "Diversities of Christian Character Illustrated in the Lives of the Four Great Apostles," 1858; "Present State of our Canon

Law considered," 1859; "Diversities of Faults in Christian Believers," 1859; "Pastoral Letters," 1861-'62; "Christian Life," 1862; "Episcopal Church of Scotland," 1862; "Two Lectures on Handel," 1862; "Proposals for providing a Peal of Bells for Edinburgh," 1863; "Christian Responsibility," 1864; "Thomas Chalmers, D.D., a Biographical Notice," 1867; "Pulpit Table-Talk, containing Remarks and Anecdotes," 1868. The last seems to be nearly as successful as the "Reminiscences."

RANDALL, ALEXANDER WILLIAMS, ex-Governor of Wisconsin, and ex-Postmaster-General of the United States, born in Montgomery County, N. Y., October, 1819; died at Elmira, N. Y., July 25, 1872. In early life he emigrated, with his parents, to Wisconsin, where he chose the profession of the law. His devotion to the interests of the State marked him as a fitting representative of that growing Territory, and he was accordingly chosen, by a large majority, as a member of the Territorial Convention, in 1847, which framed a constitution that is now, in its essential elements, the fundamental law of the State of Wisconsin. In 1856 he was chosen Governor by a very large majority, and from that period became identified with the West as one of its representative men. Before his term of office expired, the signs of war began to thicken. The Legislature had convened on the 10th of January, 1861, and there was much concern among its members as to the policy which should be pursued by the State. Wisconsin, always Democratic previously, had given 20,000 majority for Abraham Lincoln, in November, 1860. The message of Governor Randall said that the election of Mr. Lincoln was legal; that the Government was one of the people; and that immediate action should be taken to place the State on a war-footing. Notwithstanding this message, the Legislature, on the 15th of April, 1861, passed a resolution to adjourn on the 17th. On that memorable 15th of April, President Lincoln issued his proclamation calling for troops. An emergency had arisen to which the Governor was fully equal. He had the trains stopped which were on the point of leaving Madison, heedless of threats of penalties "for obstructing the mails of the United States." He was determined, if within his power to do so, to keep the flying representatives to their duty. His endeavors failed, however, and the only resource was to call an extra session of the Legislature, which did not convene until the 10th of June. In the mean time, the Governor "took the responsibility," and caused 28,000 men of Wisconsin to be placed in the field; and the Legislature responded fully to the interests of the people as expressed through the Governor, going even beyond him in their endeavors, by providing for five regiments in addition to those already raised. Upon retiring from the gubernatorial chair, in 1861, he was nominated by President Lincoln as minister to

Rome, which appointment was duly confirmed by the Senate. Though he filled that position but a short time, his record was a good and honorable one. Having resigned his diplomatic mission, and returned to his home, he devoted himself to the duties of his profession until he was appointed First Assistant Postmaster-General, in 1862. In July, 1866, he was nominated, by President Johnson, Postmaster-General, and served in that capacity till March, 1869. Since the close of that Administration, he had devoted himself to the duties of his profession, having taken up his residence in Elmira in 1869.

READ, THOMAS BUCHANAN, an American poet and painter, born in Chester County, Pa., March 12, 1822; died in New York City, May 11, 1872. His tastes for art were manifest at a very early age, and, having removed to Cincinnati, he became the pupil of Clevenger, the sculptor, when but seventeen years of age, intending to make that his profession for life. The departure of this artist for Europe, soon after, changed his plans, and he turned his attention to painting, in which he soon acquired a reputation, although, in after-life, he occasionally indulged in the practice of sculpture as an amateur—among the fruits of which was an admirable portrait-bust of General Sheridan. In 1841 he removed to New York, and, soon after, to Boston, where he occupied himself chiefly in portrait-painting. Establishing himself in Philadelphia, in 1846, he occasionally turned aside from his brush to indulge in his fine poetic tastes, and, the following year, published his first volume of poems, which was succeeded by a volume of "Lays and Ballads," in 1848. He also edited "The Female Poets of America, with Portraits, Biographical Notices, and Specimens of their Writings," which has passed through many editions. In 1850 he visited Europe, passing a year in Florence, and, soon after his return, published "The Pilgrims of the Great St. Bernard: a Prose Romance;" and, in 1852, an illustrated edition of his poems, with additions. Subsequent editions of these followed. In 1853 he again went to Italy, and resided some years in Florence and Rome; but, since 1858, he had divided his time mostly between Philadelphia and Cincinnati, practising his favorite profession with increasing reputation and success. In 1855 he brought out his most elaborate poem, "The New Pastoral," written while in Italy, and consisting of thirty-seven sketches of rustic and domestic life. He was also the author of "The House by the Sea," a poem, 1856; "Sylvia; or, the Lost Shepherd," 1857; "Rural Poems," the same year; "A Voyage to Iceland," etc., 1857; "Complete Poetical Works," 1860; "The Wagoner of the Alleghanies," 1862; "A Summer Story, Sheridan's Ride, and other Poems," 1865; and "Good Samaritans," a poem, 1867. The productions of his pencil were characterized by vividness and delicacy of execution. Among the most

popular of them were his "Undine," "The Lost Pleiad," "Longfellow's Children," and "The Star of Bethlehem." His vigorous portrait of "Sheridan and his Horse" attained almost equal celebrity with his singularly popular poem "Sheridan's Ride." Mr. Read had been spending the last few years in Italy, and was returning home for the benefit of his health, when he was attacked with pleuropneumonia upon his voyage, and survived but a few days after his arrival in New York.

REFORMED CHURCH.—I. REFORMED CHURCH IN AMERICA. The following are the statistics of this Church:

The number of families recorded as in connection with the church is 41,835; the number of baptisms during the year was 4,296; the number of Sunday-school scholars was 49,758. The amount of contributions for religious and benevolent purposes was \$357,216.86; for congregational purposes, \$1,066,492.45.

The General Synod of the Reformed Church in America met in Brooklyn, N. Y., June 5th. The Rev. J. T. Elmendorf, D. D., of Albany, was elected President. The most prominent topic of discussion concerned the Theological Seminary at New Brunswick, N. J. The committee having the matter in charge reported that the Rev. Dr. Shedd, who at a special meeting of the General Synod, held in the fall of 1871, had been elected Professor of Didactic and Polemic Theology in that institution, had declined to serve. The committee also called attention to the gradual diminution which was taking place in the number of students attend-

ing the seminary. They recommended the enlargement and improvement of the course of instruction, and an increase of the force of professors, to the end that the seminary might offer every reasonable attraction to the students of the Church "to prefer its own institutions to all others." In making these recommendations, the committee used language which was regarded by some members of the synod as reflecting unfavorably upon the present professors. A long debate took place, after which the language of the report was amended so as to do away with the objectionable expressions, and its recommendations were adopted. The Rev. A. B. Van Zandt, D. D., was elected to the vacant professorship. Delegates were received from the Eastern Synod and the Synod of Ohio of the Reformed Church in the United States. The address of the representative of the Eastern Synod was very cordial. The Rev. Dr. Van Zandt had attended the General Assembly of the Southern Presbyterian Church as a corresponding delegate. He reported that he had been received with great cordiality, and that his suggestions toward bringing the two churches into closer relations with each other had met with marked favor. The committee on correspondence with the Classis of North Carolina reported that a warm desire had been expressed by that body for union with the General Synod, but that no steps had been taken in the matter, because it was found that the Classis belonged to the Reformed Church in the United States. The committee on the revision of the constitution reported that they had completed their work. The committee on the revision of the liturgy reported progress. The treasurer of the Centennial Fund presented the following schedule of contributions received up to the time of the meeting of the General Synod:

For the Building Fund.....	\$16,353 59
" Board of Foreign Missions.....	23,557 53
" Domestic Missions.....	12,346 34
" Education.....	6,720 45
" Publication.....	3,755 26
" Sustentation.....	621 35
Special gifts, including contributions for Hol- land sufferers.....	76,961 46
Home objects—Church debt paid, new build- ings and repairs.....	542,103 19
General Centennial purposes.....	781 77
Total.....	\$684,251 21

The time for taking contributions to this fund was extended to January 1, 1873. The receipts of the widows' fund, for 1872, were \$1,815.58. The total amount of this fund was \$34,515.90. The fund for the endowment of Hope College amounted to \$22,300.89. The whole amount of the disabled ministers' fund for the year was \$3,869.82; of this amount \$1,800 had been paid on appropriations, leaving a balance of \$2,069.82. The increase in the benevolent contributions over those of the previous year was \$31,182.86; the increase in contributions for congregational purposes was \$108,875.62. The receipts of the Board of Publication were, from collections, \$10,133.06;

from sales, \$15,148.79. The value of stock had increased \$3,552.37. The amount of the permanent fund was \$16,156.84.

The receipts of the Board of Foreign Missions, for the year ending April 30, 1872, were \$65,273.26. The following is the general summary of the missions under the care of the Board:

MISSIONS.	China.	India.	Japan.	Total.
Stations.....	1	8	3	12
Out-stations.....	11	38	..	49
Missionaries.....	4	7	5	16

The Board of Missions had also, under the direction of the Government of the United States, the care, in Arizona Territory, of the Gila River Indian Reservation agency, containing about four thousand Pima and Maricopa Indians, the Colorado Reservation agency, occupied by about eight hundred Mohaves, and of the Apache Indians upon the Camp Grant, Camp Apache, and Camp Verde Reservations in Arizona, numbering about three thousand souls, in all, about eight thousand Indians.

II. REFORMED CHURCH IN THE UNITED STATES.—The following is a summary of the statistics of the Reformed Church in the United States, for 1872: Synods, 4, viz., the Eastern, Ohio, Northwestern, and Pittsburgh Synods. Classes, 84; ministers, 586; members, 180,299; unconfirmed members, 73,288; Sunday-schools, 1,021; Sunday-school scholars, 58,538; amount of benevolent contributions, \$86,651.58.

The following is an exhibit of the growth of the ministry in this Church from 1820 to 1871:

YEARS.	Ministers.	Absolute Increase in 10 Years.	Increase per cent.
1820.....	60
1830.....	99	39	65
1840.....	173	73	73
1850.....	280	108	63
1860.....	391	111	40
1870.....	548	157	40
1871.....	567

The fourth triennial meeting of the General Synod was held at Cincinnati, Ohio, commencing November 27th. The proceedings were

invested with more than the usual interest by reason of the action taken upon topics on which material differences of opinion exist within the Church. These differences concern doctrines, and the order of worship, and have led to a classification of parties within the church as "High Church," or "Liturgical," and "Low Church" parties. The majority of the churches and members of the Eastern Synod were classed as "High Church," while those of the Western Synods are "Low Church."

A case prominently involving the points of difference was presented in the appeal of Dr. J. H. A. Bomberger, of Ursinus College, from the decision of the Synod of the United States (Eastern Synod), which had met at Martinsburg, W. Va., in October. It is known in the minutes of the General Synod as the "Super Appeal case." Ursinus College, at Freeland, Pa., was established and is conducted by the "Low Church," or non-liturgical party, and is not under the control of any synod. Dr. Bomberger, the president of this institution, without seeking the sanction of any of the Church assemblies, had caused to be inserted in its annual circular an announcement that a full theological course had been added to its departments of instruction for the free use of those who might wish to avail themselves of it. For this, the Synod at Martinsburg had passed the following resolutions of censure against Dr. Bomberger:

Resolved, That the conduct of the said member of the Philadelphia Classis, in assuming the office of teacher of theology, and in giving theological instruction independently of any proper ecclesiastical supervision and direction, is contrary to the constitution and government of the Reformed Church, and therefore disorderly.

Resolved, That this Synod hereby enjoins upon the aforesaid member of the Philadelphia Classis, forthwith to desist from this disorder.

Resolved, That a committee of three be appointed to communicate an official copy of this action to the Rev. Dr. Bomberger, and, in case he does not respect this injunction, it shall be their duty, and they are hereby directed, to institute such constitutional proceedings as shall be necessary to maintain the order of the Church.

The appeal was brought before the General Synod by Prof. H. W. Super. The case was carefully discussed, and decided in favor of the appellant, by a vote of 100 to 78. A minute was adopted, defining the points which were decided, as follows:

1. That the General Synod has decided that the conduct of the Rev. Dr. J. H. A. Bomberger, and those associated with him, in Ursinus College, in giving theological instruction at the request of the Board of Directors, is not disorderly nor contrary to the constitution of the Reformed Church, although they have not been invested with the office of Teacher of Theology by, nor are conducting their theological teaching under, the direction of the Eastern Synod.

2. That the General Synod has decided that the Synod of the Reformed Church in the United States acted unconstitutionally in assuming original jurisdiction in the case of one of the ministers of the Classis of Philadelphia.

An amendment which had been proposed to the constitution to allow the formation of German classes on territory occupied by English classes, was declared adopted, a sufficient number of classes having approved it. The General Synod formally signified its consent to the organization of a German Synod whenever any four or more adjacent German classes, having first obtained the consent of the synods to which they belong, may desire to constitute themselves as such. The Rev. Dr. Bausman, who had visited the General Synod of the Reformed Church in America as a corresponding delegate from this synod, reported that he had been cordially received by that body, and, in response to his address, they had expressed willingness to coöperate with the Reformed Church in the United States, in advancing the kingdom of Christ. The Rev. Dr. Pelz appeared as a corresponding delegate from the General Synod of the Reformed Church in America, and spoke at some length in reference to the relations which the two Churches sustain to each other, especially as regards the subject of Church union. The question of union was referred to a committee, who presented a report, in which they said :

The subject has been before the mind of the Church for several years, and thoroughly discussed in all its bearings, and the conclusions reached have found utterance in the actions of several Church Courts. The General Assembly at Philadelphia, in 1869, had already said that a close union between the two bodies so intimately related in doctrine, cultus, and name, would be both natural and desirable, so soon as the consummation could be reached with the cordial consent of both parties. It is believed that the action of our Church courts is not only in harmony with the common feeling of Protestant Christendom regarding the necessity for unity in the body of Christ, but it is further held that it is expressive of the sincere desire of the Church which the General Synod represents; that it would be a matter for rejoicing throughout its congregation to be brought into the closest relations for which the providence of the great Head of the Church may prepare the way. The union of these two members of the Reformed Church would realize the accomplishment of a hope long cherished.

The following resolution was proposed by the committee, and was unanimously adopted by the Synod :

Resolved, That this General Synod is in full accord with the prevailing sentiment in the Church as it regards the desirableness of Christian unity; looks forward with pleasure to a union with the Reformed Church in America that may be accomplished on a basis satisfactory to both Churches. Believing the time to be at hand when negotiations looking to this end should be initiated, it is resolved by the General Synod to appoint a committee of three from each of the five synods comprising the General Synod, who shall confer with a like committee of the Reformed Church of America on the proposed union between that Church and our own, and report the results of their conference to the General Synod at the next meeting.

The several synods were directed to appoint the committees named in this resolution at their next annual meetings. The Board of Foreign Missions were instructed to select and

take charge of a suitable foreign field at as early a day as possible. The pastors and congregations were advised to coöperate with the German Evangelical Missionary Society of New York, and to pay to it the interest of the foreign mission funds in their hands, until the Church is prepared to commence a mission of its own. A correspondence is to be opened with the Board of Foreign Missions of the Reformed Church in America with a view of making arrangements for sending a missionary from this Church to India or China, who shall labor in sympathy with the missionaries of that Board already in the field. The Board of Home Missions reported that there were under their charge 76 missions, scattered over seventeen States; 41 missions were west of the Alleghany Mountains. The appropriations for the year were \$15,000. Eight missions had become self-supporting during the year. The number of congregations in the missions was 125; of members, 7,000; of Sunday-schools, 160; of scholars, 4,000. The committee on the state of the Church presented a report, in which they made especial remark upon its steady progress and growth since the previous meeting of the General Synod :

The number of ministers has grown from 526 to 586, a net increase of 60; the number of classes from 81 to 84, an increase of 3; the congregations from 1,179 to 1,812, an increase of 133; the membership from 117,910 to 180,299, an increase of 12,389; the additions by certificate and confirmation from 28,962 to 32,809, an increase of 3,847; and the contributions from \$228,817.94, the sum total for the three years ending with November, 1869, to \$247,886.12, the sum total for the three years ending in 1872, the increase being \$18,568.18.

The report refers also, in the following terms, to the differences of sentiment concerning the forms of worship, and some points of doctrine, which prevail within the Church :

That there are two tendencies was distinctly recognized by the General Synod of Philadelphia. This division of sentiment has ripened into antagonism, the adherence of one tendency being arrayed in their practical church-work directly against the adherents of the opposite tendency. While the present state of things exists, there can be no unity, peace, and concord. Instead of concentrating our energies in the way of harmonious action against the common foe, much of our time and strength is expended in maintaining the conflict within our own organization, and in seeking to achieve victory over the other. What is to be done? The status is abnormal. We do not report it in order to attempt to solve the problem, but simply as a matter of fact.

III. REFORMED CHURCH OF FRANCE.—The last meeting of the Reformed Synod of France, previous to that of 1872, was held in 1659, when King Louis XIV. sent a communication to the body demanding its permanent dissolution. It is said that he assigned, as a reason for his order, that the synod "cost the state too much money, and wasted too much of the time of its ministers." The Government had never granted permission since to hold another synod until 1872. Napoleon III. professed an

intention to restore the Reformed Church to its ancient privileges, but never carried it into effect. On the 19th of November, 1871, M. Thiers, President of the Republic, signed a decree restoring to the Church the function of holding provincial and national synods, and authorizing the election of delegates to a synod which was to meet on the 6th of June, 1872.

The meeting of the synod was anticipated with great interest by the Protestants not only of France, but of other states of Europe, and of America. During the period which had elapsed since the meeting of any body which could speak with authority for the Reformed Church, a diversity in faith had been developed among its pastors and members. A "liberal" or Unitarian party had grown up, and acquired much strength under the championship of its leader, M. Athanase Coquerel. The increasing influence of this party gave great offence to the "Evangelical" members of the Reformed Church, and to the orthodox denominations generally. A disruption had already occurred in the body, about twenty-five years before, when a portion of the Church, led by Mr. Frederick Monod, seceded on account of the laxity in doctrine which was allowed, and formed the union of the Evangelical Churches of France. The Evangelical party, believing themselves to be still the stronger party in the Church, hoped, if the synod were held, to be able to commit it to a fixed basis of doctrine, which would exclude all Unitarianism and rationalism, and place the Church among those of pronounced orthodox faith. This subject was fully discussed during the months which elapsed between the calling and the meeting of the synod, and was the most important feature in the programme of the orthodox party.

The synod met in the *Temple du Saint-Esprit*, Paris, on the 6th of June, 1872. The division of parties was made manifest from the beginning of the session, when the members of the synod, following the fashion of the National Assembly, seated themselves according to their affiliations, on the Right and Left, and in the Centre. The orthodox members occupied the Right and Right Centre, and the Liberal members the Left and Left Centre. Pastor Bastie, of Bergerac (orthodox), was elected moderator by a majority of eleven votes over Pastor Viguer, of Nîmes (liberal). An address of thanks was voted to M. Thiers for issuing the decree by which the meeting of the synod was authorized. The first three days were spent mainly in settling the minor arrangements. The vote on the election of a moderator had shown that the orthodox party were in the ascendant in the synod, and that, if any determination were made on doctrine, it would be in favor of their views. In order to prevent this, a motion was made in behalf of the Left, declaring "that the synod, as it does not really represent the Church, since some consistories are larger than others, be

regarded only as a consultative assembly, with no powers to make any organic or constitutional law." This motion was rejected, and the competency of the synod to legislate for the Church was declared by a vote of 61 to 45.

M. le Professeur Blois proposed a profession of faith in the following terms:

At the moment of renewing the series of her synods, interrupted during so many years, the Reformed Church of France feels, before all else, the need to return thanks to God, and to testify her love to Jesus Christ, her Divine Head, who has sustained and consoled her throughout so many trials. She declares herself to remain faithful to those principles of faith and liberty on which she was founded. With her fathers and martyrs of the Confession of Rochelle, with all the churches of the Reformation under their different creeds, she proclaims: The sovereign authority of the Holy Scriptures in matters of faith and salvation, by faith in Jesus Christ, only Son of God, who died for our offences and rose again for our justification. She preserves, therefore, and she maintains, as the basis of her teaching, her public worship and her discipline, the great Christian facts represented in her sacraments, celebrated in her religious solemnities, and expressed in her liturgies, more especially in the confession of sins, in the Apostles' Creed, and the liturgy of the Holy Supper.

An animated debate of ten days' duration ensued upon this confession, at the end of which it was adopted by a vote of 61 to 45, as the basis of the doctrine of the Church. Motions by the liberals that the confession should be simply communicated to the churches under the form of a synodical letter; that it should be simply recommended to the churches, and not obligatory upon them; and that no disciplinary consequences should follow its promulgation, were voted down by the same majority as that by which the confession was adopted.

The following rule regarding the qualification of electors was adopted:

"An elector in the Church must declare himself heartily attached (*de cœur*) to the Protestant Reformed Church of France, and to the revealed truth, as it is contained in the sacred books of the Old and New Testaments." This rule received 77 votes. No votes were recorded against it, but 24 members abstained from voting, and 7 were absent. Proposals were made to the Left for the representation of minorities in churches in the various bodies, but they were not acceded to.

The following rule was adopted in reference to the admission of candidates for the ministry: "Every candidate for the ministry in the Reformed Church of France must adhere to the faith of the Church as defined by the General Synod at the beginning of the session." This received 62 votes to 39 cast against it. Seven members were absent.

The general effect of the action of the synod is to permit the Unitarian members and ministers to remain in the Church and to vote, upon declaring attachment to the Church and the revealed truth of the Old and New Testaments, but to prevent the ordination, in the

future, of ministers who will not subscribe to the Confession of Faith.

The following resolution on the separation of Church and state was agreed to :

The synod, considering that the reciprocal independence of the Churches and of the state ought to be introduced into modern public law ; considering that the Reformed Church of France is disposed, for its part, to accept with confidence its separation from the state, when the Government shall deem it necessary for all religious bodies, the synod deems it well to urge the Church to prepare for this separation.

The synodal presbyterian form of government was decided upon. The pastors are to be nominated by a presbyterial council. The consistory is to have the right of veto. When this right is exercised, the case may be referred to the Provincial Synod, and to the General Synod as the highest authority. A resolution prescribing the ability to read and write as an essential qualification for votes after the 1st of January, 1875, was adopted unanimously.

The synod was visited by representatives of the Presbyterian Church in the United States of America, who congratulated it on its resuming its meetings under a liberal government. It is represented that the Unitarian party is stronger in the churches than it appeared in the synod.

RHODE ISLAND. After an unprecedentedly long session of seventeen weeks, the General Assembly holding its session in Providence adjourned, without having passed any measures of general public interest. The revision of the statutes was completed, and two congressional districts of the State were reformed. A new apportionment of the House of Representatives was also made. The number of members will be 72, as heretofore ; but there will be one representative for every 2,794 inhabitants, instead of 1,875. Each town shall be entitled to at least one representative, and no town will be entitled to more than twelve.

The subject of politics attracted more than usual attention during the year, owing to the interest felt in the coming presidential canvass, and to the singular attitude of parties in relation thereto. The Republican State Convention assembled in Providence, March 14th, with General Burnside as president, and chose a State ticket and delegates to the National Republican Convention. The State ticket consisted of Seth Padelford, of Providence, for Governor ; Pardon W. Stevens, of Newport, for Lieutenant-Governor ; Joshua M. Addeman, of Providence, for Secretary of State ; Willard Sayles, of Providence, for Attorney-General ; and Samuel Clark, of Lincoln, for General Treasurer. The resolutions adopted were as follows :

Whereas, The annual convention of the National Union Republican party of Rhode Island is now in session for the purpose of nominating to the people of the State suitable candidates for their support for general affairs, and for the selection of delegates to the National Convention of the party, to be holden in Philadelphia in June next, to nominate candidates

for the offices of President and Vice-President of the United States for the next presidential term, it is fitting now, before we proceed further with the work of the convention, that we should give expression to our views of the principles and policy of the party which we represent : it is, therefore—

Resolved, That the National Union Republican party of Rhode Island adheres to and here reaffirms the principles of the party announced at the various national conventions thereof, and illustrated by the glorious and patriotic records of the Administrations of Presidents Lincoln and Grant.

Resolved, That we highly appreciate the distinguished services of the eminent soldier, the upright and practical civilian, who is now the Chief Magistrate of this great republic, and that we earnestly favor his renomination and reelection to the office of President of the United States.

Resolved, That in Schuyler Colfax we recognize an experienced statesman, a fit presiding officer of the Senate of the United States, and an upright and intelligent magistrate, and that we cordially favor his renomination and reelection to the office of Vice-President of the United States.

Resolved, That we especially commend the efforts of President Grant to secure integrity and economy in the administration of the Government, to reduce the burdens of taxation imposed upon the industries of the country by the late war, and to honorably discharge the debt which was incurred in the salvation of the nation.

On the 20th of March the Democratic Convention was held in Providence. Candidates for State offices were nominated, and delegates were elected to the National Democratic Convention ; but the subject of resolutions was referred to the State Central Committee. The election was held April 8d, and resulted in the success of the Republican ticket, except the Lieutenant-Governor, Charles R. Cutler, the Democratic candidate, having been elected to that office. The majorities of the different candidates elected varied greatly, on account of local issues. The highest majority on the Republican ticket was 3,869 ; that of Governor Padelford was 1,075.

The General Assembly convened at Newport on the 28th of May, and, after organizing the State government for the ensuing year, adjourned on the 31st to the second Monday of January. The new Legislature consists of 56 Republicans in the House and 25 in the Senate, and 16 Democrats in the House and 11 in the Senate.

On the 8th of October the Democratic party and the Liberal Republican party each held a convention in Providence. The two parties united upon an electoral ticket. The following resolutions were adopted by the Democratic convention :

Resolved, That we, the representatives of the Democratic party of Rhode Island, in convention assembled, do approve, ratify, and adopt the platform and resolutions of the Democratic Convention held at Baltimore, and the Liberal Republican Convention at Cincinnati.

Resolved, That we will heartily support the candidates nominated at these conventions, and will unite with all persons who sympathize with us in our efforts to establish a permanent reform, and the establishment of peace and good-will toward the people of all sections of the country.

At the election, the whole number of votes

cast for President was 18,994, of which 13,665 were for Grant and 5,329 for Greeley, giving the former a majority of 8,336.

The State debt amounts to \$2,627,500, it having been reduced to that amount from \$4,000,000 since the close of the war. A part of the State bonds are due in 1882; but more of them are due in 1893 and 1894. The present condition of the State finances is as follows:

Balance in the Treasury April 30, 1872.....	\$171,127 00
Estimated receipts from the usual sources of revenue for the fiscal year ending April 30, 1873.....	671,665 00
	<hr/>
	\$842,792 00
Estimated payments to be made up to the same time.....	725,158 00
	<hr/>
Balance in the Treasury.....	\$117,634 00

The income of the State is derived from the direct tax of $\frac{1}{4}$ of 1 per cent. on the valuation of the different towns for 1866, the total amount of which valuation for that year was \$189,687,591, giving an income of \$474,218. The valuation of the towns for 1871 was \$221,945,035, an increase in five years of \$39,657,444. The increased valuation for 1872 over that of 1866 cannot be much less than \$50,000,000, which, with the increased revenue derived from the deposits in the savings-banks, the tax on which is to be $\frac{1}{4}$ of 1 per cent., instead of $\frac{1}{16}$ per cent. as heretofore, will, if the valuation of 1872 is adopted, swell the receipts of the General Treasurer over former years to more than \$150,000.

The reformatory institutions of the State are in a satisfactory condition. In the Work-house and House of Correction on the State farm are 148 males and 50 females, and in the Insane Asylum 70 males and 83 females. Sixty-five convicts are confined in the State-prison, and 110 in the jail. The earnings of the prison during the year amounted to about \$5,000 above the expenses.

According to the report of the Commissioners of Public Schools, the total expenditures for school purposes for the year ending April 30, 1872, amounted to \$465,623, and the receipts to \$496,906. There are in the State 423 school districts, the attendance in which averages 21,805 in summer and 23,052 in winter. The per cent. of average attendance on total school population is 53. In the summer schools the number of male teachers is 93, and of female teachers 612; in winter schools the male teachers number 177, and the female teachers 579. The average wages per month, including board, is \$34.85 in summer schools and \$39.72 in winter schools. The length of school-year ranges from 30 to 39 weeks, being shortest in Washington County, where it amounts to 30 weeks and 3 days, and longest in Bristol County, where it amounts to 39 weeks and 1 day.

The Commissioners of Inland Fisheries continued their exertions during the year in promoting the important work of fish-culture in the inland waters, with encouraging results.

The ova of salmon and trout have been procured, hatched, and placed in the waters natural to them. The ova of shad have been introduced into the Blackstone, Pawtuxet, and Pawcatuck Rivers, in which streams these fish were formerly found. A pond in Newport and another in Tiverton have been stocked with black bass of the northern lakes, an excellent fish, well adapted to such waters; and arrangements have been made for stocking other ponds with the same fish.

Important public improvements have been in progress during the year by means of appropriations made by the General Government. Chief among these is the breakwater on Block Island. For this work Congress has already appropriated \$155,000, including an appropriation of \$50,000 made in June, 1872. This sum will enable the contractors to extend the pier or breakwater so as to afford protection to vessels seeking a refuge. Steam-dredges are employed in deepening the harbor within the pier.

The appropriations for improving the navigation of Pawtucket River, made by Congress since the year 1867, amount in the aggregate to \$42,000, of which sum \$10,000 was appropriated in June last. Formerly this river was almost useless for navigation, but, by the recent dredging, the water has been so deepened that vessels drawing eleven feet of water can ascend at high tide. When the dredging now contemplated is completed, it is estimated that there will be seven feet at low water.

An appropriation of \$10,000 was also made for straightening and deepening the channel of Providence River. The appropriations for improvements within the borders of Rhode Island made by the United States Government, from 1866 to 1872, amount to more than \$500,000.

"But these improvements in our navigable waters," says Governor Padelford, "are not all for which the United States Government has made appropriations within our borders, and for our particular benefit. Light-houses have been built and repaired; beacons, to guide the mariner and keep him from dangerous shoals, have been constructed at a great expense; sea-walls have been built to protect certain shores; fog-signals have been put up, and provisions made for keeping them in operation, at Point Judith and Beaver-Tail; and a life-saving station has been established on Narragansett Beach, and one also on the south side of Block Island."

According to the census of 1870, of the total population (173,751) ten years old and over, there were engaged in all classes of occupations 88,574 persons, of whom 66,859 were males and 21,715 females. There were engaged in agriculture 11,780, including 11,767 males and 13 females; in professional and personal services, 19,679, including 12,349 males and 7,330 females; in trade and transportation, 10,108, including 9,878 males and 230 females; in manufactures and mechanical and

mining industries, 47,007, including 32,865 males and 14,142 females.

The State contained 289,080 acres of improved land, 169,899 of woodland, and 48,879 of other unimproved land. The cash value of farms was \$21,574,968, of farming implements and machinery, \$786,246; total amount of wages paid during the year, including value of board, \$1,124,118; total (estimated) value of all farm productions, including betterments and additions to stock, \$4,761,163; orchard-products, \$43,086; produce of market-gardens, \$316,133; forest-products, \$254,688; value of home manufactures, \$37,847; of animals slaughtered or sold for slaughter, \$755,552; of all live-stock, \$3,185,132. There were 7,770 horses, 43 mules and asses, 18,806 milch-cows, 5,821 working-oxen, 9,748 other cattle, 23,938 sheep, and 14,607 swine. The chief productions were 588 bushels of spring, and 196 of winter, wheat, 20,214 of rye, 811,957 of Indian-corn, 157,010 of oats, 83,559 of barley, 1,444 of buckwheat, 796 pounds of tobacco, 77,328 of wool, 9,920 bushels of peas and beans, 669,408 of Irish, and 142 of sweet, potatoes, 765 gallons of wine, 941,199 pounds of butter, 81,976 of cheese, 1,944,044 gallons of milk sold, 89,045 tons of hay, 954 bushels of clover-seed, 1,938 of grass-seed, 249 pounds of hops, 20 gallons of sorghum molasses, 629 pounds of honey, and 498 of wax.

The total number of manufacturing establishments was 1,850, using 403 steam-engines of 28,546 horse-power, and 456 water-wheels of 18,481 horse-power, and employing 49,417 hands, of whom 28,804 were males above sixteen, 14,752 females above fifteen, and 5,861 youth.

The total amount of capital invested was \$66,557,322; wages paid during the year, \$19,354,256; value of materials consumed, \$78,154,109; of products, \$111,418,354.

The whole number of newspapers and periodicals was 82, having an aggregate circulation of 82,050, and issuing annually 9,781,500 copies. There were 6 daily, with a circulation of 23,250; 1 semi-weekly, circulation 1,200; 19 weekly, circulation 43,950; 6 monthly, circulation 13,650.

There were 759 libraries, having 698,887 volumes. Of these 425, with 883,691 volumes, were private, and 334, with 809,696 volumes, were other than private, including 32 circulating libraries, with 65,750 volumes.

The total number of religious organizations was 295, having 283 edifices, with 125,183 sittings, and property valued at \$4,117,200.

The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	109	34,886
Christian.....	13	3,050
Congregational.....	27	18,500
Episcopal.....	43	17,173
Friends.....	17	5,514
Methodist.....	88	14,605
Roman Catholic.....	22	19,108
Second Advent.....	17	3,870

The condition of pauperism and crime is shown by the following statistics:

Total population.....	217,253
Number of persons receiving support during the year ending June 1, 1870.....	1,046
Cost of annual support.....	\$97,702
Total number receiving support, June 1, 1870..	684
Native.....	442
White.....	407
Colored.....	35

ROMAN CATHOLIC CHURCH. During the year 1872 the Catholic Church experienced no little opposition in its head and its members. The Pope remained in the Vatican under the same circumstances as in the preceding year, relying entirely on the contributions of Catholics throughout the world, and declining all recognition of the acts of the Italian Government. He issued no bull or brief of important bearing; the official acts relating to local matters. On the anniversary of his accession to the Pontificate, and on other occasions, Pius IX. received delegations of Catholics from Rome, various parts of Italy, and from other countries, and his replies to the addresses made him on these occasions attracted, in many cases, general attention. His reply to the address of two German clubs, June 24, 1872, gave great offence to the Government of the German Empire. The important portion of the reply is as follows:

Behold, then, a persecution already prepared and commenced in Germany; the Prime-Minister of a Government, after its victorious successes, is the chief author thereof, but we have sent to tell him—and you may likewise publicly proclaim it—that triumph unaccompanied by modesty is but fleeting, that triumph united with opposition to the Church is the utmost madness. This very persecution which Catholics suffer at the hands of the persecutor will hasten the diminution of that triumph.

I have sent to inform that Prime-Minister that hitherto Catholics have been favorable to the Germanic Empire. I have informed him that I have always received from bishops, from priests, and Catholics at large, continued accounts of the contentment they experienced at the cordial manner in which they were treated by Government, and of the freedom preserved to the Church. And the Government itself appeared satisfied with the Catholics. How, then, after these declarations and confessions of the German Government itself, how is it that the Catholics are suddenly transformed into people who disobey and who conspire? This is the question I have had put to him, to which I have received no answer; nor shall I have a reply just yet, since truth is unanswerable. Be that as it may, let us elevate our eyes toward God, let us be confident and united, and, ere long, some pebble rolling down from the mountain will bruise the heel of the Colossus.

But should the Lord will that further persecutions come, the Church knows no fear; on the contrary, persecutions purify her, strengthen her, and increase her beauty and her loveliness; since even in the Church there are subjects for purification, and persecutions from the great ones of the earth better serve that end.

Let us then quietly await God's will, but be ever

filled with faith; have respect and entire docility toward the Government—not, however, toward laws contrary to the Church.

He had, on the 16th of the same month, in a letter addressed to Cardinal Antonelli, protested against the proposed law of the Italian Government for suppressing all houses of religious orders in Rome, and said :

Who can deny that to suppress the religious orders at Rome, or to limit, arbitrarily, their existence, is not only to attack the liberty and independence of the Roman Pontiff, but to take out of his hands one of the most powerful and effectual means for the government of the Universal Church !

Every one knows that, as the centre of Christendom is at Rome, so the religious houses that have been long established here are, so to say, the centres of all these orders and congregations respectively, that are spread through the Catholic world. They are like so many special seminaries built by the indefatigable care of Roman Pontiffs, endowed by the generosity of pious founders—even foreigners—and governed by the supreme authority of the Sovereign Pontiff, from whom they receive life, counsel, and direction. These houses have been founded with the purpose of furnishing laborers and missionaries for all parts of the world. Without reverting to history, it suffices, at this day, to run the eye over the different countries of Europe and the farther and more inhospitable fields of Asia, Africa, America, and Oceania, to appreciate the advantages for the Christian republic, and for the whole human race, procured by these followers of the evangelical counsels. In all those regions these zealous servants of God are consecrating their strength, their health, their very life, with an admirable self-denial, to the good of the people.

But, with the religious orders suppressed at Rome, or their existence in any manner hindered, the world will no longer reap the advantages, as now, of these pious and charitable institutions. For at Rome are established, so to say, the principal novitiates for furnishing fresh soldiers of the faith. It is to Rome that the religious of every nation flock, to retemper their dispositions, and to give account of their missions. It is at Rome that are discussed, under the shadow of the Apostolic See, all the principal interests, even those of distant lands, belonging to these communities of religious. It is at Rome that are elected, in assemblies of religious of many nations, the superiors-general, the dignitaries of the orders, and the provincial heads.

How, then, can it be expected that, without these great centres, established as they now are, the life-giving and beneficent work of these evangelical laborers can be productive of the same results ? It cannot be. To suppress the religious houses at Rome is to leave without life the communities of religious scattered all over the world. And to rob them of their properties at Rome, is to strip each order throughout the world of its legitimate possessions.

Thus, then, the suppression, at Rome, of the religious orders is, not simply an open wrong done to the well-deserving individuals of each ; but, much more, it is a real attack on the international rights of the whole Catholic world. It is, besides, a duty of obligation for us to declare that the suppression of religious houses at Rome might be, at given times, very prejudicial to the Apostolic See ; for it is among the more distinguished subjects of these houses that useful collaborators are chosen for the holy ministry, assistants of the different ecclesiastical congregations, who serve the Church most usefully, in giving information in regard to the different missions confided to their care, or in bestowing profound study on refutations of error, or in rendering wise advice on divers questions of discipline relating to the various churches of the Catholic world.

It is, then, manifest, cardinal, what is the object sought by the usurping government, in its proposed law preparing for the suppression of the religious orders at Rome. Ay, it is but the continuation of the injurious and revolutionary plan that has been pursued, hypocritically, from the day of the forcible occupation of Rome, and by means of which they wish to attack not only our temporal authority, but especially, and above all, our supreme Apostolate, for the advantage of which, said they, the annexation of the patrimony of the Church was made—a patrimony bestowed on the Roman Pontiffs by an admirable disposition of Divine Providence, and possessed by the Popes for more than eleven centuries, by titles the most legitimate and sacred ; and for the good of all.

This letter defined his position, in regard to the Italian Government, in these words :

And how, in fact, since the new order of things, can the Pope style himself free and independent ? It suffices not that he may, for the moment, call himself materially free as to his person ; he should be, and should appear in the eyes of all, free and independent in the exercise of his supreme authority. Now, the Pope neither is, nor can be, free and independent, so long as his supreme power is subjected to the arrogance and caprice of an adverse power ; so long as his elevated ministry is made a mark for the influence and for the predominance of political passions ; so long as his laws and his decrees cannot pass exempt from suspicion of partiality or of offence toward the respective nations. In the new condition of things, forced on the Pontificate since the usurpation of the patrimony of the Church, conflict between the two powers is inevitable ; concord and harmony cannot depend upon the will of men ; relations between the two powers, based upon an absurd system, can have no other effect save those naturally resulting from opposing elements, which must necessarily keep them in continuous and painful contention.

History itself is filled with collisions between the two authorities, and of examples of commotions within the Christian family, every time the Roman Pontiffs were even momentarily subordinated to the authority of foreign power. The reason thereof is but too clear. The world being subdivided into a very considerable number of states, each independent of the others, some strong and powerful, some weak and small, peace and tranquillity could not exist in the consciences of the faithful, otherwise save in proportion to their certainty and secure conviction of the entire impartiality of the common Father of the faithful, and of the independence of his actions. Now, how could that be at present, if the action of the Roman Pontiff be continually exposed to party agitation, to governmental despotism, and to the danger of finding, at every turn, his repose disturbed, as also the tranquillity of his counsellors and of his ministers themselves ?

Likewise the freedom of the sacred congregations, whose duty it is to resolve questions, and to respond to all the consultations of the Catholic world, is of immense importance to the security of the Church, and to the legitimate imperious needs of all Christian nations. It is requisite, in short, that none, ever upon earth, can doubt the liberty and independence of the decisions and decrees emanated from the common Father of the faithful. It is necessary that no one be disturbed by the fear of extraneous pressure in Pontifical resolutions. It is incumbent that the Pope, the congregations, the conclave itself, not only be free in fact, but that said liberty appear manifest and evident, and that neither doubt nor suspicion arise in this respect. Now, the religious liberty of Catholics having, as an indeclinable condition, the freedom of the Pope, it follows that, if the Pope, supreme judge and living organ of the faith and of the laws of Catholics, be not free, they can

never feel reassured as to the freedom and independence of his acts. * * *

What avails it that the door of our domicile be not closed against our exit, once we could not issue forth without witnessing impious and revolting scenes, without exposing ourselves to insult at the hands of people gathered hither to foment immorality and disorder, without incurring the peril of rendering ourselves an involuntary cause of contention amid citizens! What matters promising personal guarantees to the high dignitaries of the Church, when they are obliged even to conceal, when in the streets, the insignia of their dignity, in order not to be liable to every style of bad treatment; when the ministers of God and the most sacred things are objects of derision and of mockery, so that it be not frequently even expedient to perform, in public, the most august ceremonies of our holy religion; when, finally, the sacred pastors of the Catholic world, who are, from time to time, obliged to come to Rome to report upon the affairs of their respective churches, may find themselves exposed, without any royal guarantee, to the like insults and, possibly, even to similar dangers!

The following allocution of the Pope to the Cardinals, delivered December 22, 1872, is the great official act of the year:

VENERABLE BROTHERS: The just and merciful Lord, whose judgments are inscrutable, and whose ways are not to be scanned, permits this Apostolic See, and the whole Church in union with it, to groan under a long and cruel persecution. Our and your condition, venerable brothers, has not been changed, but rather is daily aggravated since the occupation of our provinces, and especially since, two years ago, this glorious city was withdrawn from our paternal rule. The experience of our yoke has taught us how correctly, from the beginning of this persecution promoted by the machinations of wicked sects, and perpetrated and carried on by their disciples at the head of public affairs, we frequently, in our allocutions and apostolic letters, have asserted openly that the sovereign rights of our secular principedom were attacked with so much force, for no other reason than that so a way might be laid toward abolishing, if that could be done, the spiritual authority in which the successors of Peter are glorious, and to obliterate the Catholic Church, and the very name of Christ Himself, living and reigning in it. Very clearly, indeed, has that been shown by the hostile acts of the sub-Alpine Government, especially by those iniquitous laws, by which even the clerics, torn from the foot of the altars and deprived of their immunity, have been summoned to the military service; by which even bishops have been deprived of the right of teaching youth, and their seminaries have been closed. Still this purpose of theirs shall be made still more clear by us. In this very city the religious congregations are disturbed under our own eyes, or violently driven out from their houses, and the property of the Church subjected to an enormous tribute, and handed over to the disposition of the civil authority. Even now there has been proposed in the Legislative Chamber, as they call it, a law not wholly dissimilar from that which, notwithstanding our protest and solemn condemnation, has already been put into execution in other parts of Italy, which must extinguish, even here in the centre of Catholic faith, the religious congregations, and confiscate the goods of the Church and offer them at public auction. But this law—if, indeed, we can honor by such a name a decree so repulsive to natural, divine, and social right—is much more iniquitous and criminal in Rome and the adjacent provinces. It injures more deeply and sorely the rights and possessions of the universal Church. It attacks the very foundation of the true social civilization, which the religious orders, with unceasing labor and equal courage and constancy, have pro-

moted and perfected, not only in our territory, but which they have brought and still bring to foreign and barbarous nations, despising difficulties, dangers, losses, even life itself. In fine, this law attacks the rights and privileges of our Apostolate, since, if the religious houses were obliterated or notably reduced, and the secular clergy reduced to destitution and gradually diminishing in numbers owing to the military conscription, not only here as elsewhere would there be wanting those who should break the bread of life to the people, who should administer the sacraments to the faithful, who should teach the young and strengthen them against the innumerable snares daily laid for them, but the Roman Pontiff would be deprived of those aids which, as the universal master and pastor, he so much needs for the government of the entire Church.

The spoliation of the Roman Church would include those treasures which have been gathered here and placed in this centre of unity by the generosity of all Catholics rather than by the gift of our own people. And so those treasures which were brought here for the use and increase of the universal Church will be impiously converted to the use of others. Scarcely had we learned that one of the ministers of the sub-Alpine Government had signified to the Legislative Assembly his purpose of submitting to it a law of this kind, than we exposed its monstrous character through a letter of the 16th day of June of this year (1872), addressed to our Cardinal Secretary of State, and we commanded him that he should make known to the ambassadors of the foreign princes near the Holy See this new danger impending over us. Nevertheless, as the threatened law has been proposed, the duty of our Apostolate requires that we should renew with a louder voice the expostulations already made in your presence, venerable brothers, and before the universal Church. Execrating this nefarious crime, in the name of Jesus Christ, whose vicar we are on earth, we condemn it by the authority of the holy apostles Peter and Paul, and by our own, together with any scheme of law which shall arrogate to itself the power of disturbing the religious orders in Rome and the adjacent provinces, and of depriving the Church there of its property and disposing of it for the benefit of the treasury or otherwise. We therefore pronounce invalid whatever is done against the rights and patrimony of the Church. We declare absolutely void and null any acquisition, by any title, of the stolen goods, against alienation of which this Apostolic See will never cease to protest. Let the authors and supporters of this law remember the censures and spiritual punishments which, *ipso facto* incurred, the apostolic constitutions inflict on the invaders of the rights of the Church, and, pitying their souls bound by these spiritual chains, let them cease to lay up treasures of anger against the day of wrath, and of the revelation of the just judgment of God.

The very bitter grief with which we are afflicted, on account of these and the other injuries wrought against the Church throughout Italy, has been not lightly increased by the cruel persecutions to which it is subject elsewhere, especially in the new German Empire, where not only by secret machinations, but also by open force, they attempt to subvert it from the very foundation, since men who not only do not profess our holy religion, but do not even know it, claim for themselves the right of defining the dogmas and rights of the Catholic Church, and while they disturb her they have the audacity to declare that they do her no injury. Moreover, adding calumny and derision to injury, they do not hesitate to attribute this cruel persecution to the fault of the Catholics, forsooth; that their prelates and priesthood, together with the faithful, refuse to prefer the laws and will of the civil empire to the holy laws of God and the Church, and to abstain from their religious duty.

Would that the guides of public affairs, taught by a long experience, might be persuaded that none

of their subjects would with greater exactness than Catholics render to Cæsar the things that were Cæsar's, and this precisely because they desire religiously to render to God the things that are God's!

The civil authorities of some of the cantons of the Swiss Republic appear to have entered upon the same path as the German Empire in deciding on the dogmas of the Catholic faith in favoring apostates and interrupting the exercise of episcopal authority. The Government of Geneva, although bound by a solemn treaty to guard and protect in its territory the Catholic religion, has in the past years enacted laws injurious to the authority and liberty of the Church, and more recently has suppressed the Catholic schools, has banished religious orders, and deprived others of the right of teaching. Lately it has endeavored to destroy the authority which for many years past our venerable brother Gaspar, Bishop of Hebron, legitimately exercises, and to deprive him of his parochial benefice; it has even gone so far as to invite, by public solicitation, the inhabitants to schismatically subvert the ecclesiastical government.

Not less grave is what the Church suffers in Catholic Spain from the hands of the civil power. We have learned that a law concerning the endowment of the clergy has been proposed and ratified, by which not only are the solemn treaties and conventions broken, but absolutely every rule of right and justice is trampled under foot. This law, which is calculated to increase the destitution and servitude of the clergy, and to augment and increase the evils done to that illustrious nation, in these later years, in the injury of faith and ecclesiastical discipline, by a deplorable series of acts of the Spanish Government, has called for the just and emphatic complaints of our venerable brothers the Bishops of Spain, as it now calls for our solemn expostulation.

Sadder things are also to be told of that small but impudent band of Armenians, who, especially at Constantinople, have endeavored by audacious fraud and violence to overwhelm the much greater number who remain faithful in their duty and faith. Belying their Catholic name, they continue in opposition to our supreme authority and their legitimate Patriarch, who, expelled by their artifices, has been compelled to fly, an exile, to us. By their craftiness they have found favor with the civil power, so that, notwithstanding the exertions of our legate extraordinary sent thither to arrange this affair, and our own letter addressed to the most serene Emperor of the Turks, by force of arms they have converted to their own use some of the Catholic churches; they have assembled in a caucus (*conciliabulum*) and have appointed a schismatical patriarch, and have succeeded in depriving the Catholics of the rights which they always up to this enjoyed through public agreements. Concerning these troubles of the Church we shall, perhaps, deal more explicitly if our just protests are despised.

But among so many causes for grief we rejoice, venerable brothers, that you can be consoled, as ourselves have been raised up from our affliction, by the constancy and indefatigableness of the bishops of these regions and elsewhere; bishops who, girt round the loins in truth and clad with the breastplate of justice, and closely bound to this chair of Peter, frightened by no dangers, cast down by no affliction, both singly and in a body, by word and writing, by expostulations and pastoral letters, together with their clergy and faithful people, bravely and with alacrity defend the rights of the Church, of this Holy See, and of themselves. They restrain unjust violence, refute calumnies, discover plots, defeat the audacity of the impious, and show to all the light of truth. They strengthen the good, and they oppose, to the assaults of the enemy attacking them on all sides, the strength of a compact unity. To us, afflicted with so many evils of the Church, they afford a most comforting consolation and a powerful help, which will certainly be greater if they take care that the bonds of faith and charity, in which

their minds and affections are joined, should become daily closer. To secure this, let no one think it inopportune that those who, with the authority of metropolitans, preside over the ecclesiastical provinces, should confer with their suffragans in the best manner that circumstances will permit on those measures which will mutually unite and strengthen them all in one mind and sentiment, and let them prepare themselves to undergo with a unanimous effort the difficult contest against the assaults of the impious.

The Lord has truly smitten us, venerable brothers, with His sword, hard, great, and strong; the smoke of His anger ascends, and the fire burns from His face. But will God cast us down forever, or will He not be appeased? No! for the Lord does not forget to have mercy, and He will not stay His mercies in His anger, for He is mighty to pardon, and He may be propitiated by those invoking Him in truth, and He shall pour out on us the riches of His mercy. Let us endeavor to appease the divine anger in this acceptable time of the advent of our Lord. Humbly walking in newness of life, let us go to the King of Peace who is about to come to announce peace to man and good-will. The just and merciful God by whose mysterious purpose we are permitted to see the sorrow of our people, and the sorrow of our holy city, and to sit there when it is given into the hands of the enemy. He will incline His ear to hear; He will open His eyes and see our desolation and the city upon which His name is invoked.

The troubles between the new German Empire and the Roman Catholic Church arose primarily out of the support given by Government to the few Catholic priests and professors who refused to acknowledge the decrees of the Vatican Council.

Bishop Krentz, of Ermeland, having declared Dr. Wollmann and Dr. Michalis, professors of theology, excommunicated, the Prussian Minister of Worship on the 28th of March called the bishop to account, denying the right of any religious denomination to cut off any members from its communion without leave of the state. The bishop, in reply, adhered to his act as one of absolute duty on his part, involving no civil rights, and in so far not under the state control. The Government, however, punished him by depriving him of the usual salary paid to Catholic bishops.

Another cause of dispute arose soon after, in consequence of the appointment by the Emperor of Cardinal Hohenlohe as ambassador to the Pope. Pius IX. declined to receive a cardinal as ambassador from any power, as it was against sound principle, constant usage, and the express direction of the Council of Basle, because the cardinals forming the Pope's Council cannot at the same time represent another government.

The excitement consequent on these collisions of the spiritual and temporal powers led the German Empire to a course of open hostility. On July 4, 1872, the Reichstag passed the following law:

Wz, William, by the grace of God, Emperor of Germany, King of Prussia, etc., in the name of the German Empire, with the assent of the Federal Council, and of the Parliament, ordain as follows:

I. The Order of the Society of Jesus, as well as the monastic Orders and Congregations affiliated to the said Society, are excluded from the territory of the German Empire. The creation of establish-

ments by them is forbidden. Establishments of theirs at present existing shall be suppressed within a period to be settled by the Federal Council, but not later than six months.

II. The members of the Order of the Society of Jesus, or of Orders and Congregations affiliated, may, if aliens, be expelled from the territory of the Confederation. If they are natives, their residence in certain districts, or certain places, may be forbidden, or prescribed, to them.

III. The Federal Council will take the measures necessary for securing the execution of this law.

In faith of which we have set our hand and seal imperial.

Done at Ems, July 4, 1872.
PRINCE BISMARCK.

WILLIAM.

NOTICE CONCERNING THE ABOVE.

In virtue of paragraph III., of the law of the 4th inst., regarding the Order of the Society of Jesus (*Bulletin of Imperial Laws*, p. 253), the Federal Council has decided:

1. The Order of the Society of Jesus, being excluded from the German Empire, the exercise of every function of their ministry, especially in the Church, and in the School, and the giving of Missions, is interdicted to the members of this Order.

2. The establishments of the Order of the Society of Jesus shall be suppressed, at latest in six months from the going into effect of this law.

3. The proper measures, in each special case, for the execution of the law, will be arranged by the police authorities of each locality.

For the Chancellor of the Empire, DELBRUCK.
BERLIN, July 5, 1872.

The law, though naming the Jesuits only, was interpreted by the Government in the widest sense, and not only Jesuits, but Redemptorists, Brothers of the Christian Schools, and even Sisters of Charity, were expelled and their establishments closed.

The German bishops, in a memorandum drawn up at Fulda, September 26, 1872, protested against this act, and the other proceedings, while the bodies to which the law applied, and in some cases individual members claiming rights as nobles, protested, but the law was rigorously carried out. A general association of German Catholics met at Mayence, but only drew down prosecutions by its protests. The law extended not only to Prussia proper, but also to Baden, Bavaria, where the King was unable to retain one of his own family. The excitement produced by these measures continued throughout the year. In December the Catholic churches in the Diocese of Gnesen and Posen (Polish Prussia) were closed, and many clergy prosecuted for reading a pastoral letter of Bishop Ledochowski, appointing the 8th of December for devotions to the Sacred Heart of Jesus, under whose protection he placed his diocese, imploring a suspension of the hostility against the Church.

The allocation already given contributed to continue the excitement in Germany.

Following the example of Germany, the canton of Geneva expelled the Christian Brothers and the Sisters of Charity, who had for some years conducted the free schools of the Catholic population. The canton of Geneva is made up in part of territory taken from France and Savoy in 1814. The Catholic population of the

new canton were, by the brief of Pius VII., in 1819, placed under the Bishop of Lausanne, who was made also Bishop of Geneva. In 1865 M. Mermillod, who had been appointed *curé* of Geneva, was appointed and consecrated by the Pope Bishop of Hebron *in partibus infidelium*, and Bishop auxiliar of Geneva, Monseigneur Marilley, Bishop of Lausanne and Geneva, at the same time nominating him vicar-general of the latter diocese. Bishop Mermillod's appointment was never formally recognized by the cantonal authorities, although he has hitherto appointed the *curés* or pastors of the various parishes, and given confirmation on them, and exercised other episcopal acts. In the excitement arising out of the expulsion of the religious communities, the canton refused, by decree of September 20, 1872, to recognize him any longer as *curé*, cut off his salary, and forbade him to exercise any episcopal functions at Geneva. They also called upon Monseigneur Marilley to recall any powers conferred upon him; but that prelate formally resigned all jurisdiction in the Diocese of Geneva. The Bishop of Hebron, on the 28th, protested against their action, appealing to article 15 of the treaty of Turin, and protocol of the Congress of Vienna, article 887. A protest of the clergy was also made, and the Catholic bishops of Switzerland, on the 24th of September, sustained his position, and encouraged him to remain firm; but the Government proceeded to new measures, and somewhat later expelled Bishop Mermillod from the Swiss soil, upon which he retired to Paris. Upon the occasion of his arrest by the chief of police at Geneva, Monsignor Mermillod drew up the following protest: "I protest in the name of the rights of the Catholic Church, in the name of the liberty of Catholic consciences violated in my person, in the name of my rights as a free citizen of the Helvetic Republic, against the decree of banishment by which the Federal Council puts me outside the territory of my country without having heard me in person, without judging me, and without any violation on my part of any law of the Constitution."

Another Swiss bishop, Monseigneur Lachat, of Basle, had been forbidden by the government of Soleure to publish the canons and decrees of the Vatican Council, under threat of proceedings against him. In October, 1872, however, he pronounced the pastor of Starrkirch excommunicated. The government directed the authorities to prevent by force any other priest from taking the position of *curé*. At a later date they withdrew their recognition of Monseigneur Lachat as Bishop of Basle, declared the see vacant, and requested the chapter to elect a new bishop.

Among the Armenians in the Turkish Empire who recognized the Pope, troubles arose in 1872, at the head of which was Kasangian, Bishop of Antioch. Hassoun, patriarch of the Catholic Armenians, in carrying out the de-

cisions of the Holy See, was exiled by the Sultan.

During the year the dissidents from the Council of the Vatican, whose support by the German Government had been followed by severe action against the bishops and religious orders, maintained their attitude, but without any striking increase in the number of priests, who amounted in all to less than fifty. With a view of effecting an organization, they called a second Old Catholic Congress at Cologne. It met on Saturday, September 20th. It was attended by the Jansenist Archbishop of Utrecht, two bishops of the Established Church of England, the Bishops of Ely and Lincoln, one Protestant Episcopal bishop from the United States, the Bishop of Maryland, and 250 delegates from various parts of Germany. No definite confession of faith was adopted; but, in view of the fact that no bishop had joined them, a committee was appointed to consider the means to be adopted to supply the want by electing one or more bishops.

Fifteen resolutions, adopted by them, on the repose of the theological and juristic committees, maintained: 1, the right of excommunicated old Catholic priests to officiate; 2, that any of them could administer the sacrament of penance without faculties; 3, in any diocese; 4, that congregations may elect their own pastors; 5 and 6 dispensed them from the necessity of using Catholic churches, consecrated altars, etc.; 7 retains liturgical usages "as nearly as possible;" 8 proposes reform; 9, to avoid religious and political questions; 10 leaves setting up of a new organization to the local necessities; 11 provides for reports to central committee; 12 favors civil marriage; 13 declares marriage dispensations unnecessary; 14 declares it lawful to apply to foreign bishops, especially of the Utrecht Church and the Armenian, for ordination; 15 elects a committee of three theologians, two canonists, and two laymen, to arrange the election of bishops, their residence, salary, relation to government and the congregations.

Three other resolutions related to the reunion of Christian churches, and ten others to the rights of the old Catholics as against the state, and the Catholics who accepted the Vatican decrees, claiming recognition and the church property as the only real Catholic body.

The year 1872 was remarkable for a renewal of pilgrimages to various shrines, one of the most important being that to our Lady of Lourdes, in the Pyrenees, to which thousands of pilgrims flocked from all parts of France.

During the year there was no new promotion of cardinals, and four members of the Sacred College died: Cardinal Cyril Alameda, O. S. F., Archbishop of Toledo; Cardinal Nicholas Clarelli, Bishop of Frascati; Cardinal Angelo Quaglia; and Cardinal Aloysius Amat, Bishop of Palestrina. Among other eminent dignitaries who died during the year, was the Aus-

trian Bishop Fessler, secretary of the late council.

RUSSIA (Empire of all the Russias), an empire in Europe and Asia. Emperor, Alexander II., born April 17. (April 29, new style), 1818; succeeded his father, February 18 (March 2), 1855; crowned at Moscow, August 26 (September 7), 1856. Heir-apparent, Grand-duke Alexander, born February 26 (March 10), 1845; married November 4, 1866, to Maria Dagmar (born November 26, 1847), daughter of King Christian IX., of Denmark. Offspring of the union are two sons: Nicholas, born May 6, 1868; and George, born April 28, 1871.

The administration of the empire is intrusted to four great boards or councils, possessing separate functions, but centring in the private cabinet of the Emperor. The first of these boards is the *Council of the Empire*, which has to superintend the general administration of affairs, and propose alterations whenever necessary. It was established by Alexander I., in 1810, and in 1872 consisted of 86 members, exclusive of the ministers who have a seat *ex officio*, and of the princes of the imperial house, who can claim the right to be present at the deliberations. The president, in 1872, was Grand-duke Constantine, the brother of the Emperor. This Council is divided into three departments, namely, of Legislation, of Civil Administration, and of Finance. Each department has its own president, and a separate sphere of duties, but there are meetings together of the three sections. The second board is the *Senate* (Directing Senate), which is the high-court of justice for the empire, controlling all inferior tribunals, and examining into the state of public revenue and expenditure, and having power to appoint to a great variety of offices, and to make remonstrances to the Emperor. It is divided into seven (before 1869 into eight) sections or committees, of which five sit in St. Petersburg and two in Moscow. In the *plenum*, or general meeting of the sections, the Minister of Justice takes the chair, as high procurator for the Emperor. The third board is the Holy Synod, established by Peter I., in 1721, which has the superintendence of all the religious affairs of the empire. The President of the Holy Synod is the Metropolitan of Novgorod. The fourth board is the Council of Ministers. It is divided into eleven departments, namely:

Ministry of	Incumbent.
Imperial House....	Count Alex. Adlerberg (app. 1870).
Foreign Affairs....	Prince Alexander Michael Gortschakoff (app. 1856).
War.....	General Count Millertin (1862).
Navy.....	Admiral Crabbe (1860).
Interior.....	General Timasheff (1868).
Public Instruction.	Count Tolstoy (1866).
Finance.....	Privy-Councillor M. von Reutern (1869).
Justice.....	Count Pahlen (1868).
Imperial Domains.	Privy-Councillor D. Valoniew (1872).
Public Works.....	Lieut.-Gen. Count Bobrinsky (1871).
General Comptrol.	Privy-Councillor M. Abaza.

The area and population of the several governments into which Russia is divided were, in 1872, as follows:

GOVERNMENTS.	Area.	Population.	GOVERNMENTS.	Area.	Population.

	47,113	5,705,607			

The area and population of the great divisions of the Russian Empire were, according to the latest dates (1867), as follows:

COUNTRIES.	Square Miles.	Population.
European Russia (in. Poland) ..	1,994,382	69,864,641
Grand-duchy of Finland.....	184,899	1,830,868
Countries of the Caucasus.....	169,633	4,661,824
Siberia.....	4,717,990	8,837,037
Central Asia.....	1,066,996	2,740,588
Total.....	8,038,830	81,935,458

The most densely peopled portion of the

empire is the ten Polish provinces. In a territory of 107,221 square versts, or 47,113 English square miles, there are 5,705,607 souls, which gives an average of 58 inhabitants per square verst, or 121 per English square mile. Of the Russian provinces, those in which industry has attained its highest degree of progress, and those in which the cultivation of the soil or its more favorable conditions enable it to insure the means of subsistence to a larger number, are the most thickly populated. Thus, Moscow shows an average of 126 inhab-

itants per square mile; Kiev, 114; Poltawa, 104; Koorak, 98; Tula, 97. Another point of some interest is the population of Russian towns. A large number that are officially named such are only villages. About 100 of these have less than 1,000 inhabitants each; some 150 vary from 1,000 to 2,000; and about an equal number are under 3,000. Most of the Russian towns, about 230, have from 5,000 to 10,000 inhabitants. There are only 140 towns in Russia with a population over 10,000. Of this number, only six have over 100,000 inhabitants; three from 75,000 to 100,000; five from 50,000 to 75,000; six from 40,000 to 50,000; nine from 30,000 to 40,000; 22 from 20,000 to 30,000; and, finally, 89 from 10,000 to 20,000 inhabitants.

The religious statistics of the empire, according to the "Statistical Year-Book of the Russian Empire" (vol. ii., Petersburg, 1871), are as follows:

I. EUROPEAN RUSSIA AND POLAND.

DENOMINATIONS.	European Russia.	To 1,000 Pop'n.	Poland.	To 1,000 Pop'n.
Orthodox Gr'k Church	53,189,347	835	39,932	5
Rascolniks	922,079	14	4,552	1
Gregorian Armenians	37,136	0.6
United Greeks	229,260	40
Roman Catholics	2,582,991	45	4,326,473	758
Protestants	2,234,112	35	331,228	58
Israelites	1,329,100	29	783,079	137
Mohammedans	2,353,766	37	606	..
Pagans	255,508	4	472	..
Total	63,653,984	1,000	5,706,607	999

II. FINLAND.

Nearly the entire population of the Grand-duchy of Finland belongs to the Lutheran Church. In 1867 it contained, besides the 1,759,859 Lutherans, 35,538 Orthodox Greeks, and about 800 Roman Catholics.

III. CAUCASUS AND SIBERIA.

DENOMINATIONS.	Caucasus.	To 1,000 Pop'n.	Siberia.	To 1,000 Pop'n.
Orthodox Greek	1,929,925	421	2,873,538	864

IV. CENTRAL ASIA.

The large majority of the population are Mohammedans. The number of the Greek Catholics is estimated, in Akmolinsk, at 20,605, in Semipalatinsk at 50,355, in Semiretchensk at 2,000, in Uralsk at 40,503 (exclusive of 42,443 Rascolniks).

The "Statistical Year-book of Russia" gives the following account of the different nationalities of the empire:

I. EUROPEAN RUSSIA, 1867.

NATIONALITIES.	Population.	To 1,000 Popula'n.
Russians	50,730,000	797
Poles	1,000,000	16
Bulgarians	44,000	0.7
Germans	688,000	11
Greeks	51,000	0.8
Moldavians	910,000	14
Lithuanians	2,438,000	38
Fins	3,158,000	50
Armenians	82,000	0.5
Tatars	1,363,000	21
Bashkors	1,078,000	17
Kirghizes	153,000	2.4
Calmuks	89,000	1.4
Israelites	1,898,000	29
Samolods	4,000	..
Gypsies	20,000	0.5
Other nations	70,000	1

II. KINGDOM OF POLAND.

NATIONALITIES.	Population.	To 1,000 Popula'n.
Poles	3,700,000	649
Russians	640,000	113
Israelites	783,000	137
Germans	290,000	51
Lithuanians	290,000	51
Other nations	3,000	..

III. FINLAND.

The large majority of the population are Fins, who are divided into Tavasts and Kardes. Of the non-Finnish inhabitants, about 125,000 are Swedes, 8,000 Russians, 1,000 Gypsies, and 400 Germans.

IV. CAUCASUS.

Nationalities.	Population.	Nationalities.	Population.
Russians	925,210	Mountaineers	897,945
Grusonians	832,319	Calmuks	..
Armenians	561,784	Nogals	111,678
Greeks	8,537	Others	146,597
Germans	9,649		
Jews	21,676		4,507,556
Tatars	977,191		

V. SIBERIA.

The number of Russians in Siberia is estimated at 2,300,000, that of Israelites at 7,000, that of Germans at 3,000.

The official estimate of revenue and expenditure for the year 1872, as sanctioned by the Emperor, is as follows: revenue, 497,197,802 rubles; expenditure, 496,813,581 rubles; surplus, 384,221 rubles.

The public debt of Russia, on January 1, 1871, amounted to 2,000,414,345 rubles.

According to the project of the transformation of the army, as elaborated by an imperial commissioner, the Russian army is to consist, in future, of 801,707 men on the peace-footing, and of 1,653,393 on the war-footing.

The Russian fleet consisted, in 1872, of 268 vessels, having 34,277 horse-power, with 1,535 guns. The greater and more formidable part of this navy was stationed in the Baltic. The Black-Sea fleet numbered 32; the Caspian, 31; the Siberian, or Pacific, 39; and the Lake Aral, or Toorkistan squadron, 6 vessels. The rest of the ships were either stationed at

Oronstadt or engaged in cruising in European waters.

The movement of commerce in 1869 was as follows (value expressed in rubles): imports, 169,940,000; exports, 121,280,000.

The merchant navy, in 1869, was composed as follows: sailing-vessels, 2,584; steamers, 114; total, 2,648.

The length of railroads in operation, on January, 1872, amounted to 18,944 kilometres. On January 1, 1872, the telegraph-lines in operation had an aggregate length of 50,848 kilometres, while the length of wire was 88,901 kilometres.

On January 22, 1872, an imperial decree was issued, which subjects all male citizens of Russia to military service. It was a few days later followed by another, making the use of the Russian language compulsory in the primary schools of Poland. The efforts of the Russian Government to substitute in the Polish and Baltic provinces the Russian language for the Polish and German, in the schools of all grades, continued throughout the year.

At the meeting of the nobility of the province of Moscow, which was held in February, Prince Mestchersky, who was reelected to the office of marshal, brought forward a scheme for the establishment of a charitable asylum for children of the poorer nobility unable to meet the expenses of education at the Gymnasium of Moscow. An elaborate draught of regulations for the protection of minors and lunatics, and for the appointment of guardians, was discussed and adopted by the assembly. But the most important of the questions debated was the one brought forward by M. George Samarin, an eminent writer of the Pan Slavist school. He submitted to the assembly the draught of a petition to his Imperial Majesty, praying that all persons exiled or imprisoned by the administrative authorities (i. e., the secret police) should have the power of claiming to be brought to public trial within a fortnight after their arrest. The motion was adopted, owing, in a great measure, to the support it received from Count Orloff Davidoff, one of the principal and most enlightened landed proprietors in Russia. The count urged that the grant of the right demanded by the nobility of Moscow would have a beneficial effect on the Government itself, since it would in future protect it from the accusation of abusing an arbitrary power in matters relating to the liberty of the subject. The necessity for advocating such an elementary reform proves the existence of a state of things somewhat incompatible with the reform of the law courts, the emancipation of the serfs, and other liberal measures introduced during the present reign. Under a charter granted by Catherine II. the noble classes possessing a property qualification have the right of holding a triennial Parliament for the purpose of electing officers for the administration of certain funds belonging to the nobility, as well as,

generally, for the purpose of considering matters connected with the welfare of their body, and this convention can make representations to the sovereign with respect to the needs and wishes of the nobility. The meetings are presided over by a marshal of the nobility, who is generally the most influential and distinguished landed proprietor in the province.

On June 12th (old style May 30th) all Russia celebrated the two-hundredth anniversary of the birth of Peter the Great. In all the inhabited places of the vast empire, from the two capitals down to the most insignificant villages, the civil, military, and ecclesiastical authorities united with the people in commemorating the day which gave to the largest empire in the world its greatest man.

The operations of the Russians in Central Asia appeared to reach a crisis in 1872, in the campaign against the Khan of Khiva. The fullest preparations were made for this expedition. So far as was possible, all the impediments which had before stood in the way of an energetic advance, were removed. To make success more probable, it was necessary that the Russians should be in a position of complete security in the two khanates already subjected to their control. This was not difficult to accomplish, for the extension of Russian rule into the centre of the formerly Independent Tartary has struck the Central Asiatics with a terror from which they are not likely to recover for many years. Bokhara had for two years accommodated itself with remarkable equanimity to its inevitable fate. A large fraction of the malcontent mollahs had been made quiet by the premature and evidently violent death of the rebellious Kette Toré, or crown-prince; and the order and subjection to law, prevailing in the parts of the border districts of the Zereschau, which had been annexed to Russia, could not fail to produce a good effect upon the agricultural, as well as the trading class in Bokhara. Expressions of enmity had become less frequent in the current speech of the country; the individual tribes of Ozbeeks and Toorkomans found themselves less free to indulge their warlike tastes. Mosaffar-ed-din-Khan, the ruler of Bokhara, notwithstanding his apparently friendly attitude toward the Governor-General of Russian Toorkistan, was not at all pleased with this state of affairs. He still entertained faint hopes of regaining his former power, as was indicated by his sending embassies to Cabul and Constantinople for sympathy. Yet, mindful of the experience he had already had of Russian strength, it could be assumed that he would be on his guard against giving an actual manifestation of his unfriendliness. In Khokan affairs had, during the two years, been shaping themselves still more favorably for the Russians. Khudajan Khan—who had been stupid and dissolute in his youth—seemed in his more mature age to be quite at ease under

the shadow of Russian suzerainty, and was living quite contentedly, without care for the future of his throne. Liquors, which were scarce and hard to get in the old days of Bokharan rule, were now within easy reach. The Khan could amuse himself at will with photography and Swiss clocks, in freedom from all care concerning the rebellious Kipt Schacks and Kirgheez, or the safety of his life and throne. He had the Russians to thank for the easy life he was leading, and might well be cautious how he forfeited their favor by any disorderly conduct. Affairs wore a very different aspect with his eastern neighbor, the warlike and ambitious Yakoob Kushbegi. The advance of the Russian outposts on the Navin appeared more and more menacing to him. He sought to find some opportunity to get rid of them. The latest Russian occupation beyond the Thian Shan, however, and the acquisition of the Eelee district, had deprived him of all prospect of effecting this end. The faintness of the friendship shown him by the Anglo-Indian Government was also very depressing to him. The East Indian Government had, indeed, while Lord Mayo was Viceroy, sent an able and skilled diplomatic agent to Yarkand, but had so restricted him in time and means that he was able actually to accomplish nothing; and Yakoob Kushbegi found his situation no better than it had been before. Thus Russia had no reason to anticipate effective hostility from that quarter.

Against a Russian advance under these favorable circumstances, Khiva could oppose her own military force of about 30,000 horsemen—a force composed, for the most part, of Ozbeks, the dominant and most settled class of people in the land. Although their arms are of a very primitive character, they are brave and, in a certain sense, effective troops. A ruler of ability might have enlisted in his behalf the nomadic tribes on the borders of the khanate, chiefly the Jomuts on the western border, and the Ischaudors of the midland between the Aral and the Caspian Seas, with their several family stems, who could have furnished him with additional corps of about 10,000 men each, and thus have given him an entire force of 50,000 men. The Khan does not appear, however, to have effected any alliance with these tribes. More serious obstacles than any military force which Khiva could present against an invading army, are offered by the character of the country which such an army would have to traverse to reach the territory of the khanate. Khiva is surrounded on almost every side by steppes of a dangerous and almost impassable character. By whatever road an army could march upon it from the west, the north, or northeast, it would have to pass large stretches of desert, in which neither grass nor water fit to drink can be found, or would be embarrassed by extensive and deep swamps. The intense cold and heavy snows which prevail on the steppes

during the winter are matched by the heat and drought of summer. On the southwest the khanate is protected by the Hyrcanian steppe.

The reason alleged by Russia for commencing hostilities against Khiva was, that the Khivans held as slaves about forty Russian subjects, whom the khan had refused to give up after the Russian Government made a demand upon him to set them free. The captives so held consisted for the most part of fishermen and merchants whom the nomadic Tartars had captured in their inroads into the Russian territory, and had sold to the Khivans. Ulterior motives also, probably, had their influence upon the course of the Russian Government. Among them, the desire to secure commercial advantages and to complete the conquest of that part of Central Asia, was, doubtless, not insignificant.

When the Khan of Khiva learned that the Russians were preparing to attack him, he lost no time in sending ambassadors to sue for peace. One embassy reached Fort Alexander on the 27th of February (old style, March 10th, new style), bringing with it one of the Russian prisoners. The embassy was addressed to the Government of the Caucasus, and was composed of six princes, with Mahmet Amin, the first ecclesiastic of the khanate, as chief. The Khivans presented a written paper to Colonel Lomakin, setting forth that the Khan was prepared to treat with Russia on the following bases: 1. Establishment of peaceful relations; 2. Restoration of all the Russian prisoners; 3. Complete liberty of trading for the caravans; 4. Full and entire submission to the grand-duke, lieutenant of the empire in the Caucasus.

The ambassadors declared that they were not acquainted with the purport of a sealed letter which they brought with them for the Lieutenant of the Caucasus; but they stated the character of the instructions they had received, and these accorded with the contents of the written paper. They had been told to promise restoration of the captives, and the other concessions, on condition of peace being guaranteed. It was afterward found that there were some important discrepancies between the paper presented to Colonel Lomakin and the letter reserved for the grand-duke.

Before the arrival at Fort Alexander of the embassy to the Lieutenant of the Caucasus, the approach of another embassy from Khiva, addressed to the Emperor himself, had been announced at Orenburg. The chief of this embassy was Atalik Imazar, the lieutenant of the Khan among the Karakalpaks, a tribe subject to Khiva; and the ambassadors brought with them numerous presents, including two magnificent horses, but no Russian prisoners. Believing that the object in sending these embassies was merely to gain time, the Russians resolved to stop their further progress, and to tell the ambassadors at once on what condi-

tions Russia would remain at peace with them. The embassy which had reached Fort Alexander, and had afterward embarked on one of the Caspian steamers, was not allowed to proceed beyond Temir Khan Chousa, a port on the east coast of Daghestan. The embassy expected at Orenburg was detained on its arrival. Two conditions were then communicated to the embassies as those on which Russia would agree to remain at peace. They were—1. The immediate restoration of all the prisoners; 2. That the Khan should make explanations to the Governor-General of Toorkistan in regard to the uncourteous replies which he had made to the friendly overtures of that officer. The terms having been made known to Mahmet Amin, he replied that he would send his son to inform the Khan of the Russian demands. Mahmet Amin then returned to Fort Alexander, leaving with Prince Melikoff the letter from the grand-duke. The ambassadors detained at Orenburg were sent back, taking with them the letter of the Khan to the Emperor, which had not been accepted. The Khan afterward dispatched an embassy to the Viceroy of India, to ask for his intervention. A similar embassy had been sent, under similar circumstances, in 1839, to Major Todd, at Herat, and the aid which was asked had then been refused. But the Khan, who labored under the impression, common to the Tartar tribes, that the English and Russians are bitter enemies, was not deterred by this fact, and acted in the fullest confidence that the English would not neglect an opportunity to check a further advance of their rivals for supremacy in Asia. Lord Northbrook received the embassy, but answered their request with a rebuff which is described as very blunt and disheartening. He advised the Khan to accede to the righteous demand of the Czar, by releasing the prisoners, and warned him that England would not allow her friend, Russia, to be injured by him.

In preparing for the campaign, the Russians established their base of operations at Krasnowodsk, a well-fortified military colony situated on the creek of the same name on the east side of the Caspian Sea. The contemplated commercial road to the Oxus, by which it is expected that the time of transportation from the interior of Russia to Central Asia will be shortened one-half, is to start from this point. A railroad is also projected to connect the Oxus with the Caspian Sea, which will be substantially a continuation of the road spanning the Caucasus from Poti to Baku. This route is practicable in fall, winter, and spring; and by it, a Russian army, if not opposed by a hostile force, could reach the banks of the Oxus in ten days. But very few details have been made public of the progress of the campaign. A report which was circulated in October, that the city of Khiva and the Khan had been captured, proved to be false. The expedition was unsuccessful, and its recall and

return were announced in November. Since that time, the Russian Government has been busy with preparations for an expedition on a more extensive and formidable scale, to be commenced as early as possible in 1878. Since the failure of the expedition against Khiva became known, the Russian Government has announced officially that it has completed treaties with the Khan of Khokan, the Ameer of Bokhara, and Yakooob Kushbegi, the ruler of Kashgar, and that any breach of these treaties will be punished with force.

An elaborate narrative of Russian dealings in Central Asia, and statement of the policy of the Imperial Government, appeared in the *St. Petersburg Official Gazette* of November 18th. It held up the accomplishment of the expedition against Khiva as the one necessary condition remaining, should negotiations fail, to the fulfilment of a grand design for civilizing the whole interior of Central Asia. The direct instruments in this scheme are to be the Russian merchants, whose operations the empire is bound in honor to protect. Free intercourse on both sides for the traders of Russia and for those of the khanates—if such there be; protection to be afforded to the caravans by regularly-organized and responsible agents; leave to import into each of the states of Central Asia such quantities of Russian goods as are fairly proportioned to their respective populations: these conditions constitute the programme which Russia would undeviatingly press upon her neighbors. The Khan of Khokan had accepted the conditions early in 1868, under the conviction of his inability to hold out against them. The Ameer of Bokhara, late in the same year, submitted, after his defeats, to the imposition of a similar treaty. In the direction of the borders of China, the country of Chinese Toorkistan was first opened to Russian trade under the treaty of Peking, it being then, at least nominally, a province of the Celestial Empire; and Yakooob Kushbegi, its new, independent ruler, had frankly accepted this part of his obligations. There remained only Khiva to be brought to reason, in order at once to complete the security and develop by trade the full resources of the Russian possessions beyond the Caspian Sea. General Kauffman, who had been so successful with the other petty sovereigns, would insist on the necessary terms being early accepted. This he hoped to accomplish by peaceful means, but, if these failed, force would certainly be used for this highly-necessary object.

The prompt and decided refusal given by the Viceroy of India to the application of the Khan of Khiva for aid against the Russian advance called forth much comment in the English papers. The opposition journals assailed the ministry for what they considered the want of decision and cowardice of its attitude toward Russia. The steady progress of Russian influence in the districts southeast of the

Caspian Sea was regarded as fraught with danger to the English empire in India and to English influence in Persia and Afghanistan. Apprehension was freely expressed, not only that Russia might eventually reach a point from which an actual attack upon some British possession would be practicable, but also that the mere fact of the gradual approach of Russia toward the British lines might encourage the discontented in India to revolt. The news that the Russians had secured from the Shah of Persia a cession of the territory lying on the north side of the river Attreck served to increase these apprehensions.

The English Government was also mindful of the effect of the Russian movement upon its interests in the East, and in due season opened a correspondence with the Russian Government, with a view of coming to an understanding as to what should be the limit of the Russian annexations. On the 8th of October, Lord Granville addressed a dispatch to the British ambassador at St. Petersburg, asking assurances from the Russian Government

that it would not encroach upon territory claimed by the Ameer of Cabul as belonging to Afghanistan. This dispatch contained also a very distinct description of the lines and points which the English Government regarded as marking the northern boundary of Afghanistan. Prince Gortchakoff replied, on the 7th of December, on behalf of the Russian Government, admitting generally the reasonableness of the English demands, but expressing doubts as to the right of the Ameer of Cabul to some parts of the territory claimed by the English as belonging to him. Toward the end of December, the Russian Government dispatched Count Schouvaloff to London, to represent more fully its views to the British Government, and endeavor to secure a modification of the demands made by Earl Granville in his dispatch of October 18th. This was the condition in which affairs stood at the close of 1872. It is proper to add here that the British demands were subsequently conceded, and an agreement was entered into upon the basis proposed by Earl Granville.

S

SANDWICH ISLANDS, OR HAWAIIAN ISLANDS, a chain of islands situated in the North-Pacific Ocean, formerly the kingdom of Hawaii. They consist of 18 islands, eight of which are inhabited. Area, 7,416 square miles; population in 1866, 62,959; in 1872, 57,145. The number of foreigners, in 1866, was 4,194, among whom there were 1,206 children. The largest islands are Honolulu, with 13,521, Hilo, with 4,655, and Lahaina, with 3,501 inhabitants. The revenue for the term from April 1, 1870, to March 31, 1872, amounted to \$964,959, and the expenditures to \$969,784. The public debt on March 31, 1872, was \$177,971. The imports in 1871 were valued at \$1,626,000; the exports at \$1,892,000. The number of commercial vessels entering the ports of the kingdom amounted to 171, of an aggregate burden of 105,993; the number of whalers, 31. The principal articles of export, in 1871, were: sugar, 21,761,000 pounds; rice, 1,284 pounds; coffee, 47 pounds; tallow, 185 pounds; palm, 293 pounds. The principal port is Honolulu; of the 151 vessels entering the port in 1870, 95 were North American, 31 English, 14 Hawaiian, and 11 German.

The population of the islands, since their discovery by Captain Cook, has been decreasing at a fearful rate. In 1779, their number was estimated at 400,000; now they number less than 60,000; and, during each year, the most distressing accounts have come in from the country districts of excessive mortality among the natives. In 1872, from one school district, the agent stated that the deaths for the first quarter were forty-seven; births, eight. From another district a report came in, unofficial,

that the deaths were nearly one hundred against six births.

The King of the islands, Kamehameha V., died in Honolulu on December 11, 1872. He died childless, and, as he failed to avail himself of the privilege conferred by the Constitution, of naming his successor, there was a short *interregnum*. Prince William Lunalilo, who was naturally one of the claimants to the vacant throne, issued a *plebiscitum*, calling on the people to vote for him, and promising them, in the event of his election, to restore the old Constitution of 1852. This Kamehameha had overturned in 1864, and set up a new and usurping one of his own manufacture, according to which the choice of a new ruler, in the event of his failure to appoint a successor, fell to the Legislature. Thus the *plebiscitum* of Lunalilo was entirely informal, put forth only as a means to gain an expression of the people's wishes. A vote was taken in all the districts of the island on January 1, 1873. Over 12,000 ballots were cast, all but 19 of them being for Lunalilo. In the capital district, that of Honolulu, 8,049 were cast, every one of them being for Lunalilo. Another claimant, David Kalakana, had appeared, asking the suffrages of the people, but so firm were they in their attachment to Lunalilo, that hardly any one could be found to espouse his cause. The Legislature was convened on the 8th of January, according to Kamehameha's Constitution, to vote for his successor, or, rather, to ratify in a constitutional way the popular voice which had already declared so unanimously for Lunalilo. In spite of his crushing defeat at the polls a week previous, Kalakana had attempted to

bribe some of the assemblymen by promising them offices in case of his election. On the morning of the 8th of January, the day set for the election by the Assembly, the natives began at a very early hour to surround the Assembly hall, provided amply with sticks and clubs of all sizes, and many with stones and other convenient missiles. A report had obtained very extensive credence that the Assembly, after meeting, would adjourn over a day, as a compliment to the new King, for such Lunalilo really was, needing only the formal ratification of the Legislature to make him so *de jure* as well as *de facto*. But the Kanakas were determined that he should be elected, and that too on that day, and the somewhat mobbish preparations above described were simply intended as a forcible suggestion to the Assembly that such was their will. In spite of this formidable array, through which the members were compelled to pass to gain the hall, one of them had the boldness to rise and move an adjournment, but as soon as this was known outside, and before the motion could be put to a vote, the angry Kanakas shouted out: "Put a rope around that man's neck, and give us the end of it!" Two or three remarks of a nature similar to this had the desired effect, and the motion was not put. The voting was immediately taken up, and, under the pressure of the decided feeling manifested by the natives without, a motion that each member be compelled to write his name on the back of his ballot prevailed easily, and amid the greatest excitement the votes were cast and declared to be unanimously for Lunalilo. The King-elect was crowned the next day in the stone church at Honolulu. His inaugural address proposed important changes in the government; one, that the Legislature be divided in two branches—that of the nobles, and that of the representatives; another, that free suffrage be granted to all natives; and another, that the Attorney-General be no longer considered as one of the cabinet. The legislative assembly afterward ratified these amendments, and all that now remains, before they be incorporated into the Constitution, is that the Legislature ratify them next year. Immediately after his coronation, the King chose his cabinet, evincing in his selections a sound judgment and liberal tendencies.

SANDWICH ISLANDS, LOT KAMEHAMEHA KAPUAIWA, KAMEHAMEHA V., King of the, born in Honolulu, Hawaii, December 11, 1830; died in that city, December 11, 1872. He was the son of Mataio Kekuanaoa and Kinanau (daughter of Kamehameha I.), and, in company with his elder brother, afterward Kamehameha IV., and a number of other sons of the high chiefs, was educated at the Royal School, established by the American Mission in 1839, under the charge of Mr. and Mrs. J. P. Cook. He was quick to learn, and acquired a very thorough education, becoming in time an accomplished scholar and gentleman. But, like most of his race, there lingered about him

a taint of the old heathen superstitions, and, at not very long intervals, he would indulge in gross intoxication, and, in his secluded cluster of cabins on the sea-shore, would direct the performance of all the old rites, dances, and ceremonies of the heathen worship. In 1854 his brother, Kamehameha IV., ascended the throne, and he filled with ability the office of Minister of the Interior. At the death of his brother, November 30, 1863, Prince Lot ascended the throne as Kamehameha V. He had previously visited California and England with his brother. He was somewhat jealous of the influence of the missionaries, and was greatly dissatisfied with the constitution adopted during the reign of Kamehameha III., and which, it is said, was drawn up by the missionaries. He had introduced, soon after his accession, the Established Church of England as the state Church, and had assumed the name of "Head of the Church" as one of his royal titles. In 1864 he summoned a convention to amend the constitution, or, rather, to make a new one; but, dissatisfied with their efforts, he dismissed the convention, abrogated the constitution, and promulgated another of his own composition. He made, however, a very good ruler, and, though he was more nearly absolute than most of his predecessors, seemed, in general, to be actuated by a desire to promote the best interests of his people. He was, nevertheless, discontented with his position, which he said, very truly, offered no basis for the dignity of royalty. He was a man of fine stature, well formed, athletic, and with a regal bearing. He had accumulated large wealth for so small a state, and, as he had no relative living, except an imbecile half-sister, his property will probably revert to the nation.

SAN SALVADOR (REPÚBLICA DE SAN SALVADOR), an independent state of Central America, bounded on the north and northeast by Honduras; on the east, by Nicaragua; on the southeast, by Fonseca Bay; on the south, by the Pacific Ocean; and, on the northwest, by Guatemala. It has an area of 7,500 square miles; and, of its population, which is estimated at 600,000, about one-half are Indians; 290,000 mestizos; 1,000 negroes, and the remainder whites.

President of the republic, General San J. González (re-elected February 1, 1872, for two years); Vice-President, the Licentiate M. Mendez; Minister of Foreign Affairs, Dr. G. Arbiza; Minister of War and Finance, General B. Bustamante; Minister of Public Instruction, the Vice-President; Minister of Justice, the Licentiate M. Trigueros; President of the Congress, M. Vasconcelos; President of the Senate, Dr. J. Silva; Bishop, T. M. Vineda y Zalana.

The standing army consists of 1,000 men, and the militia of 5,000.

The principle articles of export are indigo, coffee, sugar, and balsam of Peru; the values

of the first three of these exports, in 1869, were respectively \$2,447,550, \$507,793, \$250,232, and \$40,000.

The total imports of the republic, in 1870, amounted to \$2,551,560; and the exports to \$3,810,910. Those for the third quarter of 1872 were \$618,828.45 and \$544,916.89 respectively.

The movements at the port of Acajutla, during the year ending September 30, 1870, were as follows:

ENTERED.

Steamers, 25, with an aggregate of 29,507 tons.
Sailing-vessels, 14, with an aggregate of 4,288 tons.

CLEARED.

Steamers, 25, with an aggregate of 29,507 tons.
Sailing-vessels, 14, with an aggregate of 4,288 tons.

The commerce at the ports of La Union and La Libertad was nearly the same as at Acajutla.

The following is a statement of the revenue and the expenditure in 1869:

REVENUE.	
Customs duties.....	\$461,395
Internal taxes.....	143,310
Monopolies.....	155,560
Sundry receipts.....	70,104
Total.....	\$830,371
EXPENDITURES.	
Administration.....	\$153,497
Army.....	223,064
Public debt.....	63,151
Sundry expenses.....	84,938
Total.....	\$504,650

The public debt, in 1869, was (September 30th) \$705,800 at 60 per cent. Annual amortization, \$24,557. Floating debt, \$84,264.

The railway from the capital to Acajutla is progressing rapidly. M. Bueron, the contractor, reported to the Government, in February, that the road had been graded for about one mile in length, and 5½ yards in width. Some 300 men were at work.

Several deputies presented a proposal to reward the services of Mr. Arbizu, the present Minister of Foreign Affairs, with the sum of \$20,000.

A treaty of friendship and alliance between Guatemala and San Salvador was approved by the Congress of the latter country.

The republic, though at the time enjoying complete tranquillity, was nevertheless in continual apprehension respecting the plans and plots of the reactionary parties in the neighboring states against all forms of liberal government. As a proof of this, one of the leading journals referred to the discourse of the President of the Legislative Assembly of Honduras, in which authority was offered to President Medina to declare war against San Salvador, if the latter does not pay all the expenses of the difficulties that took place the previous year.

With respect to ex-President Dueñas, it was thought that he would be delivered over to the civil and military tribunals for trial on all the points on which he was accused.

Early in July a conspiracy was formed against the Governments of San Salvador and Guatemala, but proved futile. The Government of San Salvador was warned that on the 6th and 12th of July a revolution would break out in the capital, in San Vicente, Cojutepeque, and Sensuntepeque, under the influence of the reactionary party, among which the most prominent personages were Archbishop Pinol, the Jesuits, and a part of the San Salvador clergy. These notices agreed with what was rumored in Nicaragua, as having been spoken of by Pinol and the Jesuits there, and had been communicated to the Government of San Salvador. The conspiracy was believed to have many ramifications in Guatemala, its object being to overthrow the Governments of both Guatemala and San Salvador, known not to be friendly to retrograde measures. On one of the days fixed for the attempt, the Indians of Cojutepeque made an unsuccessful assault upon the garrison of that city. A large force was sent thither by the Government.

In view of these disturbances, the President issued a decree prohibiting the publication of newspapers, pamphlets, etc., until a copy thereof should be presented to, and approved by, the Government, and prescribing a fine of \$100 for the first instance of omission to comply with that order, and suspension for the second offence.

Ex-President Dueñas, imprisoned for political offences, was released on bail; but, on the outbreak of the troubles above alluded to, was again deprived of his liberty. Early in August he was expelled the republic, together with sixteen Capuchin friars, and proceeded with them to Panama, where he embarked for Europe.

Bishop Ortiz Urruela was banished from the republic, where he had been residing for a time as a political refugee.

In September President González issued a decree inviting the people of the republic to name thirty-six representatives for the National Constituent Convention. The elections were to take place on the 8th, and the representatives were to meet in the capital on the 25th.

That decree was followed by another in relation to the assassination of the Vice-President of the republic in the capital. The event was declared to be a national calamity; and it was ordered that all the national functionaries should wear mourning for nine days. The assassination was believed to be an act of revenge by the reactionary party.

Amnesty was granted to all the Indians who had taken part in the rebellion in the city of Izalco, in August.

The San Salvador minister to Italy sent \$100 to the Government to be applied in aid of the widows and orphans of soldiers killed in the Honduras campaign.

The Provisional President of Honduras communicated a vote of thanks to the allied forces

of Guatemala and San Salvador for their services in behalf of Honduras.

Don Francisco Bogen had begun the formation of a German colony in San Benito, situated at the foot of the volcano San Salvador. The Government gives its protection to the enterprise, and contributes \$75 toward the passage of each family from San Francisco to the port of Libertad. The colonists will be exempted from military service for ten years. The colony is to consist of 200 families. The principal pursuit will be the cultivation of the sugar-cane.

SAUNDERS, Rev. EPHRAIM DOD, D.D., a Presbyterian clergyman, teacher, and philanthropist, born October 31, 1809, in Morris County, New Jersey; died in West Philadelphia, Pa., September 13, 1872. He was educated at Yale College, graduating thence with the second honors of his class, in 1831, studied theology (we believe at Princeton), was ordained to the ministry in the Presbyterian Church, and settled at Goochland C. H., Va., about 1835. He remained in Goochland County, where he founded several churches, and was active in educational efforts, for sixteen or seventeen years, when, in consequence of ill-health, he resigned the pastorate, and visited Europe, where he travelled extensively. On his return he was settled for a year or two at Pottstown, Pa. His voice failing him a second time, he gave up the pastoral office, and established, in 1857 or 1858, at West Philadelphia, a boys' school of the highest grade, under the name of the Saunders Institute. This school was very successful, and he employed in it the ablest teachers he could find, two college presidents having been among his instructors. Among others who taught there was his son, Courtland Saunders, a young man of rare genius and remarkable scholarship, whose little work on the "Paradigms of Latin Verbs," written before he was twenty years of age, was a monument of careful and extended research. He was the only child of Dr. Saunders, most dearly cherished; yet, in his ardent patriotism, he said, at the commencement of the late civil war, to this beloved son, "One of us must give himself and, if need be, his life to our country's service." The father earnestly desired to go; but the son claimed the privilege, enlisted as a captain in the Corn Exchange Regiment, fought bravely, and fell at Antietam. Meantime, the father was indefatigable in his efforts to raise volunteers and money for bounties, and received the thanks of the city for his patriotic labors. He also established a drill-class in his institute, and trained many young men who went out as officers in the Union service. He was active in all educational enterprises, being a trustee of Lincoln University, and connected with other colleges and seminaries in the region around Philadelphia. But from the time of the death of his gallant son he had felt it his duty to rear some memorial of him, which

should be a lasting honor to him and blessing to the community. In 1870 he gave up his school, and soon after, with the full and cordial consent of his wife, gave the large building and extensive grounds of the institute to found a memorial hospital, to be called the Presbyterian Hospital of Philadelphia. He further offered to raise by personal effort and solicitation \$100,000 toward the erection of hospital buildings, and had accomplished this before his death. The late John A. Brown, a retired banker of Philadelphia, gave \$300,000 toward its endowment, so that the hospital will start with about half a million dollars. Dr. Saunders's own gift being about \$100,000. His learning, his skill and success as a teacher, and his philanthropic spirit, caused his loss to be deeply felt in Philadelphia.

SCRANTON, JOSEPH H., an eminent citizen, and one of the founders of the city of Scranton, Pa.; born at Madison, New Haven County, Conn., June 27, 1818; died at Baden-Baden, Germany, June 6, 1872. He began his business-life as a clerk for a house in New Haven, but subsequently removed to Augusta, Ga., and entered into business for himself. In 1847 he made the Lackawanna Valley his permanent home, and in connection with some family relatives, and a few other energetic men, began to develop the resources of that portion of Luzerne County, then almost a wilderness, consisting of one or two farm-houses, and a country tavern by the border of a stream, while surrounding these were the bleak and sterile mountains. After unremitting effort in spite of delays and repeated failures, he succeeded in enlisting the coöperation of some capitalists, through whom he raised the sum of thirty thousand dollars and formed a partnership in the enterprise of bringing out the wealth that lay latent beneath the surrounding hills. In June, 1853, this firm was merged into the Lackawanna Iron and Coal Company, with which he was identified until the time of his death. Iron-works were constructed, railroads built, and difficulties surmounted, which would have intimidated a man with less perseverance and executive ability, and, as a result, we find, in the short period of twenty-five years, a city of nearly fifty thousand inhabitants, and which is the focus of one hundred and fifty millions of capital invested in railroads and other improvements. For twenty years he was successively manager, superintendent, and president of the above company, and was also president and director of several railroads and banking corporations. For some months previous to his death, Mr. Scranton had been travelling in Europe, in the vain hope of recovering his health.

SEABURY, Rev. SAMUEL, D.D., an Episcopal clergyman, professor, and author, born in Hartford, Conn., in 1801; died at the General Theological Seminary of the Protestant Episcopal Church, in New York City, October 10, 1872. He was a grandson of Samuel Seabury,

D. D., Bishop of the Diocese of Connecticut, and first Protestant Episcopal bishop in the United States. He graduated from Columbia College in 1823, and from the theological seminary in 1826, was ordained deacon in 1826 by Bishop Hobart, and received priest's orders in 1828. He was Professor of Languages in the Flushing Institute, afterward St. Paul's College, from 1830 to 1834, editor of *The Churchman* from 1834 to 1849, and professor in the General Theological Seminary from 1849 to his death, and for some years before his death rector of the Church of the Annunciation. Dr. Seabury held to the high prelatial theories of his grandfather, and was generally inclined to the (so-called) High Church party. His published works were: "The Continuity of the Church of England in the Sixteenth Century: Two Discourses, with Appendix and Notes," 1852; "Discourses on the Supremacy and Obligation of Conscience," 1861; "American Slavery distinguished from the Slavery of English Theorists, and justified by the Law of Nature," 1861—this was very sharply reviewed by Prof. Peabody, in the *North American Review*, and others; "Mary the Virgin, as commemorated in the Church of Christ," 1868; and several funeral and other occasional discourses, among which was one on the death of the late Rt. Rev. Benj. T. Onderdonk, D. D.

SEWARD, WILLIAM HENRY, LL. D., an American statesman, born in Florida, Orange County, N. Y., May 16, 1801; died at Auburn, N. Y., October 10, 1872. His ancestors upon his father's side were Welsh, though for several generations resident in this country; his mother, whose maiden name was Jennings, was of Irish extraction. His paternal grandfather, John Seward, was an officer during the war of the Revolution, with the rank of colonel. Samuel S. Seward, father of the deceased statesman, was both a physician and merchant, and late in the last century removed from Sussex County, Virginia, to Florida, N. Y. At a very early age William exhibited a fondness for books, and ran away from home to go to school, establishing a precedent that has been rarely followed. At the age of nine years he was sent to Farmers' Hall Academy in Goshen, which had numbered among its pupils Noah Webster and Aaron Burr. With a strong aptitude for knowledge, he rapidly advanced in his studies, so that before he was fifteen he was ready to enter college. In 1816 he was received into Union College, from which he graduated with high honors, though six months of his senior year had been spent in teaching in Georgia. He studied law with John Anthon, in New York, and afterward with Ogden Hoffman and John Duer, at Goshen, and was admitted to the bar in 1822. In the following year he removed to Auburn, where he formed a partnership with Judge Miller, whose daughter, Miss Frances Adeline Miller, he married in 1824. As a lawyer he soon became distinguished for originality of

thought, independence of action, and an industrious devotion to his profession that brought him a large practice and a high reputation.

The attention of Mr. Seward was early called to political subjects. His father was an eminent Jeffersonian Republican, and the natural instincts as well as the early education of the son led him to adopt the same principles. In 1824 he was selected by a Republican county convention to prepare the usual address, although scarcely old enough at the time to be a voter. In several orations at this early period of his life we find the same fervent devotion to the cause of liberty that ever afterward marked his public career. In 1827 he appeared as the champion of the struggling Greeks, and by his youthful eloquence secured large contributions to the fund raised in this country for their defence.

One of the largest political conventions that had ever assembled in the State of New York was held at Utica in 1828, composed of young men favorable to the election of John Quincy Adams to the presidency. Mr. Seward presided over this convention with marked ability. The same year he was offered a nomination for member of Congress, but declined it. The Anti-Masonic party was at this time rising into temporary and local importance, and Mr. Seward and his friends affiliated themselves with it, believing that it afforded the best position for a successful resistance to the national and State Administrations. By this party he was elected a State Senator from the Seventh District in 1830, by a majority of over two thousand, although his district had the preceding year given a large majority the other way. Not yet thirty years old, he entered the Senate, and, at the same time, became *ex officio* a judge in the highest court of the State, and the peer of men venerable in years and distinguished for talent and experience. He was politically in a small minority in the Legislature, at a time when party lines were strongly marked. The record of his career as a Senator and a judge, nevertheless, compares favorably with that of his associates. The abolition of imprisonment for debt, the melioration of prison-discipline, reforms in the militia system, opposition to corporate monopolies, the extension of popular franchises, the subject of education, and the work of internal improvement, received a cordial and effective support from him during his term of four years. In some of the reported opinions pronounced by him as a judge, we find that he did not hesitate to vindicate the claims of justice even when opposed by the arbitrary and time-honored rules of law.

Mr. Seward found time during the recess of the Senate to make a hurried visit to Europe in the summer of 1833. His letters, upward of eighty in number, written during his few weeks' travel in Great Britain and portions of the Continent, were published at the time, adding much to his growing reputation.

In 1834 Mr. Seward was nominated for Governor, but was defeated by Governor Marcy, although in every county he ran ahead of his ticket. Among the charges brought against him in this and the subsequent successful canvass was "the atrocious crime" of being "a young man." But little over thirty, he had dared to aspire to an office which had thus far only been held by the ablest and ripest statesmen of the State. He went back to the practice of the law, and to the private advocacy of liberal measures and reforms, speaking at Auburn in 1835 on education and internal improvements. In 1830 the anti-ent troubles brought him prominently forward, and he established himself at Westfield, Chautauqua County, as agent of the Holland Land Company. A speech delivered by him in 1837, in the Whig Convention of Cayuga County, is still remembered as an unusually able production. During the canvass of this year he spoke often, and the revolution in State politics which then occurred, and which assumed from the circumstances a national importance, was largely attributed to his exertions. In 1838 he ran again for Governor, beating Governor Marcy by 10,000 majority, and taking his seat at the age of thirty-seven as the first Whig Governor of the Empire State. He was reelected in 1840, but declined to be a candidate in 1842, and retired from office January 1, 1843. The administration of Governor Seward was, in many respects, the most remarkable of any in the history of the Empire State; and many persons regarded it as more influential in shaping the political issues, which followed in the next twenty years, than any other event of that period. During that administration occurred the anti-ent difficulties; the enlargement of the Erie Canal, largely the result of his foresight and energetic advocacy; the founding of the State Lunatic Asylum at Utica, to which he gave his best efforts; the eradication of the laws for imprisonment for debt, and every vestige of slavery, from the statute books; the reformation of the penitentiary system, and those reforms in the severity of criminal sentences which betokened the dawning of an era of greater humanity; the promotion of the agricultural interests of the State; the creation and fostering of normal schools, and the increase of school libraries; the extension of the privileges of the public schools to all classes and conditions, etc. But preëminently was his administration known for its action relative to slavery. In the case of the colored seamen, charged by the Governors of Virginia and Georgia as being slaves abducted from those States, or carried to free States and set at liberty, the seamen having been arrested in the city of New York, and their extradition to Virginia and Georgia demanded, Governor Seward refused to surrender them. His grounds for their refusal were ably stated in a series of letters to the Executives of Virginia and Geor-

gia, in which he maintained that the crimes contemplated by the Constitution, in its provisions requiring the rendition of fugitives from justice, were not such as depended on the legislation of a particular State, but such as were determined by some common standard to be crimes—such as were *mala in se*. No State, he argued, could force a requisition on another State, founded on an act which was only criminal through its own legislation, but which, compared with general standards, was not only innocent, but humane and praiseworthy. Virginia, and other Southern States in sympathy with him, threatened retaliatory measures against the commerce of New York, but Governor Seward was not to be influenced or intimidated. A similar instance of his firmness and sagacity was exhibited in the "McLeod case." Alexander McLeod, a British loyalist, charged with burning the American steamer *Caroline* during the Canadian rebellion in 1837, was arrested and committed to jail in the State of New York to await his trial for the offence. The British minister alleged that the act was one of war, for which his Government should be held responsible. He therefore demanded the release of McLeod, menacing hostilities in case of a refusal. President Tyler's Administration—Mr. Webster being Secretary of State—counselled compliance, and urged Governor Seward to surrender the accused. Many of Governor Seward's friends also advised him to the same course. But he resolutely resisted the demand of the British Government, and refused to adopt the policy of President Tyler. His bold and independent stand sustained the honor of his country; and the fortunate conclusion of the matter restored public tranquillity and strengthened Governor Seward's administration.

At the expiration of his second term as Governor, he resumed the practice of his profession, though occasionally indulging in his taste for literary labor. Thus, in 1843, he addressed the Phi Beta Kappa, of Union College, on the "Elements of Empire in America;" in 1847, delivered an oration on the "Life and Character of Daniel O'Connell;" and in 1848 pronounced an eloquent eulogy on John Quincy Adams before the New York Legislature. He also took an active part occasionally in national and State politics, canvassing the State for Mr. Clay in 1844, though he had not favored his nomination; opposing the annexation of Texas, and the Mexican War; and about the same time contending zealously against the National American movement. He was largely instrumental in securing the calling of the Constitutional Convention of 1846. But the greater part of his time, during the six years 1843-'49, was devoted earnestly to legal practice, and his extensive attainments in the law, and his eloquence before the jury, caused him to be retained very often in cases of great importance. Among them may be named the

case of James Fenimore Cooper vs. Greeley & McElrath, for libel in the *Tribune*, in which he appeared for the defendants. He defended, in 1847, John Van Zandt, charged in Washington with aiding fugitive slaves. The case of William Freeman, indicted for the murder of the Van Nest family, in which Mr. Seward appeared for the defense, resulted in a verdict of insanity. He had previously defended, upon the same grounds, Henry Wyatt, indicted for the murder of a fellow-convict in the Auburn Prison. The excitement occasioned by the crime of Freeman was intense, and the humane efforts of Governor Seward were unsuccessful, except in obtaining for him an appeal to the higher court, though Freeman afterward justified the plea in his behalf, by dying utterly idiotic in prison after a new trial had been granted him. Mr. Seward's defence of Abel F. Fitch and forty-nine others, for conspiracy to destroy the property of the Michigan Central Railroad Company, is also notable in judicial annals. To the annexation of Texas he remained an uncompromising opponent to the bitter end. During the war with Mexico, however, which resulted from the consummation of that measure, his course was patriotic, and he constantly recommended a vigorous conduct of hostilities. He warmly supported the election of General Taylor in 1848, and acted through the canvass with unusual energy. It was now, though not for the first time, that he announced his idea, since so well known, and so often discussed, of "the antagonistical elements of society in America, Freedom and Slavery," and which was subsequently formulated by him into that pithy expression "the irrepressible conflict." This was thoroughly developed in his great speech at Cleveland, Ohio. Mr. Seward was elected to the Senate of the United States in the place of Mr. Dix, in 1849, there being no serious opposition to him. He went to the Thirty-first Congress with thirty-three other Whig members, and with one Democrat. He was the friend of General Taylor, and that President extended to him full confidence. He supported the invitation to organize State governments, extended by the President to California and New Mexico. It was in a speech in the Senate, March 11, 1850, that he used the phrase "higher law," which has since become so famous. His opposition to the compromise measures, and his support of emancipation in the District of Columbia, mark the general tenor of his course upon the most exciting question of the day. He ardently supported the "French Spoliation Bill," and in February, 1851, advocated the principles subsequently embodied in the "Homestead Law." He was prompt in submitting a resolution to the Senate offering a cordial welcome to Kossuth, then about to visit this country. In a speech on Mr. Foote's resolution, he expressed his sympathy with the exiled Irish patriots, and his speech on "Freedom in Europe," containing

an able review of the Hungarian Revolution, has been much admired. President Taylor died in 1850. Mr. Seward had heartily opposed the compromise measures up to that time, and he continued his opposition, though his associates proved less faithful. The main features of the bill became law *seriatim*, and this was inconsiderately thought to be a final solution of the problem. Mr. Seward did not think so, and refused to say so; and the slavery question, in its different aspects, became the vital point in the election of 1852.

The nomination of General Scott for the presidency in 1852 met Mr. Seward's approval, though he could not sanction the platform adopted. The election resulted in the overwhelming defeat of the Whigs; but Mr. Seward, undismayed by this disaster, resumed his place in the Senate with his characteristic calmness and assiduity. He found time also to prepare two orations; one, at the dedication of a university at Columbus, Ohio, on "The Destiny of America," the other before the American Institute, at New York, on "The True Basis of American Independence."

In the debates on the Nebraska Bill, in the session of 1853-'54, Mr. Seward was conspicuous for his able yet calm and dispassionate arguments against it. The contest was hopeless, so far as immediate results were concerned, from the beginning, but it was gallantly maintained to the end. His eloquent defense of the three thousand and fifty New England clergymen who sent in a remonstrance against the bill, attracted at the time much notice and approbation. In the summer of 1854 he made the annual oration before the Literary Societies of Yale College, on "The Physical, Moral, and Intellectual Development of the American People." On this occasion, he received the honorary degree of LL. D., which was also conferred by Union College, in 1866. In February, 1855, Mr. Seward was reelected to the Senate for six years from March 4, 1855, by a large majority, against the determined opposition of both the American and Democratic parties. In the Kansas debates of the ensuing session, he took an active part, and his speeches were marked with their usual clearness and fairness. When Senator Sumner was assaulted by Mr. Preston Brooks, in the Senate-chamber, May 22, 1856, Mr. Seward was the first Senator to call for a committee of inquiry into the matter, and, though he was not appointed on the committee, his whole course was dignified and honorable, and his rebuke was felt the more keenly from its judicial impartiality. The nomination of Colonel Fremont for the presidency by the Republican party in 1856 was a serious disappointment to many of Mr. Seward's friends; but he himself manifested no disappointment or chagrin, and entered upon the canvass with great zeal and energy. The Republicans were defeated but not demoralized, and, under Mr. Seward's leadership in the Senate, they made a gallant though in-

effectual resistance to the Kansas-Lecompton Constitution Bill, to the Dred Scott decision, and the other issues forced upon them by the party in power. They were all the time gaining strength and influence for the more desperate conflict soon to come.

In 1860 the Republican party, strong and united, while its opponents were divided in their councils, seemed to be in a position to reward with the first office in the nation's gift the able statesman who so often had held up its banners. At their National Convention of 1860, at Chicago, Mr. Seward received 173 votes for the presidency; but other considerations were thought to justify, and even render imperative, Mr. Lincoln's nomination, and Mr. Seward gracefully yielded what proved to be his last opportunity of becoming the nominee for that high office. It was almost a matter of course that the new President should tender him the first place in his cabinet, and it was known early in February, 1861, that he was to be Secretary of State. Before leaving the Senate, he made a speech which was regarded by all parties as foreshadowing the policy he intended to follow, and deep was the chagrin of many of his friends at what seemed to them a willingness to concede every thing for the sake of maintaining the Union. They had regarded him as the special champion of universal freedom, and they were distressed at the thought that he should subordinate freedom to the integrity of the Union. This was not, however, the real design of Mr. Seward. His astute mind had discerned that the interests of freedom were not really in peril, and that the preservation of the Union, or, failing that, the ability to throw upon the secessionists the responsibility for its dissolution, was the true point to be attained. This was very admirably expressed in the following letter of his to a friend in New York who had divined his purpose:

WASHINGTON, February 23, 1871.

MY DEAR SIR: The American people in our day have two great interests—one, the ascendancy of freedom over slavery; the other, the integrity of the Union! The slavery interest has derived its whole political power from bringing the latter object into antagonism with the former. Twelve years ago, freedom was in danger, and the Union was not. I spake then so singly for freedom that short-sighted men inferred that I was disloyal to the Union. I endured the reproach without complaining, and now I have my vindication. To-day, practically, freedom is not in danger, and union is. With the loss of union all would be lost. With the attempt to maintain union by civil war wantonly brought on, there would be danger of reaction against the Administration charged with the preservation of both freedom and the Union. Now, therefore, I speak singly for union, striving, if possible, to save it peaceably; if not possible, then to cast the responsibility upon the party of slavery. For this singleness of speech I am now suspected of infidelity to freedom. In this case, as in the other, I refer myself, not to the men of my time, but to the judgment of history. I thank you, my dear sir, for having anticipated what I think history will pronounce.

But do not publish or show this letter. Leave me

to be misunderstood. I am not impatient. I write to you only because I would not be, nor seem to be, ungrateful. Faithfully your friend,

WILLIAM H. SEWARD.

REV. DR. JOSEPH P. THOMPSON.

The war followed, and through its whole course Mr. Seward exhibited an ability and statesmanship which will be more and more admired the more carefully they are studied. He was accused of being an optimist, and much sport was made of his prediction that the war would not last ninety days; but this sublime faith in the vitality of the republic, and the hopeful spirit which he always maintained, were invaluable in sustaining the confidence and hope of those who were inclined to despondency. He kept us from a foreign war in addition to the civil war, and it is doubtful if any other of our statesmen could have done as much. He gained, too, the respect and esteem of other nations and governments for the country, to a degree that had never previously been experienced. He had passed the ordeal, and those who had been impatient and dissatisfied with his course were now loudest in his praise. It was at this moment that he was stricken down at the same time with President Lincoln, by the hand of the assassin. For a long time he lingered between life and death, but at length his vigorous constitution triumphed over the peril, and he recovered, though crippled by paralysis, the result of his terrible injuries. He retained his place in the cabinet, feeling that the work which was assigned to him was not complete until the States which had attempted to withdraw were all reinstated, and the nation was once more united. That period of four years was one of great trial for Mr. Seward, and subjected him to manifold criticisms and denunciations—some of them very bitter; but he was never disposed to defend his action, trusting rather to time to show that he was right. There can be no question now, that, whether his course was judicious or injudicious, the motive which impelled him to follow it was one of fidelity to what he believed to be duty; and, when the secret history of the Johnson Administration is made public, it may prove that Mr. Seward was not so much in error as many supposed. In March, 1869, Mr. Seward retired from his eight years of cabinet service to the pleasures and joys of his home at Auburn, though that home had been darkened by the shadow of a great affliction, the loss of his excellent wife. In 1869, he journeyed through California and Mexico, visiting the principal cities of that republic, and in August, 1870, accompanied by several members of his family, set out for a tour round the earth, visiting the principal countries of Asia, Northern Africa, and Europe, everywhere received with great honor, and everywhere making himself familiar with the government, policy, races, productions, and commerce of the countries he visited. He returned

from this extended journey October 9, 1871, and busied himself thenceforth with the preparation of a narrative of this journey, and with a history of his own life and times. At his death, the former work was completed, but the latter was not more than half finished.

Mr. Seward took broad and comprehensive views of all the subjects which came under his consideration; and, though at times he may have generalized from insufficient data, yet his judgments were, in the main, sound and accurate. He had a strongly practical vein, and adapted, in general, his theories to the existing state of affairs with great facility.

Though a voluminous writer, his essays and state papers have not been fully collected. A collection of his orations, speeches, and addresses, with a biographical memoir, edited by George E. Baker, was published in 1853, in three vols. 8vo, to which a fourth volume was added in 1862. Mr. Seward had previously published a memoir of John Quincy Adams, founded on his oration already mentioned, 1849; and a number of volumes of his diplomatic correspondence were published. He had also contributed several able articles to the "New American Cyclopædia." His "Travels around the World" have been published since his death.

SOMERVILLE, Mrs. MARY FAIRFAX, a British authoress and physicist, born at Jedburgh, Scotland, December 26, 1780; died at Naples, November 29, 1872. She was the daughter of Sir William George Fairfax, a naval officer of considerable reputation, who commanded the Venerable, in the action of Camperdown, and was afterward knighted, and advanced to the rank of Vice-Admiral of the Red. Mary, his daughter, was educated at a school in Musselburgh, near Edinburgh. In 1804 she married Samuel Greig, captain and commissioner in the Russian Navy, who took great pleasure in initiating her into the mysteries of mathematics and general science, for which she had a decided taste. In 1806 Captain Greig died; and in 1812 his widow, who had previously removed to Edinburgh, married William Somerville, M. D., of that city, subsequently Inspector of the Army Medical Board, and Physician to the Royal Hospital, Chelsea. Mrs. Somerville first became known to the scientific world by some experiments on the magnetic influence of the violet rays of the solar spectrum. Her scientific attainments soon procured for her the acquaintance of Lord Brougham, at whose suggestion she undertook to produce for the Library of Useful Knowledge a summary of the "*Mécanique Céleste*" of Laplace, under the title of "Mechanism of the Heavens." The work, however, was too voluminous for its original purpose, and was published in an independent form in 1831, with a dedication to Lord Brougham, and at once achieved for its authoress a high place among the cultivators of physical science. It was followed, in 1834, by her treatise "On the Con-

nection of the Physical Sciences," dedicated to the Queen. This work passed through nine editions in English, and was translated into Italian, and published at Florence, in 1861. In 1848 she published her "Physical Geography," a history of the earth in its whole material organization, and of animal and vegetable life. A fourth edition of this, thoroughly revised, was issued in 1858, besides an Italian translation, of which there have been two editions. Her last work, "On Molecular and Microscopic Science," with 180 illustrations, and a Glossarial Index, was published in London, 1869, when she had reached the advanced age of eighty-nine years. At the time of her death she was engaged in the preparation of her autobiography. In 1834 Mrs. Somerville was elected a member of "The Learned and Scientific Society" of Geneva; in 1835 was made an honorary member of the Royal Astronomical Society of London, and in the same year received from Sir Robert Peel a warrant on the civil list pension fund for £300 per annum. In May, 1869, she was presented by the Royal Geographical Society of London with the Patron's, or Victoria Medal, for her eminent services to physical science.

SOUTH CAROLINA. The most important feature in the history of South Carolina for the past year is that which relates to her financial condition and public credit. When the Legislature met in November, 1871, the affairs of the Treasury were in the utmost confusion, and there was great uncertainty regarding the amount and character of the liabilities of the State. The finances were managed by a Financial Board, consisting of the Governor, Treasurer, and Attorney-General, and charges were freely made that the bonds of the State had been issued without authority of law, and the proceeds in part appropriated for illegal uses. There were other charges of recklessness and extravagance in every department of the government, but nothing was done to bring these to proof. On the 31st of October the State Treasurer had reported the total debt at \$17,557,000. The Comptroller-General, in submitting the statement of the accounts of the various disbursing officers, with such other information as he could gather concerning the financial condition of the State, expressed his regret that the reports were not more satisfactory, and that he was unable, "under the present embarrassed condition of our finances, to make some recommendations looking to improvement in the future." "Without reflecting upon any one," he said, "I beg leave to say that I am both disappointed and surprised at the enormous amount of our funded debt, and venture to make one suggestion, that in the future we live within our income, the State having lost its credit by extravagant practices, just as a private individual would lose his by the adoption of a similar course."

The bulk of the work of a session of the Legislature, lasting from the latter part of

November to the 13th day of March, related more or less to financial matters. A movement looking to the impeachment of the Governor, to be followed by an investigation of his administration, and the punishment of those found guilty of irregularities in office, miscarried from the start, the resolution for impeachment receiving but a small vote in the Lower House.

The act of March 7, 1871, to create a sterling funded debt, "the same, or the proceeds thereof, to be exclusively used in exchange for or in payment of the existing public debt," was repealed. An act was then introduced and passed after an extended debate, entitled "An act relating to the bonds of the State of South Carolina," but generally known as the "validating act." This was preceded by the following preamble:

Whereas, Bonds or obligations of this State have been issued, from time to time, to a large amount, in accordance, as was supposed by the officers issuing the same, with the authority and provisions of certain acts of the General Assembly, including "An act to authorize a loan to redeem the obligations known as the bills receivable of the State of South Carolina," approved August 26, 1868; also, "An act to authorize a State loan to pay interest on the public debt," approved August 26, 1868; also, "An act to provide for the appointment of a Land Commissioner, and to define his powers and duties," approved March 27, 1869; also, "An act to amend the last named act, and for other purposes," approved March 1, 1870; also, "An act to authorize a loan for the relief of the Treasury," approved February 17, 1869; also, "An act to provide for the conversion of State securities," approved March 23, 1869; and "An act to authorize the financial agent of the State of South Carolina, in the city of New York, to pledge State bonds as collateral security, and for other purposes," approved March 26, 1869; which said bonds are fully and particularly stated, and set forth in a report made by the Treasurer of the State to the General Assembly, dated October 31, 1871; and, whereas, doubts have arisen whether said issues were in strict conformity to the provisions of the said several acts under which they were respectively issued; and, whereas, it was the true intent and meaning of the several acts above set forth that such issues of bonds or obligations should be made in the manner in which the same have been made, as aforesaid; and, whereas, also, doubts have been raised as to the validity of some of the bonds mentioned in the said annual report of the State Treasurer, for the fiscal year ending with October 31, 1871, although money has been borrowed, or realized out of, said bonds on account of this State; and, whereas, the credit of this State has been affected thereby:

It is, then, formally enacted that the said bonds and obligations "were duly and lawfully issued in conformity with the true intent and meaning of the several acts of the General Assembly," set forth in the preamble. The acts of officers under the laws of the State and of the acts enumerated "to the extent of all issues of bonds or obligations enumerated and set forth in the said report of the Treasurer," are, "in all things, ratified, confirmed, and established." Each and all of the bonds referred to are declared to be "legal and valid bonds of the State of South Carolina, for the payment of which the faith, credit, and funds

of the State have been, and are hereby, pledged: *Provided*, That no bonds be included which are not registered in the Treasury at the time of the passage of this act, as provided for in section 14, article 9 of the constitution, relating to finance and taxation."

The section of each of the acts under which the bonds were issued, which provides for an annual tax to pay the interest, is made a part of this act, and an annual tax, in addition to all other taxes, is provided for, sufficient to pay the interest until the principal share become due. All bonds hereafter issued are to be of the description and style of those issued under "An act to provide for the conversion of State securities," approved March 23, 1869, so that all the bonds of the State shall be of one style and description when the exchange is made. The bonds named in this act are all to be duly signed and countersigned and sealed, and the Commercial Warehouse Company, in the city of New York, and the Carolina National Bank at Columbia, are designated as the authorized places for registering the bonds, coupons, and stocks of the State. No interest is to be paid on the stocks and bonds until they have been duly registered. This bill was passed by a vote of 17 to 10 in the Senate, and 50 to 39 in the House. The following protest, against the passage of the bill was signed by five Republican and four Democratic Senators:

We protest against the passage of a bill relating to the bonds of the State of South Carolina, for the following reasons:

1. If there have been no bonds of the State of South Carolina issued without authority of law, then the requirements of this bill are presumptuous and unnecessary.

2. If the several acts cited in the preamble of the bill justified the financial managers of our State government in the issue of a larger amount of bonds than the public and the General Assembly supposed had been issued, and the true intent and meaning of the said several acts was the warrant and authority for such an issue, then no greater force or legal strength can be legislated into the acts of the officers of this State by the specious declaration of this bill, viz.: That the said bonds and obligations issued on behalf of the State, as set forth in the report of the Treasurer of this State to the General Assembly, dated October 31, 1871, were duly and lawfully issued in conformity with the true intent and meaning of the several acts of the General Assembly.

3. That which is already valid and cannot be overthrown or set aside, by virtue of its legality or equity, needs no additional act of legislation to convince or confirm the public mind of its soundness.

4. Because, such has been the character of the statements made by the officers of this State as to the public debt and the prodigal issue of bonds, to increase the same, which would not have been disclosed, even at the present moment, had not the fact been unwillingly wrung from them, that doubts have arisen in the public mind, not only with regard to the integrity of the said officers, but the legality of their action; and from such a combination has the credit of the State been affected, which cannot be repaired by the questionable passage of a bill ratifying and confirming in all things all their acts and assertions.

5. The bill gives these officers a renewal of authority to continue the issue and conversion of bonds

without limit, and makes no provision for the cancellation of such bonds as have already been converted, and are, according to the language of the Governor, "if on the market, fraudulently." Such powers redelegate, in the knowledge of the great excess of issue of the bonds of the State, to the very officers who have abused the confidence and betrayed the trusts reposed in them, is as unwise as it is dangerous.

6. Because the bill itself is the strongest evidence of the invalidity of the acts of those who ask us to re-instate them in popular favor by validating their confessedly doubtful transactions.

Another bill provided for a settlement with the financial agent of the State in New York, Mr. H. H. Kimpton, and the payment of his claims against the Treasury. Two members of the House protested against the passage of this bill, because it conferred "authority upon the Finance Board to audit and pay claims to an undetermined amount." "It would have satisfied the tax-payers of the State," they say, "much more fully, if a disinterested committee had been called upon to adjust the account of the State with Mr. Kimpton."

An act was passed toward the close of the session, "to relieve the State of South Carolina of all liability for its guarantee of the bonds of the Blue Ridge Railroad Company, by providing for the securing and destruction of the same." Under an act of September, 1868, the State had indorsed the bonds of the Blue Ridge Railroad Company to the amount of \$4,000,000, and now the State Treasurer was required, with the consent in writing of the president of the company, to demand of the State financial agent in New York the delivery of all these bonds held by him as collateral security for advances made by him to the company, and, on such delivery, to cancel them. Upon the surrender by the company of the balance, the State Treasurer was authorized and required to deliver to the president of the company "treasury certificates of indebtedness (styled revenue bond scrip), to the amount of \$1,800,000." These certificates are to express on their face that the sum mentioned in each is "due by the State of South Carolina to the bearer thereof, and that the same will be received in payment of taxes and all other dues to the State, except special tax levies to pay interest on public debt." The faith and funds of the State are pledged to their ultimate redemption, and an annual tax of three mills on the dollar is directed to be levied for the purpose. The Treasurer is required to retire one-fourth of the amount issued at the end of each year until the whole is redeemed. When the whole of these bonds have been cancelled, the lien of the State on the property of the company is to be discharged. If the company accept the provisions of the act, it is authorized to change its name to that of the "Knoxville & South Carolina Railroad Company," and to extend its line and construct branches to any place within the State.

This act was vetoed by the Governor, and

passed in spite of his objections, by a vote of 22 to 6 in the Senate, and 84 to 18 in the House. The Governor, in his veto message, said:

But there are reasons, in my judgment, deeper and more substantial than those of expediency. There are grave doubts as to the constitutionality of the act, both Federal and State. The Constitution of the United States clearly prohibits a State from issuing bills of credit, while the State constitution provides that a debt can only be created by an issue of bonds running twenty years. But, whether these objections are valid or not, there is still another objection, which, in my judgment, is paramount to any other reason that can be urged against the act becoming a law. During the last four years the Legislature has appropriated money for legislative and other expenses, amounting, in the aggregate, to about \$2,000,000, without levying a single mill of taxes to raise the money. These several appropriations for legislative expenses authorize the Treasurer to pay them out of moneys not otherwise appropriated, when it must have been clear, to the mind of every member of the General Assembly, that there was not a dollar collected from the levy of taxes that has not been appropriated in the general appropriation bill, to meet the annual expenses each fiscal year; and, even in the collection of the general tax levy, there has been a deficit of from twenty-five to fifty per cent. per annum from delinquent taxes. This deficit, I have previously stated to the General Assembly, was about \$1,200,000; hence, the moneys expended, for which no levy of tax was made, added to this amount, makes an aggregate of over \$3,000,000. In this statement I have not taken into account the numerous claims, including the Land Commission, which have been paid out of moneys borrowed.

Among the measures for raising funds for the necessities of the State, in addition to the regular tax levy, was a general license law, which requires a license, for which a designated sum is to be paid, from persons embarking in almost every profession or pursuit.

The last act of the Legislature relating to the subject of finance was contained in the following joint resolution:

Resolved, by the Senate and the House of Representatives of the State of South Carolina (two-thirds of both Houses concurring), That the following article be submitted to the qualified electors of this State at the next general election for Representatives, as an amendment to the constitution of the State, which, if a majority of the electors qualified to vote for the members of the General Assembly voting thereon shall vote in favor of such amendment, and two-thirds of each branch of the next General Assembly shall, after such an election and before another, ratify the same, shall become a part of the constitution, viz.:

ARTICLE XVI. To the end that the public debt of South Carolina may not be hereafter increased without the due consideration and free consent of the people of the State, the General Assembly is hereby forbidden to create any further debt or obligation, either by the loan of the credit of the State by guarantee, indorsement, or otherwise, except for the purpose of meeting its existing obligation, or in and for the ordinary and current business of the State, without first submitting the question as to the creation of any such new debt, guarantee, indorsement, or loan of its credit to the people of this State, at a general State election, and, unless two-thirds of the qualified voters of this State voting on the question shall be in favor of a further debt, guarantee, indorsement, or loan of its credit, none such shall be created or made.

After the adjournment of the Legislature, various controversies arose regarding the financial situation. It was claimed by some that the general license law was unconstitutional, and, at a public meeting in Charleston, in April, resolutions were adopted recommending that it be brought to a judicial test, but no decision has ever been obtained upon it.

The act "to relieve the State of South Carolina of all liability for its guarantee of the bonds of the Blue Ridge Railroad Company, etc.," was pronounced unconstitutional by Judge A. J. Willard, of the Supreme Court, acting in the place of a circuit judge; the question having been brought before him by an application of the Auditor of the State for an injunction restraining the Treasurer from issuing the revenue bond scrip. His decision was placed on the ground that this scrip was intended to circulate as money, and contained a pledge of the faith of the State, and was, therefore, "bills of credit" within the meaning of the clause of the Federal Constitution which prohibits the States from issuing such bills. The subject was again brought up before Judge Samuel W. Melton, of the Court of Common Pleas in Richland County, and he also decided, on the 2d of December, that the issue of this scrip was unconstitutional. He said, in his decision:

In arriving at my conclusions, I have not deemed it pertinent to consider the equity which may exist as between the State and holders of revenue bond scrip, arising from the surrender of the guaranteed bonds. If an obligation exists involving the faith of the State, it rests upon the legislative, and not with the judicial, department of the government. And I have deemed it alike foreign to the issues presented to pass upon the morality or the justice of this legislation, which, without consideration and without benefit to the State, seeks to impose an additional and grievous burden of debt upon the people. 1. The action may be maintained by the plaintiff as State Auditor; and all parties necessary to an adjudication of the issues so made are before the court. 2. The revenue bond scrip is a "bill of credit" within the meaning of Section 10, Article I. of the Constitution of the United States; and the act of the General Assembly of this State, approved 2d March, 1872, so far forth as it authorizes the emission of such scrip, is in violation of the Constitution of the United States, and therefore void. 3. The revenue bond scrip is not within the meaning of Sections 10 and 14, Article VI. of the constitution of the State of South Carolina, and does not constitute, therefore, an obligation which the State may direct to be received in payment of taxes or other dues to the State, or to be redeemed in the manner provided by the said act. Issued in violation of the constitution of this State, as well as that of the United States, it is wholly unauthorized, illegal, and without value for any purpose whatever. It is, therefore, ordered that the injunction heretofore granted against the State Treasurer and county treasurers, as prayed in the complaint, be, and the same is hereby, made perpetual.

Subsequently, various holders of the scrip petitioned the Supreme Court to issue a mandamus to compel the Comptroller-General to levy the three-mills tax provided for by the act authorizing the issue of the scrip, and an order was made requiring Solomon L. Hoge,

the Comptroller-General, to show cause on the 2d of January, 1873, why the writ of mandamus should not issue as prayed for.

During the summer, the Secretary of State, F. L. Cardozo, refused to affix the State seal to certain bonds issued and signed by the Governor, and an order was obtained on petition of the Governor and Treasurer, from the Circuit Court at Columbia, commanding him to show cause why a peremptory writ of mandamus should not issue compelling him to do so. In his response, Mr. Cardozo said that he was not authorized to affix the seal to any bonds, "except for the conversion of bonds or stock already issued pursuant to law," and that the "pretended bonds of the petitioners, for the conversion of which bonds of the State are now sought to be sealed," were not issued pursuant to law. He further stated that he believed "the pretended bonds of the petitioners" had been already once converted into other bonds of the State, and that he had sealed bonds for the purpose in June, 1871. And, finally, he says in his answer: "This respondent further shows that the act entitled 'An act relating to the bonds of the State of South Carolina,' approved March 18, 1872, and the act entitled 'An act to provide for the conversion of State securities,' approved March 28, 1869, are contrary to the constitution, and null and void. That the petitioners are not authorized by law to maintain this action and demand, and have this respondent seal bonds of the State for the purpose of conversion for other bonds or stocks of the State. That under the pretended law of the State, to wit, the act entitled 'An act to provide for the conversion of State securities,' approved March 28, 1869, the State Treasurer is authorized, only on application of any person holding coupon bonds of the State of South Carolina, to take up the same, and issue, in lieu thereof, stock or bonds of said State, and the said State Treasurer only can demand and have this respondent seal bonds for the said purpose."

A controversy ensued between the Governor and the Secretary of State, in which the latter claimed that the former had issued and signed over \$6,000,000 of bonds without warrant of law, and had diverted the proceeds to unauthorized uses. The issues of this dispute were never submitted to any judicial examination.

Almost immediately after the election in October, Mr. Gary, the State Auditor, was removed, and he declared that the reason was that he had refused "to levy a tax to pay interest upon the fraudulent debt of the State, and to include a levy of three mills upon the dollar to redeem \$450,000 of the Blue Ridge scrip, one-quarter of the entire issue." In November Mr. Cardozo, who had been elected Treasurer, but had not entered upon his office, brought a suit to restrain the State Treasurer and the county treasurers from collecting and disposing of any revenues under the new tax levy ordered by the Comptroller-General.

A temporary injunction was granted in the court of the fourth circuit, and afterward made permanent. Mr. Cardozo's object in obtaining this injunction, as explained by himself, was, that the proceeds of the taxes for the fiscal years 1871-'72 and 1872-'73 were in danger of being used for the expenses of the former year only, which he regarded as unwarranted by law.

When the new Legislature met on the 25th of November, the Treasury was still in a very embarrassed condition. The Comptroller-General, in his report, gave a very elaborate statement of the various affairs of the Treasury. The debit and credit accounts, on the 31st of October, footed up and balanced at \$26,621,917.85. The receipts and expenditures for the year preceding that date amounted to \$1,684,835.61, there being a balance in the account of receipts of \$2,403.61. There were, at the same date, undrawn appropriations amounting to \$355,717.84. The assets of the State were set down at \$980,700, consisting mainly of shares in several railways. The entire public debt of the State is put at \$15,851,327.85. Of this, \$1,438,482.84 consisted of stock issued under various acts, from 1833 to 1869, except \$38,886 authorized in 1794, bearing three per cent. interest, and payable at pleasure. With this exception, the stock bore six per cent. interest, and was redeemable at various dates from 1870 to 1888. Of the bonds, amounting to \$14,412,844.51 in all, \$1,734,944.51 were authorized prior to 1866, and the remainder under various acts from 1866 to March 1, 1870, payable at different dates from 1885 to 1889. The contingent liabilities of the State, arising from the indorsement of the bonds of railroad companies, amounted to \$4,797,608.20. It was estimated that \$2,054,347.10 would be needed for the support of the government for the ensuing year, and \$1,266,405 to meet the deficiencies of the last year.

With a full statement of all the items making up these totals before it, the Legislature again took up the task of placing the finances of the State on a firm basis. The new Governor submitted a message in which he stated that the amount of deficiencies and claims to be provided for amounted to \$1,266,395. He says: "The duty of retrenchment and economy imposed upon the executive and legislative branches of the government by the expressed will of the people, from whom they derive their power, is also enforced by the impoverished condition of the public Treasury. In this matter, fellow-citizens of the General Assembly, you must be guided and controlled, and it will be the bounden duty of others to obey a judicious system, by a wise economy in expenditures, which is not inconsistent with a strict maintenance of our State indebtedness, and a speedy liquidation of its legitimate obligations. All the taxes necessary to the accomplishment of these ends, no doubt, will be

levied, but a high rate of taxation can only be vindicated by a clear necessity, which must be made manifest by plain proofs of logical reasoning. The highest tax on the lowest basis of expenditures will meet with the sanction of the people. That basis having been arrived at, the public necessity in good faith being the standard, the tax should be promptly levied, and rigorously collected. Whatever may be your action in the premises, it must stand as the authoritative decision of the law-making branch of the government, by which our citizens must be guided."

One of the first necessities was a tax bill, and before the end of the year one had been passed providing for a levy of fifteen mills on the dollar. Bills were pending for the repeal of the license law of the last session, and of the act to relieve the State of its liability on account of the guarantee of the bonds of the Blue Ridge Railroad Company; and there was talk of a movement for the repeal of the "validating act."

Among the acts of the Legislature of 1871-'72 of a general character were the following: "To repeal an act to establish a Bureau of Agricultural Statistics, for the encouragement of industrial enterprise, and to invite capital to South Carolina for the development of the resources of the State;" "To repeal the act to provide for the appointment of a Land Commissioner, and to define his powers and duties;" "To provide for the appointment of an Inspector of Phosphates, and to declare his duties;" "To abolish the office of State Auditor, and confer the duties of his office upon the Comptroller-General;" "To provide for the establishment of a school in the State Penitentiary," and "to incorporate the Wall-halla and Spartanburg Female Colleges." The school in the penitentiary is to be provided with teachers and text-books at the expense of the State, and is to be open "at such time between the hours of 6 to 8 A. M., and between 4 to 8 P. M., as shall not interfere materially with the general work and labor, nor with the meal-hours established, or hereafter to be established, at the institution;" "*Provided*, That the Directors and the Superintendent of the Penitentiary may increase the said time, and protract or lengthen the hours of the school at their discretion, for such convicts or scholars as shall manifest particular aptness to derive benefit therefrom." The Inspector of Phosphates is to be appointed for two years by the Governor, and it is his duty to inspect all phosphates and other fertilizers, obtained, manufactured, or sold within the State, and to mark the same, and make monthly reports to the Comptroller-General. Those engaged in digging phosphates are required to make reports to the inspector, and he has continual access to all mines, manufactories, warehouses, and vessels where these substances are kept. The act abolishing the office of Land Commissioner confers the duties of that office upon

the Secretary of State. "An act to amend the law in relation to the license and registration of pharmacutists, apothecaries, and druggists, and to regulate the vending of drugs and poisons," requiring that any pharmacist, apothecary, or druggist, carrying on business in the State, shall obtain a license from the medical faculty of the University of South Carolina, or the faculty of the Medical College of Charleston, after undergoing an examination. Those medical faculties are required to keep a register of all persons thus licensed, and make annual reports to the General Assembly. In case of the sale of a poison, the apothecary must be satisfied that it is required for a legitimate purpose, and must keep an account of every such sale.

The first political convention of the year was that of the Republicans, held at Columbia, on the 20th of February, to appoint delegates to the National Convention of the party. A resolution was adopted, indorsing Governor Scott as a true Republican and a faithful public officer, and the following was agreed upon as the platform in the ensuing canvass:

Resolved, By the Union Republican party of the State of South Carolina, in convention assembled, that we indorse the Administration of President Grant in its wise and successful policy, which has reduced the national debt, while lessening the public taxes, and, at the same time, preserved full faith with the public creditors.

Resolved, That the profound gratitude of the Republicans of South Carolina is due to the Republican majority in the Forty-second Congress, for their enactment of the act to enforce the fourteenth amendment to the Constitution of the United States, and to its President, U. S. Grant, for his prompt and timely enforcement of that act, whereby the armed bands, organized and operated by the Democratic party, for the suppression of free speech and a free ballot in South Carolina, have been themselves suppressed.

Resolved, That while we thus accord merited indorsement to the man who, in peace as in war, has deserved the "well done" of the whole country, we respectfully remonstrate against the great majority of the Federal appointments that have been made in the State during the past three years, whereby the Republican party of South Carolina has been wounded in the house of its friends, and we do here express our belief that such appointments of persons not in sympathy with the Republican party of the State or nation is due largely to the misrepresentations made to the President by United States Senator F. A. Sawyer.

Resolved, That the National Republican party, having declared, in its platform of 1868, in favor of amnesty, we do hereby instruct our delegates to the National Republican Convention to move and advocate the adoption of a clause in the national platform, in favor of the rigid enforcement of universal civil rights for every American citizen on every inch of American soil, and their full and equal enjoyment of all public privileges.

The Democrats met in convention at Columbia, on the 12th of June, and appointed delegates to the national gathering of the party at Baltimore. The following resolutions were adopted:

Resolved, That this convention recognizes the movement which was organized at Cincinnati, on the 4th of May last, as the only one in this crisis calcu-

lated to secure civil liberty, and restore local self-government.

Resolved, That this convention accepts the Cincinnati platform as broad and liberal, and just to all portions and classes and citizens of the republic.

Resolved, That it is the sense of this convention that the interests of the country require that no separate and distinct Democratic nomination should be made by the Baltimore Convention, and the delegates appointed by this body are hereby instructed to oppose such nomination.

A minority report of the Committee on Resolutions, favoring straight-out Democratic nominations at Baltimore, was laid on the table, with only two dissenting votes.

The Republican Convention for the nomination of State officers was held at Columbia, on the 22d, 23d, and 24th of August. There was considerable contention over the rival aspirants for State offices, and several names were proposed for the governorship, and urged upon the convention by their various adherents. The discussion ended on the second day, by the nomination of Franklin S. Moses, a native white citizen of the State, for the chief executive office. On the announcement of the result, James L. Orr stated that, "in view of General Moses's record, he could not, as a conscientious man, support him," and asked leave to withdraw from the convention. His example was followed by a number of other delegates. The State ticket, as finally completed on the third day of the convention, was as follows: For Governor, Franklin J. Moses, Jr.; Lieutenant-Governor, Richard H. Gleaves (colored); Secretary of State, Henry E. Hayne (colored); Treasurer, Francis L. Cardozo (colored); Attorney-General, Samuel W. Melton; Comptroller-General, Samuel L. Hoge; Adjutant and Inspector-General, Henry W. Parvis (colored); Superintendent of Education, Justus K. Jillson. There was a good deal of excitement over the nomination of Treasurer, Mr. Cardozo being charged with fraud and responsibility for the over-issue of State bonds as Secretary of State. The platform adopted pledges the Republican party of the State:

1. To the support of Grant and Wilson and the Philadelphia platform.

2. To financial reform in the State government, by suspending the payment of interest on every bond of the State to which the slightest suspicion can be attached, and to the payment of interest on the legal debt.

3. That a safeguard shall be thrown around the State Treasury.

4. A reduction of the public expenses, and a moderate system of taxation, and a fair and equitable assessment of property, and the immediate reduction of the salaries of all public officers, and a reduction of the number of officers.

5. It regards the general license law as odious and oppressive, and pledges the party to its immediate repeal.

6. The enactment of a law providing that no moneys be paid out of the Treasury, except in pursuance of the enactment of law and on

warrants of the Comptroller-General; and also the enactment of a law compelling the Treasurer and Comptroller-General to publish daily reports of the receipts and disbursements of their offices for the past twenty-four hours.

7. The enforcement of law and order in the State, and the protection of the rights of all citizens.

9. In full faith in the justice of principles, and confessing errors of the past, they appeal to all true Republicans to unite in proving to the world that good government and Republicanism are not inconsistent with each other.

8. "We pledge ourselves that the government of the State shall be so administered, in all of its departments, that neither the public schools nor the asylums of charity shall be closed for the want of proper maintenance by the State."

10. "We maintain the authority of the General Government to interpose for the preservation of domestic tranquillity in the several States, and we acknowledge, with gratitude, such interposition in this State, and, with the hope that the example lately presented the civilized world, from within our borders, will avail to assure to our people the enjoyment of free speech and human rights, we invoke for such as were ignorant, undesigned violators of the enforcement act, the merciful exercise of executive clemency."

Ex-Governor J. L. Orr and the other delegates who were opposed to the action of the convention met in another part of the city, and organized, with Mr. Orr as president. After a session of three days, they presented a full ticket of candidates for State offices and an address to the people of the State. The ticket was as follows: For Governor, Reuben Tomlinson; Lieutenant-Governor, James W. Hayne (colored); Secretary of State, Macon D. Allen (colored); Treasurer, Edwin F. Gary; Attorney-General, John S. Green; Comptroller-General, J. Scott Freeman; Adjutant and Inspector General, Philip E. Ezekiel (colored); Superintendent of Education, B. L. Roberts (colored). It was determined not to cooperate with Democrats, nor in any way to abandon the Republican party. The address to the people, which was published, contained the following statements:

The condition of the affairs of the State at this time causes the gravest concern and most serious anxiety in the minds of all good citizens. Taxation unprecedented in amount in the history of this State weighs upon the people. No man but feels the burden; but, however, and by whatever channels, the taxes reach the Treasury, they come finally, in great part, from those who till the soil, in the form of reduced wages, and the increased cost of food, clothing, and other necessary expenses of a comfortable existence. The hard hand of toil largely pays the expenses of the State, though the money may be deposited in the Treasury by those who own the capital and the land. Let no man flatter himself, therefore, that his poverty renders this subject of taxation one of indifference to him.

Besides the vast sums which have been drawn from the people by direct taxation, our rulers have

been heaping other burdens upon us and our posterity, by enormous and, in many cases, fraudulent issues of bonds, the very interest upon which is a sum so large that it seems impossible to pay it. Concealment of the real state of our affairs has been practised to a criminal extent: report after report, statement after statement, has been made by the financial officers of the State, making false exhibits of our public debt; and it was only when an outraged public opinion demanded and compelled an investigation, that our real situation was developed, and was found to justify the worst apprehensions that had been felt.

The State government has failed to protect the citizens, not only in the enjoyment of those rights and privileges intended to be secured by the provisions of the State and national Constitutions, but even in those more limited rights which no respectable, civilized government on earth allows to be violated in the persons of its subjects; and it has been the strong arm of the Federal Government which has released thousands of men, women, and children, from a terror with which they could not fail to be filled by countless outrages perpetrated upon their friends, relatives, and neighbors, by conspirators whose deeds the world reads of with horror.

The public schools have been crippled in their work, and, in many cases, closed, because their teachers applied in vain at the State Treasury for the small salaries justly due them and necessary to their daily support.

The inmates of the Lunatic Asylum must have been turned loose upon the community, but for the humane efforts of its efficient superintendent, who pledged his private credit to obtain food nobody would sell on that of this great State. The doors of the penitentiary may be flung wide open any day, to allow the exit of a band of convicts whom the warden cannot feed, because there is no money in the State Treasury to purchase food. The judges of our courts have not been paid their salaries for many months, and are compelled, in most cases, to borrow money, to supply the wants of themselves and their families, and to be subjected to the temptations too often placed by rich suitors before a judiciary irregularly or inadequately paid.

Jobs of every conceivable description have been undertaken; the interests of the State have been constantly and systematically set aside to enrich those who scrupled at no kind of bribery or corruption to secure such legislation as the jobbers required.

Public money has been squandered for objects of no public moment. The expenses of some branches of the government have been so enormously increased as to astonish all who are not familiar with the character of many of those who fill important positions in the State government.

"Pay certificates," drawn by the Speaker of the House of Representatives, purporting to be for expenses of the late session, to the amount of over \$1,000,000, have already appeared at the Treasury, and been paid or exchanged for the notes of the Treasurer, and it is estimated, by those in a position to judge wisely, that \$250,000 in "pay certificates" are still afloat in the community, to be presented whenever there is any probability of their being allowed. This will make the expenses of a single session of the General Assembly over \$1,250,000, or more than 4,000 per cent. of the sum which was formerly considered sufficient to pay them. Enormous sums have been lavished in pretended support of an "armed force," which is notoriously non-existent. The most corrupt practices have obtained in the making of contracts by State officials. The contract with the Roberts and other arms companies, of New York, under which there were drawn from the State Treasury over \$200,000, while said arms company received less than \$90,000, is a type of the manner in which the State Treasury has been depleted. The public are familiar with the enormous extent of the

bills for State printing. Formerly, this item of expense, for a session of the Legislature, was not one-fiftieth, certainly not one-fortieth, of what it has been during the year past.

Our plain duty points to this; our obvious interests demand this; the interests of party demand it; the interests of the State demand it; a decent regard for the opinions of mankind demands it: we must put forward for official position those, and those only, who are known as upright, true, and unstained men, whose Republicanism is as undoubted as their integrity and their capacity to perform the functions of the offices for which they are nominated. Within the lines of the Republican party our work lies. There are honest hearts and wise heads enough in that party to do our work. Every good citizen, whatever his party affiliations may have been, owes it to himself to work to purify and regenerate our State government; but the work especially belongs to us. We cannot abandon it to our political adversaries, until we have demonstrated our inability to do it ourselves.

The Executive Committee of the Democratic party decided not to call any convention for the nomination of State officers, their decision being expressed in the following resolutions, adopted on the 27th of August:

Resolved, That, in the present state of parties in South Carolina, we deem it unwise to nominate a Democratic State ticket, and decline, therefore, to call a convention of the people for that purpose.

Resolved, That, having adopted the policy thus indicated, we demand of the Republican party that they fulfil in good faith their public pledges, and give to the State an able, honest, and economical Government, under which extravagance and fraud shall cease, and all classes of citizens shall be faithfully and intelligently represented.

Resolved, That we now place on record our unqualified condemnation of the corruption and robbery which, as the Republicans themselves confess, pervade the executive and legislative departments of the State government; for which corruption and robbery the Republican party of this State, as sustained by the Federal Government, is alone responsible.

Resolved, That we deem it of the first importance that the Democratic party be organized in the several counties, for the purpose of obtaining, by such means as may seem best, the largest measure of local and legislative reform.

Resolved, That the chairman of this committee appoint, at his leisure, a chairman for each county in the State, who shall carry out in their respective counties the objects of the preceding resolutions.

Resolved, That the members of this committee from the different congressional districts have authority to make arrangements for the nomination of members of Congress for their respective districts.

There was, however, a meeting of the so-called "straight-out" Democrats, at Columbia, at about the same time with the Republican Conventions in August, and delegates to the National Convention to be held at Louisville were appointed. The following is the platform adopted:

Resolved, That South Carolina is one of the thirteen original States of the American Union, is a peer and an equal of each of the thirty-seven States now composing the Republic of the United States, and, as such, should and ought to enjoy all the rights reserved and guaranteed by and under the Constitution of a common country.

Resolved, That the union established by the Constitution is a union of States thereby united, and is incapable of existence without the States as its con-

stituent integral parts; that the indestructibility of the States, of their rights, and of their equality with each other, is an indispensable part of this political system, and, therefore, the perpetuation of the Union in its integrity depends upon the preservation of the States in their political integrity; the Government of the United States being a federal republic, and not a consolidation of the whole people into one homogeneous nation.

Resolved, That the right of local State government, with the subjection of the military to the civil authority, and the security of the writ of *habeas corpus*, in time of peace, with the power to enforce the rights and promote the well-being of its inhabitants by such means as the judgment of its own people may prescribe, are reserved, secured, and guaranteed, under the Constitution of the United States, to the several States of the Union, and that, too, not subject to any constitutional obligation, on the part of the Federal Government, of any kind whatever; but, on the contrary, the Federal Government is under a solemn constitutional obligation not to interfere in these matters in any way; and, when it does so, it becomes a usurper of power, an oppressive tyrant, and an enemy to the liberties of the Government.

Resolved, That the perpetuation of the Union, and the maintenance of the Government, as both were established by the Constitution, and as both under the Constitution have been expounded in the foregoing resolutions, in conformity with the teachings of Jefferson, Madison, and Jackson, have ever been held as cardinal doctrines of the Democratic party; and they are now reiterated, with increased earnestness, under the solemn conviction that the only sure hope for the preservation of liberty rests in bringing back the administration of the Government to these principles, and in rescuing it from the hands of those whose admitted usurpations and revolutionary measures now threaten the entire overthrow of the whole fabric of our system of free institutions, and the erection in their stead of a consolidated empire.

Resolved, That, in the approaching election, the Democratic party of South Carolina invites everybody to cooperate with them in a zealous determination to change the present usurping and corrupt Administration, by placing in power men who are true to the principles of constitutional government, and to a faithful and economical administration of public affairs.

The State election occurred on the 16th of October, and resulted in the victory of the "Regular" Republicans. The total vote cast for Governor was 106,871, of which Moses received 69,738, and Tomlinson 36,533, making the majority of the former 33,305. "Regular" Republican Congressmen were chosen in all four of the districts, and the new Legislature consists of 25 Republicans and 8 Democrats in the Senate, and 100 Republicans and 24 Democrats in the Lower House. The total vote at the presidential election in November numbered 95,880, including 187 in favor of Charles O'Connor, for President. General Grant received 72,290, and Horace Greeley 22,903, the majority of the former being 49,300.

The total value of real estate in South Carolina, as returned by the county assessors, for the thirty-one counties, is \$92,806,417, of which \$63,801,843, is outside of incorporated cities, towns, and villages, and \$29,504,574 in them. The total value of taxable personal property is \$46,190,322. The rate of taxation for 1872-'73 is 15 mills on the dollar. The

county taxes amount on an average to about eight mills more.

The legal "school age" in this State is from six to sixteen, both inclusive. The number of children whose ages came within these limits, at the beginning of the year, was 209,376, of whom 43,344 were white males, 40,860 white females; 62,925 colored males, and 62,247 colored females. Of these, 19,446 white males, 18,241 white females, 19,428 colored males, and 19,207 colored females, or a total number of 76,822, attended the public schools during the year. This is only about thirty-six per cent. of the whole. The number of free common schools in the State was 1,919, an increase of 280 in one year. The increase in attendance was 10,266. The whole number of teachers employed was 2,185, or 287 more than in 1871. These teachers are classified thus:

TEACHERS.	Males.	Females.	Total.
Northern white teachers.....	13	40	53
Southern white teachers.....	998	646	1,644
Northern colored teachers.....	16	6	22
Southern colored teachers.....	346	180	476
Total.....	1,363	822	2,185

The average monthly wages paid to male teachers was \$32.55, to female teachers \$31.25. In the city of Charleston male teachers receive \$144 per month, and females \$40 per month. The number of school districts in the State is 462, and the average length of the schools throughout the State was five months. The number of school-houses erected during the year was 226, the aggregate cost being \$11,505.50. The number of school-houses previously erected is 1,644, which are valued at \$220,448. The amount of money appropriated by the State for the support of free schools, in 1871, was \$150,000, while in 1872 it was \$300,000. Besides this, the poll-tax, amounting to about \$50,000, is devoted to this purpose, and, in the sixteen counties of the State which made returns out of the whole number of thirty-one, \$75,898.35 was raised by local

taxation for school purposes. Seven teachers' institutes were held in the State during the year.

The State University, at Columbia, had 88 students in attendance during the year ending June 29th. The appropriations for its support for the fiscal year ending October 31st were \$27,850 for ordinary expenses, and \$10,000 for repairs on the buildings. The Institution for the Education of the Deaf, Dumb, and Blind, located at Cedar Spring, in Spartanburg County, had 42 pupils during the session ending June 27th. These consisted of 12 male and 11 female deaf-mutes, and 11 male and 8 female blind pupils. The State appropriation for this institution, including an unexpended balance of \$3,179 from the preceding year, amounted to \$13,179. The State Orphan Asylum had 180 inmates on the 31st of October, 71 boys and 69 girls, all colored. Of the \$15,000 appropriated for the asylum for the year, only \$3,500 was paid over during the year. The number of patients in the State Lunatic Asylum on October 31, 1871, was 295, of whom 135 were males, and 160 females. During the year following, 54 males and 39 females were admitted, 80 were discharged, and 22 died, leaving on October 31, 1872, 284 inmates. The appropriation for this asylum for the last fiscal year was \$80,000. The disbursement, for the same period, amounted to \$66,506.92, and there was \$62,015.65 of unpaid liabilities. The number of convicts in the penitentiary on the 1st of October was 219, against 309 a year previous. The reduction was due in a large measure to the pardon of many convicts for good behavior, near the close of their terms. This institution began the year with a deficit of \$17,457.11; the appropriation for the year was \$80,000, and \$4,717.69 was derived from the labor of the convicts. The disbursements for the year amounted to \$74,699.43, leaving a deficit at the end of the year of \$7,438.85.

The following is a statement of the condition of the railroads of the State, so far as reported:

NAME.	Length, with Branches.	Capital Stock.	Funded Debt.	Floating Debt.	Cost.	Earnings of the Year.	Expenses.
Greenville & Columbia.	162	\$1,514,463 54	\$1,953,123 18	\$388,572 96	\$3,142,825 96	\$538,376 94	\$549,997 92
Northeastern & Charleston.....	102	898,950 00	1,269,533 00	96,544 00	2,148,180 00	380,600 00	245,924 00
South Carolina.....	348	5,819,275 00	4,489,334 51	8,613,087 73	1,364,577 45	842,897 97
Washington, Columbia & Augusta.....	189	800,000 00	5,800,000 00	238,102 15	4,352,898 21	491,068 79	864,547 70

An important item in the natural resources of South Carolina is found in her phosphate-beds. The shipping of this material to foreign and domestic ports began in 1867, when the total amount shipped was six tons. The whole amount shipped from Charleston and Beaufort down to July 1, 1872, was 206,305 tons, valued at \$1,450,000, while 86,110 tons, valued at \$250,000, have been consumed by local companies in the manufacture of fertilizers.

The increase has been steady and rapid, both in exportation of crude phosphate rock and in the manufacture of fertilizers at home.

In 1870 the population over ten years was 508,768. The number of persons engaged in all occupations was 268,801. There were engaged in agriculture, 206,654, of whom 163,528 were agricultural laborers, and 42,546 farmers and planters; in professional and personal services, 84,848, including 558 clergymen, 16,314

domestic servants, 10,654 laborers not specified, 887 lawyers, 789 physicians and surgeons, and 1,074 teachers not specified; in trade and transportation, 8,470, including 2,084 clerks in stores, 1,112 employés (not clerks) of railroad companies, and 1,277 traders and dealers not specified; and in manufactures, mechanical and mining industries, 13,794, of whom 2,454 were carpenters and joiners.

The State contained 3,010,539 acres of improved land, 6,443,851 of woodland, and 2,650,890 of other unimproved land. The cash value of farms was \$44,808,763; of farming-implements and machinery, \$2,282,946; total amount of wages paid during the year, including value of board, \$7,404,297; total (estimated) value of all farm-productions, including betterments and additions to stock, \$41,909,402; orchard-products, \$47,960; produce of market-gardens, \$127,459; forest-products, \$167,253; home manufactures, \$812,191; animals slaughtered or sold for slaughter, \$2,507,149; all live-stock, \$12,443,510. There were 44,105 horses, 41,327 mules and asses, 98,693 milch-cows, 17,685 working-oxen, 132,925 other cattle, 124,594 sheep, and 395,999 swine. The chief productions were: 817,700 bushels of spring, and 465,910 of winter, wheat, 86,165 of rye, 7,614,207 of Indian-corn, 613,593 of oats, 4,752 of barley, 460,378 of peas and beans, 88,252 of Irish, and 1,342,165 of sweet, potatoes, 5,830 of clover-seed, 10,665 tons of hay, 224,500 bales of cotton, 32,304,825 pounds of rice, 34,805 of tobacco, 1,461,980 of butter, 184,253 of honey, 11,404 of wax, 1,055 hogsheads of cane-sugar, 13,179 gallons of wine, 241,815 of milk sold, 436,862 of cane, and 183,585 of sorghum, molasses.

The total number of manufacturing establishments was 1,584, having 210 steam-engines of 4,537 water-power, and 700 water-wheels of 10,395 water-power, and employing 8,141 hands, of whom 7,099 were males above sixteen, 578 females above fifteen, and 464 youth.

The capital invested amounted to \$5,400,418; wages paid during the year, \$1,543,715; value of materials used, \$5,855,736; of products, \$9,858,981. Among the leading industries were 12 establishments for the manufacture of cotton-goods, using 14 water-wheels of 955 horse-power, and employing 1,123 hands; capital, \$1,387,000; wages, \$257,680; materials, \$761,469; products, \$1,529,937; 624 flouring and grist mills, using 79 steam-engines of 1,242 horse-power, and 537 water-wheels of 7,209 horse-power, and employing 1,188 hands; capital, \$835,814; wages, \$109,836; materials, \$2,663,423; products, \$3,180,247; 227 lumber-mills, using 82 steam-engines of 2,315 horse-power, and 114 water-wheels of 1,729 horse-power, and employing 1,212 hands; capital, \$583,425; wages, \$209,806; materials, \$581,499; products, \$1,197,005; and 54 establishments for the manufacture of tar and turpentine, employing 876 hands; capital, \$205,425;

wages, \$123,645; materials, \$422,378; products, \$774,077.

The total number of libraries, reported by the census of 1870, was 1,663, containing 546,244 volumes. Of these, 922, with 397,020 volumes, were private, and 741, with 149,224 volumes, other than private; among the latter were 1 State library, with 2,700 volumes, 3 court and law, 6,324 volumes, 4 school, college, etc., 20,800 volumes, 647 Sabbath-school, 93,200 volumes, 84 church, 25,100 volumes, and 2 circulating, 1,100 volumes.

The total number of newspapers and periodicals was 55, having an aggregate circulation of 80,900, and issuing annually 8,901,400 copies. Of these, 5 were daily, with a circulation of 16,100; 4 tri-weekly, circulation 9,600; 42 weekly, circulation 44,000; 3 monthly, circulation 10,000; and 1 quarterly, circulation 1,200.

The total number of religious organizations was 1,457, having 1,308 edifices, with 491,425 sittings, and property valued at \$3,276,982. The principal denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	523	191,550
Episcopal.....	88	36,350
Jewish.....	3	900
Lutheran.....	49	17,900
Methodist.....	611	164,050
Presbyterian.....	164	67,100
Roman Catholic.....	12	10,775
Universalist.....	3	850

The condition of pauperism and crime is shown by the following statistics:

Total population.....	705,606
Number of persons receiving support during the year ending June 1, 1870.....	2,343

Foreign.....	18

SPAIN, a country in Southern Europe, was, at the close of the year 1872, a kingdom,* ruled by Amadeus I., second son of the king of Italy, born on May 30, 1845; King of Spain since December 4, 1870. King Amadeus was elected at a full meeting of the Cortes, at which 311 members, out of a total of 345, were present. The majority required by law for the election of a monarch was 173, and the king obtained 191 votes, the remainder being given to three other candidates and in favor of a republic.

Spain is divided into forty-nine provinces, which, according to the latest calculations ("Gotha Almanac" for 1873), had the following area, and, in 1867, the following population:

* On February 11, 1873, the king abdicated, and Spain became a republic.

PROVINCES.		Area.	Population.	PROVINCES.

On January 1, 1872, the aggregate length of railroads in operation was 8,800 miles. On the island of Cuba there were, in 1871, 397 miles in operation.

In the middle of January, the Spanish ministry sent a circular to the governors of provinces, instructing them to suppress all organizations belonging to or in any way connected with the International Society, within their respective jurisdictions. They were directed, while thus breaking up a system dangerous to civil peace, not to interfere with liberty of speech, and to take no notice of the simple enunciation of the principles of the International Society, as the laws of Spain provided no punishment for such utterances.

The circular caused remonstrances from all members of the International Society in all parts of Spain, and the Internationals of Madrid made an earnest appeal for the revocation of the instructions.

King Amadeus, in order to give to the great Spanish statesman, Espartero, a proof of his high respect, offered to him the title of Prince of Vergara. Espartero at first declined this title, but subsequently reconsidered his refusal,

and signified his acceptance of the honor offered him by the King.

The national Cortes met on January 23d. At a previous caucus of Senators and Deputies, it was resolved to present and support the name of Señor Zorilla as President, against the ministerial candidate, Señor Herrera. The ministry made the election of Herrera a cabinet question; but, during the proceedings preliminary to organization, it became evident that the temper of the House was against the Government, and that the ministerial candidate for the chair had little chance of success. On the test-vote the opposition showed itself largely in the majority, and Herrera's defeat in the regular election for President was inevitable. For this, Señor Sagasta did not wait. He immediately visited the King, and informed him that the vote in the Cortes left him but two alternatives—the dissolution of the Cortes or the resignation of the ministry. The latter course was decided upon, and the King said he should take counsel with the President of the Senate, the Vice-President of the House, and with Señors Herrera, Zorilla, and Serrano, before the formation of a new Cabinet.

On January 24th a royal decree was read in the Senate, dissolving the Senate and Congress. A stormy scene followed the reading of the decree. The House seemed to be taken by surprise, and the members were unable to conceal their indignation. Passionate speeches were made, which were answered by derisive cries by the few supporters of the ministry. One deputy exclaimed, "The time has come for barricades!" The greatest uproar and confusion followed, amid which the sitting was declared at an end.

On January 29th there was a serious disturbance at Barcelona, caused by the resistance of the people to the payment of the octroi duties. A large mob assembled at one of the gates of the city, and threatened the customs officers with violence. The police interfered, and some shots were fired. The rioters were dispersed with difficulty. Subsequent investigations led to the discovery that the disturbance was fomented by the International Society, and many members of the organization were arrested.

At the beginning of February, dispatches were received from the Governor-General of the Philippine Islands, announcing a serious attempt at revolt. A company of 200 native soldiers, belonging to the artillery service, mutinied and took possession of a fort. The place was subsequently carried by assault by the regular troops, and all the insurgents were killed.

On February 20th a new ministry was formed by Señor Sagasta, composed partly of his own adherents and partly of the members of the Unionist party. It consisted of the following members: Presidency and the Interior, Sagasta; Foreign Affairs, De Blas; Justice, Colmenares; War, General Rey; Finances, Camacho; Navy, Malcampo; Instruction, Robledo; Colonies, Herrera.

The Radical party assumed a very hostile attitude toward the new ministry, and even toward the King. The committee of the party published a manifesto, explaining its coalition with other parties, on the plea that it despaired of any results of the revolution in 1868. No mention was made in the manifesto of the King or his dynasty.

On March 9th, a meeting of delegates from the committee of all the parties forming the coalition met at the house of Señor Zorilla, to arrange the division of the electoral districts, and to settle the basis of their course of action at the elections. It was decided that each party should preserve its principles and aims intact in the Cortes, and that at the elections the opinion of the majority of the opposition electors, to be ascertained by the preliminary ballot, should prevail in the selection of the candidate of the coalition, so that each district should only nominate one coalition candidate.

On the other hand, a large meeting of about 4,000 electors belonging to the Ministerial

(Sagastist) and Unionist parties, held in Madrid on March 9th, appointed a joint electoral committee of the two parties. Among those present were Marshal Serrano, Señors Zabala, Montijo, and the principal members of the Unionist and Sagastist parties. Señor Santa Cruz made a speech, in which he said that the deputies and senators of the Unionist and Sagastist parties accepted the programme of Señor Sagasta, and formed henceforth a single party. They had, therefore, decided upon the joint appointment of an electoral committee, to be entrusted with the task of selecting candidates for the next elections. Señor Candan described the coalition of the different opposition parties as abominable, and said: "We are the revolutionists of September, and, with a few exceptions, all the men who made that revolution are on our side—for example, Marshal Serrano, Señor Malcampo, Admiral Topete, Señor Sagasta, and others. The existence of the dynasty is placed in the safe keeping of the real revolutionists of September. King Amadeus represents the revolution."

In response to numerous appeals, Marshal Serrano made a speech, in the course of which he said that, on the corpse of General Prim, he had sworn to save the dynasty. He had not failed and would not fail to fulfil this vow. He warmly eulogized the King, and said he looked upon the Carlists and Republicans only as enemies; the Radicals, he hoped, would recognize their error.

The official *Gazette* of March 20th published royal decrees accepting the resignation of Señor Lopez Roberts, the Spanish minister at Washington, and appointing Rear-Admiral Polo to replace him. The new minister delivered his credentials to President Grant on April 5th.

The elections for members of the electoral colleges (which choose Senators and Deputies of the Cortes) took place, on April 2d, throughout the kingdom, and were conducted quietly, except in Cordova, and a few other places, where slight disorders occurred. The city of Madrid was carried by the coalitionists; ministerialists on the other hand were successful in the provinces of Valencia, Salamanca, Huesca, Alicante, and Avila. The Ministerialists only gained a small majority, the opposition having carried over 170 districts; of its members 62 were reported to be Radicals, 38 Carlists, 42 Republicans, and 32 Opposition Conservatives (Alfonsinos, Montpensierists). In the new Senate the ministry had an overwhelming majority.

The newspaper organs of the Carlist party published a manifesto (dated April 8th) of Don Carlos, protesting against the late elections, signed by his secretary and countersigned by Nocedal, and declared that henceforth Don Carlos and his followers would protest only in the field. The Carlist members accordingly refused to take their seats.

A few days later Carlist risings occurred

amid the cries of "Viva Carlos VII." "Death to the Liberals!" in the provinces of Navarre, Guipuzcoa, Teruel, Leon, Huesca, and several others. The number of the Carlist bands which were in the field about the close of April was estimated at over 15,000. In the Basque provinces and Navarre, the great stronghold of the party, General Diaz de Rada, who formerly held that rank under Isabella II., was appointed commander-in-chief. On assuming command he issued the following proclamation:

The King, our august master, did me the honor to write this to me on the 14th of April: "My dear Rada, the supreme hour has arrived. All Spaniards of spirit are calling for their legitimate King, and the King hastens to respond to their appeal. I, therefore, order that the general rising of Spain shall commence on the 21st, to the cry of 'Away with the foreigner—long live Spain!' I shall be among the first at the post of honor. Those who follow me will deserve well of their King and their country; those who fight against me will alone be responsible for the blood that may be shed." My reply to his Majesty was a promise of fidelity and immediate obedience to his orders. Up to this time you have given many proofs of obedience and discipline, have suffered in silence, and have always stifled the indignation which you felt for the illegalities which were being committed, the acts of tyranny, the persecutions of the satellites of a princely adventurer, who, to the disgrace and humiliation of Spain, has not scrupled to occupy the throne of Saint Ferdinand by usurping the most legitimate rights, and by trampling upon the most sacred principles. The King had directed you to wait, and you obeyed. To-day he says to you, "To arms!" and you rush to the standard of "God, the country, the King," for his will accords with the warmest impulses of your own hearts. To arms, then, brave and heroic Navarros and inhabitants of the Basque provinces! and very soon we shall gain a victory which will forever secure your venerated privileges (*fueros*), the peace, happiness, and true freedom of our country. Hurrah for religion, for Spain, for Charles VII.! Down with the foreigner!

The Commandant-General,
EUSTAQUIO DIAZ DE RADA.

On April 24th the new Cortes were opened by the King in person. In the speech from the throne, his Majesty stated that cordial relations existed with all foreign powers, and that Venezuela had offered the most satisfactory explanations respecting the incident with the Spanish representative in that state. The policy of Spain toward the American republics was one of peace, mutual respect, and that generous and reciprocal interest which unites all civilized nations. The King hoped an agreement between Italy and the Holy See, which he strongly and sincerely desired, would shortly be effected. His Majesty intended rendering practical and fruitful the sacred rights established by the Constitution, and announced measures for army reform and for the fulfillment of the promises of reform in the colonies, while avoiding all that might imperil the integrity of the territory, or give arms to the enemies of the Spanish name and race.

Relative to the Carlist rising, the King said:

A party denying the legitimacy of modern right, and which is a stubborn enemy of the institutions established by the Spanish nation, after having been

beaten in the elections, has risen in arms in some provinces. The Government has taken the most efficacious measures promptly to crush the insurrection, and, taught by experience the futility of clemency, will be inexorable in its punishment of the constant enemies of liberty and disturbers of the public peace. If ordinary measures are not sufficient, my Government will demand your sanction for others necessary to firmly reestablish the reign of the law.

The King expressed a hope for a prompt termination of the insurrection, praised the discipline and services of the army and the civic guard, and concluded by stating that he would seek in the deliberations of the Cortes a guide for his conduct and a way to identify his feelings with those of the Spanish people. He said:

I will never impose myself on the Spanish people; but neither will I allow myself to be accused of deserting the post which I occupy by its will, nor of forgetting the duties which the Constitution places upon me, and which I shall fulfil with the loyalty and constancy which I owe to the honor of my name.

On April 25th Señor Rios Rosas was elected President of the Cortes by 168 votes. Eighty-four blank voting tickets were given in. For the office of Vice-President the ministerial candidates were elected by a large majority.

Public attention was for some time wholly absorbed by the progress of the Carlist insurrection, which spread to more than twenty of the forty-nine provinces into which Spain is divided. Don Carlos himself appeared in the field. The Government appointed Marshal Serrano commander-in-chief of the troops sent against the Carlist bands in the insurgent provinces. A severe encounter occurred on May 5th at Oroquieta, in Navarre, in which the Carlists were completely defeated. The troops charged the insurgents with the bayonet more than once, drove them from the village, and took by assault the houses to which they fled for shelter, and where they attempted to barricade themselves. The Carlist force had halted at Oroquieta for refreshment, but though it was known that Moriones, a very energetic officer, was in pursuit of them, it seems that insufficient precautions were taken against surprise. The surprise was complete. Moriones, with a column of about 2,000 men and a mountain battery, fell upon the insurgents almost before they knew where they were. The loss of the Carlists was over 700 men killed, wounded, and prisoners. It is reported they were near 4,000, and that there were in addition, perhaps, 1,500 men who, however, did not come up in time to help them. After the combat Don Carlos rode off with an escort, and soon after recrossed the frontier of France. On May 10th the managing committee of the federal republicans issued a manifesto bearing the signatures of Señors Pi Margall, Castelar, Figueras, and other leading republicans. The manifesto repudiates any alliance or sympathy with the Carlists, and says that, beyond what local circumstances may counsel, the republicans can neither protect the cause of Don Carlos nor fight under the flag of King Amadeus. The manifesto also accuses the

Government of hypocritically diminishing Spanish liberties, adding:

The Government is bringing us not peace but war. By a timely intervention in the contests of the monarchical parties, the republicans will at once save liberty and establish the republic. The revolution is far from being consolidated. It has not yet fought its last battle. Republicans must prepare for the combat. This preparation must be the work of the managing committee.

As several persons belonging to the Carlist bands who accepted the pardon offered them by the general-in-chief, and who gave themselves up to the authorities, returned to the ranks of the rebels, Don Domingo Moriones, Commandant-General of the Division of Navarre, issued the following order:

ARTICLE 1. Every rebel who, having once accepted pardon, absents himself from his habitual domicile, and again enlists in the ranks of the faction, shall be shot.

ART. 2. The alcaldes and other persons who induce the pardoned to again form part of the said bands shall be brought in to this city (Pamplona), and tried by court-martial.

ART. 3. Equal responsibility will be incurred by the alcaldes who neglect to give an account of the inhabitants of their towns who are in the situation of those referred to in Art. 1, and who do not inform the nearest column of troops of the direction taken by the Carlist bands as soon as these abandon their respective towns.

On the part of Don Carlos, his brother Don Alfonso was appointed commander-in-chief of the insurgent forces. Don Alfonso addressed a manifesto (without date) to the Spaniards. He expressed his joy at being named by the King, his brother, the general-in-chief, and of his being in the midst of the army; he was confident that its coöperation would secure the triumph of the good cause, the symbol of which is the flag which floats in all Spain, and bears as its motto, "God, country, and King." He was certain there was not a Spaniard loving his country who did not ardently desire to raise her from the abject condition to which those who were improperly termed Liberals had brought her. These so-called Liberals, says the manifesto, profess doctrines which essentially differ from their acts. They abuse the word liberty, for it is in the name of liberty that they commit the worse crimes, impose laws, and bow down the nation under the most odious of despotism. Arbitrary acts, violence everywhere, destruction of churches, sales of property to glut their cupidity, to satisfy their passion for wealth—such are the things which characterize them. No one can have a doubt of the truth of these allegations who examines the deplorable state of the finances—bankruptcy is inevitable. In spite of the millions upon millions swallowed up, the most sacred obligations are disregarded, and yet near 3,000,000,000 of reals are spent every year; and, to complete their iniquities, concubinage is preferred to legitimate marriage. As it is impossible to support any longer such a state of things, the Infante summons all true Spaniards to arms, as the only means left to

restore the dignity and independence of the nation, and to establish forever right and justice. The army, entirely composed of their brethren, will not dare to fire upon them in defence of a foreign dynasty—in defence of men who are the supporters of that dynasty, merely to retain power in their own hands. The prince concludes:

The peaceable inhabitants of the towns have nothing to fear from us, whatever their political opinions may be. Our magnanimous King knows no other enemies than those who combat him; he has no personal injuries to avenge, no hatreds to satisfy. His greatest desire is to save our unfortunate country, to tear it from the yoke which is crushing it, and to restore its true liberty—Christian liberty, the liberty which makes nations powerful, happy, and respected.

The Infante of Spain, Generalissimo,
ALFONSO DE BOURBON ET D'AUTRICHE.

The Cortes, on May 19th, after an animated discussion, rejected a resolution introduced by Deputy Argullos, censuring the Government for declaring Navarre, Lerida, Biscay, and Catalonia in a state of siege during the recent movements of the Carlists in those provinces. They also passed a bill providing for bringing the effective force of the regular army in Spain up to eighty thousand men. On May 20th, the Minister of State, Señor Blas, stated that in a few instances the Carlists had been favored by the French authorities on the frontier, and that the Government had protested against it.

On May 22d Señor Sagasta stated that, in consequence of the publicity which had been given to the documents relative to the secret funds, the Government was about to resign. Señor Zabala, who was first called upon to form a new ministry, declined, alleging as a reason his indifferent health. Marshal Serrano likewise declined this request, and the King then applied to Admiral Topete, who consented to perform the duty. The new ministry was constituted as follows: Admiral Topete, President of the Council and Minister of War, and the Navy; Groizard, Minister of Justice; Elduayen, Minister of Finance; Candau, Minister of the Interior; Balaguer, Minister of Public Works; Ulva, Minister of Foreign Affairs; and Aquala, Minister of the Colonies.

On May 29th Marshal Serrano concluded at Amorovieta a convention with the Carlist war junta, who in the course of May had made considerable progress, granting a universal amnesty, even to the leaders, and leaving the officers of the royal army who had joined the insurgents in their former ranks.

The Cortes having reassembled on May 28th, Admiral Topete, the President of the Council, on May 30th, stated that the ministry recognized the validity of the convention made by Marshal Serrano with the rebels in Biscay, pardoning those who voluntarily surrendered, and requested the members of the Opposition not to interpellate the Government relative thereto. Upon this announcement Señor Zorrilla moved a vote of censure upon Marshal

Serrano, and Señor Martos proceeded to question the Government. The President of the Cortes refused to answer. Señor Martos insisted upon his question, when the President declared that the action of the Deputy was insulting to him, and left the Chamber. Great confusion followed the retirement of the President, and the tumult in the Chamber became general.

On May 31st Marshal Serrano resigned as generalissimo of the troops operating against the Carlists in the Basque provinces, and Lieutenant-General Echague was appointed his successor.

On June 8d, the Cortes, by a vote of 140 against 22, passed a resolution declaring valid the amnesty granted by Serrano to the Carlists who voluntarily surrendered. Marshal Serrano took the oath of office as President of the Council and Minister of War to the new ministry, which position had been occupied by Admiral Topete.

As the Carlist troubles continued, and as the Radicals, whose leader, Zorilla, had resigned his seat in the Cortes, and retired, in disgust, to private life, threatened to unite with the Republicans, Serrano proposed to the King a suspension of the guarantees of individual liberty and popular rights contained in the constitution. The King at once refused to approve this measure, and not only accepted the resignation of the ministry, but invited the chief of the Radical party, Zorilla, to form a new ministry. The invitation was accepted, and the new ministry constituted as follows: Zorilla, Prime-Minister and Minister of the Interior; Martos, Minister of Foreign Affairs; Cordova, Minister of War; Mantero Rios, Minister of Justice; Ruiz Gomez, Minister of Finance; Beranger, Minister of the Navy; Echegaray, Minister of Public Works; Gasset, Minister of the Colonies. On June 26th the new prime-minister addressed a circular to the governors of the provinces, explaining the course to be pursued by him. The main points of this circular are as follows: He announces the Radical programme to be the same as stated in his speech of the 24th of July, and in his circular of the 4th of August. The Government believes that it is neither fitting nor necessary to take measures to save liberty: liberty is self-reliant. Señor Zorilla declares that the Government will energetically combat the insurrection, with the support and unwavering loyalty of the army and navy, and the patriotic aid of the citizen-militia. Replying to the attacks of the Conservatives, who attribute to the Radicals anarchical ideas and projects, and designs against public peace, social order, religion, property, and family life, Señor Zorilla says the ministry will govern according to the constitution—neither more nor less. He announces the immediate establishment of trial by jury, the abolition of the conscription, and the reorganization of the army and navy on a basis rendering them really national institutions. The ministry will oppose religious intolerance,

and secure the universal enjoyment of liberty of conscience. Special care will be bestowed to improve the present critical condition of the finances. The Government will propose means for diminishing the expenditure and increasing the revenue, so as to establish the budget upon a solid basis. With regard to the enormous debt pressing upon the Treasury, the Government will respect, as justice and decency require, the sacred rights of the creditors of the state, and will act in concert with them in questions in which they are concerned. The Government wishes, above all, to crush the Cuban insurrection, and secure the integrity of the territory at any sacrifice, and without making for that end concessions repugnant to patriotism and Spanish honor. When the insurrection is vanquished, the Government will give the colonies the promised constitution and reforms. Relative to liberty of association, the circular says:

The Government cannot persecute a state of things based upon the philosophical economy of political systems, even when contrary to their ideas, or prosecute associations founded on these systems, so long as they remain within the circle traced by the penal laws; but the ministry will repress any attempt manifested, by overt acts, to destroy existing institutions, to attack individual liberty, or obstruct the free exercise of constitutional rights.

On June 30th royal decrees were made public accepting the resignation of Count Valmaseda, Captain-General of Cuba, and intrusting the vacant post, *ad interim*, to Señor Ceballos; relieving Señor Gomez Pulido from his functions as Captain-General of Porto Rico, and appointing Señor Simon Latone his successor; removing Señor Letraíne Bonajo from the presidency of the financial commission of Spain abroad, and nominating as his successor Señor Lopez Tejada. Elections for the Senate and Congress were ordered in Porto Rico, in conformity with the decree of the 1st of April, 1871. Another royal decree (dated June 30th) dissolved the Cortes, ordered elections for members on August 24th, and convoked the new Cortes on September 15th. The Republicans at first resolved to oppose every form of monarchical government in Spain, to acknowledge no monarchical authority, and to abstain from all elections while monarchy existed in the country; subsequently, however, this resolution was reconsidered. At the same time numbers of the majority in the Cortes, and former members of the ministry belonging to the Conservative party, determined to withdraw from the political arena.

On July 17th Señor Zorilla issued a circular on the subject of the approaching elections. In this circular he urged that perfect liberty should be given to the voters, and recommended the Government functionaries not to interfere in any way with the elections, but to abstain absolutely from lending their influence to any party. Señor Zorilla says that there are no official candidates, and that it is for the members of the Radical party freely to choose

candidates who will support the Government. The minister, remarking next that it is an invariable rule with the Radical party, and, consequently, with the present Government, to respect public opinion and obey the laws, adds that, thanks to the moderation and loyalty of the Government, the general condition of the country has been undergoing a favorable change since the appointment of the new ministry. Individual rights and constitutional privileges are upheld even in those parts which are disturbed by the civil war. The rebellion is now dying out in the north, and is almost entirely subdued in Catalonia. Referring to the financial position, Señor Zorilla is glad to find that the injured credit of Spain is recovering, and capital is again forthcoming. The good administration of public affairs, based on rigorous economy, is sufficient to restore to the finances their usual resources. The Government considers that the moment has arrived for giving effect to the great reforms promised by the revolution. The minister enumerates these reforms, which will be carried out with the concurrence of the Cortes. Señor Zorilla concludes by saying that the Government is determined to solve the problem of identifying democracy with liberty, stability with progress, monarchy with the people, and the interests of all parties with the most complete enjoyment of all rights.

On July 19th, while the King and the Queen were returning from the garden into the Palace of Buen Retiro, at midnight, five men, who had posted themselves in the calle Arnal, fired upon the carriage of their Majesties. Neither the Queen nor the King was hurt. One of the assassins was killed upon the spot by the attendants. Two others were captured. The greatest indignation at this attempt was expressed by the entire population of Spain.

The election held in August resulted in a complete victory of the new Radical ministry. Out of the 406 Deputies composing the Congress, Señor Zorilla's party, the Radicals, numbered 296. It was, moreover, expected that the Republicans, who numbered about 80, in all sincere and honest efforts to effect practical reforms, would vote with the Government, that thus the system of trial by jury would be established, negro slavery abolished, the financial position of the country looked fairly in the face, conscription for the army discontinued, the relations between Church and state modified, the position of the clergy clearly defined; in short, that the various practical reforms the revolution promised to effect would be carried out. The Conservatives professing adhesion to King Amadeus only numbered 10 in the Congress; those whose sympathies were with Prince Alfonso, 14. Out of 200 composing the Senate, the Radicals had 144; the Republicans, 16; while the Conservatives, dynastic and anti-dynastic, had the remaining 40.

On September 15th the King opened the session of the new Cortes. In his speech from

the throne, he stated that the efforts to re-establish diplomatic relations with the Papal See had so far proved unavailing; but he did not despair of seeing remedied a situation so afflicting to him, hoping that the Pope's wisdom and prudence would persuade him of the King's veneration for his person and respect for his spiritual power, as also of his determination to study the deeds and ideas of the age, and to maintain religion according to the decrees established in full right by the sovereign will of the Spanish nation. The speech then referred pleasantly to the recent provincial journey and the friendly relations with foreign powers, and censured the clergy for their share in the Carlist insurrection. The promised reforms in Cuba would be carried into effect as soon as the rebellion was over. The deficit in the budget was announced, and the Cortes was called upon to provide means for meeting it.

The powers of nearly all the Deputies and Senators having been "verified," the Congress and Senate were definitely "constituted" on September 16th, with the following result:

Congress.—Señor Nicolas Maria Rivero, President (elected by 176 against 80 votes); Señor Nicolas Salmeron, First Vice-President; Señor Pasarón y Lastra, Second Vice-President; Duke de Veragua, Third Vice-President; Señor Mosquera, Fourth Vice-President; Señor Cayo Lopez, First Secretary; Señor Calvo Ascensio, Second Secretary; Señor Moreno Rodriguez, Third Secretary; Señor Morayta, Fourth Secretary.

Senate.—Señor Laureano Figuerola, President (elected by 58 against 3 votes); Señor Cipriano Montesino, First Vice-President; Marquis de Perales, Second Vice-President; Señor Luis Maria Pastor, Third Vice-President; Señor Fernando de Castro, Fourth Vice-President; Señor Federico Balart, First Secretary; Señor Vicente Fuenmayor, Second Secretary; Señor Saturnino Vargas Machuca, Third Secretary; Señor Eduardo Benot, Fourth Secretary.

The two Presidents have long been known in Spanish politics. Señor Salmeron, the First Vice-President of the Congress, is one of the most eloquent of the old (Prim) Progresista party. The First Vice-President of the Senate, Señor Montesino, is a nephew of Espartero, and has been in Parliament many years. He was one of the few members of the Cortes of Queen Isabella who had the courage to stand up for religious liberty in his place in Parliament. He studied railway-engineering in England, and has attained great eminence in that profession, as well as great perfection in the English language. He is the managing director of the Southern Railway line. Like his uncle, he is a thorough Liberal, and is also, like him, modest and retiring. Señor Fernando de Castro, the Fourth Vice-President of the Senate, is one of the fathers and founders of popular education in Spain. He was for a long time Rector of the Madrid University. He is one of the most learned men Spain ever

produced. He is President of the Spanish Abolition Society. Señor Calvo Ascensio, the Second Secretary of the Congress, is the youngest in the Cortes, being only twenty, but he is a young man of great attainments, and he bears a name ever honored among the Liberals of Spain—that of his father, the late Calvo Ascensio, founder of *La Iberia*, and the friend and early patron of Señor Sagasta.

A motion for the impeachment of the Sagasta-Moreno ministry was supported by the Republicans and a portion of the Radicals. Señor Zorrilla spoke against the motion, but declared that he would not make it a cabinet question. Señor Martos also spoke against the motion, which, however, was taken into consideration by a vote of 124 against 104.

On October 11th, 1,500 men at the Arsenal of Ferrol, in Galicia, rebelled to the cry of "Viva la república!" under Montijo and the retired army-colonel Pazo. The Republican members of the Cortes disavowed all complicity with the movement, which after a few days was put down by the Captain-General of Galicia.

The Carlist bands were, at the close of the year, not yet fully suppressed, but they were of no political importance. The extreme wing of the Republicans also attempted several risings, all of which were without difficulty put down.

In October, the Spanish Government decided to abandon the fortress of Penon de la Gomero (40 miles southeast of Ceuta), in Morocco. The war-material was to be sent to other Spanish possessions on the coast of Africa, where considered convenient, and the fortress to be blown up, to render its reestablishment impossible.

The war in Cuba continued throughout the year, and, although the Spanish Government, in February, complied with the demand of Captain-General Valmaseda to send several thousand more Spanish troops to Cuba, it does not seem that any signal advantages were gained over the insurgents. The latter, on several occasions, were entirely successful, even according to Spanish accounts. Thus, on March 5th, they captured the town of Sagua de Tahanan, and, on June 29th, they defeated the Spaniards near Holguin. A Spanish account claims that from the commencement of the campaign in Cuba to August, 1872, 18,600 insurgents were killed, and a large number taken prisoners; 69,640 were in submission to the Government, and 4,819 fire-arms, 3,249 swords and bayonets, and 9,921 horses were captured.

SPALDING, Most Rev. MARTIN JOHN, D. D., seventh Archbishop of the Roman Catholic Diocese of Baltimore, Primate and Metropolitan of the Roman Catholic hierarchy in the United States, born near Lebanon, Marion County, Ky., May 23, 1810; died in Baltimore, Md., February 7, 1872. His parents were natives of Maryland, but emigrated, in their youth, to Kentucky. In his twelfth year, Martin was sent to the Saint Mary's Seminary, Marion County, Ky., from which he graduated in 1836. Having determined on entering the

ministry, he proceeded at once to Bardstown, Ky., where he remained four years in the Saint Joseph's Seminary, studying theology and teaching in the college. In April, 1830, he went to Rome, and soon after entered the Urban College of the Propaganda. Here also he remained four years, and, at the conclusion of his course, made a public defence, covering the whole ground of theology and canon law, and embracing two hundred and fifty-six theses or propositions, which he maintained, in Latin, against all opponents for seven hours. As a result of this able effort, he was made a Doctor of Divinity by acclamation, and, having been ordained priest, returned home, and was at once made pastor of Saint Joseph's Church, in Bardstown, and afterward President of Saint Joseph's College. After having been again for a short time pastor of the above-mentioned church, he was called, in 1843, to the cathedral in Louisville, and, five years later, to the episcopate, under the title of Bishop of Lengone, as coadjutor to the venerable Bishop Flaget, of Louisville, whom he succeeded in 1850. On the death of Dr. Kenrick, Archbishop of Baltimore, in 1863, Bishop Spalding was created Archbishop of Baltimore May 12, 1864. This see being the oldest in the republic, Pius IX. conferred upon it, by a special decree, the prerogative of place, in virtue of which, Archbishop Spalding, taking official precedence of all other prelates, became the Primate of Honor of the Roman Catholic Church in the United States. One of the most remarkable events of his administration was his convening and presiding over the second Plenary Council of Baltimore, in October, 1866, an assembly composed of all the archbishops and bishops of the United States, and continuing its deliberations two weeks. The acts and decrees of this council, embracing also those of all previous councils of Baltimore, were, in due time, approved by the Pope, and published in an octavo volume. In June, 1867, he visited Rome, on the occasion of the eighteen hundredth anniversary of the martyrdom of Saints Peter and Paul, and assisted in the canonization of various heroes of the Church in modern times. Upon the convocation of the Ecumenical Council at Rome, December, 1869, Archbishop Spalding was again in attendance, and, upon his return home in November, 1870, was welcomed by a public procession of nearly sixty thousand people. He was among the most strenuous supporters of the dogma of the papal infallibility, which he defended in a lengthy pastoral letter, written in Rome and published and extensively circulated in the United States. In this document he took the ground that, while, as a private individual, the Pope is not exempt from sin and error, as a public and authorized teacher of all Christendom, and as a supreme judge of the faith, his solemn decisions on doctrines of faith and morals, are guaranteed from error by the divine promises made to Peter and his succes-

sors, in order that the whole Church might not be misled into fatal mistakes, and the whole work of Christ be thus marred and ruined. His chief works are the following: "D'Aubigné's History of the Reformation Reviewed," 1844; "Sketches of the Early Catholic Missions of Kentucky," Louisville, 1848; "Lectures on the General Evidences of Catholicity," 1847; "Life, Times, and Character of Bishop Flaget," 1852; "Miscellanea," two vols., 1855; "History of the Protestant Reformation in Germany and Other Countries," two vols., 1860.

ST. GOTHARD TUNNEL. After protracted negotiations of a very difficult nature with various contractors, the administration of the St. Gothard Railway closed, on August 7th, the agreement with reference to the construction of the great Alpine tunnel between Goeschenen and Airolo. The successful competitor for the perforation of the greatest tunnel under the Alps is a Swiss contractor, M. L. Favre, of Geneva, who has already executed very considerable and various railway and tunnel works in a manner which was calculated to recommend strongly his application for the colossal undertaking.

According to the propositions of M. Favre, the total cost of the excavation of the great tunnel (14.8 kilometres in length, or rather more than nine English miles) will be 50,000,000 francs, or, say, \$10,000,000; this sum including, of course, the preparatory works, machinery, and permanent way. M. Favre's offer, is, therefore, about 10,000,000 francs below the estimate of the international commission, and 12,500,000 below the offer of Signor Grattoni, made by this gentleman on behalf of the Società Italiana di Lavori Pubblici, of Turin. M. Favre engages himself to finish the tunnel within eight years from the date of approval of the agreement by the Swiss Federal Council. In the case that M. Favre should succeed in completing the works before the specified period, he will be entitled to receive for each day of such premature accomplishment of the undertaking a premium of 5,000 francs, \$1,000; should, on the other hand, the completion of the works be retarded—no matter for what cause—beyond the said period, then the contractor will have to pay for each day the sum of 5,000 francs. If the delay exceeds six months, the deduction from the contract price will be increased to 10,000 francs per day, and at the expiration of one year the agreement will be cancelled, when the security of 8,000,000 francs will become the property of the St. Gothard Railway Company.

STRONG, SELAH BREWSTER, LL.D., an eminent jurist, and formerly Judge of the Supreme Court of New York, born in Brookhaven, L. I., May 1, 1792; died at his residence, Saint George Manor, Setauket, L. I., November 29, 1872. He entered Yale College at the age of fifteen years, and graduated in the class of 1811. Having chosen the

profession of law as his pursuit in life, and devoted three years of close application to its study, he was admitted to the bar in 1814, and, after practising for seven years, was appointed district attorney for the county of Suffolk, the appointment at that time being made in the Court of General Sessions. This position he retained, with a single interval of nine months, until 1842, when he was elected as a member of Congress. He served one term, after which he was elected to the bench of the Supreme Court of the State of New York for the second district, drawing the short term of two years, at the expiration of which he was reelected for the full term, serving until 1860. In 1867 he was a member of the State Constitutional Convention. His great age prevented active participation in debate, but his ripe experience and sound judgment rendered his advice of great value; his tall, commanding form, thick silvery hair, and kindly face, giving him a very benign appearance. As a jurist on the bench, and a counsellor discussing points of law, he was held in deserved esteem by the people of the whole State, and the record of his decisions and opinions forms an imperishable monument to his memory. Though elected to office as a representative of the Democratic party, of which he was a strong and consistent advocate, when entering upon judicial duties he left politics behind him, and never subsequently figured prominently in political life.

SULLY, THOMAS, an American painter, born in Horncastle, Lincolnshire, Eng., June 8, 1783; died at Philadelphia, November 5, 1872. At the age of nine years he came to this country with his parents, who were English actors, and soon after entered the office of a broker, but, displaying no aptitude for business, he was apprenticed to a designer in Charleston, S. C. In 1808 he established himself as an artist in Richmond, Va. Obtaining letters to Lawrence and Reynolds, then in the height of their fame, and with \$400 in his pocket, he sailed for England, where he studied for many years under Sir Benjamin West, forming his style, and learning the art of preparing colors, from that eminent painter. Upon his return to this country, he made his residence in Philadelphia, and devoted himself with ardor to his profession. His reputation as one of the leading American portrait-painters is founded upon numerous works produced in the chief cities of the United States. Among his large productions may be mentioned, full-length portraits of George Frederick Cooke as Richard III., Dr. Benjamin Rush, Commodore Decatur, Thomas Jefferson, and Lafayette. His well-known picture of "Washington Crossing the Delaware" is now in the possession of the Boston Museum. During a visit to England in 1837-'38, he painted a full-length portrait of Queen Victoria, esteemed a very faithful likeness. His portraits of Fanny Kemble and Mrs. Wood are also regarded as

possessing great merits. The school of art of which Mr. Sully was the best American representative has now given place to one less conventional and artificial; but there was, after all, a certain grandeur and stateliness about his best portraits, which is lacking in the modern school. For half a century he occupied a house built for him in Philadelphia by Stephen Girard, and which contained rooms admirably adapted for a studio and exhibition hall. He was the instructor of Charles Robert Leslie, and outlived for many years his distinguished pupil.

SWEDEN AND NORWAY, two kingdoms of Europe. Oscar II., King of Sweden and Norway, born January 21, 1829, succeeded his brother, Charles XV., on September 18, 1872. King Oscar was married on June 6, 1857, to Sophia, Princess of Nassau, born July 9, 1836. The offspring of the union were four sons: Gustavus, Duke of Wermland, born June 16, 1848; Oscar, Duke of Gotland, born November 15, 1859; Charles, Duke of Oestergötland, born February 27, 1861; and Eugene, Duke of Nerike, born August 1, 1865. The present King is the third sovereign of the house of Ponte Corvo, and grandson of General Bernadotte, Prince de Ponte Corvo, who was elected heir-apparent of the crown of Sweden by the Parliament of the kingdom, August 21, 1810, and ascended the throne, February 5, 1818, under the name of Charles XIV. The population, on December 31, 1871, was as follows:

Län (Province).	Population.
Malmöhörn	318,786
Christiansstad	223,492
Blekinge	126,985
Halland	127,848
Kronoberg	159,858
Jönköping	180,569
Calmar	234,397
Gotland	54,387
Göteborg and Bohus	233,689
Elfsborg	230,454
Skaraborg	245,691
Oestergötland	257,897

Götaland

Stockholm (city)	188,513
Stockholm (Län)	131,731
Upsala	101,336

Gästeborg	150,374
Västernorrland	138,939
Jämtland	71,338
Vesterbotten	93,154
Norrbottn	77,393

Norrland

Total

The population of the largest cities of Sweden was, in 1871, as follows:

Stockholm	188,512	Gefle	14,712
Göteborg	57,360	Upsala	11,705
Malmö	26,436	Jönköping	11,254
Norrköping	24,016	Lund	10,870
Carlskrona	16,234		

The population of Norway, at the close of 1871, was 1,753,000. The largest towns had, in 1870, the following population:

Christiania	68,657	Stavanger	17,053
Bergen	30,353	Drammen	15,458
Drontheim	20,553	Christiansand	11,463

The number of emigrants from Sweden was, in 1867, 9,384; 1868, 27,024; 1869, 39,064; 1870, 20,008.

From Norway, from 1856 to 1865, about 54,000; 1866, 15,700; 1867, 13,200; 1868, 14,500; 1869, 18,100; 1870, 14,900; 1871, 12,300.

In the budget of Sweden, for the year 1873, the revenue is estimated at 47,669,400 rix dollars; the expenditures at 56,640,255 (including extraordinary expenditures of 5,600,000 for the construction of railroads, and 4,000,000 for the defence of the country); the deficit at 8,970,855. The public debt, on December 31, 1871, amounted to 86,600,000. The armed forces of Sweden, not counting the volunteers, consist of 99,578 infantry, 8,511 militia of Gotland (which is not compelled by law to serve beyond the confines of the isle of Gotland), of 9,154 cavalry, of 7,984 artillery (with 284 guns), of 2,024 engineers, of 5,524 train: total, 132,775 men. The navy of Sweden consisted, at the beginning of 1872, of 86 steamers (carrying 147 guns), 15 sailing-vessels (190 guns), and 62 galleys (87 guns).

The imports and exports of Sweden, in 1870, were as follows (in rix dollars; 1 rix dollar is equal to \$0.26):

COUNTRIES.	Imports.	Exports.
Europe	135,300,000	144,300,000
America	6,400,000	5,600,000
Africa	1,300,000
Asia	1,400,000
Total 1870	141,700,000	152,400,000
Total 1869	136,600,000	125,900,000

The following table exhibits the movement of Swedish shipping in 1870:

FLAGS.	ENTERED.		CLEARED.	
	Vessels.	Tons.*	Vessels.	Tons.
Swedish	3,092	97,416	6,735	196,325
Norwegian	794	35,004	2,542	218,361
Foreign	2,064	94,200	3,995	212,475
Total	5,950	226,620	13,272	617,161

The commercial navy of Sweden numbered, in 1870, 3,376 vessels, of a total burden of 107,808 lasts. The number of vessels registered for foreign trade was 1,463, of a total burden of 84,882 lasts. The total length of railroads open in 1871 was 1,846 kilometres; of telegraph-lines, 6,388 kilometres; of telegraph-wires, 14,514 kilometres.

The public revenue of Norway, in recent years, was generally above the expenditures. In 1870, the revenue was 5,233,900 specie dalers, the expenditures 4,997,400 specie dalers,

* 1 last = 3.27 English tons.

and the surplus 237,500 specie dalers. The public debt, in December, 1870, amounted to 7,696,900 specie dalers. The imports, in 1870, were valued at 26,020,000, the exports at 20,200,000 dalers. The number of vessels entering Norwegian ports in 1870 was 11,917, of a burden of 762,600 lasts; of those cleared, 11,994, of a total burden of 775,991 lasts. The aggregate length of railroads in operation in 1871 was 422 kilometres; the state telegraphs had 5,898 kilometres of lines, and 8,770 kilometres of wires.

King Charles XV. of Sweden and Norway died on September 18th, at Malmö, while on his return from the baths at Aix-la-Chapelle. His brother, the Prince-Regent Oscar, was proclaimed King, with the title of Oscar II.

The millennial festival of the establishment of the kingdom of Norway, by the fusion of her petty kingdoms into one realm, was celebrated on July 18th, in every part of the kingdom. Tradition relates how one of the many kinglings of the land—Harold, afterward called "Fair Hair"—asked for the hand of Githa, a daughter of another petty prince, but the only answer he got from her was that she would only listen to his suit when he had laid all Norway under his feet. After a long series of weary struggles and conflicts he actually succeeded in accomplishing this task. One prince after another was forced to bow before him, and at last, in a bloody sea-fight at Hafs-fjord, he, in the year 872, was able to crush all opposition to his absolute rule. Several years ago, a general wish was expressed that a monument should be raised over the grave of Norway's first king, as the man with whose name history has especially connected the tradition of the consolidation of the kingdom, and that it should be inaugurated on the thousandth anniversary of the battle of Hafs-fjord. The sagas tell us that King Harold was buried close to the present town of Hagesund, and though the description of the locality has caused antiquaries to doubt the truth of the statement, this much at least is certain, that Harold's cairn has been long since so disturbed and defaced that no trustworthy traces remain of its exact position. In choosing a place, therefore, for the monument, a spot has necessarily been selected which is designated as the resting-place of the great king by a very unsafe tradition. By a peculiar accident Harold was buried but a few miles from the fjord on which he completed his conquest of Norway. Hafs-fjord, where in 872 he fought his crowning battle against the last of his foes, is a little bay on the south side of the entrance to the broad Stavanger Fjord, while the island of Karm, off which Hagesund lies, touches the northern side of the Stavanger Fjord. When it was first proposed to erect a monument over Harold's grave, it was hoped that this object might be effected by means of subscriptions from the people over the whole country. But this hope was not fulfilled. Though the whole

cost, it was calculated, would not exceed \$5,000, even that amount could not be raised by subscription; and, in order that the work, when undertaken, should not stop for want of funds, the Storthing had to pass a grant to carry it on. Harold's monument consists of a huge cairn, which, at its base, is fenced by a square enclosure of hewn stone. On the outer edge of this low wall rise, at intervals, 24 pillars, eight feet high, on which are inscribed the names of the 24 provinces or petty kingdoms into which the ancient Norway was divided. From the midst of the cairn rises an obelisk, or "Bauta-stone," which springs from a pedestal enriched with bass-reliefs. These ornaments are cast in bronze, and represent on one side an old Norse war-galley running into battle under full sail, and on the other a trophy of old Norse weapons. On the two remaining sides of the pedestal are inscriptions which tell that Harold Fair Hair lies buried on this spot, and that this monument was erected a thousand years after he consolidated Norway into one kingdom. The height of the whole monument is 70 feet. The cairn is 15 feet high, and the obelisk, with its pedestal, 55 feet; and the impression it produces, in spite of its very simple form and proportions, is both graceful and imposing. To this may be added the fact that it stands on a bare and rather flat elevation, whence it towers over all adjacent objects, and can thus be seen from a considerable distance. The whole consists, with the exception, of course, of the cairn itself, of hewn Norse granite.

The Storthing thought it could not refuse to entertain an invitation to be present at the unveiling of the monument, and it confided to twelve of its most distinguished members the charge of being present at the festival in Hagesund. The chairman and spokesman of this deputation was one of the two Presidents of the Storthing, Advocate Daniel Kildal; the other President of that Assembly, however, the leader of the Opposition, Hr. John Tverdrup, was not a member of the deputation, as he recently requested that he might not be chosen to serve on it; adding, as is reported, that if he had lived in the days of King Harold he would in all probability have figured among those Norsemen who emigrated to Iceland. Responding to the expressed wish of the promoters, a member of the royal house arrived to take part in the festival, in the person of Prince Oscar, the King's brother, who began, on the 12th of July, a journey along the coast, in the course of which he received, in the various towns on his route, a number of loyal addresses. The prince had requested the chief of the Norwegian Government, Privy-Councillor Frederick Stang, to accompany him on this journey. In addition to these distinguished personages, a number of deputations were present from all parts of the Scandinavian kingdoms; also one from the Norwegians of America, led by the famous violinist, Ole Bull.

Prince Oscar, in uncovering the monument, delivered a spirited speech. The President of the Storting also spoke, and the toast was drunk of "God save the King, the Fatherland, and Sister Countries." The festival was witnessed by about 20,000 spectators.

SWEDEN AND NORWAY, LOUIS EUGENE, crowned KARL XV., King of; born in Stockholm, May 3, 1826; died at Malmö, September 18, 1872. He was the son of Oscar I. and his Queen Josephine, daughter of Prince Eugene of Leuchtenberg, and was, on account of the prolonged illness of his father, appointed Prince Regent of Sweden and Norway, by royal decree, September 25, 1857. Having succeeded to the throne of the two countries on the death of his father, July 8, 1859, he was crowned at Stockholm, for Sweden, on the 3d of May, 1860, and at Dronheim, for Norway, on the 5th of August, 1860. He was a man of cultivated tastes and decided literary talents. About three years previous to his death, he published a volume of poems.

His reign was signalized by efforts at administrative reorganization, both socially and politically. The principal act of reform, of which he is entitled to the credit, was introduced in 1866, and related to the national representation of Sweden. In place of four Chambers responding to the four classes of the nobility, the clergy, the *bourgeoisie*, and the peasantry, there were two Chambers established, an Upper and Lower. The first was elected by the provincial assemblies, the second by the people. The nobility and clergy lost the privileges which they previously held as a matter of right. By an application of the principle of civil equality, an assembly of nobles was convened, on the 15th of March, 1859, to pronounce upon the suppression of another privilege—that of the *forum privilegiatum*—by virtue of which the nobles could only be cited, in certain cases, before the superior courts, and not before the tribunals of first instance. Other projects were entertained and submitted to the discussion and to the votes of the Chambers. In the same way, in the beginning of April, 1869, the Norwegian Storting voted a considerable extension of the right of suffrage to small proprietors, functionaries, and employés. It was also decided that the Storting should thereafter hold its sessions annually. A reform which King Charles exerted himself personally to promote was the abolition of capital punishment. Toward the end of October, 1868, he refused to sign a death-warrant, and declared that he would no longer sign any in the future. If the penalty of capital punishment was not abolished by law, it was virtually at an end, throughout the kingdom, through this act. He was married, on the 19th of June, 1850, to the Princess Louisa, of Orange, daughter of an uncle of the King of the Netherlands, by whom he had one child, the Princess Louisa, married, July 28, 1869, to Prince Frederick, eldest son of the King of Denmark.

King Karl XV. was a man of deep feeling; generous, frank, and amiable in character, and had a strong hold upon the affections of his people. He was returning from a German watering-place, whither he had been in the vain hope of recovering his impaired health, and was only able to reach Malmö in the south of Sweden, when he peacefully expired. He is succeeded by his brother, Oscar Frederick, who reigns under the title of Oscar II.

SWITZERLAND, a republic in Europe, has been, since 1848, a united confederacy (Bundesstaat), while before that year it was a league of semi-independent states, or "Staatenbund." The present constitution, which bears date September 12, 1848, vests the supreme legislative and executive authority in a Parliament of two Chambers, a Sänderath, or State Council, and a Nationalrath, or National Council. The first is composed of forty-four members, chosen by the twenty-two cantons of the confederation, two for each canton. The National Council, the members of which are chosen in direct election at the rate of one deputy for every twenty thousand souls, will, according to the census of 1870, have 185 members, divided among the cantons as follows:

Bern.....	25
Zürich.....	14
Vaud (Wandt).....	11
Aargau.....	10
St. Gall.....	10
Lucerne.....	7
Ticino (Tessin).....	6
Fribourg (Freyburg).....	6
Graubünden (Grisons).....	5
Wallis (Valais).....	5
Thurgau.....	5
Basel—city, 2.....	5
Basel—country, 3.....	5
Neuchâtel (Neuenburg).....	5
Geneva (Genf).....	4
Soleure.....	4
Appenzell—Outer Rhodes, 2.....	3
Appenzell—Inner Rhodes, 1.....	3
Glarus.....	2
Schaffhausen.....	2
Schwytz.....	2
Unterwalden—Upper, 1.....	2
Unterwalden—Lower, 1.....	2
Uri.....	1
Zug.....	1
Total representatives.....	185

A general election of representatives takes place every three years; the last having been in October, 1872, the next will be in 1875. Every citizen of the republic who has attained the age of twenty years is entitled to a vote, and any person, not a clergyman, may be elected a deputy. The National Council and the State Council together, are called the Federal Assembly (Bundesversammlung). The chief executive power is vested in a federal council, or Bundesrath, consisting of seven members elected for three years by the Federal Assembly. The President and Vice-President of the Federal Council are the first magistrates of the republic. They are elected by the Federal Assembly for a term of one year, and are not reëligible till after the expiration of another year. President for the year 1872, Dr. E. Welti, of the Canton of Aargau; Presi-

dent for the year 1873, P. J. Cérésolo, of the Canton of Vaud. The seven members of the Federal Council act as chiefs of the seven administrative departments of the republic.

The area of Switzerland is 15,992 square miles; population in 1860, 2,507,170; in 1870, 2,669,147; increase, 6.5 per cent. The Protestants, in 1860, numbered 1,477,228 (or 58.9 per cent. of the entire population); in 1870, 1,566,347 (58.7 per cent.). The Roman Catholics, in 1860, 1,019,807 (40.7 per cent.); in 1870, 1,084,869 (40.6 per cent.). The other Christian sects, in 1860, 5,881; in 1870, 11,485; the Jews, in 1860, 4,259; in 1870, 6,996. With regard to the nationality of the inhabitants, the Germans are a majority in fifteen cantons, and a plurality in one (Graubünden); the French constitute the majority in five cantons (Valais, Fribourg, Neuchâtel, Vand, and Geneva), and the Italians in one (Ticino). The total number of the German population is estimated at 1,840,000, of French at 640,000, of Italians at 144,000, of the Romaic at 42,000.

The total revenue, in 1871, amounted to 27,513,704 francs, and the expenditures at 24,782,866 francs, leaving a surplus of 2,731,338 francs. The public debt of the republic amounted, at the commencement of 1871, to 21,396,648 francs, as a set-off against which there was a so-called "federal fortune," or property belonging to the state, valued at 19,816,885 francs.

The armed forces of Switzerland were, at the end of September, 1872, as follows:

1. Bundesanzug, or Federal army, consisting of men able to bear arms, from the age of 20 to 30.....	84,369
2. Reserve, comprising those who have served in the first class, from the age of 31 to 40....	50,000
3. The landwehr, or militia, comprising all men from the 41st to the completed 44th year....	65,981
Total.....	300,419

The aggregate length of the railroads which, at the end of 1871, were in operation, was 1,472 kilometres; all of them are private roads, with the exception of the Canton of Bern state railroad, and the Fribourg railroad. The aggregate length of the telegraph lines, in 1872, was 5,812 kilometres; and the length of wires, 11,699 kilometres.

The Federal Assembly ended the revision of the Constitution on March 5th. This revised Constitution, as adopted by the Assembly, extends, in many important respects, the jurisdiction of the central authorities at the ex-

pense of the sovereignty of the cantons. All the army matters are placed under the control of the Federal authorities, while, heretofore, only the general staff and the chief command were appointed by these authorities. The Confederation will have the right to establish, in addition to the Federal University and the Federal Polytechnic Institution, other educational institutions, and to enforce in all the cantons compulsory and gratuitous instruction. Five cantons, or 50,000 citizens, have the right to demand that any law adopted by the Federal Assembly be submitted to a vote of the Swiss people, and the same number of cantons or citizens can demand that the Assembly take into consideration the introduction of any new or the repeal of any existing law. Nearly three-fourths of the press of Switzerland was favorable to the revised Constitution; nevertheless, when, on May 12th, it was submitted to the popular vote, it was rejected, both by a majority of the cantons, and by a majority of the entire votes cast. The vote of the cantons was thirteen against, and only nine for it; while the people cast 257,444 against, and 252,477 votes for it.

At the new election of members of the National Council, held in October, the party favorable to the revision of the Constitution carried a considerable majority of the districts.

The Pope having separated the Canton of Geneva from the bishopric of Lausanne, without the previous consent of the cantonal authorities, and having appointed Abbé Mermillod the administrator of the new Diocese of Geneva, the government of the canton, therefore, removed him, and forbade him to exercise his episcopal functions within the diocese. At the election for the Grand Council of Geneva, which took place in November, the action of the Government, with regard to the Abbé Mermillod, was made a test question. The Government was sustained by a vote of 8,900 against 1,500.

The governments of those cantons which belong to the Catholic Diocese of Basel, namely, Basel, Aargau, Soleure, Bern, Thurgau, Lucerne, and Zug, held, on November 19th, a diocesan conference, which issued a protest against the doctrine of papal infallibility and the excommunication of anti-infallibilist priests. The Papal Nuncio sent to the President of the Federal Council a protest against the resolutions passed by the Conference.

T

TENNESSEE. The first event worthy of record in the history of this State, during the year, was the proclamation of Governor Brown, dated February 22d, for convening the General Assembly in extraordinary session, on the 12th of March, to redistrict the State into nine congressional districts, and other matters of importance.

The Legislature assembled at the appointed time, but adjourned, after a very short session, on the 1st of April. The business, however, for which the extra session was chiefly called, viz., the reapportionment of the State, was completed.

By the provisions of the supplemental apportionment bill, passed by Congress, and ap-

proved May 30, 1872, Tennessee was allowed an additional representative in Congress, making ten in all, with a proviso that such representative might be elected to the Forty-third Congress only by the State at large. It therefore becomes the duty of the Legislature again to redistrict the State so as to constitute ten congressional districts, instead of nine. According to the census of 1870, the total population of the State is 1,258,520, while the voting population is 258,093. An exact division of the aggregate population into ten districts would give to each district 125,852 inhabitants.

A large share of the attention of the Legislature was devoted to the consideration of measures relating to railroads.

The Railroad Commissioners were authorized to sell the Tennessee & Pacific Railroad to the stockholders for \$300,000 in State bonds. This law was the result of a compromise between the State and the railroad, and was recommended by the Governor and Railroad Commissioners. This is the only railroad now unsold wherein the State has an interest.

An act was passed to indemnify the purchasers of the McMinnville & Manchester Railroad against a claim for \$67,000, claimed to be due the United States, for which suit has been brought by the United States Government.

The Governor was authorized and empowered to settle and adjust all claims by the United States Government against the various railroads in the State, and also all counter-claims the State has against the United States on account of railroads.

The Louisville & Nashville Railroad Company was authorized to deposit the balance due by it to the State (\$350,000 in State bonds) in some depository selected by the Railroad Commissioners, and thereupon the State releases her lien upon the Memphis, Louisville & Clarksville Railroad, and in lieu the State is given a lien on said bonds.

The Railroad Commissioners were authorized to settle with the "receivers of delinquent railroads," and report thereon to the next Legislature.

The interest of the State in turnpikes has been a question of no little importance to the people of Tennessee. The extent of this interest in the various roads is shown in the following official figures: Nashville, Murfreesboro & Shelby, \$66,666.60; Nashville & Kentucky, \$50,000; Franklin & Columbia, \$75,000; Nashville & Charlotte, \$30,000; Columbia, Pulaski & Elkton, \$126,606; Clarksville & Russellville, \$37,500; Columbia Central, \$189,000; Ashport, \$35,000; Big Hatchie, \$12,000; Chambers & Purdy, \$7,500; Cumberland & Stone's River, \$107,000; Forked Deer, \$7,000; Fulton, \$6,000; Rogersville & Little War Gap, \$15,000; Bristol & Kendrick Creek, \$20,000; Jacksboro, Powell's Valley & Cumberland Gap, \$8,000; Mulberry Gap &

Rogersville, \$50,000; Harpeth, \$39,000; Jefferson, \$45,000; Murfreesboro, Manchester & Winchester, \$49,890; Pelham & Jasper, \$44,000. Total, \$971,056.60. The above-named companies do not pay any dividends. The following are the turnpikes that pay dividends, with the amount received from each, from June, 1870, to February, 1872:

TURNPIKES.	Stock.	Dividends.
Lebanon & Sparta.....	\$35,800 00	\$1,036 73
Nolensville.....	47,000 00	1,980 00
Gallatin.....	123,500 00	1,325 00
Gallatin & Cumberland.....	6,000 00	425 38
Lebanon & Nashville.....	80,000 00	2,325 07½
	\$346,800 00	\$7,832 18½
Total amount of the State's stock in turnpikes.....	\$1,317,856 60	

From the Cumberland & Stone's River Turnpike Company, the Secretary of State has also received \$266.02, within the time above mentioned.

The Governor, Secretary of State, and Comptroller, having been directed by the Legislature to sell the interest of the State in these roads, advertised during the year for proposals from purchasers. But in consequence of the inadequacy of the prices offered the proposals were rejected, and the roads withdrawn from sale.

"It would be far better," says Governor Brown, "to donate the State's interest in the turnpikes, to the several counties through which they run, with a guarantee that they be maintained according to the provisions of the charters, than to accept the prices offered without such guarantee.

"I therefore recommend that the disposition of roads be provided for in such manner as that they shall be secured and preserved as thoroughfares of travel to the public, and with a view to their ultimate improvement.

The political campaign in Tennessee during 1872 was more than usually exciting, and attracted a large share of public attention. This was due in part to the new condition of national politics, and the unusual attitude of parties, but more especially to the fact that ex-President Andrew Johnson was one of the three candidates for Congress at large, having entered the contest independent of all party action. The first important political movement was the assembling of the Democratic State Convention in Nashville, May 9th, for the nomination of a candidate for Governor, and the election of delegates to the Baltimore National Democratic Convention. John C. Brown was renominated for the office of Governor, by acclamation. The following resolutions were adopted, but not without a warm struggle:

The Democracy of Tennessee assembled in General Convention in pursuance of the call of the Democratic Executive Committee for the State, for the purpose of nominating a candidate for Governor for the term next ensuing, and of taking such other ac-

tion as the interests of the party and the public welfare may seem to require, do declare:

1. Inasmuch as the administration of Governor John C. Brown, by its prudence, moderation, and wisdom, by the fidelity displayed in the discharge of every trust or duty imposed by the constitution or by legislative enactment upon the Executive, and by the vigilant care with which the rights and interests of the people have been guarded and protected, has fully vindicated the wisdom of the people of the State in calling him to the gubernatorial chair; and, believing that such honesty, fidelity, and capacity in a public trust, deserve, in these times, to be specially recognized, and that the welfare of the State demands the retention of Governor Brown in the Executive office for another term; we do therefore unanimously present the name of Governor John C. Brown to the people of Tennessee as our candidate for reelection to the office of Governor; and, in so doing, pledge to him our united and most cheerful support.

2. That, for the purpose of maintaining our organization, and the better promoting the general interests of the party, the president of this convention is hereby authorized and requested, at as early an hour as practicable, to appoint and make known an Executive State Committee, to consist of eleven members—five from Middle, three from East, and three from West Tennessee—any six of whom shall constitute a quorum to do business under the call of the chairman.

3. That we recognize, among other things, as cardinal points in our political faith, the following:

The preservation of our local State governments against Federal encroachment and centralization of power.

The equality of all men before the law, and an equal participation of all citizens in the rights and benefits of government.

The subordination of the military to the civil authority.

The inviolability of the right of *habeas corpus*.

The purification of the corrupt civil service of the Government.

A rigid economy in the expenditures of government, and a faithful compliance with its obligations.

The preservation of the national honor at home and abroad.

The union of the States, and all the guarantees of the Constitution respected.

And, for the purpose of securing the recognition and faithful application of these principles in the administration of our national Government, we are ready and willing to cooperate with all good citizens in the pending presidential contest, without regard to other and minor differences of creed or policy, or past political names or associations.

4. That, inasmuch as the convention of Liberal Republicans, held at Cincinnati, in the first and succeeding days of the present month, has presented to the country the names of Horace Greeley, of New York, and Benjamin Gratz Brown, of Missouri, as candidates for President and Vice-President of the United States, pledged to the maintenance and enforcement of the doctrines above enunciated, and has invited the cooperation of all patriotic citizens in their support, we deem it but the part of patriotic duty to declare that, in the contest now wellnigh upon us, said nominees deserve the support of every patriot in the land as against a ticket representing the principles, policy, and practices of the present Federal Administration. And while reaffirming our purpose and desire to preserve the integrity of the Democratic party, we do nevertheless declare, in our behalf, and, as we are well satisfied, in behalf of the people we here represent, that, in our opinion, with the lights before us, the presentation of candidates for the presidency and vice-presidency in the approaching contest, by the Democratic party of the nation, would be unwise, unnecessary, and exceedingly dangerous to the welfare of the people at large.

5. Inasmuch as a National Democratic Convention has been called by the National Executive Committee, to meet at Baltimore on the 9th day of July, 1872; and inasmuch as it is desirable that the Democracy of Tennessee, as well as of all the States, shall be fully represented in said convention, we do hereby appoint and authorize twenty-two delegates to said National Democratic Convention, four from the State at large, and two from each congressional district; the delegates from the congressional districts to be selected by the representatives to this convention from the respective congressional districts, and the delegates from the State at large to be selected by a committee of two from each congressional district, to be appointed by the Chair. Said delegates to appear and act in behalf of the Democratic party of Tennessee, in said National Convention, with special instruction to carry out the spirit of the foregoing declarations, believing as we do that the election of the ticket presented by the Liberal Republicans, and the cooperation of the Northern and Southern people, would go far toward a healing of the nation.

Resolved, That this convention proceed to select two electors for the State at large, for President and Vice-President, and that the different congressional districts shall, at the present, select local electors for the same purpose.

On the 21st of August, the Democracy again assembled in convention, and, after an exciting session of four hours, nominated General B. F. Cheatham for Congressman at large, and chose ex-Senator Joseph S. Fowler as elector for the State at large. The nomination of General Cheatham was stoutly contested by the friends of ex-President Johnson who sought to secure the position for their candidate. Mr. Johnson then announced himself an independent candidate for Congressman. The reasons for this action were given by him in a speech at Columbia, September 6th. Referring to the proceedings of the convention, he said:

But after the nomination was made, there seemed to be such a general dissatisfaction, such a thorough conviction that the will of the people had been violated, trampled under foot, that, as it were, by spontaneous combustion, the people rose up *en masse*, and ten or fifteen thousand made the most decided demonstration, without being manufactured. It was spontaneous. They adopted a preamble and resolutions, and I was called upon to address them. These ten or fifteen thousand people nominated me by acclamation. They adopted a resolution requesting me to be their candidate for Congressman for the State at large. I told them that I was no candidate, and, in fact, did not desire to be one, but they insisted, did this outburst of the masses, this throbbing of the popular heart, coming forth like a tidal-wave, and said, "We want you to represent the industrial, tax-paying, laboring classes of the country, the great mass of the people in this State." I accepted their nomination, and expect to carry their standard as the people's candidate. I had rather receive the popular nomination of the people assembled *en masse* than be the nominee of forty such conventions, as they now claim that the people shall obey and bow to with bended knee. I come here as no "disorganizer," in the sense that the advocates of the disreputable convention system are pleased to term it. Why, you have got up a committee at Nashville, the members of which are scattered promiscuously about the State. "But you have committed a great offence against the committee, Mr. Johnson; you have had the audacity to come out without having asked that committee for its most gracious permission as to whether you should or should not be a candidate," which means—without consulting this sham convention. No, I come before you to-day bearing the

standard of the people, and I intend to fight the battle out for them. (A voice: "Yes, that's right. Ain't that so, major?")

The Republican State Convention assembled in Nashville, September 11th, and, during an harmonious session, nominated A. A. Freeman for Governor, Horace Maynard for Congressman for the State at large, and Alvin Hawkins as elector for the State at large. Its platform has failed to reach us.

The contest among the candidates for Congressman at large, General Cheatham, Horace Maynard, and ex-President Johnson, was very spirited, and was watched with interest throughout the country. The election resulted in the choice of Mr. Maynard, who received 80,825 votes out of a total vote of 183,918; General Cheatham received 65,188, and ex-President Johnson 37,900. Mr. Maynard's majority over the next highest candidate was, therefore, 15,637. The whole number of votes cast for President, was 178,046, of which 94,891 were for Greeley, and 83,655 for Grant, giving to the former a majority of 10,786. The gubernatorial election resulted in favor of John O. Brown, who was elected by a majority of 13,589, having 97,689 out of 181,789 votes. The State government for 1873 is composed as follows: Governor, John O. Brown, Democrat; Secretary of State, Thomas H. Butler, Democrat; Comptroller, Edwin R. Pennebaker, Democrat; Treasurer, William Morrow, Democrat.

LEGISLATURE.	Senate.	House.	Joint Ballot.
Democratic.....	14	40	54
Republican.....	7	37	34
Independents.....	4	7	11
Dem. majority.....	8	6	9

In his message to the Legislature, dated January 9, 1873, Governor Brown devotes much space to the consideration of the financial interests of the State, which he thinks are not entirely free from embarrassment, although the last three years have witnessed a great reduction in the bonded debt, and a perceptible improvement in the value of Tennessee securities in the money-markets. The Governor remarks that the debt is still large, and the quotations of the bonds are far below that of other States of equal indebtedness, and with inferior resources. The bonded debt with the unpaid coupons added to the 1st of January, 1873, according to the Comptroller's report, is \$30,632,200.76. The State lien upon solvent railroads, and the proceeds of the sale of delinquent roads, will reduce the actual debt to \$21,362,654.31, which can be paid alone through the instrumentality of taxation. Of this latter sum, about \$4,000,000 is unpaid over-due coupons; and the debt will continue to increase at the rate of about \$1,000,000 per annum, until the payment of interest is resumed.

No interest on the public debt has been paid for more than three years, nor has any provision been made for it. "Now the question,"

says the Governor, "what shall be done with our past-due coupons and bonds and the accruing interest cannot, upon any pretext, justifiable either before the world or before the enlightened public sentiment of Tennessee, be longer postponed. It is a question that cannot be trifled with. If this General Assembly fails to make provision for the debt, two years hence your successors may quail before a debt increased about \$2,000,000 by accrued interest. And we may well ask ourselves whether the country will be better prepared to meet the present debt, increased by \$2,000,000, than we are now to meet the existing debt. Nothing gives such a promise." As a practical solution of the problem, he recommended the funding of the entire bonded debt of the State, including the past-due coupons, in a new series of bonds to mature in forty years, bearing interest at the rate of six per cent. per annum, payable in January and July of each year. Two reasons are assigned for this policy: "1. If there be outstanding bonds issued without authority of law, they can and will be detected, and thrown aside. We ought not to pay the principal or interest of such bonds, and this is the only practicable mode of detecting them. 2. In the issue of a new series of bonds, running forty years, taking up all the old bonds, a system of registration not heretofore adopted in Tennessee would always show precisely our bonded debt. The work of funding would be accomplished under one law, and probably within a year after the passage of the act. The confusion always incident to a frequent issue of bonds, under different acts, to take up obligations constantly maturing, would be altogether avoided, and our financial system would be greatly simplified. It is believed that the expenses incident to funding should be borne by the holders of our securities, and, under an assurance and provision for an early resumption of the payment of interest, it is believed that the bondholder would cheerfully comply with such a provision." It was further recommended that interest be paid only upon the funded debt, and that provision be made for such payment, to commence as early as may not be oppressive to the tax-payers. This measure, if adopted, should provide also for the funding of all well-ascertained liabilities of the State, other than what is recognized as the floating debt, and the repeal of all existing laws authorizing the funding or novation of bonds and coupons is advised.

The financial embarrassment of the State very forcibly suggests the necessity of seeking new sources of revenue. The attention of the Legislature is called to the fact that while the capital stock of Tennessee railroads is, by their charters, perpetually exempted from taxation, the shares of stock in the corporation in the hands of individual stockholders, according to a decision of the Supreme Court of Tennessee, are not so exempted, and the General Assembly are reminded that they are left without

option in taxing these stocks, since the constitution provides that "all property, real, personal, or mixed, shall be taxed." The taxing of suits before justices of the peace is recommended, and the adoption of more stringent rules concerning the sale of lands for taxes.

The statistics of 1870 afford the basis of a charge that Tennessee is third in ignorance of the States of the American Union. The following causes that have retarded the growth of the educational system of the State are specified:

When the late civil war was inaugurated, Tennessee, with a population of 1,109,801, had a taxable list of \$889,011,668.

At the close of the war the assessments showed only \$194,846,387 of taxable property. The war had swept away \$115,609,554, in slaves.

And it is universally known that very little of the millions of personal property (aside from slaves) escaped the ravages of war. Meantime, the large debt owing by our people, growing out of their commercial and ordinary transactions, had swollen in volume by four or five years of accrued interest, all of which was unpaid. Tennessee, early in 1862, on account of her geographical position, became, and until the declaration of peace continued, the theatre of military operations. The school-houses were closed. The country was devastated. And not until several years after hostilities actually ceased did society attain such repose and security that schools could be reestablished.

Added to this, when the people were restored to power, there was no educational fund, and the enormous public debt, already against the State, rendered it difficult to provide any permanent school fund.

A large majority of the States were free from the *actual presence of war*. All of them enjoyed seasons of immunity from the scourges that daily afflicted Tennessee throughout her borders. So that, without regard to where the responsibility for the war rests, the fact nevertheless cannot be controverted that, for a period of time embracing the war and several years afterward, a system of schools in Tennessee was impossible.

And in 1869, when the people acceded to power, they found a State debt of nearly \$43,000,000 hanging like a midnight shadow upon them. We had neither money nor credit. Our revenues were yearly absorbed in the redemption of the notes of the Bank of Tennessee and outstanding Treasury warrants. And the appalling question was, not whether we could maintain a system of common schools by the State, but could we preserve the State government and sustain its faith and credit without bankrupting the people of their private fortunes. That problem is now happily solved. And while it is most unfortunate for the State, and especially for her children, that these untoward circumstances have paralyzed the efforts of the friends of education, yet it cannot be truthfully said that Tennessee is third in ignorance because of the indifference of her people to the subject of education. Every true son of hers, at the same time that he would aid in developing a plan to educate her children, will not fail to relieve his State from the obloquy attempted to be cast upon her fair name.

Of the total population of the State (1,258,520) in 1870, of whom the number from five to eighteen years of age was 429,692, only 120,710 attended school. 290,549 persons, ten years of age and over, could not read; while 864,697 persons, ten years of age and upward, were unable to write. Of the last number, 20,887 were white males from ten to fifteen

years of age, and 17,991 white females; 15,962 were white males from fifteen to twenty-one, and 17,349 were white females; 87,713 were white males, twenty-one and over, and 68,825 were white females. There were 16,407 colored males, and 15,225 females, from ten to fifteen years of age, unable to write, 16,299 males and 18,835 females from fifteen to twenty-one, and 55,988 males and 63,248 females, twenty-one and over.

The system of public schools now prevailing in Tennessee is known as the "county system," which was adopted more than two years ago. The backward condition of education is indicated by the fact that in 1872 only twenty-nine of the ninety-three counties in the State levied a tax for school purposes. In some of them the tax is merely nominal, and in others only sufficiently liberal to keep up schools for several months in the year. It is estimated that the total school population of the State, between the ages of six and eighteen, is 391,068. The Assistant Superintendent of Public Instruction, Mr. J. B. Killebrew, who traversed the State during the year to promote the cause of education, reports that, "from the returns as published, it would be safe to say that not one-fifth of that population has any means of education. Indeed, in some of the counties visited last summer, there was not a single school, either public or private, in operation. Nor were there any efforts being made by the citizens to remedy the deficiency." This condition of affairs is impelling the friends of education to action which will doubtless lead to early and important improvements in the present system.

The "Tennessee School for the Blind" has 88 inmates, with an increasing demand for admission. According to the census of 1870, there were 800 totally blind in the State. A large lot, with improvements, in Nashville, has recently been donated to the institution by a wealthy citizen of that place. Under the leasing system the penitentiary has become self-sustaining.

The Agricultural Bureau, organized under the act of the 14th of December, 1871, has entered upon its duties with a degree of zeal and energy that promises the most valuable results, not only for the immediate benefit of the agriculturist, but in the interest of immigration and mining. Rapid progress has been made in compiling statistics of soil, climate, population, prices of land and labor, mineral resources, etc., together with maps, which, when completed and published, it is believed, will attract attention more directly to Tennessee than any other means yet devised for that purpose. The Bureau also affords facilities for the analysis of soils and commercial fertilizers, which must result in incalculable benefit to the farmer.

The iron resources of Tennessee are beginning to attract attention, and it is believed that they will develop into one of the leading

industries of the State. The iron-ore deposits (banks and strata) are grouped, for the most part, in three belts, or areas—namely, the eastern iron-belt running along the base of the Unaka chain, to the northeast into Virginia, and to the southeast into Georgia; the dye-stone belt, skirting the eastern base of the Cumberland table-land, or of Walden's Ridge, from Virginia to Georgia, spreading laterally twenty miles into the valley of East Tennessee on the one side and into the Sequatchie on the other; the western iron-belt, lying west of Nashville, or west of what is called the Central Basin—mainly between the latter and the Tennessee River—extending a few miles in some counties, even west of the river, and northward into Kentucky. In the eastern belt, banks occur in all the counties. Johnson and Carter contain many of them, some of which are exceedingly valuable. In Greene County there are very good banks. Two large furnaces have been erected in this county since the war, and are doing a large business. The ore yields from 40 to 50 per cent. of tough gray iron. Limonite, as has been stated, is the principal ore of this belt. In addition to this, the black ore of iron, *magnetite* of the mineralogists, occurs at one point near the North Carolina line, in Carter County. Much excellent bar-iron has been manufactured from it in a common bloomery. In Sullivan County, in addition to the limonite banks, are veins or banks of red ores, *hematites*. The Crocket and Sharp banks afford this variety, and are capable of supplying much good ore. In McMinn County is a remarkable deposit of stratified red ore. This is Hill's bank. The ore is a stratified, fossiliferous rock, much like the ore of the Dye-stone belt. The main deposit is a third of a mile or more in length, and at some points fifty or sixty feet wide. It belongs to the Trenton or Lebanon formation.

The Dye-stone belt derives additional value from its close proximity to extensive coal-beds. The western iron-belt includes the counties of Lawrence, Wayne, Hardin, Lewis, Perry, Decatur, Hickman, Humphreys, Benton, Dickson, Montgomery, and Stewart. Over this whole region more or less ore occurs, but only at *certain centres* is it found in sufficient quantity to be made available. These centres present accumulations of ore, and are for that reason called "banks." The ore, like that occurring for the most part in the eastern iron-belt, is *limonite*. The banks, too, though the kind and the position of the rocks, the topography of the country, and other circumstances, make some difference, resemble those of the eastern belt. In all these regions iron-furnaces are in operation and are increasing in number.

According to the census of 1871, of the total population (890,872) ten years old and over, there were engaged in all classes of occupations, 367,987 persons, of whom 322,585 were males and 45,402 females. There were engaged in agriculture, 267,020, including 247,-

953 males and 19,067 females; in professional and personal services, 54,396, including 30,077 males and 24,319 females; in trade and transportation, 17,510, including 17,417 males and 93 females; in manufactures and mechanical and mining industries, 26,061, including 27,168 males and 1,923 females.

The State contained 6,843,278 acres of improved land, 10,771,396 of woodland, and 1,966,540 of other unimproved land. The cash value of farms was \$218,743,747; of farming implements and machinery, \$3,199,487; total amount of wages paid during the year, including value of board, \$7,118,003; total (estimated) value of all farm productions, including betterments and additions to stock, \$86,472,847; orchard-products, \$571,520; produce of market-gardens, \$301,093; forest-products, \$335,317; value of home manufactures, \$2,773,820; of animals slaughtered or sold for slaughter, \$15,856,880; of all live-stock, \$55,084,075. There were—247,254 horses, 102,983 mules and asses, 243,197 milch-cows, 63,970 working-oxen, 336,520 other cattle, 826,783 sheep, and 1,828,690 swine. The chief productions were: 375,400 bushels of spring, and 5,813,516 of winter, wheat, 223,835 of rye, 41,343,614 of Indian-corn, 4,513,315 of oats, 75,068 of barley, 77,487 of buck-wheat, 3,899 pounds of rice, 21,465,452 of tobacco, 1,389,762 of wool, 181,842 bales of cotton, 194,535 bushels of peas and beans, 1,124,337 of Irish, and 1,205,683 of sweet, potatoes, 15,778 gallons of wine, 9,571,069 pounds of butter, 142,240 of cheese, 415,786 gallons of milk sold, 116,582 tons of hay, 8,564 bushels of clover-seed, 11,153 of grass-seed, 565 pounds of hops, 1,033 of hemp, 80,930 of flax, 4,612 bushels of flax-seed, 1,410 hogsheds of cane, and 134,968 pounds of maple, sugar, 3,269 gallons of cane, 1,254,701 gallons of sorghum, and 4,843 of maple, molasses, 1,030,550 pounds of honey, and 51,685 of wax.

The total number of manufacturing establishments was 5,317, using 732 steam-engines, of 18,467 horse-power, and 1,340 water-wheels, of 19,514 horse-power, and employing 19,412 hands, of whom 17,663 were males above sixteen, 1,089 females above fifteen, and 660 youth.

The total amount of capital invested was \$15,595,295; wages paid during the year, \$5,890,630; value of materials consumed, \$19,657,027; of products, \$34,362,636.

The whole number of newspapers and periodicals was 91, having an aggregate circulation of 225,152, and issuing annually 18,300,844 copies. There were 13 daily, with a circulation of 34,630; 2 tri-weekly, circulation 2,300; 1 semi-weekly, circulation 1,000; 65 weekly, circulation 117,022; 1 semi-monthly, circulation 15,000; 8 monthly, circulation 54,200; 1 quarterly, circulation 1,800; 1 annual, circulation 12,000.

There were 3,505 libraries, having 802,112 volumes. Of these, 2,782, with 597,399 vol-

umes, were private; and 773, with 204,713 volumes, were other than private, including 17 circulating libraries, with 7,253 volumes.

The total number of religious organizations was 8,178, having 2,841 edifices, with 878,199 sittings, and property valued at \$4,684,175. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	987	255,376
Christian.....	908	55,455
Episcopal.....	33	12,940
Lutheran.....	22	9,875
Methodist.....	1,339	336,433
Presbyterian.....	556	188,970
Roman Catholic.....	21	13,850
United Brethren in Christ.....	7	1,600

The condition of pauperism and crime is shown by the following statistics:

Total population.....	1,253,530

Foreign.....	79

TERRITORIES OF THE UNITED STATES. There has been no material change in the condition of the Territories of the United States during the year; but in all there are signs of progress in developing natural resources, building up towns and cities, and constructing railroads.

ARIZONA.—With the exception of the difficulties caused by marauding bands of Indians, the condition of Arizona is most promising. She has no public debt, and at the end of the year the surplus in her Treasury, and the sums due from one or two counties in which the collection of taxes had been delayed, amounted to \$20,000. The total receipts into the general fund for the year were \$83,722.61, and the disbursements, \$21,659.69. The receipts into the school fund were \$3,436.82, and the disbursements therefrom \$2,030.51.

An act to establish public schools was passed by the last Legislature, which made the Governor superintendent of public instruction and the probate judges superintendents of public schools in their several counties. Free schools have been taught during the past year in every district in the Territory, at least three months. There is still a lack of school-houses, teachers, and text-books, but the infant-school system bids fair to grow until it is able to meet the demands of the people. The Governor, in his message to the Legislature of 1873, recommends that the tax of 10 cents on \$100, for school purposes, be raised to 25 cents, and that of 50 cents on \$100, for general purposes, be reduced to 25 cents, and that a portion of the surplus in the Treasury be distributed to the counties, to be expended in providing school-houses.

No sufficient provision has yet been made in the Territory for the unfortunate and criminal classes. The care of the insane is left to the supervisors of the counties, and all convicts are confined in county jails, which are, as a rule, very insecure.

The rich mineral and agricultural resources of Arizona are, in a great measure, still undeveloped. There is a great amount of dry land in the Territory capable of being made fruitful by irrigation, and attention has been directed of late to the sinking of artesian wells, which, it is thought, will supply the pressing need. The construction of the Texas & Pacific Railroad, which is well under way, and which will traverse a distance of over 400 miles in the Territory, will give a strong impulse to the development of all industrial interests.

The Apache tribe of Indians have continued to disturb the settlers, more or less, throughout the year. The 100 men, Americans, Mexicans, and friendly Indians, who were indicted for participating in the "Camp Grant massacre," of April 30, 1871, were tried during the December term of the United States District Court in that year, and the jury, after a consultation of twenty minutes, rendered a verdict of "Not guilty." During the past year, the destruction of life and property by the hostile savages has been as great as at any former time. In the early part of the year, strong efforts were made to induce the Indians to retire to their reservations and live peaceably. General O. O. Howard was sent out for this purpose, and met with a measure of success. It was then left to General Crook to deal with those who proved intractable. He operated against them with vigor during the last months of the year, and punished severely those who displayed any special hostility, or were known to be guilty of depredations. He is likely to bring them all, before long, into complete subjection. There are in the Territory, at the present time, 4,300 Pima and Maricopa Indians, occupying a reservation of 64,000 acres on the Gila River; 4,000 Papagoes in the southeastern part of the Territory, with no reservation; 4,000 Mohaves, on a reservation of 75,000 acres, on the Colorado River; 2,000 Yumas, living near the mouth of the Colorado, but belonging to the same reservation with the Mohaves; 1,500 Hualapais, north of the Mohaves, and more or less hostile; and 8,000 to 12,000 Yavapais and Apaches, including most of the hostile marauders whom it has been impossible, thus far, to keep upon reservations.

The only election of importance in Arizona during the year was that of Delegate to Congress. Richard C. McCormick, Republican, was returned without opposition.

According to the census of 1870, the Territory contained 385 horses, 401 mules and asses, 938 milch-cows, 587 working-oxen, 3,607 other cattle, 808 sheep, and 720 swine. The chief productions were: 27,052 bushels of

spring wheat, 32,041 of Indian-corn, 55,077 of barley, 679 pounds of wool, 3,417 bushels of peas and beans, 575 bushels of Irish potatoes, 800 pounds of butter, 14,500 of cheese, 4,800 gallons of milk sold, and 109 tons of hay.

COLORADO.—The progress of Colorado continues to be very rapid; but her application for admission into the Union as a State was again denied by the last Congress. Her population is now about 80,000, and the valuation of her property is over \$30,000,000. She has no public debt, and at the end of the year there was a surplus of \$50,000 in the Treasury. The last Legislature provided that no tax should be levied for the past year, and fixed that for 1873 at $1\frac{1}{4}$ mill on the dollar of taxable property.

The natural resources of the Territory are almost beyond calculation, and rapid progress is made in their development. A Board of Immigration was provided for by the last Legislature, to publish information and take the necessary steps to induce settlers to take up their residence there. Railroads are constructed as fast as the capital and labor at command can build them. The following are already in operation:

	Miles.
Kansas Pacific, Eagle Tail to Denver.....	210
Denver Pacific, Denver to Cheyenne.....	106
Denver & Boulder Valley, Hughes to Boulder.....	27
Colorado Central.....	36
Denver & Rio Grande, Denver to Pueblo.....	117
Denver & Rio Grande, Pueblo to Cañon City.....	45
Total.....	541

The following are in course of construction:

	Miles.
Extension of Denver & Rio Grande to the City of Mexico, total distance, 1,730 miles; miles in Colorado, Pueblo to Territorial line.....	100
Denver & Julesburg (via Fort Morgan).....	185
Golden & Julesburg (via Evans, Longmont, and Boulder).....	210
Colorado Central, Big Hill to Black Hawk.....	8
Colorado Central, branch to Georgetown.....	20
Kansas Pacific, Kilt Carson to Fort Lyon.....	54
Atchison, Topeka & Santa Fé, Territorial line to Pueblo.....	150
Total, under construction.....	727

A number of colonies have been formed in different parts of the Territory, made up of settlers who located themselves together.

A tolerably complete and efficient school system has been established. During the year, there have been 175 public schools in operation, with 280 teachers and 5,640 pupils. The value of the school-buildings is \$186,645, and the amount of the school-fund \$121,372.

There has been little or no trouble during the year from hostile Indians. The Indians now within the Territory are the Tabeguache band of the Utes, at the Los Pinos agency, numbering about 3,000, and the Yampa, Grand River, and Uintah bands, of the White River agency, numbering 800. They have a reservation of 14,784,000 acres, in the western part of the Territory, but a few still roam about. There is a school at the White River agency, attended by 40 scholars, but there is little

inclination among the Indians to accept the conditions of civilization.

The ninth session of the Territorial Legislature occupied about six weeks at the beginning of the year, but none of its acts were of general importance.

The election for Delegate to Congress and members of the Legislature occurred in September. There were 13,856 votes cast for Delegate, of which 7,596, or a majority of 1,336, were for Jerome B. Chaffee, the Republican candidate. There is a Republican majority in both branches of the Legislature. The Governor of the Territory is Edward M. McCook.

The population of the city of Denver is said to have nearly doubled in the last year, and is now about 14,000. Five railroads centre there, bringing in an average of 20,000,000 pounds of freight per month. There are five banks, carrying an average of \$1,500,000 in deposits. The value of new buildings and building improvements for the year was \$2,510,000, and the business of the year amounted to over \$14,000,000.

According to the census of 1870, of the total population (30,349) ten years old and over, there were engaged in all classes of occupations, 17,583 persons; in agriculture, 6,462; in professional and personal services, 3,625; in trade and transportation, 2,915; in manufactures and mechanical and mining industries, 4,681.

The Territory contained 6,446 horses, 1,173 mules and asses, 25,017 milch-cows, 5,566 working-oxen, 40,153 other cattle, 120,928 sheep, and 5,509 swine. The chief productions were 255,939 bushels of spring, and 2,595 of winter, wheat, 5,235 of rye, 231,903 of Indian-corn, 332,940 of oats, 35,141 of barley, 178 of buckwheat, 890 pounds of tobacco, 204,925 of wool, 7,500 bushels of peas and beans, 121,442 of Irish potatoes, 892,920 pounds of butter, 33,626 of cheese, 19,520 gallons of milk sold, and 19,787 tons of hay.

The total number of manufacturing establishments was 256, using 49 steam-engines, of 1,433 horse-power, and 31 water-wheels, of 792 horse-power, and employing 876 hands. The amount of capital invested was \$2,835,605; wages paid during the year, \$528,221; amount of materials consumed, \$1,593,280; of products, \$2,852,820.

The whole number of newspapers and periodicals was 14, having an aggregate circulation of 12,750 copies, and issuing annually 1,190,600 copies.

The total number of religious organizations was 55, having 47 edifices, with 17,495 sittings, and property valued at \$207,230.

COLUMBIA, DISTRICT OF.—The District of Columbia, under its Territorial government, is flourishing, and great public improvements have been made during the past year. Charges of fraud against the Commissioners of Public Works, in making these improvements, have

been made, but never substantiated. The Governor is still Henry D. Cooke. The indebtedness of Washington in January was \$2,966,098.27; that of Georgetown, \$261,463.37; and that of the Levy Court, \$28,825.84.

DAKOTA.—Dakota has an area of about 152,000 square miles, and a white population of about 15,000. The capital is Yankton, and the present Governor, John A. Burbank. The other officers of the government are: Edwin S. McCook, Secretary; George W. French, Chief Justice, and J. P. Kidder, and W. W. Brookings, Associate Justices; W. H. N. Beadle, Surveyor-General; William Pound, District Attorney; G. W. Kingsbury, Assessor of Internal Revenue; G. P. Bennett, Collector of Internal Revenue; G. C. Maynard, Treasurer; G. S. Gillespie, Auditor; J. S. Foster, Commissioner of Immigration, and E. W. Miller, Superintendent of Public Instruction. Moses K. Armstrong, Democrat, was chosen Delegate to Congress at the last election, over Moody and Brookings, both Republicans. The whole vote was 4,443, of which Armstrong received 1,902, Moody 1,549, and Brookings, 992.

The Indians of Dakota number about 28,000. There are 2,000 Yankton Sioux on a reservation of 400,000 acres, in the extreme southern part of the Territory, east of the Missouri River; the Sisseton and Wahpeton Sioux, gathered on two reservations, one of 1,241,600 acres at Lake Traverse, occupied by 1,496 Indians, and one of 845,600 acres at Devil's Lake, occupied by 720 Indians; the Onepapa, Blackfeet, Lower Yanktonai, Upper Yanktonai, Sans Arc, Upper and Lower Brule, Two Kettle, Minneconjou, and Ogallala bands of Sioux, numbering 22,000 in all, gathered at five different agencies on a reservation of 25,000,000 acres west of the Missouri River and north of Nebraska; the Poncas, numbering 735, on a reservation of 576,000 acres, near the confluence of the Niobrara and Missouri Rivers; and the Arikarees, Gros Ventres, and Mandans, numbering 22,000, and having a reservation of 8,640,000 acres in the northwestern part of Dakota, and eastern part of Montana. All these tribes have been peaceable during the year.

According to the census of 1870, this Territory contained 2,514 horses, 225 mules and asses, 4,151 milch-cows, 2,125 working-oxen, 6,191 other cattle, 1,901 sheep, and 2,083 swine. The chief productions were, 170,460 bushels of spring, and 202 of winter, wheat, 133,140 of Indian-corn, 114,827 of oats, 4,118 of barley, 179 of buckwheat, 8,810 pounds of wool, 456 bushels of peas and beans, 50,177 of Irish potatoes, 209,735 pounds of butter, 1,850 of cheese, 13,347 tons of hay, and 1,230 gallons of sorghum molasses.

There were 3 newspapers, having an aggregate circulation of 1,652, and issuing annually 85,904 copies.

The total number of religious organizations was 17, having 10 edifices, with 2,800 sittings, and property valued at \$16,300.

IDAHO.—The Territory of Idaho has an area of 90,932 square miles, and a white population of 20,583. The capital is Boise City, and the present Governor, Thomas W. Bennett. John Haily, Democrat, was elected to Congress in November, and the Territorial Legislature has a Democratic majority. The Secretary of the Territory is E. J. Curtis; the Surveyor-General, L. F. Carter; District Attorney, J. W. Huston; Chief Justice, David Noggle, and Associate Justices, M. E. Hollister and W. C. Whitson; Marshal, Joseph Pinkham.

There are about 5,800 Indians in Idaho, of whom 2,807 are Nez Percés, on a reservation of 1,344,000 acres in the northern part of the Territory; 516 Shoshones, and 521 Bannocks, on a reservation of 1,568,000 acres in the southeast; and 2,000 Cours d'Alènes, Spokanes, Kootenays, and Pend d'Oreilles, with a reservation of 256,000 acres, 30 or 40 miles north of the Nez Percés' reservation, set apart for them, but not yet occupied.

According to the census of 1870, this Territory contained 2,151 horses, 371 mules and asses, 4,171 milch-cows, 522 working-oxen, 5,763 other cattle, 1,021 sheep, and 2,316 swine. The chief productions were, 73,725 bushels of spring, and 1,925 of winter, wheat, 1,756 of rye, 5,750 of Indian-corn, 100,119 of oats, 72,316 of barley, 3,415 pounds of wool, 610 bushels of peas and beans, 64,534 of Irish potatoes, 111,480 pounds of butter, 4,464 of cheese, 11,250 gallons of milk sold, and 6,985 tons of hay.

The total number of manufacturing establishments was 101, using 11 steam-engines of 311 horse-power, and 16 water-wheels of 295 horse-power, and employing 265 hands. The amount of capital invested was \$742,300; of wages paid during the year \$112,372; of materials consumed, \$691,785; of products, \$1,047,624.

The total number of newspapers was 6, having an aggregate circulation of 2,750, and issuing annually 200,200 copies.

The number of religious organizations was 15, having 12 edifices, with 2,150 sittings, and property valued at \$18,200.

INDIAN TERRITORY.—The Indian Territory is exclusively set apart for the occupation of various tribes of Indians, who are in a semi-civilized condition, with forms of government, industries, schools, etc., of their own. There has been some discussion in Congress concerning the establishment of a Territorial government here, but the plan is in opposition to the wishes of the tribes, and is not likely to be carried out at present. The Indian tribes occupying the Territory are as follows: Cherokees, 18,000, occupying a reservation of 3,844,712 acres; Choctaws, 16,000, with a reservation of 6,688,000 acres; Chickasaws, 6,000, reservation, 4,377,600 acres; Creeks, 12,295, reservation, 3,215,495 acres; Seminoles, 2,398, reservation, 200,000 acres; Senecas, 214, reservation, 44,000 acres; Shawnees, 90, reservation,

24,969 acres; Quapaws, 240, reservation, 104,000 acres; Ottawas, 150, reservation, 24,960 acres; Peorias, Kaskaskias, Weas, and Piankeshaws, 160, reservation, 72,000 acres; Wyandotts, 22, reservation, 20,000 acres; Pottawatomies, 1,600, citizens of the United States, with allotments of 160 acres of land to each adult, and 80 acres to each minor; absentee Shawnees, 663, with 80 acres of land to each adult, and 20 acres to each child; Sacs and Foxes, 463, reservation, 483,840 acres; Osages, 3,956, reservation, 1,760,000 acres; Kiowas, 1,930, Comanches, 8,180, and Apaches, 380, located on a reservation of 5,549,448 acres; Arapahoes, 1,500, and Cheyennes, 2,000, reservation, 4,611,500 acres; Wichitas, 299, Keechies, 186, Wacoos, 140, Towoccaroes, 127, Caddoes, 392, Ionies, 85, and Delawares, 81, with no defined reservation, but occupying a district on the Washita River.

MONTANA.—This Territory has an area of 143,776 square miles, and a population of 89,895. Its capital is Virginia City, and the present Governor, Benjamin F. Potts. The other Territorial officers are: James E. Callaway, Secretary; Decius C. Wade, Chief-Justice, and Hiram Knowles and Franklin G. Service, Associate Justices; Mortimer C. Page, District Attorney; John E. Blaine, Surveyor-General; Jasper A. Viall, Superintendent of Indian Affairs; E. W. Carpenter, United States Commissioner; William H. Rodgers, Auditor; and Richard O. Hickman, Treasurer. At the last election, in August, Martin Maginnis, Democrat, was elected Delegate to Congress by a majority of 319 out of a total vote of 8,711. The Legislature consists of 9 Democrats and 8 Republicans in the Council, and 18 Democrats and 8 Republicans in the House. The Indian tribes residing within the limits of Montana are mostly natives of the districts occupied, and number 32,412 in all. There are 7,500 Black Feet, Bloods, and Piegans; 4,790 Assinaboines; 1,100 Gros Ventres; 2,625 Santees, Yanktonais, Uncapapas and Out-head Sioux; 1,240 River Crows; 2,700 Mountain Crows; 460 Flatheads; 1,000 Pend d'Oreilles; 320 Kootenays; 677 Shoshones, Bannocks, and Sheep-eaters; 8,000 roving Sioux or Teton Sioux, and roaming bands of Cheyennes and Arapahoes. The Blackfeet, Bloods, Piegans, Gros Ventres, Assinaboines, River Crows, about 1,000 Arapahoes and Cheyennes and the Santee and Yankton Sioux, occupy a reservation of 17,408,000 acres on the Milk River. The Mountain Crows have 6,272,000 acres in the south, near the Yellowstone River. The Flatheads, Pend d'Oreilles, and Kootenays, have 1,483,000 acres in the Jocko Valley, and the Shoshones, Bannocks, and Sheep-eaters near the western boundary have no special reservation.

According to the census of 1870, of the total population (18,170) ten years old and over, there were engaged in all classes of occupations, 14,048 persons; in agriculture, 2,111; in

professional and personal services, 2,674; in trade and transportation, 1,233; in manufactures, and mechanical and mining industries, 8,300.

The Territory contained 5,289 horses, 475 mules and asses, 12,432 milch-cows, 1,761 working-oxen, 22,545 other cattle, 2,024 sheep, and 2,599 swine. The chief productions were 177,535 bushels of spring, and 5,649 of winter, wheat, 1,141 of rye, 149,367 of oats, 85,756 of barley, 988 of buckwheat, 600 pounds of tobacco, 2,414 bushels of peas and beans, 91,477 of Irish potatoes, 408,080 pounds of butter, 25,603 of cheese, 105,186 gallons of milk sold, and 18,737 tons of hay.

The total number of manufacturing establishments was 201, using 33 steam-engines of 822 horse-power, and 46 water-wheels, of 795 horse-power, and employing 701 hands. The amount of capital invested was \$1,794,800; of wages paid during the year, \$370,848; of materials consumed, \$1,316,381; of products, \$2,494,511.

The whole number of newspapers and periodicals was 10, having an aggregate circulation of 19,580, and issuing annually 2,860,600 copies.

The total number of religious organizations was 15, having 11 edifices, with 8,850 sittings, and property valued at \$99,800.

NEW MEXICO.—This Territory has an area of 121,201 square miles, and a population of 111,808. The capital is Santa Fé, and the Territorial officers are: Marsh Giddings, Governor; W. F. M. Army, Secretary; John Pratt, Marshal; T. B. Catron, Attorney; S. A. Smith, Collector; W. L. Waring, Assessor; J. G. Palen, Chief-Justice, and Warren Bristol and Hezekiah S. Johnson, Associates. No election of congressional Delegate took place this year. The present Delegate, chosen in 1871, is José M. Gallegos, Democrat. The Legislature is Democratic in both branches.

The Indian tribes of New Mexico are the Navajoes, 9,114 in number, with a reservation of 3,328,000 acres in the northwest; Mescalero Apaches, 830, near Fort Stanton in the east, with no defined reservation; Gila Apaches, 1,200, in the south; Jicarilla Apaches, 850, in the northeast; Muache, Weeminuche, and Capote Utes, 1,520, in the northwest; and the Pueblos, who number 7,683, and live in villages on a reservation of 439,664 acres.

According to the census of 1870, of the total population (66,464), ten years old and over, there were, engaged in all classes of occupations, 29,361 persons; in agriculture, 18,668; in professional and personal services, 7,535; in trade and transportation, 863; in manufactures, and mechanical and mining industries, 2,295.

The Territory contained 5,083 horses, 6,141 mules and asses, 16,417 milch-cows, 19,774 working-oxen, 21,343 other cattle, 619,438 sheep, and 11,267 swine. The chief productions were 338,930 bushels of spring, and 18,-

892 of winter, wheat, 640,823 of Indian-corn, 67,660 of oats, 8,876 of barley, 8,587 pounds of tobacco, 684,930 of wool, 28,856 bushels of peas and beans, 8,102 of Irish potatoes, 19,686 gallons of wine, 12,912 pounds of butter, 27,289 of cheese, 813 gallons of milk sold, and 4,209 tons of hay.

The total number of manufacturing establishments was 182, using 18 steam-engines, of 252 horse-power, and 42 water-wheels, of 659 horse-power, and employing 427 hands. The amount of capital invested was \$1,450,695; of wages paid during the year, \$167,281; of materials consumed, \$880,957; of products, \$1,489,868.

There were 5 newspapers and periodicals, having an aggregate circulation of 1,525, and issuing annually 187,850 copies.

The total number of religious organizations was 158, having 152 edifices, with 81,560 sittings, and property valued at \$322,621.

UTAH.—In the early part of the year a movement was set on foot to secure the admission of this Territory into the Union as a State, but it did not meet with success. The Governor vetoed an act of the Territorial Legislature providing for a convention to prepare a State constitution, and the appeal to Congress was without effect.

A decision of the Supreme Court of the United States, on the 15th of April, declared that the Territorial courts were not United States tribunals, but "legislative courts of the Territory created in view of the clause which authorized Congress to make all needful rules and regulations respecting the Territories." The effect of this decision was, to nullify the proceedings which had been taken against Brigham Young and others for murder and other offences, and they were discharged.

The Territorial officers, appointed by the President: are George L. Woods, Governor; William Corey, Secretary; Mathewson T. Patrick, Marshal; George O. Bates, District Attorney; James B. McKean, Chief-Justice, and Obed F. Strickland and Cyrus M. Hawley, Associate Justices. George Q. Cannon, Mormon, was elected Delegate to Congress in August last, over George R. Maxwell, the Gentile candidate, by a majority of 19,627 out of a total vote of 22,911; women voted very generally at the election. The Legislature consists of a Council of 13, and a House of Representatives of 26—all Mormons.

The assessed value of property in Utah is \$17,590,560. Much progress has been made in developing the mineral and agricultural resources of the Territory, which are very great. The value of agricultural products for the past year was \$6,149,925. The railroads of Utah at the end of the year were as follows: Utah Northern, three-feet gauge, completed 40 miles from Utah Junction, northward; Summit County, three-feet gauge, running from Echo to Coalville, only two miles finished; Utah Central, from Ogden to Salt Lake City, 37

miles; Utah Southern, from Salt Lake City, southward, completed to Lochi, 40 miles; Wasatch & Jordan Valley, to run from Sandy Station to Alta, as yet only surveyed and partly graded; Bingham Cañon and Camp Floyd, to run from Sandy Station to Bingham City, under construction; American Fork, three-feet gauge, completed from Salt Lake City to Deer Creek, 16 miles; Salt Lake City, Sevier Valley & Pioche, from Salt Lake City to the mining districts of the west, under construction; Salt Lake City & Tooele Valley, nearly same route as last, to extend 100 miles, under construction; San Juan, San Pete & Sevier, from Nephi, southeast through Salt Creek Cañon, 150 miles, three-feet gauge, under construction; Lochi & Tintie, from Lochi to the Camp Floyd and Tintie mining districts, about 50 miles, three-feet gauge, under construction; Southeastern, from Springville to San Pete, 100 miles, three-feet gauge, under construction.

The Indians living in Utah are the north-western, western, and Goship Shoshones, 3,000, in the northwest; Weber Utes, 300, near Salt Lake; Timpanagos, 500, south of Salt Lake; San Pitches, 300, in same vicinity; Pab-Vents, 1,200, near the Shoshones; Yampa-Utes, Pi-edes, Pi-Utes, Elk Mountain Utes, and She-be-rechers, 5,200, in the east and south; and the Uintah-Utes, 800, on a reservation of 2,080,000 acres in the northeast.

According to the census of 1870, the Territory contained 11,068 horses, 2,879 mules and asses, 17,568 milch-cows, 3,479 working-oxen, 18,188 other cattle, 59,672 sheep, and 3,150 swine. The chief productions were 543,487 bushels of spring, and 14,986 of winter, wheat, 1,312 of rye, 95,557 of Indian-corn, 65,650 of oats, 49,117 of barley, 178 of buckwheat, 109,018 pounds of wool, 9,291 bushels of peas and beans, 323,645 of Irish, and 163 of sweet potatoes, 3,181 gallons of wine, 810,335 pounds of butter, 69,608 of cheese, 11,240 gallons of milk sold, 27,305 tons of hay, 67,446 gallons of sorghum molasses, and 575 pounds of honey.

The whole number of manufacturing establishments was 533, using 21 steam-engines, of 331 horse-power, and 192 water-wheels, of 2,169 horse-power, and employing 1,534 hands. The amount of capital invested was \$1,391,898; wages paid during the year, \$895,365; value of materials consumed, \$1,238,252; of products, \$2,343,019.

The number of newspapers and periodicals was 10, having an aggregate circulation of 14,250, and issuing annually 1,573,400 copies.

The total number of religious organizations was 165, having 164 edifices, with 86,110 sittings, and property valued at \$674,600.

WASHINGTON.—This Territory has an area of 69,994 square miles, or 44,796,160 acres, of which 7,100,000 acres are surveyed. The population is 37,402. The capital is Olympia, and the Territorial officers are: Elisha P. Ferry, Governor; Henry S. Struve, Secretary; O.

Jacobs, Chief-Justice, and R. S. Greene and J. R. Lewis, Associates; E. S. Kearney, Marshal; S. C. Wingard, Attorney; Nelson Rowels, Superintendent of Schools; R. H. Milroy, Superintendent of Indian Affairs; L. P. Beach, Surveyor-General; Samuel Coulter, Collector; J. R. Hayden, Assessor; U. S. Porter, Auditor, and J. H. Munson, Treasurer. Obadiah B. McFadden, Democrat, was chosen Delegate to Congress at the election in November, by a majority of 709 out of a vote of 7,801. The Legislature consists of six Democrats and three Republicans in the Council, and 21 Democrats and nine Republicans in the House.

There are 8,290 children of school age in the Territory, of whom 8,828 attended school during the year. There were 144 school-houses and 157 schools. The amount paid to teachers was \$29,318.64. Parents and guardians are required by law to send their children to school at least three months in the year.

The Indian tribes in the Territory are the Nisqually, Puyallup, and others, 1,200 in number, on the reservations, amounting to 26,776 acres, near Puget Sound; D'Wamish and allied tribes, 3,600, on five reservations containing 41,716 acres, also near Puget Sound; Makahs, 604, on a reservation of 12,800 acres in the extreme northwest; Skallams, 919, on a reservation of 4,000 acres on Hood's Canal; Quinai-elts, Qui-leh-utes, Hohs and Quits, 520, on a reservation of 25,600 acres in the extreme east; Yakamas, 3,000, on a reservation of 788,860 acres in the south; Ohehalis and other remnants, 600, on a reservation of 4,822 acres in the east; Colville and other tribes in the northeast, numbering 3,349, and having no reservation.

According to the census of 1870, the Territory contained 11,138 horses, 943 mules and asses, 16,938 milch-cows, 2,181 working-oxen, 28,135 other cattle, 44,063 sheep, and 17,491 swine. The chief productions were: 186,180 bushels of spring, and 80,863 of winter, wheat, 4,453 of rye, 21,781 of Indian-corn, 255,169 of oats, 55,787 of barley, 316 of buckwheat, 1,682 pounds of tobacco, 162,713 of wool, 15,790 bushels of peas and beans, 280,719 of Irish, and 425 of sweet, potatoes, 235 gallons of wine, 407,306 pounds of butter, 17,465 of cheese, 21,060 gallons of milk sold, 80,233 tons of hay, 179 bushels of clover-seed, 1,387 of grass-seed, 6,162 pounds of hops, and 25,636 of honey.

The total number of manufacturing establishments was 269, using 38 steam-engines, of 1,411 horse-power, 52 water-wheels, of 1,412 horse-power, and employing 1,026 hands. The amount of capital invested was \$1,893,674; wages paid during the year, \$574,936; value of materials consumed, \$1,435,128; of products, \$2,851,052.

The whole number of newspapers and periodicals was 14, having an aggregate circulation of 6,785, and issuing annually 396,500 copies.

The total number of religious organizations was 47, having 36 edifices with 6,000 sittings, and property valued at \$62,450.

WYOMING.—This Territory has an area of 88,000 square miles, and a population of 11,518 souls. The capital is Cheyenne, and the officials are as follows: John A. Campbell, Governor; Hermann Glafcke, Secretary; Frank Wolcott, Marshal; E. P. Johnson, Attorney; S. Reed, Surveyor-General; Thomas Harlan, Collector; E. P. Snow, Assessor; J. H. Hayford, Auditor; S. W. Downey, Treasurer; J. W. Fiske, J. H. Kingman, and Joseph M. Corey, Justices of the Supreme Court. William R. Steele, Democrat, was chosen Delegate to Congress in September. The Legislature consists of four Democrats, three Republicans, and two Independents in the Council, and nine Democrats, two Republicans, and two Independents, in the House. An act, repealing the woman suffrage law, passed the Legislature at the last session, but was vetoed by the Governor. The House passed the act over the veto, but in the Council it was defeated by one vote.

The Indians of Wyoming, with the exception of the Sioux and northern Arapahoes, and Cheyennes, mentioned under Dakota and Montana, are the eastern band of Shoshones, numbering about 1,000. They have a reservation in the Wind River Valley, containing 2,688,000 acres.

According to the census of 1870, the Territory contained 584 horses, 283 mules and asses, 707 milch-cows, 922 working-oxen, 9,501 other cattle, 6,409 sheep, and 146 swine. The chief productions were 80,000 pounds of wool, 617 bushels of Irish potatoes, 1,200 pounds of butter, 4,980 gallons of milk sold, and 3,180 tons of hay.

There were six newspapers, having an aggregate circulation of 1,950, and issuing annually 243,800 copies.

TEST-PLATE. One of the devices used by microscopists to test the correctness and power of their lenses consists of a glass plate, upon which lines of exceeding fineness are engraved by the diamond. For this purpose a small ruling-machine is used, all the parts whereof must be made with unusual nicety. In Europe the test-plates made by M. Nobert, of Prussia, have long been celebrated for the fineness of their ruling, and in this country those of Mr. L. M. Rutherford, of New York city. The expense of the best Nobert plates has been \$100 each, and the finest rulings heretofore done have been 120,000 lines to the inch. There are few microscopists who have ever been able to see or resolve the lines of these plates, owing to the difficulty of properly lighting the plate. Dr. Woodward, of the United States Army, is among those who have succeeded in doing so. He has not only seen them, but has photographed the lines.

Mr. F. A. P. Barnard, President of Columbia College, in New York, has lately received from Nobert a new test-plate, ordered some

two years ago, at an expense of \$200, which surpasses in the fineness of its ruling any thing heretofore produced. It is a slip of glass $3\frac{1}{4}$ inches long and $1\frac{1}{4}$ inch broad, in the centre of which the unassisted eye may discover what appears to be a mark perhaps the fiftieth of an inch in width. But when placed under the microscope this mark is found to be composed of a great number of parallel lines. The plate, in fact, contains twenty test-bands, that is to say, twenty series of lines. Each series contains such a number of lines as will occupy, or more than occupy, the field of view of the microscope. The fineness of each band or series varies from a ratio of 8,000 lines per square inch up to *two hundred and forty thousand* lines per square inch; this last band contains double the number of lines ever before ruled on a test-plate.

TEXAS. The financial condition of Texas is quite promising. Its total indebtedness, at the end of the year, amounted to \$1,662,998.78, made up of the following items:

Three hundred and fifty seven per cent. frontier defence gold bonds.....	\$350,000 00
Two hundred and fifty-seven ten per cent. currency bonds.....	267,000 00
Amount due Williams & Galton, of New York City, for which as above 450 bonds are security (currency).....	327,074 70
Six per cent. currency bonds issued to fund old debt under the provisional act of November 29, 1866.....	125,100 00
Six per cent. currency bonds issued to fund old debt under act of May 2, 1871.....	44,500 00
Certificates of indebtedness issued to claimants in last-mentioned act and act of May 22, 1871, currency.....	63,157 05
Amount of outstanding warrants.....	215,000 00
Amount for deficiencies in former appropriation, and estimated as due judiciary, and officers and employees of government, since September 1, 1872.....	150,000 00
Amount erroneously collected by Comptroller for commissions of assessors and collectors in 1871, which must be returned to tax-payers.....	181,167 08
Total.....	\$1,662,998 78

There is also a debt of \$626,718.09, incurred during the war, which, in the language of the Governor, represents "State warrants or State bonds issued during the war, and, representing obligations which are now void, should no longer be borne on the Comptroller's reports." There was cash in the Treasury, on January 1, 1873, \$49,278.62 in specie, and \$204,086.07 in currency, belonging to special funds. The assessed value of property in the State, according to the returns for 1871, which are the latest that are complete, is \$220,290,524, but its actual value is estimated at nearly one-half more.

The school system of Texas was inaugurated in September, 1871, and is now pretty thoroughly established. Its cost, during the past year, was \$1,222,221.24, of which \$482,753.20 was paid by the State, and \$739,468.04 by the counties. The permanent school fund consists of \$40,708.43 specie, and \$64,089.12 in currency; in the hands of the Treasurer, \$70,800 in United States six per cent. bonds, \$271,550 in United States five per cent. bonds, and

\$2,173,278.40 in six per cent. railroad bonds, or \$2,620,125.99 in all, besides 2,763,073 acres of land, believed to be worth \$2,763,073. The number of children in the State is estimated, in accordance with the best official information, at 228,355. The number in the schools in September, 1871, was 28,800. The whole number receiving instruction during the year was 127,672, the average number being 81,658. The average monthly cost of each pupil, including the expense for buildings, was \$1.43.

The Agricultural and Mechanical College has been located at Bryan, and some progress has been made in constructing the necessary buildings, but the work was suspended last summer on account of defects in the law, which does not define with sufficient clearness the powers of the commissioners.

The State penitentiary contains 944 convicts, against 486 in February, 1870. The increase, it is claimed, is the result of a better execution of the criminal laws. This institution is leased, and the State has only to bear a portion of the expense for the transportation of prisoners. The county jails are stated, in the last message of the Governor, to be "as bad as bad can be." "When so constructed as to secure the prisoners confined in them, they become dense and unfit for the habitation of wild beasts. When not made secure, and this is the case in about four-fifths of the counties, the constant escape of prisoners is made the excuse (as recently by the mob in Erath and adjoining counties) for the wholesale murder of persons charged with offences."

The area of the vacant public lands of the State is 88,842,704 acres. The amount patented is 88,757,855 acres. The number of immigrants into the State during the year was 91,600.

Rapid progress has been made in the construction of railroads, and, at the end of the year, there were 1,078 miles against 511 two years before. It is thought that 500 miles more will be completed during the coming year.

The Comptroller, in April, refused to countersign and register certain bonds prepared and signed by the Governor for the International Railroad Company. He said:

The countersigning and registering of these bonds would also have imposed upon me the additional duty of levying a tax upon all the property, real and personal, in the State, to meet the liabilities growing out of the issuance of the bonds.

I greatly doubt the power of the Legislature to clothe me with these extraordinary prerogatives, and, while I will cheerfully and faithfully discharge every duty enjoined upon me by law, I confess I shrink from the responsibility of levying this heavy tax, for so unrighteous a purpose, in, as I believe, the absence of all law to sustain me in doing so.

A new legislative assembly is to convene in January, 1873, elected by, and fresh from the people; an assembly, it is presumed, that will be fully advised of the wants and interests of the people of the State; and I deem it wiser to have an additional legislative interpretation of this measure. If the incorporators of the International Railroad are not will-

ing to abide said interpretation, the courts of the country are open for a reversal of my decision.

This so-called law provides for the issuance of ten thousand dollars to the mile, or about sixteen million dollars, and for the payment of eight per cent. interest and two per cent. sinking fund, for a period of thirty years, which would swell the debt, principal and interest, to about the sum of twenty-four million dollars.

The said appropriation, together with an appropriation of three million dollars to the Southern Pacific Railroad Company, and three millions to the Southern Transcontinental Railroad Company, with eight per cent. interest and two per cent. sinking fund, running through a like period of thirty years, provides for the creation of an additional debt of say twenty-four million dollars—making a grand aggregate of about *forty-eight million* dollars, it is proposed to tax the people of this State for the next thirty years, for the purpose of making an unconditional present to railroad monopolists.

Some time in the month of May last, George W. Honey, the State Treasurer, disappeared from the State, leaving the Treasury in the hands of a clerk. There were suspicions that he had used the public funds in speculations of his own, and Governor Davis appointed a commission to examine the records and funds, and turn them over to Mr. B. Graham, who was appointed Treasurer. The clerk, W. Burns, refused to reveal the combinations of the locks of the safes, or surrender any of the papers or moneys, and it was found necessary to take possession of the office by force and break open the safes, an order being first obtained from the district court on a presentment of the facts by a grand-jury. Mr. Graham obtained possession of the Treasury in July. The books, papers, and accounts, were found in great confusion, and, as nearly as could be ascertained, the absconding officer was in default to the amount of \$31,171.06½ in specie, and \$45,977.54 in currency. Afterward, \$28,596.18, which had been loaned out by Mr. Honey, was recovered, and there was other evidence that the funds of the State had been used in private speculations.

The Adjutant-General, James Davidson, resigned on the 4th of November, and it was shortly after discovered that his accounts were incorrect, and that there had been a defalcation in his office amounting to about \$30,000.

There was no election for State officers in Texas this year. The Governor, who was installed on April 28, 1870, holds his office for four years; but, as the constitution provides that the Governor "shall be elected by the qualified voters of the State, at the time and places at which they shall vote for representatives to the Legislature," and as the representatives were to be chosen in November, 1872 and 1874, the question was raised whether it would not be necessary to vote for Governor in 1872. Governor Davis, being consulted on the subject, replied:

It is my understanding of the tenure of office of the Legislature to be elected in November next, that it expires on the 2d day of December of the year 1873, being two years from the 2d day of December, 1871, on which last-mentioned day, according to the

opinion of the Attorney-General, and, I believe, of most lawyers of the State, the Legislature elected in the fall of 1869 expired. It will, then, be the duty of the Legislature to be elected on the 5th day of November, to provide for the election of their successors in November, 1873, and at the same time of Governor, Lieutenant-Governor, Comptroller, Treasurer, Commissioner of General Land-Office, etc.; also of sheriffs, district clerks, justices of the peace, and other county officers. * * *

I must further, on this question, call attention to the circumstance that there is now no law fixing a day for the election of Governor and other State officers, either in November next or at any other time. This was undoubtedly an accidental omission or oversight of the late Legislature, but the new Legislature will have ample time to remedy the defect; and, should they fail to do so (which I will not presume), it will then be soon enough to inquire as to the duty and power of the Governor in the premises. In conclusion, and to relieve all doubt, if any exist, in the public mind on this subject, I will say that no election for Governor and other State or county officers, except to fill vacancies, will be held at the election in November next.

A Republican Convention was held at Houston on the 15th, 16th, and 17th of May, for the nomination of presidential electors and Congressmen at large, and the appointment of delegates to the National Convention of the party. The candidates for Congressmen at large were L. D. Evans and A. B. Horton. The following platform was adopted:

Whereas, The Republican party of the United States is about to appeal once more to the nation for the support of its principles in the coming presidential election; and—

Whereas, The election in this State in November next will decide whether or not the Democratic party, with its prejudices against the equal rights of men and against popular education, is to be restored to power in Texas:

Therefore, the Republicans of Texas, in convention assembled, do now make the following declaration of their principles as a party:

1. We declare our full fellowship with the national Republican party of the United States, and our unqualified devotion to its principles and to its fortunes.

2. We declare that the grand and fundamental idea of the political equality of all men, and their equal rights before the law, is peculiarly Republican, and is not professed by any other party in this nation; that it is the mission of the Republican party to carry this idea into full, practical effect, and therefore the Democratic party cannot safely be intrusted with the powers of government, either national or local.

3. That there are but two political parties in the nation, the Republican and the Democratic; that the nomination of Horace Greeley for the presidency of the United States was made in the interest of the Democratic party, and that the Republicans of Texas will follow no such lead, but will give their firm and zealous support to the nominees of the convention to assemble at Philadelphia on the 5th of June next.

4. We endorse the Administration of General U. S. Grant as wise, just, and honest; and we instruct our delegates to the Philadelphia Convention to vote for his renomination for the presidency.

5. The Republican party in Texas regard the free education of all the children of Texas as a sacred duty, the first and most sacred of all our public duties; and we hereby pledge ourselves to secure, to the children of all, the facilities of free public education, at the smallest cost possible to the people; and we will hedge the system of public education with all possible safeguards, endeavoring to secure the most rigid economy and the best administrative experi-

ence. Free public schools shall ever be the dearest motto of the Republicans of Texas.

6. That the development of the vast mineral, agricultural, and stock resources of Texas, is of vital importance to the future prosperity of our people, and a necessary prerequisite to that development is a well-devised system of internal improvements, stimulated by reasonable aid from the State, which shall not tax the people, and the Republican party of Texas will devise and support a reasonable system of aid to such improvements in lands; but will resist any and all further attempts at aid in bonds or money.

7. We declare our unabated confidence in the personal integrity and incorruptibility of Governor Edmund J. Davis, in his fidelity and devotion to the best interests of the people of Texas, and we will give him our firm and unflinching support in every effort to secure to all the people of the State a wise and good government.

8. That we declare our unqualified condemnation of all corruption and speculation on the part of public officials; we will do all that in us lies to promote honest and wise legislation, to secure honest and just administration, and to guard with a jealous care all the interests of all the people.

9. That we will endeavor to give protection to our frontier by every means at our command, and we pledge ourselves to cut down every superfluous expense in the State government, and to reduce taxation to the very least amount compatible with efficient government.

The Democrats met in convention at Corsicana, on the 18th of June, and nominated A. H. Willie and R. Q. Mills for Congressmen at large, besides naming a board of electors, delegates to the National Convention at Baltimore, and a new State Central Committee. The following platform was adopted in addition to that of 1871, which was reaffirmed:

We, the Democrats of the State of Texas, in convention assembled, deem it proper to announce our opinion and purposes in the present critical condition of public affairs. It is therefore

Resolved, That we have undiminished confidence in the time-honored principles of the Democracy as embodied in the platform of the Democratic State Convention held at Austin, January 25, 1871, hereto annexed and made part of this platform, and believe that the welfare and prosperity of the country will never be fully restored till those principles are in the ascendant; but we recognize as an alarming fact that the issues to be determined in the next presidential election not only concern matters of constitutional construction and expedience, but also involve the far greater and vital question whether we are hereafter to live under a government of law or a government of force.

Resolved, That the present Administration has been subversive of constitutional government, and free institutions throughout the country, and in the Southern States has been a system of lawless spoliation and central tyranny; that its chief, by accepting gifts and bestowing offices in return, by appointing incompetent and unfit relations and personal adherents to positions of profit and trust, and by devoting to unbecoming pleasures and pursuits time that should be given to official duties, has been culpably reckless of the responsibilities and dignity of the high station, has set a bad example to the people, and has violated alike the obligation of good faith and the usages of common decency, and that, encouraged and aided by the party in power, he has attempted to usurp or control legislative and judicial functions, and thus establish a consolidated personal government, destructive of the rights of the States and the liberties of the people.

Resolved, That, in view of the threatening pretensions

and great power of those now in authority, we consider their expulsion from offices of honor or trust to be essential to the welfare of the people and country, and to the preservation of constitutional government.

Resolved, That we have seen with profound satisfaction that patriotic movement of the Liberal Republicans lately assembled in convention at Cincinnati, and we fully concur with them in believing that local self-government, with impartial suffrage, will guard the rights of all citizens more securely than any centralized power. The public welfare requires the supremacy of the civil over the military authority, and freedom of person under the protection of the *habeas corpus*. We demand for the individual the largest liberty consistent with public order, and for the State self-government, and for the nation a return to the methods of peace and the constitutional limitation of power. The civil service of the Government has become a mere instrument of partisan tyranny and personal ambition, and an object of selfish greed, and is a scandal and reproach on free institutions, and breeds a demoralization dangerous to the perpetuity of republican government. We therefore regard a thorough reform of the civil service as one of the most pressing necessities of the hour; that honesty, capacity, and fidelity, constitute the only valid claims to the public employment; that the offices of the Government cease to be a matter of arbitrary favoritism and patronage, and again a post of honor. We demand Federal taxation which shall not necessarily interfere with the industry of the people, which shall provide the means necessary to pay the expenses of the Government, economically administered, pensions, the interest on the public debt, and a moderate reduction annually of the principal thereof.

Resolved, That we recognize the movement of the Liberal Republicans in opposition to the present Administration of the General Government in behalf of reform and constitutional liberty, and we, the Democratic party of Texas, confiding in the wisdom, patriotism, and integrity of the great national Democratic party, to assemble in Baltimore, do hereby pledge ourselves to give a vigorous support to the policy to be enunciated by the Baltimore Convention, and do battle for the restoration of civil government under whatever leadership it may direct.

Resolved, That whoever may be the nominee of the Baltimore Convention, this convention finds no reason therefrom for destroying, impairing, or even modifying the present organization of the Democratic party, which should maintain its organization vigorously for the purpose of putting down and removing the abuses under which our people labor from the tyrannical, dishonest, and unscrupulous State government of Texas.

Resolved, That we are in opposition to all moneyed subsidies to private corporations by the State government, and regard the same as unsound in principle and dangerous in practice.

Resolved, That it is the duty of the General Government to protect our citizens from the marauding bands of Mexicans and savages who are daily pillaging our country, murdering our citizens, and driving back the tide of civilization upon our western frontier.

Resolved, That, as the school fund, sacredly set apart for the education of the children of this State, has under the political misrule of the last two years been plundered by speculation, squandered and perverted to political purpose, the Democratic party deem it fitting on this occasion to reaffirm the opinion that, agreeably to the policy the party has ever pursued, it is the duty of the State to establish common schools, and furnish the means of a good common education to every child within our State.

Many Democrats being dissatisfied with the action of the convention, in committing the

party to the support of the Liberal-Republican candidates and principles, a conference was held at Austin, on the 17th and 18th of October, at which the following resolutions were adopted, after considerable discussion:

Resolved, That we do not regard the action of the Baltimore Convention, in nominating two Republicans, as binding on us as Democrats.

Resolved, That we are opposed to the election of General Grant as President, and disapprove of the wholesale corruption and disregard of the Constitution that have characterized his Administration.

Resolved, That a committee of six members be appointed by the chairman of this meeting, to prepare and publish an address to the Democracy of Texas, expressive of their views in regard to the objects of this conference, and to confer with the present Democratic electors, with the view of obtaining their vote for O'Connor and Adams, in the event it shall be found that their vote would not change the result of the presidential election.

This action had no practical effect on the election, which began on the 5th of November and continued four days. The largest vote cast for a Democratic elector was 66,455, for a Republican elector 47,426, while 3,704 were returned as scattering. The majority for Greeley over Grant was 19,029. The votes of El Paso and Presidio Counties were thrown out "on account of mob violence, intimidation, and undue influence being practised during the election;" that of Wilson County because the election was not held at the county-seat; those of Coleman, McCulloch, McMullen, Menard, and Pecos, because they had not the number of registered voters necessary to entitle them to organization; and that of Webb County "because 200 aliens were allowed to vote on declaration-of-intention papers taken out before the clerk of the District Court in vacation." All the Democratic members of Congress were chosen, and a majority of the members of both branches of the Legislature are Democrats.

A vote was taken on the permanent location of the State capital, and resulted in 64,277 votes in favor of Austin, the old seat of government, 35,147 for Houston, 12,777 for Waco, 11 for Bryan, and 89 scattering. The following amendment of the constitution was ratified by a vote of 57,611 to 35,076:

The Legislature shall not hereafter grant lands, except for purposes of internal improvement, to any person or persons, nor shall any certificate for land be sold at the Land-Office, except to actual settlers upon the same, and in lots not exceeding 160 acres: *Provided*, That the Legislature shall not grant out of the public domain more than 20 sections of land for each completed work, in aid of the construction of which land may be granted; and provided further, that nothing in the foregoing proviso shall affect any right granted or secured by laws passed prior to the final adoption of this amendment.

According to the census of 1870, of the total male population (56,515) ten years old and over, there were, engaged in all classes of occupations, 21,517 persons, of whom 20,442 were males and 1,075 females. There were

engaged in agriculture, 10,428, including 10,417 males and 11 females; in professional and personal services, 5,317, including 4,384 males and 933 females; in trade and transportation, 1,665, including 1,648 males and 17 females; in manufactures, and mechanical and mining industries, 4,107, including 3,993 males and 114 females.

The State contained 2,964,836 acres of improved land, 7,662,294 of woodland, and 7,769,393 of other unimproved land. The cash value of farms was \$60,149,954; of farming implements and machinery, \$3,396,793; total amount of wages paid during the year, including value of board, \$4,777,688; total (estimated) value of all farm productions, including betterments and additions to stock, \$49,185,170; orchard-products, \$69,172; produce of market-gardens, \$74,924; forest-products, \$66,841; value of home manufactures, \$298,308; of animals slaughtered or sold for slaughter, \$4,835,224; of all live-stock, \$37,425,194. There were 424,504 horses, 61,322 mules and asses, 428,048 milch-cows, 132,407 working-oxen, 2,938,588 other cattle, 714,351 sheep, and 1,202,445 swine. The chief productions were 66,173 bushels of spring, and 848,939 of winter, wheat, 28,521 of rye, 20,554,588 of Indian-corn, 762,663 of oats, 44,351 of barley, 63,844 pounds of rice, 59,706 of tobacco, 1,251,328 of wool, 350,628 bales of cotton, 42,654 bushels of peas and beans, 208,383 of Irish, and 2,188,041 of sweet potatoes, 6,216 gallons of wine, 3,712,747 pounds of butter, 34,842 of cheese, 62,771 gallons of milk sold, 18,982 tons of hay, 2,020 hhds. of cane-sugar, 246,062 gallons of cane, 174,509 gallons of sorghum, and 5,032 of maple, molasses, 275,160 pounds of honey, and 13,255 of wax.

The total number of manufacturing establishments was 2,399, using 540 steam-engines, of 11,214 horse-power, and 116 water-wheels, of 1,830 horse-power, and employing 7,297 hands, of whom 7,450 were males above sixteen, 157 females above fifteen, and 320 youth. The total amount of capital invested was \$5,284,110; wages paid during the year, \$1,787,885; value of materials consumed, \$6,278,193; of products, \$11,517,302.

The whole number of newspapers and periodicals was 112, having an aggregate circulation of 55,250, and issuing annually 4,214,800 copies. There were 12 daily, with a circulation of 8,500; 5 tri-weekly, circulation 2,450; 5 semi-weekly, circulation 3,700; 89 weekly, circulation 45,800; 1 semi-monthly, circulation 800.

There were 455 libraries, having 87,111 volumes. Of these, 320, with 62,098 volumes, were private; and 135, with 25,018 volumes, were other than private.

The total number of religious organizations was 843, having 647 edifices, with 199,100 sittings, and property valued at \$1,035,430. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	275	61,700
Christian.....	18	4,450
Congregational.....	1	600
Episcopal.....	22	11,400
Lutheran.....	23	7,650
Methodist.....	355	69,100
Presbyterian.....	101	27,600
Roman Catholic.....	36	16,000

The condition of pauperism and crime is shown by the following statistics:

Total population.....	818,579
Number of persons receiving support during the year ending June 1, 1870.....	204

Colored.....	365
Foreign.....	120

TURKEY, a country in Eastern Europe, Western Asia, and Northern Africa. Reigning sovereign, Sultan Abdul-Aziz, born February 9, 1830, succeeded to the throne at the death of his elder brother, Sultan Abdul-Medjid, June 25, 1861. Sons of the Sultan: 1. Yussuf Izzeddin Effendi, born October 9, 1857; 2. Mahmoud Djemil Eddin Effendi; 3. Mehmed Selim Effendi, born October 8, 1866; 4. Abdul Medjid, born June 27, 1868. Heir-presumptive to the throne, Mohammed Murad Effendi, eldest son of the late Sultan Abdul Medjid, born September 21, 1840. By the present law, the crown is inherited according to seniority by the male descendants sprung from the imperial harem. The Sultan is succeeded by his eldest son only in case there are no uncles or cousins of greater age.

The area and the population of Turkey are only known by estimates. According to the latest calculations, the possessions in Europe, Asia, and Africa, had the following population:

	Inhabitants.
Europe (including the dependencies of Roumania, Servia, and Samos).....	16,025,000
Asia.....	16,463,000
Africa (Tunis, Tripoli, and Egypt).....	10,000,000
	42,498,000

In the estimates for the financial year, beginning March 13, 1872, and ending March 12, 1873 (year of the Hegira, 1288), the revenue was set down at £19,488,875, and the expenditures at £19,458,570, leaving a surplus of £29,805. The actual revenue and expenditures of the Government differ, however, widely from the estimates, there being no surplus, but immense deficits. The foreign debt of Turkey represents a nominal capital of £84,918,420; the larger portion bears an interest of 6 per cent., with a sinking fund of either 1 or 2 per cent. The internal and floating debt of Turkey is estimated at from £30,000,000 to £40,000,000.

Some progress has of late been made in the

construction of railroads, and in 1872 about 500 kilometres (against 298 in 1871) were in operation in European Turkey, and 231 in Asia Minor.

An official return of the shipping, for the years 1870 and 1871, shows that 24,055 ships, representing 5,402,009 register tons, entered and cleared the harbor of Constantinople during the year 1870; and 23,686 ships, representing 5,483,518 register tons, in 1871. It will be remarked that, if the number of ships is somewhat smaller in 1871, the tonnage is larger, and there is no doubt that, but for the outbreak of cholera, which lasted nearly six months, the amount of shipping last year would have been far more considerable. British shipping supplies 1,595 sailing-vessels (502,467 tons), and 759 steamers (445,535 tons), to the return of 1870, and 1,131 sailing-vessels (367,205 tons), and 1,224 steamships (763,788 tons), to that of 1871. In both returns British steamers present the highest tonnage, while British sailing-vessels come in the third place only in 1870 and in the fourth in 1871, being surpassed by the Italian and Hellenic sailing-vessels in 1870, and by these and the Austrian in 1871.

The legislative and executive authority is exercised under the supreme direction of the Sultan, by two high dignitaries, the Grand-Vizier, as head of the temporal Government, and the Sheik-ul-Islam, as head of the Church. The latter is appointed with the nominal concurrence of the "Ulema," a body comprising the clergy and chief functionaries of the law. The Grand-Vizier is President of the Divan or Ministerial Council, and, by virtue of his office, is Minister of the Interior. The Divan is divided into eight ministerial departments, namely, the Ministers of War, Finance, Marine, Commerce, Public Works, Police, Justice, and Public Instruction. Frequent changes occurred in 1872, as well as in the preceding years, in the composition of this Divan, and even the post of Grand-Vizier was filled in 1872 no less than three times. On October 19, 1872, Rushdi Pacha was appointed to the place as successor to Midhat Pacha, and, a few weeks later (November 8, 1872), Ahmet Nunktar Effendi was appointed Sheik-ul-Islam. It was believed that both these appointments were chiefly caused by the desire of the Sultan to change the existing law of succession by substituting for it the system which prevails in all the other monarchies of Europe. It is known that a strong party at court now urges the Sultan to make the change and declare his eldest son his heir. The old Mohammedan party, however, is strongly opposed to such a course, which it considers would involve a departure from the precepts of the Koran, and, as, under the Koran, a Mohammedan is only bound to obey his sovereign in so far as he keeps within its restrictions, this opposition, it is feared, may lead to very serious results if the Sultan were to adopt the above

proposal. Moreover, it is feared that the Princes of Servia and Roumania, the Khédive of Egypt, and the Bey of Tunis, who bear with impatience the suzerainty of the Sultan, would seize the opportunity for declaring themselves independent if a Sultan were crowned who, according to the law which existed at the time when they did homage at Constantinople, would not be the rightful heir to the throne.

The long agitation of the Christian Bulgarians for a separation of the administration of their churches from the Patriarch of Constantinople, and the erection of a national Bulgarian exarchate, was, in the course of the year 1872, so far successful that the Turkish Government consented to the erection of the exarchate, and appointed the first exarch. The trouble within the Greek Church, however, which has been caused by this question, continued without abatement, and Russia, France, and other powers, find it in their interest to meddle in it. But it has not ceased yet to be a source of annoyance to the Porte. (*See EASTERN CHURCHES.*)

In the discussions which for some time have existed in the Catholic Armenian Church between those desiring to retain the old privileges of the Church and those who submit to the changes which were demanded to be made by the Papal bull *Reversus*, the Porte sided with the former party; and when, in May, 1872, a majority of the bishops of the Armenian Church declared the election of the Patriarch Hassun (who is the leader of the second party) to have been illegal, and elected the Bishop of Diarbekir Civil Patriarch of the Armenian Catholic community, his election was confirmed by the Porte. In July, the ex-Patriarch Hassun was ordered to leave the country.

On August 22, 1872, Prince Milan IV., of Servia, assumed himself the reins of government. The young prince was born in 1856, and had been proclaimed on July 2, 1868, Prince of Servia. The government of the country had, thus far, been carried on in his name by a regency consisting of three persons. An immense crowd—greater than had been ever seen there before—had assembled in Belgrade to witness the coronation festivities. The prince went in state to the cathedral, the three regents accompanying him in his carriage. After the *Te Deum*, the regents handed over their powers to the prince, giving, at the same time, a statement of the condition of the country. The prince thanked them for their administration, adding, "I take upon myself a heavy task, but its accomplishment will be facilitated by the fact that I retain the co-operation of the regents." There was subsequently a reception of the diplomatic body and other envoys. M. Dolgorouki remitted to the prince an autograph letter from the Czar. The British diplomatic agent, being the senior diplomatist, delivered a speech, in which he

alluded to the progress made by Servia during the regency, and the friendly relations maintained with foreign powers. The prince, in reply, protested his anxiety to continue the good relations existing with foreign countries.

In March the Servian Government had addressed a note to the Porte, claiming to be put in possession of two Mussulman villages, situated on the right bank of the Drin, and respectively called the "Small Svornick" and "Sakhar." The note, which was also communicated to the representatives of the powers under whose guarantee the Danubian Principalities have been placed by the Treaty of Paris, is couched in very moderate terms, and all expressions likely to envenom the discussion, or to raise the susceptibility of the Porte, have been studiously avoided by the writer. It acknowledges that, thanks to the principles of justice and equity by which the Porte has always been animated toward the principality, all the questions which have hitherto arisen out of an imperfect application of the privileges conferred upon Servia have been settled to the satisfaction of all parties, and it expresses the hope that the present question will also receive an equally satisfactory solution. The note says: "Thereby the Imperial Ottoman Government will supply a fresh proof of its respect for the rights secured to the Servian Principality, and still more consolidate the good relations which should never cease to exist between the suzerain court and the principality."

The Servian Government claims the two villages because of their situation on the right bank of the Drin, and because of their former dependence on the districts of Jadra and Radjevena, which, by the firman issued by Sultan Mahmoud in December, 1833, were incorporated into Servia. It, moreover, alleges that, if, in 1862, the commissioners who had been appointed, by virtue of the conference of Candlidja, to superintend the withdrawal of the Mussulmans from Servia had left the two villages untouched, this was solely due to the opposition made at the time by the Ottoman commissioner, who had received no instructions from his Government with respect to these villages. The Servian Government also relies upon a verbal promise alleged to have been made to it by the late Aali Pacha, in 1866, to the effect that the two villages in question would be evacuated and handed over to the principality; and this promise, it is added, would have, undoubtedly, been carried out, had not the Servian Government thought proper to abstain from pressing the Ottoman Government while they had to deal with more important questions.

The subject remained throughout the year a matter of negotiation between the Governments of Servia and Turkey. On November 4th, the Minister of Foreign Affairs, when questioned in the Skuptchina (National As-

ssembly) on the state of the question, replied that the cabinet had, in a secret sitting, determined to negotiate directly with the Porte, and not to have recourse to any foreign inter-

vention. The minister also stated that he hoped the Ottoman Government, in its wisdom, would assist in effecting a speedy solution of the case.

U

UNITARIANS. The *Year-Book of the Unitarian Congregational Churches*, for 1873, gives lists of 844 Unitarian societies, and of 400 ministers, of whom 172 are not settled.

The total receipts of the *American Unitarian Association*, for the year ending April 80, 1872, were \$109,692.92, of which \$86,761.19 were from donations, and \$22,931.78 were from sales and collections for special objects. Its expenses were \$107,082.22. Its most conspicuous work was the collection of funds to aid in rebuilding Unity Church, Chicago, which was destroyed in the fire of October, 1871.

The Association employs three persons in the oversight of its missionary work—one west of the Mississippi River, one in Maine, and one on the Pacific coast. It aids in the support of missions at Ann Arbor, Mich., at Yellow Springs and Xenia, O., places which are the seats of large educational institutions, and at several other points, of less obvious importance. It has assisted students preparing for the ministry, at Cambridge, Mass., and at Meadville, Pa. Two agents are employed, in coöperation with the Government of the United States, among the Ute Indians, in Colorado. An appropriation of \$500, in gold, annually, has been made for the support of preaching, in the English language, in Paris. The Executive Committee, in their report, expressed hopes that favorable results would follow from the labors of their missionary, Mr. Dall, in India. A revised code of by-laws was adopted at the annual meeting of the Association. It imposes more exact conditions of membership, by which the privileges of the Association may be better guarded against abuse.

The *National Conference of Unitarians* met in Boston, Mass., October 23d. Mr. E. R. Hoar presided. Seven hundred and fifty delegates attended, from 220 churches. The secretary reported that, while the number of churches summoned to the conference of 1865 was only 262, the number called to this conference was 343. Thus, a gain was manifest of 80 per cent. in seven years. It was stated also in the report of the secretary, that there are one or more Unitarian churches in efficient operation in all the cities of the United States whose population, by the last census, is larger than 40,000, excepting six, viz.: New Haven, Conn.; Albany, N. Y.; Newark, N. J.; Alleghany City, Pa.; Pittsburg, Pa., and Memphis, Tenn. The additions to the number of ministers in two years had been 45, 25 of whom were from Unitarian schools, 14 from Orthodox

schools and pulpits, and "five or six from other sources." Some ministers were received from England, and as many were sent there. Interchanges made with Universalists are not included in this estimate. Two ministers had left the Unitarian for other bodies, and 17 had been lost by death. The amount contributed during the year, by 190 churches, to the funds of the American Unitarian Association, was \$97,930.62. This money is expended in publishing and circulating the literature of the denomination, in aiding special enterprises of permanent value, and in employing preachers.

The following resolutions were adopted on the subject of a "statement of belief" of the Unitarian Churches:

Whereas, The strong convictions expressed by conscientious men in full sympathy with the spirit and purposes of this body, that a change is desirable in some of the statements in the organic basis of the national conference; considering, also, that convictions equally strong and equally conscientious exist in valuable and dear members standing on both sides of these questions, and that no final and satisfactory result can be obtained, except after the fullest and freest consultation by representative men, carefully selected from all parts of our body: therefore—

Resolved, That, after the close of this session of conference, our president, taking such advice as he may deem proper, shall appoint a committee of nine persons, thus selected of representative men of different shades of belief, and that this committee (having power to fill its own vacancies) shall meet to consult as often as is necessary, to see if any change in our constitution can be made which will be generally satisfactory.

Resolved, That this committee, if they can agree on any such change, shall send a printed copy of the same to every member of the present conference, requesting each of these delegates to return it to said committee, with his or her assent or dissent, and to report the result thus obtained to the next conference.

The conference expressed its desire for the separation of denominational education from the public school system, in the following resolutions:

Whereas, The American idea of public education is that the child of every citizen shall be provided with the best opportunities for an education the States can afford, according to the views of its best educators; and—

Whereas, By the laws of the land, expressly fixed in the constitutions of States and of the nation, the Government has no right to force upon the citizen or his children religious instruction contrary to his conscience: therefore—

Resolved, That no obstacle be permitted to remain which shall deprive any child of the grandest means of being moulded into American life.

Resolved, That we resist to the uttermost any attempt to use one cent of the public funds for any denominational or sectarian purposes.

Resolved, That, while yielding to no body of religious worshippers in our reverence for the Bible, and our grateful acceptance of the truth it contains, and commending it to every one's study, we nevertheless would not insist upon it as an essential or useful part of our public school system.

After a long discussion of the subject, the conference recommended the raising of \$50,000 for building a denominational church at Washington, "to be under the control of the American Unitarian Association," provided "that the privileges of said church be open to all alike, without distinction of race or color." The churches were also advised and recommended to raise \$100,000 for the exclusive use of the American Unitarian Association during the ensuing year, "without reference to the money which has been voted to the Washington church."

It was declared the duty of every minister "to take a bold stand in favor of temperance." The Unitarian foreign missions are in Paris and India. The latter is largely sustained by the income of the Hayward Trust Fund of \$20,000. Mr. Dall, the superintendent of the India mission, had announced, several months before, that he had come to the conclusion that the interests of his work would be promoted by his joining the society of Indian theists known as the Brahmo Somaj, and that he had joined it. The conference resolved to sustain and develop the mission. The labors conducted, under the direction of Unitarians, among the freedmen in the South, were continuing to meet with success.

The reports of the *British and Foreign Unitarian Association* show it to be making active exertions for the spread of Unitarian doctrines. During the year which ended with its anniversary in May, 1872, its funds were used to promote lectures in all parts of Great Britain. Large sheets, containing statements of principles, with citations from the Scriptures, were posted in many places. More than 100,000 tracts and leaflets were distributed, and 17,500 volumes were printed. At the time of the anniversary, 12 new chapels were in course of building. Aid had been given by the officers of the Association to seven district associations. Communication had been established with the Unitarians in the United States. Some interest had been manifested in the labors of Pastor Oquerel in Paris. A depot had been opened in Berlin for the sale of Unitarian publications, and money had been voted for the spread of Unitarian literature in Italy. A Hungarian young man was in London, receiving education for the ministry. The expenditures of the Association for the year had been £3,750.

The Association, at its anniversary, adopted a resolution, that "the Education Act (of 1870) contains provisions which violate the principles of religious equality."

UNITED BRETHREN IN CHRIST. In the following table are given the statistics of this Church:

The number of meeting-houses is 1,691; of parsonages, 168; of Sunday-schools, 2,610; of Sunday-school scholars and teachers, 144,870. The total amount paid during the year, for the salaries of ministers, was \$324,255.18; amount collected for missions, \$39,149.23; collected for Sunday-school purposes, \$38,299.07; collected for church-building and expenses, \$262,684.82. The total amount of the contributions of the Church was \$681,300.93. The increase in the number of church-members in 1872, over the number reported in 1871, was 5,019.

The receipts of the Missionary Society of this denomination for the year ending July 1, 1872, were: From contributions, \$44,156.75; amount paid as salary by missionary fields to their pastors, \$54,624.88; total, \$98,781.63. The number of missionaries employed was 299, of whom 179 labored in the home missions, 114 on the frontier, and 6 in the foreign work. The foreign missions are in Germany, and at Shengay, in Africa. The German mission is reported in need of reinforcements. Sixty-three persons were baptized at the Shengay Mission during the year.

UNITED STATES. Several projects of a national character were suggested during the year, and received more or less of public at-

tention. The scheme by which it was intended to place the telegraph system of the country in the hands of the Government was brought before Congress without obtaining success. Considerable popular opposition was manifested to it, and at present its adoption does not appear probable. Another project was, the enlargement of the system of land-locked navigation from Maine to the Gulf of Mexico, and from the Mississippi Valley to the various ports of the Atlantic seaboard. Some investigations on this subject were proposed, but received little favor. It was also suggested, more particularly by the Governor of Virginia in a message to the State Legislature, that the assumption of the State debts by the Federal Government should be made. No public action was taken upon the subject. In New Hampshire, however, the payment of the local debts of the cities and towns was assumed by the State government.

A change was made in the bench of the Supreme Court of the United States, by the retirement, in consequence of age, of Justice Samuel Nelson, from New York, and the appointment to the active duties of the position of ex-Governor Ward Hunt from the same State. A decision rendered by the court, during the year, confirmed the validity of slave contracts entered into before the proclamation of emancipation. In *Osborn vs. Nicholson*, from Arkansas, there was a warrantee that the slave was sound, and that he was a slave for life. The court held that the contract, being valid when made, was enforceable in the courts, and that the emancipation of the slave, being an exercise of sovereign power of the State, was not a breach of the warrantee and did not invalidate the contract. In *White vs. Hart et al.* (error from Georgia), which was an action on a promissory note given for the purchase-money of a slave, the defence was that, by the new constitution of Georgia, the State courts were prohibited from entertaining any cases involving the validity of a slave contract. The United States Supreme Court decided three points: 1. That the States in rebellion were never out of the Union, and were never absolved from the prohibition in the Constitution of the United States against passing any law impairing the obligation of contracts; 2. That, as the constitution of Georgia takes away the remedy upon the contract, it does not simply deny jurisdiction to her courts to enforce it, but it annihilates the contract also, and is, therefore, in this regard, repugnant to the Constitution of the United States; 3. That the constitution of Georgia was not the act of Congress, directly or indirectly (as was claimed), but the act of the people of Georgia, and that therefore it comes within the prohibition contained in the United States Constitution. In another decision rendered on April 14th, the relation of the civil to the ecclesiastical courts of the country was considered. In the case of *Watson et al. vs.*

Jones et al. on appeal from the Circuit Court of Kentucky, Mr. Justice Miller delivered the opinion, in which he said:

The questions which have come before the civil courts, concerning the rights to property held by ecclesiastical bodies, may, so far as we have been able to examine them, be profitably classified under three general heads, which of course do not include cases governed by considerations applicable to a church established and supported by law as the religion of the State.

1. The first of these is when the property which is the subject of controversy has been, by the deed or will of the donor, or other instrument by which the property is held, by the express terms of the instrument, devoted to the teaching, support, or spread of some specific form of religious doctrine or belief.

2. The second is when the property is held by a religious congregation which, by the nature of its organization, is strictly independent of other ecclesiastical associations, and, so far as church government is concerned, owes no fealty or obligation to any higher authority.

3. The third is where the religious congregation or ecclesiastical body holding the property is but a subordinate member of some general church organization in which there are superior ecclesiastical tribunals with a general and ultimate power of control more or less complete.

After a brief reference to the first and second class of cases, Justice Miller thus speaks of the third:

But the third of these classes of cases is the one which is oftentimes found in the courts, and which, with reference to the number and difficulty of the questions involved, and to other considerations, is every way the most important.

It is the case of property acquired in any of the usual modes for the general use of a religious congregation, which is itself part of a large and general organization of some religious denomination, with which it is more or less intimately connected by religious views and ecclesiastical government.

The case before us is one of this class, growing out of a schism which has divided the congregation and its officers, and the presbytery and synod, and which appeals to the courts to determine the right to the use of the property so acquired. Here is no case of property devoted forever by the instrument which conveyed it, or by any specific declaration of its owner, to the support of any special religious dogmas, or any peculiar form of worship, but of property purchased for the use of a religious congregation, and, so long as any existing religious congregation can be ascertained to be that congregation, or its regular and legitimate successor, it is entitled to the use of the property. In the case of an independent congregation, we have pointed out how this identity or succession is to be ascertained, but in cases of this character we are bound to look at the fact that the local congregation is itself but a member of a much larger and more important religious organization, and is under its government and control, and is bound by its orders and judgments. There are in the Presbyterian system of ecclesiastical government, in regular succession, the presbytery over the session or local church, the synod over the presbytery, and the General Assembly over all. These are called, in the language of the church organs, judicatories, and they entertain appeals from the decision of those below, and prescribe corrective measures in other cases.

In this class of cases, we think the rule of action which should govern the civil courts, founded in a broad and sound view of the relations of Church and State under our system of laws, and supported by a preponderating weight of judicial authority, is, that

whenever the questions of discipline, or of faith, or ecclesiastical rule, custom, or law, have been decided by the highest of these church judicatories to which the matter has been carried, the legal tribunals must accept such decisions as final, and as binding on them in their application to the case before them.

In the case of *Clinton et al. vs. Englebrecht et al.*, Chief-Justice Chase delivered the opinion establishing the principle that citizens in the Territories have rights of self-government cognate to those enjoyed by citizens in the States.

The commencement of the sessions of the Tribunal for the settlement of the Alabama claims took place at Geneva, in Switzerland, on April 15th, as provided for in the recent treaty between the United States and Great Britain. (For the proceedings and decision of the tribunal, *see* DIPLOMATIC CORRESPONDENCE.)

By article thirty-four, of the above-mentioned treaty, it was provided that the Emperor of Germany should be selected as umpire in the case of the disputed Northwestern boundary-line. By the original Treaty of Washington, of June 15, 1846, it was provided that the line of boundary between the territory of the United States and those of her Britannic Majesty, from the point on the forty-ninth parallel of north latitude up to which it had then been ascertained, should be continued westward along the said parallel of north latitude to the middle of the channel which separates the continent from Vancouver's Island, and thence southerly along the middle of the said channel and of Fuca Strait to the Pacific Ocean. But the commissioners, appointed by the contracting parties to determine that portion of the boundary which runs southerly through the middle of the channel aforesaid, were unable to agree upon the same. The British Government claimed that such boundary-line should be run through the Rosario Strait, and the Government of the United States claimed that it should be run through the Haro channel. The decision of the Emperor of Germany confirmed and established the claim of the Government of the United States.

Among the acts of Congress at its session during the year, was one to set apart a tract of land near the head-waters of the Yellowstone River as a public park. The tract is described as commencing at the junction of Gardiner's River with the Yellowstone River, and running east to the meridian passing ten miles to the eastward of the most eastern point of Yellowstone Lake; thence south along said meridian to the parallel of latitude passing ten miles south of the most southern point of Yellowstone Lake; thence west along said parallel to the meridian, passing fifteen miles west of the most western point of Madison Lake; thence north along said meridian to the latitude of the junction of the Yellowstone and Gardiner's Rivers; thence east to the place of beginning. This portion of land is reserved and withdrawn from settlement, occupancy, or sale, under the laws of the United States,

and is dedicated and set apart as a public park or pleasuring-ground for the benefit and enjoyment of the people; and all persons who shall locate, or settle upon, or occupy the same, or any part thereof, shall be considered trespassers, and removed therefrom.

It is stated, on page 215 of this volume, that, by an act of Congress adopted on February 2d, the number of members of the House of Representatives was fixed at 283. Subsequently, Congress passed another act, which was approved May 30th, and gave to New Hampshire, Vermont, New York, Pennsylvania, Indiana, Tennessee, Louisiana, Alabama, and Florida, each one representative in Congress, in addition to the number apportioned by the previous act.

The preparations for the election of a President of the United States during the year 1872 were commenced during the previous year. The division between Republican members of the Federal Senate became more distinct and complete, and the questions at issue between them were, to a certain extent, brought up for decision by the result of the election. Many other interests early appeared in the field, but subsequently coöperated, in a degree, with one or the other of the two great political parties.

The first national convention, of a political character, which was held during the year, was that of the Labor Reform party. It assembled at Columbus, Ohio, on February 21st. The States of Connecticut, Massachusetts, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Iowa, Kansas, and Nebraska, were represented. Edwin M. Chamberlin, of Massachusetts, was appointed permanent president of the convention, and the following platform was adopted:

We hold that all political power is inherent in the people; that free government is founded on their authority, and established for their benefit; that all citizens are equal in political rights, entitled to the largest religious and political liberty compatible with the good order of society, as also the use and enjoyment of the fruits of their labor and talents, and no man or set of men are entitled to the exclusive, separate emoluments, privileges, or immunities, from the Government, but in consideration of public services; and any laws destructive of these fundamental principles are without moral binding force, and should be repealed; and we believe that all the evils resulting from unjust legislation now affecting the industrial classes can be removed by the adoption of the principles contained in the following declarations: therefore resolved—

1. That it is the duty of the Government to establish a just standard of the distribution of capital and labor, by providing a purely national circulating medium, based on the faith and resources of the nation, issued directly to the people, without the intervention of any system of banking corporations, which money shall be a legal tender in the payment of all debts, public and private, and interchangeable, at the option of the holder, for Government bonds, bearing a rate of interest not to exceed three and sixty-five hundredths per cent., subject to future legislation by Congress.

2. That the national debt should be paid in good faith, according to the original contract, at the earliest option of the Government, without mortgaging the property of the people, and the future earnings

of labor, to enrich a few capitalists at home and abroad.

3. That justice demands that the burdens of Government should be so adjusted as to be equally on all classes and interests, and that exemption from taxation of Government bonds, bearing extortionate rates of interest, is a violation of all just principles of revenue laws.

4. That the public lands of the United States belong to the people, and should not be sold to individuals, nor granted to corporations, but should be held as a sacred trust for the benefit of the people, and should be granted free of cost to landless settlers only, in amounts not exceeding one hundred and sixty acres to each.

5. That Congress should modify the tariff so as to admit free such articles of common use as we can neither produce nor grow, and lay duties for revenue mainly upon articles of luxury, and upon such articles of manufacture as will—we having the raw material in abundance—assist in further developing the resources of the country.

6. That the presence in our country of Chinese laborers, imported by capitalists in large numbers for servile use, is an evil, entailing want and its attendant train of misery and crime on all classes of the American people, and should be prohibited by legislation.

7. That we ask for the enactment of a law by which all mechanics and day-laborers employed by or on behalf of the Government, whether directly or indirectly, through persons, firms, or corporations, contracting with the State, shall conform to the reduced standard of eight hours a day, recently adopted by Congress for national employees, and also for an amendment to the acts of incorporation for cities and towns, by which all laborers and mechanics, employed at their expense, shall conform to the same number of hours.

8. That the enlightened spirit of the age demands the abolition of the system of contract labor in our prisons and other reformatory institutions.

9. That the protection of life, liberty, and property, forms the three cardinal principles of government, and the first two are more sacred than the latter; therefore, money needed for prosecuting wars should, as it is required, be assessed and collected from the wealth of the country, and not entailed as a burden on posterity.

10. That it is the duty of the Government to exercise its power over railroads and telegraph corporations, that they shall not in any case be privileged to exact such rates of freight, transportation, or charges by whatever name, as may bear unduly or inequitably upon the producer or consumer.

11. That there should be such reform in the civil service of the national Government as will remove it beyond all partisan influence, and place it in the charge, and under the direction, of intelligent and competent business-men.

12. That, as both history and experience teach us that power ever seeks to perpetuate itself, by every and all means at its command, and that its prolonged possession in the hands of one person is always dangerous to the liberties of a free people, and believing that the spirit of our organic laws and the stability and safety of our free institutions are best obeyed, on the one hand, and secured, on the other, by a regular constitutional change in the chief of the country at each quadrennial election, therefore, we are in favor of limiting the occupancy of the presidential chair to one term.

13. That we are in favor of granting general amnesty, and restoring the Union at once on the basis of the equality of rights and privileges to all, the impartial administration of justice being the only true bond of union to bind the States together, and restore the affection of the people to the Government.

14. That we deem it expedient for Congress to revise the patent-laws so as to give laborers more fully the benefits of their ideas and inventions.

15. That fitness, and not political or personal considerations, should be the only recommendation to public office, either appointed or elective, and any or all laws, looking to the establishment of this principle, are heartily approved.

16. That we demand the subjection of the military to the civil authorities, and the confinement of its operation to national purposes alone.

David Davis, of Illinois, one of the judges of the Federal Supreme Court, was nominated for President of the United States, and Joel Parker, of New Jersey, for Vice-President. Subsequently, on June 24th, Judge Davis addressed a letter to the president of the convention, declining the nomination, as follows:

MY DEAR SIR: The National Convention of Labor Reformers, on the 22d of February last, honored me with a nomination as their candidate for the presidency. Having regarded that movement as the initiation of a policy and purpose to unite the various political elements in a compact opposition, and consented to the use of my name before the Cincinnati Convention, where a distinguished citizen of New York was nominated—under these circumstances, I deem it proper to retire absolutely from the presidential contest, and thus leave the friends, who were generous enough to offer me their voluntary support, free to obey their convictions of duty unfettered by any supposed obligation.

Sympathizing earnestly with all just and proper measures by which the condition of labor may be elevated and improved, I am, with great respect, your fellow-citizen,
DAVID DAVIS.

On June 28th, Governor Parker likewise declined the nomination, as follows:

SIR: Your letter, informing me that the Convention of the National Labor Reform Party, which met at Columbus on the 22d day of February last, placed me in nomination for the office of Vice-President of the United States, has been received. I feel honored by the preference thus expressed by the representatives of a large and influential body of my fellow-citizens. I am in favor of all legal and just measures that tend to improve the condition of the working-men. I have always been a member of the Democratic party. For nearly thirty-five years I have shared its triumphs and defeats, adhering to its fortunes because I considered its success essential to good government and to the elevation of the laboring-classes. Having been placed in important public positions, as the nominee of that party, I am bound in honor as well as by inclination to stand by its organization and abide by the decision of its National Convention. To be the candidate of one party while supporting the nominee of another (although the two may agree substantially in principle) would be inconsistent, and I therefore respectfully decline the nomination tendered me by the convention you represent.
JOEL PARKER.

In consequence of these letters, it was decided to hold a conference of working-men in New York, on July 30th. At this conference a convention of delegates of the party was called to meet in Philadelphia on August 22d, to nominate candidates for President and Vice-President. At this convention, on August 22d, Charles O'Connor, of New York, was nominated for President. No nomination for the vice-presidency was made. The following resolutions were adopted by the convention:

Resolved, That we, the National Labor Reformers, in convention assembled, declare that we regret that our candidates have withdrawn from the canvass, for what reason we are utterly at a loss to know;

that this conduct is such as meets with our disapprobation and leaves a suspicion on the reputation of those men that they were influenced in their action by the mercenaries of either Grant or Greeley.

Resolved, That under no circumstances will we support either Grant or Greeley, for the reason that neither of those men can fairly represent the interests of this party; that we consider those men as so closely identified with mere parties as to preclude all possibility of either of them doing justice to the working-people of this great republic; and therefore be it

Resolved, That we proceed with the business of this convention as will best serve our interests, and take such action as will aid us in nominating candidates for President and Vice-President of the United States, or such further action as this convention in its wisdom may suggest or adopt.

The Colored National Convention assembled in New Orleans on April 15th. It convened in response to a call issued by the Southern States Convention of colored men, which was held at Columbia, S. C., on October 18, 1871. Delegates were present from Arkansas, Georgia, Louisiana, Maryland, Massachusetts, Mississippi, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, and the District of Columbia.

Frederick Douglass, of Washington, was appointed chairman, and the following resolutions were adopted:

Regretting the necessity which has called into existence a colored convention, and deeply sensible of the responsibilities which have been intrusted to our consideration, we hereby acknowledge our gratitude for past triumphs in behalf of equal rights, and respectfully submit our peculiar grievances to the immediate attention of the American people in the following platform and resolutions:

1. We thank God, the friends of universal liberty in this and other lands, the bravery of colored soldiers, and the loyalty of the colored people, for our emancipation, our citizenship, and our franchise-ment.

2. Owing our political emancipation in this country to Republican legislation, to which all other parties and political shades of opinion were originally and bitterly opposed, we would be blind to our prospects and false to our best interests did we identify ourselves with any other organization; and, as all roads out of the Republican party lead into the Democratic camp, we pledge our unwavering devotion to support the nominee of the Philadelphia Convention.

3. We sincerely and gratefully indorse the Administration of President U. S. Grant in maintaining our liberties, in protecting us in our privileges, in punishing our enemies, in the dawn of recognition of the claims of men, without regard to color, by appointing us to important official positions at home and abroad, in the assurance that he has given to defend our rights; and that, while we, in our gratefulness, acknowledge and appreciate his efforts in behalf of equal rights, we are not unmindful of his glory as a soldier and his exalted virtues as a statesman.

4. Our thanks are due, and are humbly tendered, to President Grant for overriding the precedents of prejudice in the better recognition of the services of men, without regard to color, in some parts of the country, and we earnestly pray that the colored Republicans of States where there are no Federal positions given to colored men may no longer be ignored, but that they will be stimulated by some recognition of Federal patronage.

5. It would be an ingratitude, loathed by men and abhorred by God, did we not acknowledge our over-

whelming indebtedness to the services of the Hon. Charles Sumner, who stood for a long time alone in the Senate of the United States, the Gibraltar of our cause, and the north-star of our hopes, who forfeited caste in the estimation of a large portion of his countrymen, by his unswerving devotion to equal rights; who has been maligned for his fidelity to principles; who has been stricken down by an assassin for advocating liberty throughout all the land and unto all the inhabitants thereof, and in whose giant body, rising as it were almost out of the grave, to marshal the hosts of impartial justice to his mighty ideas, going to the farthest part of the land and finding a responsive echo in the triumph of liberty over slavery, we have an assurance of this good, great, and beloved patriot that he will be as faithful to the Republican party in the future as he has been unfaltering in the past.

6. That while men professing strong radical sentiments, and who were elected to Congress by overwhelming majorities of colored voters, were found voting against the Supplementary Civil Rights Bill in the United States Senate, we honor that moral exhibition of devotion to the principles of the Republican party which influenced the Hon. Schuyler Colfax, Vice-President of the United States, to honor the cause of justice by recording his casting vote as President of the Senate in favor of equality before the law, as indicated in the Supplementary Civil Rights Bill, as it passed the Senate by virtue of the aforesaid casting vote.

7. Having been by solemn legislation of the American Congress raised to the dignity of citizenship, we appeal to the law-abiding people of the States, especially to those who, in the days of the Fugitive Slave Law, exhorted obedience to the statutes, however offensive, to protect and defend us in the enjoyment of our just rights and privileges upon all conveyances which are common carriers, at all resorts of public amusements where tastes are cultivated and manhood is quickened, and in all places of a public character, or corporate associations which owe their existence to the legislation of the nation or States, against the spirit of slavery which attempts to degrade our standard of intelligence and virtue by enforcing our refined ladies and gentlemen into smoking-cars amid obscenity and vulgarity, which humiliates our pride by denying us first-class accommodations on steamboats, and compelling us to eat and sleep with servants, for which we are charged the same as those who have the best accommodations; and which closes the doors of hotels against furnishing colored persons, however wealthy, intelligent, or respectable they may be, while all other public places and conveyances welcome and entertain all white persons, whatever may be their character, who may apply. Now, in view of the disgraceful inconsistency of this affectation of prejudice, this rebellion against the laws of God, humanity, and the nation, we appeal to the justice of the American people to protect us in our civil rights in public places, and upon public conveyances, which are readily accorded, and very justly, to the most degraded specimens of our fellow-citizens.

8. That wherever Republicans have betrayed a colored constituency, we recommend that better men be elected to succeed them, and especially do we pledge ourselves to elect successors in Congress, wherever we have the power, to every Republican who voted against or dodged the Supplementary Civil Rights Bill, recently introduced into the United States Senate by Hon. Charles Sumner, and also successors to those who shall not show a satisfactory record on the Civil Rights Bill now in the United States House of Representatives.

The following letter from Senator Charles Sumner was received by the convention:

WASHINGTON, April 7, 1872.

MY DEAR SIR: In reply to your inquiry, I make haste to say that, in my judgment, the Colored Con-

vention should think more of principles than of men, except so far as men may stand for principles. Above all, let them insist on the rights of their own much-abused and insulted people. It is absurd for anybody to say that he "accepts the situation," and then deny the equal rights of the colored man. If the "situation" is accepted in good faith, it must be entirely, including not merely the abolition of slavery and the establishment of equal suffrage, but also all those other rights which are still denied and abridged. There must be complete equality before the law, so that in all institutions, agencies, or conveniences, created or regulated by law, there can be no discrimination on account of color, but a black man shall be treated as a white man.

In maintaining their rights, it will be proper for the convention to invoke the Declaration of Independence, so that its principles and promises shall become a living reality, never to be questioned in any way, but recognized always as a guide of conduct, and a governing rule in the interpretation of the national Constitution, being in the nature of a bill of rights preceding the Constitution. It is not enough to proclaim liberty throughout the land unto all the inhabitants thereof. Equality must be proclaimed also, and as, since both are promised by the great declaration, which is a national act, and as from their nature they should be uniform throughout the country, both must be placed under the safeguard of national law. There can be but one liberty and one equality, the same in Boston and New Orleans, the same everywhere throughout the country. The colored people are not ungenerous, and therefore will incline to any measures of good-will and reconciliation; but I trust no excess of benevolence will make them consent to any postponement of those equal rights which are now denied. The disabilities of colored people, loyal and long-suffering, should be removed before the disabilities of former rebels, or at least the two removals should go hand-in-hand. It only remains that I should say, "Stand firm!" The politicians will then know that you are in earnest, and will no longer be trifled with. Victory will follow soon, and the good cause be secure forever. Meanwhile, accept my best wishes for the convention, and believe, dear professor, faithfully yours,
CHARLES SUMNER.

To Professor JOHN M. LANGSTON.

The movement in Missouri in 1870, which consisted in a union of a part of the Republicans with the Democrats, and the election by them of State officers on what was designated as a "Liberal" ticket, was maintained in 1871. An attempt to reunite the Republican party in that State was made in October, 1871, but failed. The State Central Committee of the Liberal wing of the Republicans immediately afterward adopted a series of resolutions expressing their views (*see ANNUAL CYCLOPEDIA*, 1871, page 530). They also recommended a State Convention. Subsequently an address was issued, dwelling more at length on the achievements and purposes of the "Liberal movement," and calling a mass meeting, to be held at Jefferson City, on January 24, 1872. At this meeting nearly every county in the State was represented. It closed its proceedings by issuing a call for a National Convention, to be held at Cincinnati, on the first Monday of May ensuing, "to take such action as their convictions of duty and of public exigencies may require." The convention declared its adhesion to the sovereignty of the Union, emancipation, equality of civil rights or enfranchisement;

that peace and purity in administration can only come from such reconciliation as enfranchisement has wrought in Missouri; demanded complete amnesty and equal suffrage for all; a reform of the tariff, and the removal of such duties as, in addition to the revenue yielded to the Treasury, involve an increase in the price of domestic products; denounced the use of Federal patronage for the control of elections; called for a thorough and genuine reform of the public service; eulogized the Senators who pressed for the recent investigation; rebuked "the use of coercion to ratify a treaty," the "packing of the Supreme Court to relieve rich corporations," the use of unconstitutional laws "to cure the Ku-klux disorders, irreligion, or intemperance," and, finally, corruption in general, and called for an "uprising of honest citizens."

On January 9th, the Central Committee of the Democratic party of Missouri issued an address, in which they recounted the results of what was known as the "fusion" policy of the Democrats in the State canvass of 1870, and recommended the adoption of a similar policy in the presidential canvass of 1872, viz., that of making no nomination, but supporting the candidate of disaffected Republicans, as against the regular party nominee.

These proceedings in Missouri met with a response from Republicans in various parts of the country, of which the annexed is one instance. The Democrats continued silent.

To Colonel WILLIAM M. GROSVENOR, Chairman of the Executive Committee of the Liberal Republican Convention of Missouri, Washington, D. C.

SIR: We, Republicans of New York, wish to express our concurrence in the principles lately set forth by the Liberal Republicans of Missouri.

We make this departure from the ordinary methods of party action from a deep conviction that the organization to which we belong is under the control of those who will use it chiefly for personal purposes, and obstruct a free expression of opinion upon the important matters which the gentlemen whom you represent have laid before the people of the United States.

We believe that the time has come when the political offences of the past should be pardoned; that all citizens should be protected in the enjoyment of the rights guaranteed to them by the Constitution; that Federal taxation should be imposed for revenue, and so adjusted as to make the burden upon the industry of the country as light as possible; that a reform in the civil service should be made which will relieve political action from the influence of official patronage; that the right of local self-government, the foundation of American freedom, should be reasserted, and the encroachments of Federal power checked; and we also believe that at this time a special duty rests upon the people to do away with corruption in office.

The exposures recently made in this State have brought to light evils which are not confined to one party nor to a single locality, and disclose dangers more formidable than any which the republic has yet encountered.

With the hope that the movement begun in Missouri may spread through all the States and influence every political party, we accept the invitation to meet in National Mass Convention at the city of Cincinnati on the first Wednesday of May next, and

we invite all Republicans of New York who agree with us to cooperate in our action.

Henry R. Selden, Horace Greeley, Fred. A. Conkling, William Dorsheimer, Sinclair Tousey, Sigismund Kaufmann, E. Krakowizer, Ira O. Miller, Edwin K. Reynolds, William H. Briggs, Charles W. Godard, Henry D. Lloyd, William W. Goodrich, Waldo Hutchins, Hiram Barney, Freeman J. Fithian, George P. Bradford, Benjamin A. Willis, Horace Bemis, Louis Lowenthal.

The following letter also appeared from Mr. Charles Francis Adams, who was spoken of as the probable candidate of the convention, and who was then on his way to the Geneva Arbitration:

Boston, April 18, 1872.

MY DEAR MR. WELLES: I have received your letter, and will answer it frankly. I do not want the nomination, and could only be induced to consider it by the circumstances under which it might possibly be made. If the call upon me were an unequivocal one, based upon confidence in my character earned in public life, and a belief that I would carry out in practice the principles which I professed, then, indeed, would come a test of my courage in an emergency; but if I am to be negotiated for, and have assurances given that I am honest, you will be so kind as to draw me out of that crowd. With regard to what I understand to be the declaration of principles which has been made, it would be ridiculous in me to stand haggling over them. With a single exception of ambiguity, I see nothing which any honest Republican or Democrat would not accept. Indeed, I should wonder at any one who denied them. The difficulty is not in the professions. It lies everywhere only in the manner in which they are carried into practice. If I have succeeded in making myself understood, you will perceive that I can give no authority to any one to act or speak for me in the premises. I never had a moment's belief that, when it came to the point, any one, so entirely isolated as I am from all political associations of any kind, could be made acceptable as a candidate for public office; but I am so unlucky as to value that independence more highly than the elevation which is brought by a sacrifice of it. This is not inconsistent with the sense of grateful recognition of the very flattering estimates made of my services in many and high quarters, but I cannot consent to peddle with them for power. If the good people who meet at Cincinnati really believe that they need such an anomalous being as I am (which I do not), they must express it in a manner to convince me of it, or all their labor will be thrown away,

I am, with great respect, yours, etc.,

CHARLES FRANCIS ADAMS.

DAVID A. WELLS, Esq., Norwich, Conn.

On May 1st a large convention of the Liberal Republicans assembled in Cincinnati, Ohio, and was organized by the appointment of Senator Carl Schurz, of Missouri, as permanent chairman. The following resolutions as a platform were adopted:

We, the Liberal Republicans of the United States, in National Convention assembled at Cincinnati, proclaim the following principles as essential to just government:

1. We recognize the equality of all men before the law, and hold that it is the duty of Government, in its dealings with the people, to mete out equal and exact justice to all, of whatever nativity, race, color, or persuasion, religious or political.

2. We pledge ourselves to maintain the union of these States, emancipation and enfranchisement, and to oppose any reopening of the questions settled by the thirteenth, fourteenth, and fifteenth amendments to the Constitution.

3. We demand the immediate and absolute removal of all disabilities imposed on account of the rebellion, which was finally subdued seven years ago, believing that universal amnesty will result in complete pacification in all sections of the country.

4. Local self-government, with impartial suffrage, will guard the rights of all citizens more securely than any centralized power. The public welfare requires the supremacy of the civil over the military authority, and freedom of person under the protection of the *habeas corpus*. We demand for the individual the largest liberty consistent with public order, for the State self-government, and for the nation a return to the methods of peace and the constitutional limitations of power.

5. The civil service of the Government has become a mere instrument of partisan tyranny and personal ambition, and an object of selfish greed. It is a scandal and reproach upon free institutions, and breeds a demoralization dangerous to the perpetuity of republican government. We therefore regard such thorough reforms of the civil service as one of the most pressing necessities of the hour; that honesty, capacity, and fidelity, constitute the only valid claims to public employment; that the offices of the Government cease to be a matter of arbitrary favoritism and patronage, and that public station become again a post of honor. To this end it is imperatively required that no President shall be a candidate for reelection.

6. We demand a system of Federal taxation which shall not unnecessarily interfere with the industry of the people, and which shall provide the means necessary to pay the expenses of the Government, economically administered, the pensions, the interest on the public debt, and a moderate reduction annually of the principal thereof; and, recognizing that there are in our midst honest but irreconcilable differences of opinion with regard to the respective systems of protection and free trade, we remit the discussion of the subject to the people in their congressional districts, and to the decision of Congress thereon, wholly free of Executive interference or dictation.

7. The public credit must be sacredly maintained, and we denounce repudiation in every form and guise.

8. A speedy return to specie payment is demanded alike by the highest considerations of commercial morality and honest government.

9. We remember with gratitude the heroism and sacrifices of the soldiers and sailors of the republic, and no act of ours shall ever detract from their justly-earned fame, or the full reward of their patriotism.

10. We are opposed to all further grants of lands to railroads or other corporations. The public domain should be held sacred to actual settlers.

11. We hold that it is the duty of the Government, in its intercourse with foreign nations, to cultivate the friendship of peace, by treating with all on fair and equal terms, regarding it alike dishonorable either to demand what is not right, or to submit to what is wrong.

12. For the promotion and success of these vital principles, and the support of the candidates nominated by this convention, we invite and cordially welcome the cooperation of all patriotic citizens, without regard to previous affiliations.

The votes on the nomination of the candidate for the presidency were given, on each of the six ballots, as follows:

CANDIDATES.	1st.	2d.	3d.	4th.	5th.	6th.
Charles Francis Adams	208	238	264	279	309	334
Horace Greeley	147	239	258	251	258	332
Lyman Trumbull	100	148	156	141	91	19
David Davis	924	61	44	51	30	6
B. Gratz Brown	95	2	2	2	2	..
Andrew G. Curtin	62
Salmon P. Chase	24	1	34	32
Charles Sumner	1
John M. Palmer	1

Before the sixth ballot was announced, Minnesota changed 9 votes from Trumbull to Greeley; Pennsylvania changed her vote to 50 for Greeley, 6 for Davis; Indiana changed 27 to Adams; Illinois changed all but one to Greeley; and others changed, so that, when the vote was complete, the chairman announced the result as, Greeley, 482; Adams, 187. The chair thereupon announced Mr. Greeley as the candidate of the convention for President of the United States.

The convention then proceeded to ballot for Vice-President, with the following result:

CANDIDATES.	1st.	2d.
B. Gratz Brown, of Missouri.....	237	495
Lyman Trumbull, of Illinois.....	158	declined.
George W. Julian, of Indiana.....	134½	175
Gilbert C. Walker, of Virginia.....	84½	75
Cassius M. Clay, of Kentucky.....	84	declined.
Jacob D. Cox, of Ohio.....	25	declined.
James M. Scovel, of New Jersey.....	12	declined.
Thomas W. Tipton, of Nebraska.....	8	8
John M. Palmer, of Illinois.....	...	8

B. Gratz Brown was thereupon declared the nominee of the convention for Vice-President of the United States.

Mr. Greeley, on the next day, retired absolutely from all connection with the editorial department of the *New York Tribune*, and subsequently accepted the nomination in the following letter:

NEW YORK, May 30, 1872.

GENTLEMEN: I have chosen not to acknowledge your letter of the 2d inst., until I could learn how the work of your convention was received in all parts of our great country, and judge whether that work was approved and ratified by the mass of our fellow-citizens. Their response has from day to day reached me through telegrams, letters, and the comments of journalists independent of official patronage and indifferent to the smiles or frowns of power. The number and character of these unconstrained, unpurchased, unsolicited utterances, satisfy me that the movement which found expression at Cincinnati has received the stamp of public approval, and been hailed by a majority of our countrymen as the harbinger of a better day for the republic.

I do not misinterpret this approval as especially complimentary to myself, nor even to the chivalrous and justly-esteemed gentleman with whose name I thank your convention for associating mine. I receive and welcome it as a spontaneous and deserved tribute to that admirable platform of principles wherein your convention so tersely, so lucidly, so forcibly set forth the convictions which impelled, and the purposes which guided its course—a platform which, casting behind it the wreck and rubbish of worn-out contentions and by-gone feuds, embodies in fit and few words the needs and aspirations of to-day. Though thousands stand ready to condemn your every act, hardly a syllable of criticism or cavil has been aimed at your platform, of which the substance may be fairly epitomized as follows:

1. All the political rights and franchises which have been acquired through our late bloody convulsion must and shall be guaranteed, maintained, enjoyed, respected evermore.

2. All the political rights and franchises which have been lost through that convulsion should and must be promptly restored and reestablished, so that there shall be henceforth no proscribed class and no disfranchised caste within the limits of our Union, whose long-estranged people shall reunite and fraternize upon the broad basis of universal amnesty with impartial suffrage.

3. That, subject to our solemn constitutional obligation to maintain the equal rights of all citizens, our policy should aim at local self-government and not at centralization; that the civil authority should be supreme over the military; that the writ of *habeas corpus* should be jealously upheld as the safeguard of personal freedom; that the individual citizen should enjoy the largest liberty consistent with public order, and that there shall be no Federal subversion of the internal polity of the several States and municipalities, but that each shall be left free to enforce the rights and promote the well-being of its inhabitants by such means as the judgment of its own people shall prescribe.

4. There shall be a real and not merely a simulated reform in the civil service of the republic; to which end it is indispensable that the chief dispenser of its vast official patronage shall be shielded from the main temptation to use his power selfishly, by a rule inexorably forbidding and precluding his reelection.

5. That the raising of revenue, whether by tariff or otherwise, shall be recognized and treated as the people's immediate business, to be shaped and directed by them through their Representatives in Congress, whose action thereon the President must neither overrule by his veto, attempt to dictate, nor presume to punish, by bestowing office only on those who agree with him or withdrawing it from those who do not.

6. That the public lands must be sacredly reserved for occupation and acquisition by cultivators, and not recklessly squandered on the projectors of railroads, for which our people have no present need, and the premature construction of which is annually plunging us into deeper and deeper abysses of foreign indebtedness.

7. That the achievement of these grand purposes of universal beneficence is expected and sought at the hands of all who approve them, irrespective of past affiliations.

8. That the public faith must at all hazards be maintained and the national credit preserved.

9. That the patriotic devotedness and inestimable services of our fellow-citizens, who, as soldiers or sailors, upheld the flag and maintained the unity of the republic, shall ever be gratefully remembered and honorably required.

These propositions, so ably and forcibly presented in the platform of your convention, have already fixed the attention and commanded the assent of a large majority of our countrymen, who joyfully adopt them, as I do, as the basis of a true, beneficent national reconstruction—of a new departure from jealousies, strifes, and hates, which have no longer adequate motive or even plausible pretext, into an atmosphere of peace, fraternity, and mutual good-will. In vain do the drill-sergeants of decaying organizations flourish menacingly their truncheons and angrily insist that the files shall be closed and straightened; in vain do the whippers-in of parties once vital, because rooted in the vital needs of the hour, protest against straying and bolting, denounce men nowise their inferiors as traitors and renegades, and threaten them with infamy and ruin. I am confident that the American people have already made your cause their own, fully resolved that their brave hearts and strong arms shall bear it on to triumph. In this faith and with the distinct understanding that, if elected, I shall be the President not of a party but of the whole people, I accept your nomination, in the confident trust that the masses of our countrymen North and South are eager to clasp hands across the bloody chasm which has too long divided them, forgetting that they have been enemies in the joyful consciousness that they are and must henceforth remain brethren. Yours gratefully,

HORACE GREELEY.

To HON. CARL SCHURZ, President; HON. GEORGE W. JULIAN, Vice-President, and Messrs. WILLIAM E. McLEAN, JOHN G. DAVIDSON, J. H. RHODES, Secretaries of the National Convention of the Liberal Republicans of the United States.

Mr. B. Gratz Brown also accepted the nomination as candidate for the vice-presidency, in a letter dated May 31st.

Many Liberal Republicans were dissatisfied with the nomination of Mr. Greeley, and a meeting was held in Steinway Hall, New York, on May 30th, composed of such persons. Their sympathies were in favor of the adoption of a less rigid protective policy than was to be expected under Mr. Greeley. In compliance with the views of this meeting, a conference was subsequently held at the Fifth Avenue Hotel, New York, on June 20th, of persons invited, as follows:

New York, June 6, 1872.

The undersigned desire to have a conference of gentlemen who are opposed to the present Administration and its continuance in office, and deem it necessary that all the elements of the opposition should be united for a common effort at the coming presidential election.

They respectfully invite you to meet a number of gentlemen belonging to the different branches of the opposition, at the Fifth Avenue Hotel, New York, on June 20, at 2 P.M., for the purpose of consultation, and to take such action as the situation of things may require.

Your attention is respectfully drawn to the fact that this invitation is strictly personal to yourself, and a prompt reply is earnestly requested, addressed to Henry D. Lloyd, secretary of the committee, post-office box 2,209.

CARL SCHURZ,
JACOB D. COX,
WILLIAM CULLEN BRYANT,
OSWALD OTTENDORFER,
DAVID A. WELLS,
JACOB BRINKERHOFF.

A series of resolutions was adopted, and Wm. S. Groesbeck, of Ohio, nominated for President, and Frederick L. Olmsted of New York, for Vice-President. During the excitement of the canvass, this ticket was entirely forgotten.

The regular Republican Convention assembled in Philadelphia on June 5th, and was organized by the appointment of Thomas Settle, of North Carolina, as permanent chairman. The following resolutions were adopted:

The Republican party of the United States, assembled in National Convention in the city of Philadelphia, on the 5th and 6th days of June, 1872, again declares its faith, appeals to its history, and announces its position upon the questions before the country.

1. During eleven years of supremacy, it has accepted with grand courage the solemn duties of the times. It suppressed a gigantic rebellion, emancipated four million slaves, decreed the equal citizenship of all, and established universal suffrage. Exhibiting unparalleled magnanimity, it criminally punished no man for political offences, and warmly welcomed all who proved their loyalty by obeying the laws, and dealing justly with their neighbors. It has steadily decreased with a firm hand the resultant disorders of a great war, and initiated a wise and humane policy toward the Indians.

The Pacific Railroad and similar vast enterprises have been generously aided and successfully conducted, the public lands freely given to actual settlers, immigration protected and encouraged, and a full acknowledgment of the naturalized citizens' rights secured from European powers. A uniform national currency has been provided, repudiation frowned down, the national credit sustained under

most extraordinary burdens, and new bonds negotiated at lower rates. The revenues have been carefully collected and honestly applied. Despite annual large reductions of the rates of taxation, the public debt has been reduced during General Grant's presidency at the rate of one hundred millions a year. Great financial crises have been avoided, and peace and plenty prevail throughout the land. Menacing foreign difficulties have been peacefully and honorably composed, and the honor and power of the nation kept in high respect throughout the world.

This glorious record of the past is the party's best pledge for the future.

We believe the people will not intrust the Government to any party or combination of men composed chiefly of those who resisted every step of this beneficial progress.

2. Complete liberty and exact equality in the enjoyment of all civil, political, and public rights, should be established and effectually maintained throughout the Union by efficient and appropriate State and Federal legislation. Neither the law nor its administration should admit of any discrimination, in respect of citizens, by reason of race, creed, color, or previous condition of servitude.

3. The recent amendments to the national Constitution should be cordially sustained because they are right, not merely tolerated because they are law; and should be carried out according to their spirit by appropriate legislation, the enforcement of which can safely be intrusted only to the party that secured those amendments.

4. The national Government should seek to maintain honorable peace with all nations, protecting its citizens everywhere, and sympathizing with all peoples who strive for greater liberty.

5. Any system of the civil service, under which the subordinate positions of the Government are considered rewards for mere party zeal, is fatally demoralizing, and we therefore favor a reform of the system by laws which shall abolish the evils of patronage, and make honesty, efficiency, and fidelity, the essential qualifications for public position, without practically creating a life-tenure of office.

6. We are opposed to further grants of the public lands to corporations and monopolies, and demand that the national domain be set apart for free homes for the people.

7. The annual revenue, after paying the current debt, should furnish a moderate balance for the reduction of the principal, and the revenue, except so much as may be derived from a tax on tobacco and liquors, be raised by duties upon importation, the duties of which should be so adjusted as to aid in securing remunerative wages to labor, and promote the growth, industries, and prosperity of the whole country.

8. We hold in undying honor the soldiers and sailors whose valor saved the Union. Their pensions are a sacred debt of the nation, and the widows and orphans of those who died for their country are entitled to the care of such additional legislation as will extend the bounty of the Government to all our soldiers and sailors who were honorably discharged, and who in the line of duty became disabled, without regard to the length of service, or the cause of such discharge.

9. The doctrine of Great Britain and other European powers concerning allegiance, "once a subject always a subject," having at last, through the efforts of the Republican party, been abandoned, and the American idea of the individual's right to transfer allegiance having been accepted by European nations, it is the duty of our Government to guard with jealous care the right of adopted citizens against the assumption of unauthorized claims by their former Governments, and we urge continual careful encouragement and protection of voluntary immigration.

10. The franking privilege ought to be abolished, and the way prepared for a speedy reduction in the rate of postage.

11. Among the questions which press for attention is that which concerns the relations of capital and labor, and the Republican party recognize the duty of so shaping legislation as to secure full protection and the amplest freedom for capital, and for labor, the creator of capital, the largest opportunities, and a just share of the mutual profits of these two great servants of civilization.

12. We hold that Congress and the President have only fulfilled an imperative duty in their measures for the suppression of violent and treasonable organizations in certain lately rebellious regions, and for the protection of the ballot-box, and therefore they are entitled to the thanks of the nation.

13. We denounce the repudiation of the public debt in any form or disguise as a national crime; we witness with pride the reduction of the principal of the debt, and of the rates of interest upon the balance, and confidently expect that our excellent national currency will be perfected by a speedy resumption of specie payment.

14. The Republican party is mindful of its obligations to the loyal women of America for their noble donation to the cause of freedom, their admission to the wider fields of usefulness is viewed with satisfaction, and the honest demands of any class of citizens for additional rights should be treated with respectful consideration.

15. We heartily approve the action of Congress in extending amnesty to those lately in rebellion, and rejoice in the growth of peace and fraternal feeling throughout the land.

16. The Republican party propose to respect the rights reserved by the people to themselves, as carefully as the powers delegated by them to the State and to the Federal Government. It disapproves of the resort to unconstitutional laws for the purpose of removing evils, by interference with rights not surrendered by the people to either the State or national Government.

17. It is the duty of the General Government to adopt such measures as will tend to encourage American commerce and ship-building.

18. We believe that the modest patriotism, the earnest purpose, the sound judgment, the practical wisdom, the incorruptible integrity, and the illustrious services of Ulysses S. Grant have commended him to the heart of the American people, and, with him at our head, we start to-day upon a new march to victory.

President Grant was renominated by acclamation as the candidate for the presidency, and Henry Wilson, of Massachusetts, received, as the candidate for the vice-presidency, 364½ votes against 321½ votes for Schuyler Colfax.

President Grant subsequently accepted the nomination in the following letter:

EXECUTIVE MANSION, }
WASHINGTON, D. C., June 10, 1872. }
Honorable THOMAS SETTLE, AND OTHERS, President of
National Republican Convention:

GENTLEMEN: Your letter of this date, advising me of the action of the convention held in Philadelphia, Pa., on the 5th and 6th of this month, and of my unanimous nomination for the presidency by it, is received.

I accept the nomination, and through you return my heart-felt thanks to your constituents for this mark of their confidence and support. If elected in November, and protected by a kind Providence in health and strength to perform the duties of the high trust conferred, I promise the same zeal and devotion to the good of the whole people for the future of my official life as shown in the past. Past experience may guide me in avoiding mistakes inevitable with novices in all professions, and in all occupations.

When relieved from the responsibilities of my present trust, by the election of a successor, whether

it be at the end of this term or next, I hope to leave to him, as Executive, a country at peace within its own borders, at peace with outside nations, with a credit at home and abroad, and without embarrassing questions to threaten its future prosperity.

With the expression of a desire to see a speedy healing of all bitterness of feeling between sections, parties, or races of citizens, and the time when the title of citizen carries with it all the protection and privileges to the humblest that it does to the most exalted, I subscribe myself very respectfully, your obedient servant,
U. S. GRANT.

The regular Democratic Convention, in response to a call of the National Committee, assembled in Baltimore on July 9th. It was organized by the appointment of James R. Doolittle, of Wisconsin, as permanent chairman. The committee on resolutions reported as follows:

We, the Democratic electors of the United States, in convention assembled, do present the following principles, already adopted at Cincinnati, as essential to just government:

1. We recognize the equality of all men before the law, and hold that it is the duty of Government, in its dealings with the people, to mete out equal and exact justice to all, of whatever nativity, race, color, or persuasion, religious or political.

2. We pledge ourselves to maintain the union of these States, emancipation and enfranchisement, and to oppose any reopening of the questions settled by the thirteenth, fourteenth, and fifteenth amendments to the Constitution.

3. We demand the immediate and absolute removal of all disabilities imposed on account of the rebellion, which was finally subdued seven years ago, believing that universal amnesty will result in complete pacification in all sections of the country.

4. Local self-government, with impartial suffrage, will guard the rights of all citizens more securely than any centralized power. The public welfare requires the supremacy of the civil over the military authority, and freedom of person under the protection of the *habeas corpus*. We demand for the individual the largest liberty consistent with public order, for the State self-government, and for the nation a return to the methods of peace and the constitutional limitations of power.

5. The civil service of the Government has become a mere instrument of partisan tyranny and personal ambition, and an object of selfish greed. It is a scandal and reproach upon free institutions, and breeds a demoralization dangerous to the perpetuity of republican government. We therefore regard such thorough reforms of the civil service as one of the most pressing necessities of the hour; that honesty, capacity, and fidelity, constitute the only valid claims to public employment; that the offices of the Government cease to be a matter of arbitrary favoritism and patronage, and that public station become again a post of honor. To this end, it is imperatively required that no President shall be a candidate for reelection.

6. We demand a system of Federal taxation which shall not unnecessarily interfere with the industry of the people, and which shall provide the means necessary to pay the expenses of the Government, economically administered, the pensions, the interest on the public debt, and a moderate reduction annually of the principal thereof; and, recognizing that there are in our midst honest but irreconcilable differences of opinion with regard to the respective systems of protection and free trade, we remit the discussion of the subject to the people in their congressional districts, and to the decision of Congress thereon, wholly free from Executive interference or dictation.

7. The public credit must be sacredly maintained,

and we denounce repudiation in every form and guise.

8. A speedy return to specie payment is demanded alike by the highest considerations of commercial morality and honest government.

9. We remember with gratitude the heroism and sacrifices of the soldiers and sailors of the republic, and no act of ours shall ever detract from their justly-earned fame or the full reward of their patriotism.

10. We are opposed to all further grants of land to railroads or other corporations. The public domain should be held sacred to actual settlers.

11. We hold that it is the duty of the Government, in its intercourse with foreign nations, to cultivate the friendship of peace, by treating with all on fair and equal terms, regarding it alike dishonorable either to demand what is not right or to submit to what is wrong.

12. For the promotion and success of these vital principles, and the support of the candidates nominated by this convention, we invite and cordially welcome the coöperation of all patriotic citizens, without regard to previous affiliations.

The resolutions were adopted by the following vote:

States.	Yeas.	Nays.	States.	Yeas.	Nays.
Alabama.....	20	..	Carried up.....	332	38
Arkansas.....	13	..	Nebraska.....	6	..

The vote on the nomination of a candidate for the presidency was as follows: Whole number of votes cast, 732. Horace Greeley received 686; James A. Bayard, of Delaware, 15; Jeremiah S. Black, of Pennsylvania, 21; William S. Groesbeck, of Ohio, 2; blank, 8. The vote on the nomination of a candidate for the vice-presidency was as follows: Whole number of votes, 732. For B. Gratz Brown, 713; For John W. Stevenson, of Kentucky, 6; blank votes, 13. A committee was appointed by the convention to wait upon Mr. Greeley at a subsequent day, and inform him of his nomination. On June 12th, the committee met him at the Fifth Avenue Hotel, in New York, and Mr. Greeley made the following reply to the address of the committee:

Mr. Chairman and Gentlemen of the Committee of the Convention: I should require time and consideration to reply fully to the very important and, I need not say, gratifying communication that you have presented to me. It may be that I should present in writing some reply to this. However, as I addressed the Liberal Convention of Cincinnati in a letter somewhat widely considered, it is, perhaps, unnecessary that I should make any formal reply to the communication made, other than to say I accept your nomination, and accept gratefully with it the spirit in which it has been presented. My position is one which many would consider a proud one, which, at the same time, is embarrassing, because it

subjects me to temporary—I trust only temporary—misconstruction on the part of some old and life-long friends. I feel assured that time only is necessary to vindicate, not only the disinterestedness, but the patriotism, of the course which I determined to pursue—which I had determined long before I had received so much sympathy and support as has, so unexpectedly to me, been bestowed upon me. I feel certain that time, and, in the good providence of God, an opportunity, will be afforded me to show that, while you, in making this nomination, are not less Democratic, but rather more Democratic, than you would have been in taking an opposite course, I am no less thoroughly and earnestly Republican than ever I was. But these matters require grave consideration before I should make any thing that seems a formal response. I am not much accustomed to receiving nominations for the presidency, and cannot make responses so fluently as some others might do. I can only say that I hope some, or all, if you can make it convenient, will come to my humble farmer home, not far distant in the country, where I shall be glad to meet all of you, and where we can converse more freely and deliberately than we can here, and where I shall be glad to make you welcome—well, to the best the farm affords. I hope that many of you—all of you—will be able to accept this invitation, and I now simply thank you and say farewell. Take the 8:15 train.

Mr. Greeley subsequently, on July 18th, addressed the following letter to the committee:

NEW YORK, July 18, 1872.

GENTLEMEN: Upon mature deliberation, it seems fit that I should give to your letter of the 10th inst. some further and fuller response than the hasty, unpremeditated words in which I acknowledged and accepted your nomination at our meeting on the 12th.

That your convention saw fit to accord its highest honor to one who had been prominently and pointedly opposed to your party in the earnest and sometimes angry controversies of the last forty years is essentially noteworthy. That many of you originally preferred that the Liberal Republicans should present another candidate for President, and would more readily have united with us in the support of Adams or Trumbull, Davis or Brown, is well known. I owe my adoption at Baltimore wholly to the fact that I had already been nominated at Cincinnati, and that a concentration of forces upon any new ticket had been proved impracticable. Gratified as I am at your concurrence in the Cincinnati nominations, certain as I am that you would not have thus concurred had you not deemed me upright and capable, I find nothing in the circumstance calculated to inflame vanity or nourish self-conceit.

But, that your convention saw fit, in adopting the Cincinnati ticket, to reaffirm the Cincinnati platform, is to me a source of the profoundest satisfaction. That body was constrained to take this important step by no party necessity, real or supposed. It might have accepted the candidates of the Liberal Republicans upon grounds entirely its own, or it might have presented them (as the first Whig National Convention did Harrison and Tyler) without adopting any platform whatever. That it chose to plant itself deliberately, by a vote nearly unanimous, upon the fullest and clearest enunciation of principles which are at once incontestably Republican and emphatically Democratic, gives trustworthy assurance that a new and more auspicious era is dawning upon our long-distracted country.

Some of the best years and best efforts of my life were devoted to a struggle against chattel slavery—a struggle none the less earnest or arduous because respect for constitutional obligations constrained me to act for the most part on the defensive—in resistance to the diffusion rather than in direct efforts for the extinction of human bondage. Throughout most of those years my vision was uncheered, my

exertions were rarely animated by even so much as a hope that I should live to see my country peopled by freemen alone. The affirmation by your convention of the Cincinnati platform is a most conclusive proof that not merely is slavery abolished, but that its spirit is extinct—that, despite the protests of a respectable but isolated few, there remains among us no party and no formidable interest which regret the overthrow or desire the reestablishment of human bondage, whether in letter or in spirit. I am thereby justified in my hope and trust that the first century of American Independence will not close before the grand elemental truths on which its rightfulness was based by Jefferson and the Continental Congress of 1776 will no longer be regarded as “glittering generalities,” but will have become the universally accepted and honored foundations of our political fabric.

I demand the prompt application of those principles to our existing condition. Having done what I could for the complete emancipation of blacks, I now insist on the full enfranchisement of all my white countrymen. Let none say that the ban has just been removed from all but a few hundred elderly gentlemen, to whom eligibility to office can be of little consequence. My view contemplates not the hundreds proscribed, but the millions who are denied the right to be ruled and represented by the men of their unfettered choice. Proscription were absurd if these did not wish to elect the very men whom they are forbidden to choose.

I have a profound regard for the people of that New England wherein I was born, in whose common schools I was taught. I rank no other people above them in intelligence, capacity, and moral worth. But, while they do many things well, and some admirably, there is one thing which I am sure they cannot wisely or safely undertake, and that is the selection, for States remote from and unlike their own, of the persons by whom those States shall be represented in Congress. If they could do this to good purpose, then republican institutions were unfit, and aristocracy the only true political system.

Yet what have we recently witnessed? Zebulon B. Vance, the unquestionable choice of a large majority of the present Legislature of North Carolina—a majority backed by a majority of the people who voted at its election—refused the seat in the Federal Senate, to which he was fairly chosen, and the Legislature thus constrained to choose another in his stead or leave the State unrepresented for years. The votes of New England thus deprived North Carolina of the Senator of her choice, and compelled her to send another in his stead—another who, in our late contest, was, like Vance, a rebel, and a fighting rebel, but who had not served in Congress before the war as Vance had, though the latter remained faithful to the Union till after the close of his term. I protest against the disfranchisement of a State—presumptively, of a number of States—on grounds so narrow and technical as this. The fact that the same Senate which refused Vance his seat proceeded to remove his disabilities after that seat had been filled by another, only serves to place in stronger light the indignity to North Carolina, and the arbitrary, capricious tyranny which dictated it.

I thank you, gentlemen, that my name is to be conspicuously associated with yours in a determined effort to render amnesty complete and universal in spirit as well as in letter. Even defeat in such a cause would leave no sting, while triumph would rank with those victories which no blood reddens and which evoke no tears but those of gratitude and joy.

Gentlemen, your platform, which is also mine, assures me that democracy is not henceforth to stand for one thing and republicanism for another, but that those terms are to mean in politics, as they always have meant in the dictionary, substantially one and the same thing—namely, equal rights, regardless of creed, or, clime, or color. I hail this as a genuine new departure from out-worn feuds and meaningless

contentions, in the direction of progress and reform. Whether I shall be found worthy to bear the standard of the great liberal movement which the American people have inaugurated is to be determined not by words but by deeds. With me if I steadily advance, over me if I falter, its grand array moves on to achieve for our country her glorious beneficent destiny.

I remain, gentlemen, yours,

HORACE GREELEY.

To the Hon. JAMES R. DOOLITTLE, Chairman of the Convention, and Messrs. F. W. SYKES, JOHN C. MACCABE, and others, committee.

During the canvass an excursion was made by Mr. Greeley into New Hampshire and Maine, in the month of August, and another, in September, across Pennsylvania and Ohio, to Indianapolis and Louisville. On both occasions a few remarks were made by him at each stoppage of the railroad-train. With two or three exceptions, these remarks were of no political importance.

Some Democrats, who were opposed to the nomination, by the regular convention, of any other person than a well-known Democrat, convened at the Maryland Institute, in Baltimore, on the 9th, and maintained a form of organization until after the nomination of Mr. Greeley. They then resolved to issue an address to the party, and to call a convention to meet at Louisville, Ky., on September 8d, to nominate so-called straight-out Democrats for President and Vice-President. On that day a convention of a respectable number assembled, and was called to order by Colonel Blanton Duncan, of Kentucky. James Lyons, of Virginia, was appointed permanent chairman. The following platform was adopted:

Whereas, A frequent recurrence to first principles, and eternal vigilance against abuses, are the wisest provisions for liberty, which is the source of progress, and fidelity to our constitutional system is the only protection for either: therefore—

Resolved, That the original basis of our whole political structure is consent in every part thereof. The people of each State voluntarily created their State, and the States voluntarily formed the Union; and each State provided by its written constitution for every thing a State should do for the protection of life, liberty, and property, within it; and each State, jointly with the others, provided a Federal Union for foreign and inter-State relations.

Resolved, That all governmental powers, whether State or Federal, are trust powers coming from the people of each State, and that they are limited to the written letter of the Constitution and the laws passed in the pursuance of it, which powers must be exercised in the utmost good faith, the Constitution itself stating in what manner they may be altered and amended.

Resolved, That the interests of labor and capital should not be permitted to conflict, but should be harmonized by judicious legislation. While such a conflict continues, labor, which is the parent of wealth, is entitled to paramount consideration.

Resolved, That we proclaim to the world that principle is to be preferred to power; that the Democratic party is held together by the cohesion of time-honored principles, which they will never surrender in exchange for all the offices which Presidents can confer. The pangs of the minorities are doubtless excruciating, but we welcome an eternal minority under the banner inscribed with our principles, rather than an almighty and everlasting majority purchased by their abandonment.

Resolved, That, having been betrayed at Baltimore

into a false creed and a false leadership by the convention, we repudiate both, and appeal to the people to approve our platform and to rally to the polls and support the true platform and the candidates who embody it.

Mr. Charles O'Connor, of New York, was nominated for the presidency, and Mr. John Quincy Adams, of Massachusetts, for the vice-presidency. Mr. O'Connor persistently refused to be a candidate, and Mr. Adams consented only on the condition that Mr. O'Connor should withdraw his declination. This was not done. A small number of votes was given to the ticket throughout the country.

A colored Liberal Republican Convention assembled at Louisville, Ky., on September 25th. Every State and Territory was represented. W. N. Saunders, of Maryland, was appointed permanent chairman, and the following resolutions were adopted:

Whereas, In the political history of our country, by common consent of all, equal human rights have ceased to be a question at issue between the contending political parties, and all citizens are assured of equal rights, equal privileges, and equal protection; and whereas the nomination at Cincinnati of the most devoted Republican ever nominated, and the adoption of the most comprehensive and liberal platform ever adopted by the most exemplary Republicans ever assembled together in this country, is a fitting climax to the self-sacrificing labors of the best men in the land for more than a quarter of a century, and augurs a brighter and more peaceful future to our common country; and whereas it becomes the sacred duty of all citizens, of whatever race, origin, or condition, to contribute toward that grand consummation which is the end and aim of the progressive Liberal Republican Democratic party, under the leadership of the Hon. Horace Greeley and the Hon. B. Gratz Brown, tending inevitably toward the unity of the republic, with equal rights to all and reconciliation: therefore—

Resolved, by the colored Liberal Republicans of the United States, in National Convention assembled at Louisville, Ky.:

1. That, as citizens of the republic, we hail with joy the prospect of the burial of all caste, class, and sectional prejudices, and forgetfulness, and forgiveness, and oblivion of the past.

2. That our thanks and gratitude are alike due to the Cincinnati and Baltimore Conventions; to the first for adoption of a platform which opens the channel to the grand future in which all men will be known hereafter as American citizens and by no other designation; and to the latter for magnanimously and patriotically accepting the result of our late internal convulsion, and for making the grandest stride in the interest of civilization and good government yet made by a political party actuated by motives high above any selfish aggrandizement or mere political advantage.

3. We join our political fortunes with those of the party having for its standard-bearer that great and good man who has devoted his busy life to attending to the sufferings of humanity, and who, while a special friend of the American slave, has not forgotten the requirements and wants of others, who, in the providence of God, have need of helpful hands; of those who, as instruments of the Divine Power, are permitted to be with us in that struggle upward which makes a civilized and God-fearing people, in the full faith and sanguine hope that all men's rights will thus be assured, and that we as a people will have more cause to rejoice that we can forget and forgive the past than any other class of American citizens.

4. We deprecate the bitterness of the conduct of the canvass by the Grant people, and counsel our people everywhere, no matter what their political preferences, to use moderation, kindness, and Christian charity toward those who differ from them, and give more attention to their material interest and tangible advantages of education than to transitory and bootless political frenzy, which at best has no result but to a few not of their race or blood.

5. We deplore the tendency of the present Administration toward despotic centralization, and demand that some defining line be ineradicably fixed where the power of the General Government shall cease and the functions of the local governments begin; and that there shall be equality of the States in the Union as well as equality of men; that a Government like ours, administered by a single will, controlling the policy and vast patronage of the States, when the temptation of self-perpetuation remains, cannot continue a republic except in name, and must, in the eternal fitness of things, culminate in an empire or oligarchy of office-holders.

6. That civil service reform must begin at the source of all power of abuse—official patronage—and that a firm system of reform is impossible in the absence of the one-term principle for President.

7. We tender our gratitude to the pioneers of the greatest Christian accomplishment on human affairs now on the threshold of final fruition, and give our assurance of unwavering fidelity and unbounded admiration to and for those grand men who have led the way under the inspired and superhuman monition of Sumner, Greeley, Trumbull, Banks, Tappan, Julian, Farnsworth, Clay, Austin, Blair, and other bright spirits, pure men and peerless and incomparable statesmen, to whom we pledge our best efforts in this grand labor of reform and redemption.

8. That we denounce as un-republican and un-American the villany of rulers who have foisted themselves upon some of the Southern States, and who, by the most unblushing cupidity, have reduced the people of those States, of both races, to a condition of poverty which half a century of prosperity cannot redeem them from, and call upon the colored people of those States to rise in their might and rid their States of these vampires, whose combined rapacity will doom the whole people to perpetual poverty and misery.

9. That we speak only for the colored Liberal Republican voters of the country and those within whose hearts a sentiment of a common gratitude is not dead, when we pledge our efforts to secure the salvation of all the American people and the best good of the whole country by the election of Horace Greeley and B. Gratz Brown in November next.

10. That the first National Liberal Convention of colored men, assembled in Weissiger Hall, in Louisville, September 26, 1872, do unanimously nominate Horace Greeley, of New York, and B. Gratz Brown, of Missouri, for President and Vice-President of the United States of America, and accept the Cincinnati platform as the tenets of our political faith.

A convention of soldiers and sailors of the late civil war assembled in Pittsburg on September 17th. General J. R. Hawley, of Connecticut, was appointed permanent chairman, and resolutions were adopted reaffirming those of the Philadelphia Convention by which President Grant was renominated.

A convention of the colored citizens of New England, in favor of Grant and Wilson, was held in Boston on September 6th, at which Charles L. Redmond was appointed chairman. The proceedings of the Philadelphia Convention were endorsed.

The National Women's Suffrage Association

also held a convention in New York on May 9th, at which Mrs. H. B. Stanton presided. The following resolutions were adopted:

Whereas, Horace Greeley, as editor-in-chief of the *New York Tribune*, has for the last four years lost no opportunity to ridicule and falsify the spirit and purpose, the principles and persons of the woman suffrage movement of this country, thereby making that influential journal a powerful engine against the emancipation of the women of the nation: therefore—

Resolved, That no woman with decent self-respect can aid with voice or pen in his election to the high position to which he is nominated.

Resolved, That since the right to vote is a right of every citizen of the United States, it is the duty of all patriotic women citizens to exercise this right in the coming presidential election, and the duty of all patriotic men to remove the obstructions now blocking the way.

Resolved, That as Cincinnati has refused, in the face of the fourteenth and fifteenth amendments,

to recognize women as citizens, with the capacity to be legal representatives in a political convention, it is the duty of the women suffragists throughout the country to send their representatives to Philadelphia and Baltimore to demand of each in turn justice for women, and thus test the loyalty of Republicans and Democrats alike to the great principles of freedom on which our Government is based.

Resolved, That we, the women suffragists of the country, will work and vote with the great national party that shall acknowledge the political equality of woman.

Resolved, That in case neither Philadelphia nor Baltimore shall recognize the full citizenship of women, the National Woman Suffrage Committee shall call a National Nominating Convention at such time and place as they shall see fit.

The election for President and Vice-President of the United States took place on November 5th, with the following result, as compared with the two previous elections:

STATE.	1864.				1868.				1872.

Lincoln's majority over McClellan, 407,842; Grant's over Seymour, 305,458; Grant's over Greeley, 762,991; O'Connor's vote, 21,559.

One or two other conventions were held during the year relative to subjects of more or less national interest. An Agricultural Convention, composed of delegates from agricultural colleges and societies, etc., assembled in Washington on February 15th, upon the call of the Commissioner of Agriculture—to take such action regarding its interests as they should deem expedient.

A convention to urge the religious amendment of the Constitution of the United States was held in Cincinnati, on January 31st. This movement, as an organized and public effort, began in 1863. In that year the amendment was first broached, at the Convention for Prayer and Christian Conference, held at Xenia, Ohio, in a paper laid before the meeting by Mr. John Alexander. This paper being referred to a committee composed of representatives of the various denominations in the convention, was by them reported upon fa-

vorably, and their report was adopted by the convention. An assembly held at Pittsburg, Pa., on the 4th of July of that year, at which delegates were present from various denominations, was the next step. The first national convention was held in Alleghany, Pa., on January 27, 1864, and a National Association organized by that body. This Association has held eight conventions, of which five have been held in Philadelphia, one in Pittsburg, one in New York, and one, this the eighth, in Cincinnati. The call for this convention in Cincinnati was as follows:

THE RELIGIOUS AMENDMENT OF THE CONSTITUTION OF THE UNITED STATES—CALL FOR A NATIONAL CONVENTION.

Government is instituted for man as an intellectual, social, and moral and religious being. It corresponds to his whole nature. It is intended to protect and advance the higher as well as the lower interests of humanity. It acts for its legitimate purposes when it watches over domestic life, and asserts and enforces the sanctity of the marriage-bond; when it watches over intellect and education, and furnishes means for developing all the faculties of the mind; when it frowns on profaneness, lewdness, the desecration of the Sabbath, and other crimes which injure society, chiefly by weakening moral and religious sentiment, and degrading the character of a people.

Acting for such purposes, government should be established on moral principles. Moral principles of conduct are determined by moral relations. The relations of a nation to God and His moral laws are clear and definite:

1. A nation is the creature of God.
2. It is clothed with authority derived from God.
3. It owes allegiance to Jesus Christ, the appointed ruler of nations.
4. It is subject to the authority of the Bible, the special revelation of moral law.

In constituting and administering its government, then, a nation is under obligation to acknowledge God as the author of its existence and the source of its authority, Jesus Christ as its ruler, and the Bible as the fountain of its laws, and the supreme ruler of its conduct.

Up to the time of the adoption of the national Constitution, acknowledgments of this kind were made by all the States. They are yet made by many of the States. And, in the actual administration of the national Government, the principle is admitted. But the fundamental law of the nation, the Constitution of the United States, on which our Government rests, and according to which it is administered, fails to make, fully and explicitly, any such acknowledgment. This failure has fostered among us mischievous ideas, like the following: The nation, as such, has no relations to God; its authority has no higher source than the will of the people; government is instituted only for the lower wants of man; the State goes beyond its sphere when it educates religiously or legislates against profanity or Sabbath desecration.

The National Association, which has been formed for the purpose of securing such an amendment to the Constitution as will remedy this great defect, and indicate that this is a Christian nation, and place all Christian laws, institutions, and usages, in our Government, on an undeniable legal basis in the fundamental law of the nation, invites all American citizens, who favor such an amendment, without distinction of party or creed, to meet in Thoms's Hall, Cincinnati, on Wednesday, January 31, 1872, at two o'clock p. m.

All such citizens, to whose notice this call may be brought, are requested to hold meetings, and appoint

delegates to the convention. A reduction of fare has been secured on most of the railroads leading to Cincinnati.

WILLIAM STRONG, U. S. Supreme Court,
President of National Association.

Attached to the call were the names of nine vice-presidents and one hundred prominent persons. The following resolutions were adopted:

Resolved, That the State, as a power claiming and exercising supreme jurisdiction over millions of human beings, as the sovereign arbiter of life and death, and as an educating power, has necessarily a moral character and accountability of its own.

Resolved, That it is the right and duty of the United States, settled by Christians, a nation with Christian laws and usages, and with Christianity as its greatest social force, to acknowledge itself, in its written Constitution, to be a Christian nation.

Resolved, That, as the disregard of sound theory always leads to mischievous practical results, so, in this case, the failure of our nation to acknowledge, in its organic law, its relation to God and His moral laws, as a Christian nation, has fostered the theory that government has nothing to do with religion but to let it alone, and that, consequently, laws in favor of the Sabbath, Christian marriage, and the use of the Bible in the schools, are unconstitutional.

Resolved, That we recognize the necessity of complete harmony between our written Constitution and the actual facts of our national life; and we maintain that the true way to effect this undoubted harmony is not to expel the Bible and all ideas of God and religion from our schools, abrogate laws enforcing Christian morality, and abolish all devout observances in connection with the Government, but to insert an explicit acknowledgment of God and the Bible in our fundamental law.

Resolved, That the proposed religious amendment, so far from tending to a union of Church and State, is directly opposed to such union, inasmuch as it recognizes the nation's own relations to God, and insists that the nation should acknowledge those relations itself, and not through the medium of any Church establishment.

An act of Congress, approved May 22, 1872, removed all political disabilities, imposed by the third section of the fourteenth article of amendments to the Constitution, from all persons whomsoever, except Senators and Representatives of the Thirty-sixth and Thirty-seventh Congresses, and officers of the judicial, military, and naval service of the United States, heads of departments, and foreign ministers of the United States.

The number relieved by this act was estimated at not less than one hundred and fifty thousand persons of capacity and experience. The exceptions, however, embrace a considerable number of men formerly conspicuous in Southern political life, and probably amount to between three and five hundred. The passage of the act disposed of a great number of cases pending before the United States Supreme Court, where information had been made against persons holding office contrary to the provisions of the Constitution. All such cases were dismissed.

For the financial condition of the United States, see the article FINANCES. For the foreign relations of the country, see the President's Message in PUBLIC DOCUMENTS, and the title DIPLOMATIC CORRESPONDENCE. For the military and naval affairs of the country, see

ARMY and NAVY respectively; and for the general condition of internal affairs, *see* CONGRESS and the several States.

The results of the ninth census appear in 3 vols. 4to: I. Population; II. Vital Statistics; III. Industry and Wealth. Besides the various tables of population, vol. i. contains the statistics bearing most directly on the moral, social, and intellectual condition of the people, the statistics of churches, libraries, schools, newspa-

pers, illiteracy, pauperism, and crime; vol. ii. embraces the tables of mortality, births, marriages, the blind, deaf and dumb, insane and idiotic, and of sex and ages; vol. iii. gives the statistics of wealth, taxation, and public debt, of agriculture, manufactures, mining, and fisheries, together with the tables of occupations.

The following table exhibits the statistics of libraries in the United States, giving the classes and kinds in each class:

	Number.	Volumes.
United States, Congressional.....	1	190,000

Three parishes are reported in Dakota; four churches in Mississippi; one parish in Texas; one Sunday-school and one church in Virginia, but no other statistics are given from those States.

The total number of associations in the United States and British Provinces is 76; of parishes, 969; of Universalist families, 43,771; of Sunday-schools, 602; of members of Sunday-schools, 55,813; of meeting-houses, 762; value of church property, \$7,551,170.

The following educational institutions are controlled by Universalists: Tufts College and Divinity School, College Hill, Mass.; Lombard University, Galesburg, Ill.; St. Lawrence University and Theological School, Canton, N. Y.; Smithsonian College, Logansport, Ind.; Buchtel College, Akron, Ohio; Liberal Institute, Clinton, N. Y.; Westbrook Seminary, Deering, Me.; Green Mountain Perkins Academy, South Woodstock, Vt.; Goddard Seminary, Barre, Vt.; Liberal Institute, Jefferson, Wis.; Dean Academy, Franklin, Mass.; Mitchell Seminary, Mitchellville, Iowa. These institutions have in all 87 professors and teachers, and 1,093 students. Their total assets are valued, in round numbers, at \$2,290,000.

The Universalist General Convention of the United States met at Cincinnati, Ohio, September 17th. Moses Humphrey, of New Hampshire, was elected president. The attention of the convention was chiefly given to the financial interests of the denomination, and the best means of promoting them, particularly with reference to the Murray Centenary Fund, the special fund of \$40,000, and the missionary boxes. The treasurer of the Murray Centenary Fund reported its amount, at the time of the meeting of the convention, to be \$118,264.43.

During the year seventeen theological scholarships had been granted. The total amount of money so far expended on theological scholarships, was \$78,060. Thirty-eight scholarships were in force, requiring an annual appropriation of \$6,840.

The convention decided in favor of the one-lesson system in Sunday-schools, and approved the association of the sexes in the denominational schools and colleges.

An anniversary of the Woman's Centenary Association was held in connection with the meeting of the convention. This association was organized during the centennial year 1876 to help in raising the Murray Centennial Fund. It had contributed to that object the sum of \$36,000, and has now continued to carry out other denominational objects to which the efforts of women might be worthily devoted. Among them are the dissemination of denominational literature, the assistance of students for the ministry, the planting of Sunday-schools, the aid of superannuated preachers, and the employment of female home missionaries.

UPFOLD, Rt. Rev. GEORGE, M. D., D. D., LL. D., Protestant Episcopal Bishop of the Diocese of Indiana, born at Shemley Green, near Guilford, Surrey, England, May 7, 1796; died at Indianapolis, Ind., August 26, 1872. He emigrated with his family to the United States in 1802, and made his home in Albany, N. Y. He was fitted for college at Lansingburg Academy, entered Union College at the age of fourteen, and graduated thence in July, 1814. He had already commenced the study of medicine, and continued it in Albany and in

New York City, under the late Dr. Valentine Mott, attending the lectures of the College of Physicians and Surgeons till 1816, when he graduated M. D., and commenced practice in Albany. Dissatisfied with the medical profession, and having his mind directed to the ministry, he resolved to relinquish the practice of medicine and enter upon the study of theology, in September, 1817. He was admitted to deacon's orders in October, 1818, by Bishop Hobart, and ordained priest by that prelate in 1820. He was minister at Lansingburg for two years; was Rector of St. Luke's, New York City, from 1820 to 1823, and officiated as assistant minister of Trinity Church, New York, from 1821 to 1825. From 1828 to 1831 he was Rector of St. Thomas's Church, New York, and of Trinity Church, Pittsburg, Pa., from October, 1832, to January, 1850. He was elected Bishop of Indiana in June, 1849, and consecrated to that office in December of the same year. He entered upon the duties of the Episcopate with great zeal and energy, and continued unweariedly in the discharge of them, though suffering from ill health, till 1865, when he was laid aside from active labors by the painful and protracted disease of which he died. He was eminent as a scholar, clear and eloquent as a preacher, genial and courteous, but dignified in his manners, and sincerely desirous of accomplishing the highest measure of usefulness. He received the honorary degree of D. D. from Columbia College in 1831, and that of LL. D. from the Western University of Pennsylvania in 1856. Though an admirable writer, Bishop Upfold published but little. His charges to his diocese, his occasional sermons, addresses, and pastoral letters, are somewhat numerous; but, aside from them, he had only published: "The Last Hundred Years;" a lecture with notes, etc., delivered before the Literary Societies of the Western University of Pennsylvania in 1845, and a "Manual of Devotions for Domestic and Private Use," 12mo, 1863.

UPHAM, Rev. THOMAS COGSWELL, D. D., LL. D., an American clergyman, metaphysician, professor, and author, born in Deerfield, N. H., January 30, 1799; died in New York City, April 2, 1872. He graduated with high honors from Dartmouth College in 1818, and immediately entered Andover Theological Seminary, whence he graduated in 1821 with such a reputation for scholarship that he was immediately retained as assistant Professor of Sacred Literature and Instructor in Hebrew. Two years later he was settled as colleague pastor of the Congregational Church at Rochester, N. H. His sermons were much admired, but his timidity, with the excitement and exhaustion which followed his public efforts, led him to relinquish the pastoral office. In September, 1824, he was appointed Professor of Mental and Moral Philosophy, and Lecturer on Biblical Criticism, in Bowdoin College, Brunswick, Me., and filled the position with great accept-

ance till July, 1867, when he resigned, but was immediately appointed Professor Emeritus. Soon after commencing his labors as professor at Bowdoin, Prof. Upham perceived the necessity of more satisfactory text-books in mental science, and commenced their preparation. The result of his studies, continued through a number of years, was the publication in 1831 of his "Elements of Mental Philosophy, embracing the two departments of the Intellect and the Sensibilities," 2 vols.; and, in 1834, he added a third volume, with the title of "A Philosophical and Practical Treatise on the Will." These works have passed through many editions, and have been almost universally approved, especially after a subsequent revision by the author, both in Europe and America, as presenting in elementary form the most satisfactory statement of the settled principles of mental philosophy. They have been translated into Armenian by Rev. Cyrus Hamlin, D. D., and are used as text-books in all the Protestant Armenian schools and colleges in Turkey. An abridgment for high-schools was published in 1848. In 1840 he added a further contribution to mental science in his little essay, "Outlines of Imperfect and Disordered Mental Action." Partly by natural temperament, and partly by the nature of his philosophical studies, Prof. Upham began about 1845 or 1846 to adopt the views of the Quietistic School in religion. His inclination in this direction was promoted by the careful study of the writings of Tauler, Gerson, Catharine Adorna, Fénelon, Madame de la Mothe Guyon, and other mystics of the fourteenth, fifteenth, and sixteenth centuries. In 1847 appeared his "Life and Religious Opinions and Experience of Madame de la Mothe Guyon, together with some Account of the Personal History and Religious Opinions of Fénelon, Archbishop of Cambrai;" in 1848 his "Principles of the Interior or Hidden Life;" this was followed by the "Life of Faith," 1848; "A Treatise on Divine Union," 1851; "Religious Maxims, having a Connection with the Doctrines and Practice of Holiness," 1853; "Life of Madame Catharine Adorna," 1856; "A Method of Prayer: an Analysis of the Work so entitled, by Madame de la Mothe Guyon," 1859. He was also a frequent contributor to a magazine entitled *Guide to Holiness*, published in New York. The object of these works, as formulated by Prof. Upham himself, was "to show that man, on acknowledged and obvious principles of philosophy and religion, can gradually but surely rise above the propensities and sins of a perverted selfhood, and not only be brought into harmony with himself in his own interior and subjective nature, but into relations of perfect peace and union with God himself, and with all that is right and good in the universe." Prof. Upham visited Europe, the Holy Land, and Egypt, in 1852. Aside from the works already named, he had published a "Transla-

tion of Jahn's Biblical Archæology" while he was an assistant professor at Andover in 1823. This has passed through numerous editions; "Ratio Disciplina; or, the Constitution of the Congregational Churches," 1829; "A Manual of Peace," 1836; "American College Life; a Series of Descriptive Poems," 1850; "Letters Æsthetic, Social, and Moral, written from Europe, Egypt, and Palestine," 1855; "Prize Essay on a Congress of Nations," 1840. Most of Prof. Upham's works have been republished abroad. He was greatly esteemed for his genial and courteous manners, and his genuine benevolence and kindness of heart.

URUGUAY, or BANDA ORIENTAL (REPÚBLICA DE LA BANDA ORIENTAL DEL URUGUAY), an independent state of South America, lying between latitude 30° and 34° 50' south, and longitude 52° 40' and 58° west. It is bounded on the north by Brazil; on the east and south by the Atlantic Ocean; and on the west by the Argentine Republic, from which it is separated by the river of its own name. It has an area of about 66,720 square miles, and its population is estimated at 350,000, of whom, perhaps, 102,000 are of foreign birth, as follows: Spaniards, 37,900; Italians, 32,100; French, 17,700; and other nationalities, 15,400. There are no longer any Indians in the republic.

Immigration to Uruguay has been gradually increasing since 1866, in which year the number arrived at Montevideo was 9,327; while in 1870 there were 20,435. It should, however, be observed that the major portion of those disembarking at Montevideo hastened to leave that city, either for the interior, or for the Argentine Republic.

President of the republic, Dr. Theo. Gomen-soro (March 1, 1872); Minister of Foreign Affairs, Dr. C. Velasco; Minister of the Interior, Dr. C. Regunaga; Minister of War, Brigadier-General G. Suarez.

The standing army is composed of from 3,000 to 4,000 men; and the National Guard, of 20,000 men.

VAILLANT, JEAN BAPTISTE PHILIBERT, marshal of France, senator, and cabinet minister, born at Dijon, December 6, 1790; died in Paris, June 4, 1872. At seventeen years of age, he was admitted to the Polytechnic School, and, having distinguished himself in engineering studies, he was sent to the engineering school at Metz. He graduated as second-lieutenant, in October, 1809, and, entering the army, soon distinguished himself in the later campaigns of the empire. During the Russian campaign, he attained the rank of captain, and so remarkable was his conduct for energy and self-possession that he was named in one of the general orders of the army, and, in August, 1813, received the

According to official returns, the value of the imports for 1870 was \$13,135,591,* and in 1871, \$14,864,247; that of the exports for the year first mentioned was \$6,356,423; and for 1871, \$18,334,224. To these figures should be added, perhaps, one-third for smuggled goods. The chief articles of export are hides, horns, tallow, hair, salt or jerked beef, etc.

The number of vessels entered at the port of Montevideo in 1871 was 1,502, with an aggregate of 739,607 tons.

Of the public revenue, which is mainly derived from customs duties, the larger portion is applied upon the amortization of and payment of the interest on the national debt.

The expenditures and receipts for 1870 and 1871 were as follows respectively:

	1870.	1871.
Expenditures	\$5,733,063	\$6,398,961
Receipts	5,105,522	5,085,800
Deficit	\$630,540	\$1,213,161

According to the last report of the Minister of Finance, the deficit, up to June 30, 1872, was estimated at \$5,570,711, on account of the increased outlay caused by the civil war.

The total customs receipts for 1870, throughout the whole republic, were \$4,538,854; and for the year 1871, \$5,312,318.

According to the official table, published by the *Junta de Crédito*, January 1, 1871, the public debt amounted to \$19,976,550; which, added to the new debts contracted in 1871, makes a total of \$28,945,927; so that, the amortization of 1871 amounting to \$818,685, the debt on January 1, 1872, was \$28,127,242.

Uruguay has but two short lines of railway, both opened in 1866: that from Montevideo to Pedras, about 11 miles; and that from Montevideo to Maldonado, 50 miles.

The civil war, which had so long existed between the "Blancos" and the "Colorados," was finally terminated by a treaty of peace, bearing date April 6, 1872.

V

cross of the Legion of Honor. Soon after, being surrounded by the enemy, after a most unequal conflict, he was taken prisoner, and was not exchanged until the peace. On his return to the army, early in 1815, he again attracted attention by his skilful works for the defence of the capital, and his courageous conduct at Ligny and Waterloo. After the restoration, he devoted himself, as a staff-officer, to the study and practice of the art of fortification. He was promoted to a captaincy of the first class in 1816, and, soon after, translated from the English an "Essay on the Principles and Construction of Military Bridges." He became

* The Uruguay dollar is equivalent to \$1.05.

major in 1826, lieutenant-colonel in 1830, after a brilliant campaign in Algeria, where he mined and exploded a fort, and had a leg broken; colonel in 1833, after the siege of Anvers, and honored with the cross of an officer of the Order of Leopold. In 1834 he was sent to Algeria in command of the corps of engineers, and covered the country with blockhouses and fortified ramparts. In 1838 he returned to France as brigadier-general of engineers; in 1839 was made superintendent of the Polytechnic School, and, in 1840, assigned to the direction of the fortifications on the right bank of the Seine, in Paris. In 1845 he was promoted to the lieutenant-generalship, and presided over the chief committee on fortifications. In 1849 he was made second in command in the army sent to Italy. For his services there he was made a marshal of France, by Louis Napoleon, in 1851, just after the *coup d'état*, and received, among other favors from the new régime, the appointment of grand-marshal of the palace. As marshal of France, he was a senator by right, as well as by imperial favor. When St. Arnaud was placed at the head of the Army of the East, Marshal Vaillant was made Minister of War, and displayed considerable zeal and scientific knowledge of military movements. He retained this portfolio until 1859, when, in the Italian campaign, he exchanged it with Marshal Randon for the command of the Army of the Alps. After the campaign, he commanded the corps of occupation at Milan till May, 1860. On his return, he was made Minister of the Emperor's Household and of Fine Arts, and member of the Privy Council. He ranked so high as a man of science as to be elected, in 1853, a free member of the Academy of Sciences. He reorganized the School of Fine Arts, procured a decree of liberty from censorship for the theatres, and the power to distribute duplicates of objects of art and museum collections for the benefit of departmental establishments of arts. He was a member, and several times president, of the Bureau of Longitudes. His only original published work, not on military matters, was a "Report upon the Situation of Algeria" (1855). His administration of the military affairs of France is cited as the most perfect of his time, and his writings on military matters are regarded as standard works. He had been decorated with almost all the orders existing in France.

VERMONT. The political campaign in this State began with the assembling of the Republican State Convention, which was convened at Bellows Falls, May 1st, for the choice of delegates to the National Republican Convention. The following resolutions were adopted:

Resolved, That we cordially approve and indorse the present national Administration, and commend it as distinguished among the best of our history, for ability, integrity, economy, and fidelity to principle.

Resolved, That the first preference of the State is for the renomination of Grant and Colfax, and we wish

our delegates to regard that preference so far as, upon consultation with the delegates from other States, they shall find that preference consistent with the harmony of the Republican organization, the welfare of the common cause, and the successful and permanent establishment of Republican principles. To these considerations all others should yield.

Resolved, That we deeply regret the defection of Republicans from the regular organization. We believe the objects of reform professed to be sought by the Liberal-Republican movement are mainly such as can be secured only in the Republican party, while the only practical result of the movement will be to strengthen the Democracy.

Resolved, That we deprecate the restoration of the Democratic party to power, as endangering the equal laws which, against the opposition of that party, have recently been engrafted upon our system, as preventing any further progress in the same direction, and as likely to lead to the preferment and allowance of unjust and excessive Southern war claims against the Government, which would heavily increase taxation and seriously impair the national credit.

Resolved, That we pledge ourselves anew, in this our first State Convention for two years, to the great leading aims of the Republican party, namely: the most complete liberty and the most exact equality of rights, under the law, for all men throughout the republic; the promotion of education, intelligence, and thrift of every class, and especially of the laboring-class, of our population; the most strict observance of the public faith, both toward our creditors, by the payment of the national debt, and toward our soldiers and sailors by a prompt and generous provision for them, their widows, and orphans; the preservation of peace, so far as consistent with national honor and security; the cultivation of relations of confidence and good-will with all, from the old nations of the East to the savage tribes of the West; faithfulness and economy in the administration of the laws, and promptitude and thoroughness in the correction and reform of all abuses in any department of the public service.

On the 12th of June, the Democratic State Convention assembled in Montpelier, and was attended by 188 delegates. The following resolutions were adopted:

Resolved, That the Democracy of Vermont, assembled in convention, to select delegates to the National Convention at Baltimore, recognizing the recent changes in the nature and constitution of the Government, are ready to cooperate with all those who favor limited and localized governments, and who seek to restrain the exercise by Congress of absolute powers, to prevent private legislation, to restrain the growth of vast corporations, and to work a permanent civil-service reform.

Resolved, That the platform of principles adopted by the recent Cincinnati Convention indicates progress of public opinion toward sound views of government; that all patriotic citizens may and should unite upon that platform, so well calculated to restore an honest Administration and enforce the obligations of the Constitution, and our delegates are instructed to secure, if possible, the triumph of those principles, and to support any candidates representing them, who shall meet the approval of the Democracy in National Convention assembled.

The Republican State Convention for the nomination of candidates for State offices, and two presidential electors at large, assembled in Montpelier, on the 26th of June. After a close contest, Julius Converse, of Woodstock, was nominated for Governor; Russell S. Tait, of Burlington, for Lieutenant-Governor; and John A. Page, of Montpelier, for State Treas-

urer. The electors at large chosen were Harmon Canfield, of Arlington, and Elisha P. Jewett, of Montpelier. The following resolutions were adopted:

Resolved, That the mission of the Republican party is not ended, that its continued existence is alike demanded by love of country, love of humanity, and the safety of the noblest form of government upon the earth.

Resolved, That the enemies of constitutional liberty, in their efforts to restore to power the Bourbon elements of despotism and oppression so signally routed and overthrown under the efforts of our brave soldiers, led on by generals unsurpassed in bravery and gallantry in the world, only show their desire to reinstate a policy at war with the true interests of the nation, and subversive of the rights of man.

Resolved, That we heartily indorse the platform adopted by the National Republican Convention at its late session in Philadelphia, and we believe that the principles there announced, and to be carried out by a Republican Administration, will advance the moral and material interests of our whole country, during the next four years, more than those interests have been advanced during any four years of its history.

Resolved, That with enthusiasm we indorse the nominees of the Philadelphia Convention, viz., Ulysses S. Grant and Henry Wilson. We believe in their honesty, firmness, and success. We rely upon the qualities that gave us Vicksburg, that drove Lee into Richmond, that drove Lee out of Richmond, and that shone in magnanimity at Appomattox Court-House. We believe, too, in the consistent friend of the freedman, and the laboring-man everywhere, Henry Wilson, whose head and heart have remained undisturbed by long continuance in office. With these tried leaders in the front, we guarantee to the Republican party of the country that Vermont still continues the "Star that never sets," and that in November next we will show such a vote for the Republican nominees as will silence the guns of the opposition for four years to come.

Resolved, That we believe in a State policy that shall educate every child within its borders, train the able-bodied for the defence of the State in time of need, suppress crime, and punish every breach of law, restrain vice, pay the State debt with the least possible burden to the people, encourage mining and manufactures, while we do not neglect the interests of agriculture, and so manage the entire interests of the Commonwealth as to keep our young men within the borders of Vermont.

Resolved, That the illegal traffic in intoxicating drinks is a prolific source of temptation, poverty, taxation, and crime, causing needless and heavy burdens to fall on many innocent citizens. It is therefore the duty of the State, in accordance with its highest interests and its present settled policy, to protect the people from the evil and the results that follow such illegal sale.

Resolved, That we fully and heartily indorse the nominees of this convention, and we pledge ourselves and those we represent to renewed labor in the cause of Republican principles, that their election may not only be assured, but that it may be a foretaste of the utter defeat, in November next, of Greeley principles and Cincinnati platforms, and Democracy, present, past, or future, whether represented by men or platforms.

This convention was followed by the conventions of the Democratic and the Liberal Republican parties, both of which were held in Burlington on the 1st of August. The former was a delegate and the latter a mass convention. The Democratic Convention was composed of about three hundred delegates,

including many of the leading Democrats of the State. Prior to the assembling of the convention, the Liberal Republicans had issued an address denouncing the Administration of General Grant, and indorsing the nomination of Greeley and Brown by the Cincinnati Convention, and the platform there adopted. The Democrats and the Liberal Republicans having respectively assembled in convention, a union was effected between the two parties, who united upon the following ticket: For Governor, A. B. Gardiner, of Bennington; Lieutenant-Governor, W. H. H. Bingham, of Stowe; Treasurer, Henry Chase, of Lyndon; Presidential electors, W. T. Horrobin, of Bennington; Jasper Rand, of St. Albans; Thomas E. Powers, of Woodstock; Samuel Bishop, of Bolton; Jedediah P. Ladd, of Alburg. Of the eight persons constituting this ticket, three were Republicans and five Democrats.

The election for State officers was held on the 3d of September, and resulted in the success of the Republican ticket. The total vote for Governor was 58,559, of which Julius Converse received 41,946, and Mr. Gardiner 16,613; majority for Mr. Converse, 25,338. At the election in November, 52,408 votes were cast for President, of which 41,481 were for Grant, 10,927 for Greeley, and 553 for Charles O'Connor.

The State Legislature was composed as follows:

LEGISLATURE.	Senate.	House.	Joint Ballot.
Republicans.....	30	217	247
Democrats and Liberals..	..	23	22
Republican majority...	30	195	225

The present State government of Vermont is composed wholly of Republicans, as follows: Governor, Julius Converse; Lieutenant-Governor, Russell S. Taft; Secretary of State, George Nichols; Treasurer, John A. Page; Auditor, Whitman G. Ferrin; Railroad Commissioner, Myron C. Bailey; Speaker of the House of Representatives, Franklin Fairbanks; Judges of the Supreme Court, J. Pierrepont, J. Barret, A. Peck, H. H. Wheeler, H. E. Boyce, T. P. Redfield, and J. Ross.

The Legislature, which meets biennially, convened on the 2d of October, and after a session of fifty-seven days, the longest session by one day that has ever been held in the State, adjourned on the 27th of November. Many public and private acts were passed, but the legislation was not of sufficient general interest to require extended notice.

According to the report of the State Treasurer, the total amount of the funded debt outstanding August 1, 1872, after deducting the loan of \$135,500 due June 1, 1890, which is held by the State, was \$380,000. This amount matures as follows: December 1, 1874, \$109,000; December 1, 1876, \$186,500; December 1, 1878, \$84,000. Balance in the Treasury

September 1, consisting of bonds, sinking fund, and cash, \$988,532.80.

The financial policy of the State government, is indicated in the following language of the Governor in his message to the Legislature in October: "However desirable it may be to discharge our entire debt, and however compatible with the economical habits of the people to be and remain free from public debt, it seems to be very doubtful economy to burden ourselves with onerous taxes, for the sake of purchasing our bonds at a large premium, which have only a few years longer to run. It seems to me specially improper, in view of the fact that many towns in the State are still indebted to considerable amounts, and therefore liable to heavy taxation, for debts contracted in furnishing men and other means for suppressing the late rebellion, and for repairing damages by floods, fires, etc."

The charitable and reformatory institutions of the State are reported to be in a flourishing condition. The insane of the State are cared for in the asylum at Brattleboro, which is owned and governed by a corporation. The State, however, appoints a commissioner of the insane. In this institution there are three classes of inmates: 1. Those supported entirely by the State; 2. Those supported in part by the State; 3. Those who do not receive State aid. Of the first class there are about 88, whose support amounts to \$18,539.06. Of the second class there are about 250, who receive about sixty-five cents apiece, making the \$5,000 appropriated for this purpose. In the third class there are about 200 supported by friends or charities.

The committee appointed pursuant to an act of November 22, 1870, to investigate the question of changing the site of the State-prison, has reported "that neither the welfare of the prisoners nor the interest of the State demands the removal of the prison from Windsor at the present time." The committee further found that "the ruinous contract for the labor of the convicts, that has existed for a number of years, expired in 1871, and a new contract was entered into whereby the State receives seventy cents per day, instead of forty-two cents, as before, and from present estimates the prison will be self-sustaining and the State be relieved from the yearly appropriation for its support. Your committee were assured by the superintendent that the present occupation of the prisoners, shoemaking, is more healthy than the making of scythes, and the change has thus far had a beneficial effect upon the convicts."

The affairs of the Vermont Central and Vermont & Canada Railroads have recently been topics of wide discussion. Not only has the general policy of the companies in extending their lines been criticised, but grave charges of mismanagement have been openly made. The original line of the Vermont Central Railroad was about 118 miles long, but it

has been extended by leases and other arrangements until the whole mileage owned, operated, and leased, amounts to 1,044 miles, including the small steamboats on Lake Champlain, and the line of steamers plying between New York and New London. The extent of these lines is indicated in the following statement:

Mileage of the Vermont Central Railroad Confederation.

MAIN LINE.		Miles.
Vermont Central—Windsor to Burlington, Vt.....		118
LEASED LINES.		
Northern New Hampshire—Concord to Lebanon.....		63

Owing to the prevalence of these charges, a meeting of "the security-holders of the Vermont & Canada and Vermont Central Railways" was held in Boston, October 2, 1872, when an official statement of the managers was submitted. From the treasurer's report accompanying this statement, it appears that on June 1, 1872, the total floating debt was \$2,878,164.42, and the available assets were \$1,849,249.57, leaving the actual floating debt \$1,528,914.85. The debt consists in large part of the deficiencies in the earnings of the Ogdensburg and Rutland roads to meet the expenses of the rentals. The result of the business of the roads for the two years ending June 1, 1872, and the financial condition at that time, will appear more fully from the treasurer's report:

The gross earnings of the Vermont Central and Vermont & Canada, including the Stanstead, Shefford & Chambly Railroad		\$4,265,234 17
The expenses.....		2,004,890 84
The net.....		\$1,960,498 33
The gross earnings of the Rutland road and branches from the time of lease to June 1, 1872—17 months.....		\$1,969,589 64
The expenses.....		1,353,636 48
The net.....		535,953 16
The gross earnings of the Ogdensburg & Lake Champlain Railroad from time of lease to June 1, 1872—37 months.....		\$2,232,461 64
The expenses.....		1,506,281 75
The net.....		664,185 89
Total net.....		\$2,560,633 38

Brought forward—Total net..... \$2,590,633 88
 The gross earnings being..... \$8,497,441 45
 The gross expenses being..... 5,906,809 07

The net being..... \$2,590,633 88

The proportion of expense to earnings being 69½ per cent.

The interest paid on bonds during the last two years, according to the Treasurer's Report, amounts to..... \$860,463 67
 Rents of leased roads and the interest on the Vermont & Canada stock..... 2,097,145 00

Total..... \$2,957,613 67
 Net earnings during same period..... 2,590,633 88

Deficit..... \$366,981 80
 Increase of rolling-stock and improvement of main and leased roads..... 1,295,665 55

Excess of expenditures over net earnings... \$1,662,646 84

The bonded debt, June 1, 1872, was as follows:

Equipment bonds, 8 per cent..... \$3,000,000
 First mortgage bonds, 7 per cent..... 3,000,000
 Vermont Central guaranteed bonds, 8 per cent. 795,500
 Stanstead, Shefford & Chambly bonds, 7 per cent..... 443,800

Second-mortgage bonds \$6,289,300

Total..... \$7,739,300

The assets to meet this debt were stated by the treasurer to amount to \$11,255,164.

To provide for disposing of the present floating debt, authority has been granted to the trustees and managers to issue their notes for \$2,500,000, payable in thirty years with 8 per cent. interest, and constituting them a special lien upon the trust property and income of the road. Of this sum \$700,000 is to be deposited with the New England Trust Company, for the purpose of retiring the first equipment loan for that amount, which matures in 1875. The balance—\$1,800,000—is to be disposed of for the purpose of retiring the floating debt of the trust.

According to the census of 1870, of the total population (258,751), ten years old and over, there were engaged in all classes of occupations 108,763 persons, of whom 95,263 were males and 13,500 females. There were engaged in agriculture, 57,983, including 57,889 males and 94 females; in professional and personal services, 21,032, including 9,680 males and 11,352 females; in trade and transportation, 7,132, including 7,101 males and 31 females; in manufactures, and mechanical and mining industries, 22,616, including 20,598 males and 2,023 females.

The State contained 3,078,257 acres of improved land, 1,886,984 of woodland, and 68,613 of other unimproved land. The cash value of farms was \$189,367,075; of farming implements and machinery, \$5,250,279; total amount of wages paid during the year, including value of board, \$4,155,385; total (estimated) value of all farm productions, including betterments and additions to stock, \$34,647,027; orchard-products, \$682,241; produce of market-gardens, \$42,225; forest-products, \$1,-

233,929; value of home manufactures, \$181,268; of animals slaughtered or sold for slaughter, \$4,820,619; of all live-stock, \$23,883,835. There were 65,015 horses, 252 mules and asses, 180,285 milch-cows, 27,809 working-oxen, 112,741 other cattle, 580,347 sheep, and 46,845 swine. The chief productions were: 438,155 bushels of spring, and 16,548 of winter, wheat, 73,346 of rye, 1,699,882 of Indian-corn, 8,602,430 of oats, 116,333 of barley, 415,097 of buckwheat, 72,671 pounds of tobacco, 3,102,137 of wool, 95,242 bushels of peas and beans, 5,157,428 of Irish potatoes, 1,038 gallons of wine, 17,844,396 pounds of butter, 4,830,700 of cheese, 8,835,840 gallons of milk sold, 1,020,669 tons of hay, 785 bushels of clover-seed, 4,018 of grass-seed, 527,927 pounds of hops, 12,899 of flax, 444 bushels of flax-seed, 8,894,302 pounds of maple-sugar, 12,023 gallons of maple-molasses, 142,932 pounds of honey, and 5,235 of wax.

The total number of manufacturing establishments was 3,270, using 186 steam-engines, of 6,425 horse-power, and 1,984 water-wheels, of 44,897 horse-power, and employing 18,686 hands, of whom 16,801 were males above sixteen, 1,872 females above fifteen, and 513 youth. The total amount of capital invested was \$20,329,637; wages paid during the year \$6,264,581; value of materials consumed, \$17,007,769; products, \$82,184,606.

The whole number of newspapers and periodicals was 47, having an aggregate circulation of 71,390, and issuing annually 4,055,300 copies. There were 3 daily, with a circulation of 3,190; 43 weekly, circulation 56,200; 1 monthly, circulation 12,000.

There were 1,792 libraries, having 727,263 volumes. Of these, 1,056, with 405,536 volumes, were private, and 736, with 321,727 volumes, were other than private, including 33 circulating libraries, with 20,676 volumes.

The total number of religious organizations was 699, having 744 edifices, with 270,614 sittings, and property valued at \$3,713,530. The leading denominations were:

DENOMINATIONS.	Organizat'ns.	Sittings.

VINTON, Rev. FRANCIS, D. D., LL. D., an American clergyman of the Protestant Episcopal Church, a professor and author, born in Providence, R. I., August 29, 1809; died in Brooklyn, N. Y., September 29, 1872. He received his academic training in his native city, entered Williams College at an early age, but, before graduating, was appointed a cadet at West Point, whence he graduated, fourth in his class, in July, 1830, as brevet lieutenant of artillery, and was immediately promoted to be second-lieutenant of the Third Artillery; was two years in garrison at Fort Independence, Mass., nearly a year on topographical duty, six months on engineering duty, three years in garrison at Fort Constitution, N. H., during which he studied law, and was admitted to the bar at Portsmouth; a brief period in the Creek nation and on recruiting duty, and resigned August 31, 1836. Very soon after his resignation, he followed the example of his elder brother, and, abandoning the law, entered the General Theological Seminary in New York, and received deacon's orders from Bishop Griswold in 1838. Two years afterward, he became Rector of St. Stephen's, in his native city of Providence. From this charge he passed successively to that of Trinity Church, in Newport, R. I., and to that of Emanuel Church, in Brooklyn, L. I. In 1847 he became rector of Grace Church, in Brooklyn. In this position he remained for eight years, declining, meanwhile, episcopal honors, which were offered to him in 1848, with the bishopric of Indiana. At the election for Provisional Bishop of New York, in 1851, he was within one vote of being chosen. In 1855 he was invited to become an assistant-minister at Trinity Church, in New York, and accepted the invitation, and subsequently filled this responsible post. In 1869 he was elected Ludlow Professor of Ecclesiastical Polity and Canon Law in the Episcopal General Theological Seminary. He was an extensive writer on general subjects, in magazines and reviews, his educational training making him a man of varied and extensive knowledge, with a style clear and forcible. His book on the canon law is regarded as an authority in the Church of which he was a minister. His other publications were: "Arthur Tremaine; or, Annals of Cadet Life," 1830; an oration on "The Annals of Rhode Island and Providence Plantations," 1868; "Lectures on the Evidences of Christianity," 1865, and many single sermons, pamphlets, lectures, and essays, 1840 to 1872.

VIRGINIA. The joint resolution of the Virginia Legislature, passed in December, 1871, to "discontinue the issue of bonds required to be issued by the act for funding the public debt," and vetoed by Governor Walker on the 28th of that month, was passed over the veto, in January, by more than a two-thirds vote of both Houses. A joint committee was then appointed "to take into considera-

tion all questions of finance connected with the funding bill, and the payment of the public debt." A majority of this committee proposed a plan which provided for the funding of two-thirds of the debt with new bonds, payable in thirty-four years, at three per cent. interest for the first twelve years, six per cent. for the next ten years, and seven per cent. for the remaining twelve years. Another plan was submitted by a minority of the committee, and several more were offered in the way of substitutes. The discussion of these various plans took up a large share of the session. None of them were adopted, and the only action taken was a repeal of the clause of the original funding act, making the coupons of the bonds receivable for taxes, and the passage of an act for the payment of interest due in 1872. The latter was as follows:

Be it enacted by the General Assembly, That it shall be the duty of the Auditor of Public Accounts to pay into the public Treasury, subject to the warrant of the Second Auditor, so much of the public revenue as the Second Auditor may certify to be necessary to pay the interest on the public debt as herein provided.

2. On the 1st day of January, or as soon thereafter as may be, and on the 1st day of July, 1872, there shall be paid two per cent. interest upon the principal of the public debt, bearing an interest of six per cent. per annum, as evidenced by bonds issued under the provision of the act approved March 30, 1871, and, upon that part of the debt bearing an interest of five per cent., there shall be paid, at the same times, one and two-thirds per cent.; and, upon two-thirds of the debt, the securities representing which have not been changed since the 30th day of March, 1871, there shall be paid a like interest.

3. It shall be the duty of the Second Auditor, upon the presentation of any coupon for the payment of interest under this act, to stamp upon such coupon the amount of interest paid thereon, and return the same to the holder thereof.

4. The receipt of interest, under the provisions of this act, shall be held and deemed to be an acquiescence upon the part of the creditor in the provision of an act "declaring what shall be receivable in payment of public dues."

5. This act shall be in force from its passage.

With regard to the effect of the repeal, the Attorney-General gave the following opinion in reply to inquiries:

COMMONWEALTH OF VIRGINIA,
ATTY-GEN'L'S OFFICE, RICHMOND, March 9, 1872. }
Hons. JOSEPH MAYO, Jr., and ASA ROGERS:

GENTLEMEN: I have the honor to answer your note of this day, by saying that the act passed by the General Assembly, on the 7th day of March, 1872, entitled "An act declaring what shall be received in payment of taxes or other demands of the State," was intended by the General Assembly to repeal so much of the second section of the act approved March 30, 1871, entitled "An act to provide for the funding and payment of the public debt," as made "the coupons receivable, after maturity, for all taxes, debts, dues, and other demands, due the State."

It is my opinion that the funding of the public debt will be continued until the whole debt is funded, or the law authorizing it is repealed, and that the exchange of registered bonds for coupon bonds may be made as heretofore, with the exception only that all coupons hereafter issued *will not* bear the promise that they are receivable in payment of all taxes, debts, dues, and demands, due to the State.

JAMES C. TAYLOR.

The funding process was suspended until new coupons had been printed, which occupied about two months.

The Legislature adjourned, after having been in session about one hundred and twenty days, without passing any tax law, and the Governor immediately summoned an extra session, for the purpose of having such a measure enacted. The bill, which was passed after several days of discussion, retained the old tax of fifty cents on every hundred dollars of the assessed value of all property, real and personal, and provided for the assessment of fifty cents on every hundred dollars of the market value of all bonds issued by the State, and by all railroad and canal companies, the tax to be reserved out of the interest due or becoming due on the bonds. A specific tax was also laid on express, transportation, telegraph, and other companies, as well as a tax on their gross receipts, and a tax of five per cent. on the gross amount of sales of spirituous and malt liquors. A bill providing for the reassessment of lands, which had been passed before the adjournment of the regular session, it was generally thought, would so far reduce the taxable value that the amount raised, under the new act, would hardly exceed that collected under the old law.

On the 26th of August, a council of foreign holders of the State bonds was held in London, at which a protest was drawn up, and forwarded to the Auditor, against the action which had been taken, suspending the funding process, and altering the coupons. "They felt assured," they say, "that, after her past misfortunes, the first sentiment of Virginia would be to make the best possible provision for the discharge of her engagements, and it was in this spirit that the funding bill was received and accepted. All such reliance was, however, weakened by the subsequent tampering with the funding bill, and the insufficient provision made for payment of the coupons; that, while these infractions of credit inflict serious damage on the bondholders, they are convinced that they no less affect the best interests of the State and its citizens.

"At this time, invitations are offered to Englishmen, in our daily papers, to emigrate to Virginia, and settle in a country having the same population, language, laws, and institutions. These propositions were well regarded, but they are likely to remain abortive, as well as others for the development of the landed and natural resources of the country, until justice is done.

"The protesters likewise object to the alteration in the coupons under the new funding, as involving a breach of faith on the part of the Commonwealth of Virginia.

"The protesters further object to the heavy amount of the State tax, as being a tax far beyond the ordinary burdens of State taxation, and as being, consequently, what it is intended to be—a form of repudiation, and a spoliation of the bondholders.

"The bondholders also object to being kept out of dividend on the plea of an assignment of one-third to West Virginia, for the assumption of which no terms have been made with West Virginia. That the protesters feel it their duty to urge that the natural resources of a country are dependent for their real value on the intelligence and moral capacity of its citizens; that material resources may be wasted by the calamities of war; but, that the good name of the State and citizens is an abiding inheritance which may remain in all times."

Meantime, the constitutionality of the act changing the coupons had been brought in question, and suits were commenced in the Supreme Court to test its validity. A final decision was rendered in December. The questions involved were—1. Was there, under the act aforesaid, of March 30, 1871, between the State and such of her creditors as should accept and comply with the terms of the act, a valid contract that the interest coupons issued thereunder should "be receivable, at and after maturity, for all taxes, debts, dues, and demands, due the State?" 2. If so, was the obligation of this contract impaired by the act aforesaid of March 7, 1872, which substantially declares that the collecting officers of the State shall not receive the coupons aforesaid in discharge of any "taxes or other demands of the State, now due, or that shall hereafter become due?"

Both these questions were considered at length by the court, and decided in the affirmative. In rendering the decision, Judge Bouldin said, in conclusion:

We are of opinion, therefore, that the act aforesaid of March 7, 1872, is repugnant to the constitution of this State and of the United States, inasmuch as it impairs the obligation of a contract, and is, on that account and to that extent, void; and, being further of opinion, both on principle and authority, that the writ of *mandamus* is the proper remedy in the case (the duty of the sheriff being purely ministerial), a peremptory writ of *mandamus* must be awarded in the case of *Antoni vs. Wright*, and the judgment of the Circuit Court of the city of Richmond in the case of *Wright vs. Smith* must be affirmed.

The court is sensible of the grave, responsible, and painful duty that will be cast on the Legislature by this decision, but we feel assured that it will be faithfully and wisely met. We think, with the whole court in the homestead cases, that temporary relief from pecuniary pressure would be too dearly bought at the price of the broken faith of Virginia. She has just emerged from a terrible trial, an ordeal of fire, without a stain upon her escutcheon—impoverished, crushed, and dismembered, but not dishonored. She is now taking a new departure, and we would hope to see it in the right direction. In the language of a vigorous writer, "Now is the sad time of faith and honor. The least fracture now will be like a name engraved with the point of a pin on the tender rind of a young beech: the wound will enlarge with the tree, and posterity will read it, a full-grown character." This court is unwilling to inflict that wound.

Judges Anderson and Christian gave their assent to the decision as delivered by Judge Bouldin. Judge Moncure, being a holder of State bonds, did not sit as a member of the

court, but stated his concurrence in the opinion of the majority. Judge Staples dissented, and gave an elaborate opinion upon the questions involved, concluding as follows:

I do not believe the Supreme Court of the United States will ever hold that one Legislature can, by any form of enactment, bind succeeding Legislatures and the public revenue in the manner attempted in the provisions of the funding act; and, until they so decide, I am not willing that this court should sanction a precedent which may prove most disastrous to all the vital interests of the State, and under authority of which, practically, liens and mortgages may be given upon the future revenues of the State, by statutes assuming the form of contracts. We have heard a good deal of violated faith, and of the obligation and duty of paying the public debt. These are questions for the consideration of the Legislature, and not of the courts. They who purchased the bonds of the State were well aware of this when they made their investments. They who deliberately, and in defiance of a positive enactment of the Legislature, that these coupons will not be redeemed in payment of public dues, persist in purchasing them, are not entitled to the least favor or consideration, and should receive none from the court. Upon this question of public faith, I will say this, that for four years Virginia bore upon her bosom the burden of a civil conflict as great as any recorded in history. She came out of the struggle presenting a lamentable spectacle of a prostrate and bleeding State, without a currency, without any organized system of labor, one-half of her territory almost a waste, and vast numbers of her citizens reduced to hopeless insolvency and ruin. For years after the rage of battle had ceased, she was kept in subjection to military power, under the rule of aliens and strangers, unacquainted with her laws, her traditions, and her sufferings; and yet her statutes exhibit the gratifying spectacle of an honest endeavor on the part of her representatives, while still under the shadow of these great disasters, to make some provision for the payment of her creditors. I believe it will still be done, and payment be made, from time to time, until the last farthing is paid. But, regarding the whole subject as involving the exercise of legislative functions of sovereign powers, I am content to leave it where it properly belongs under our constitution and form of government. Virginia's representatives will not fail to preserve untarnished Virginia's honor.

When the Legislature of 1872-'73 met on the 4th of December, this subject of the financial condition of the State was still the most important with which it had to deal. Early in January the following resolution was adopted by the Senate:

Resolved, That, in view of the late decision of the Court of Appeals, the Governor of this Commonwealth be requested to give to the General Assembly his views, at the earliest moment, as to the best mode of raising money to pay the interest on the public debt and defray the expenses of the State, and the increase of taxation necessary.

In response to this request, the Governor submitted his views at length, in a special message, on the 18th of January. They were expressed in these three propositions: 1. The reduction of the principal or sum total of the public debt to the lowest possible amount, by applying our non-productive assets to its liquidation. 2. The reduction of the current expenses of the State government to the lowest degree consistent with its proper and efficient

administration. 3. The assessment of all the property in this Commonwealth, in accordance with the mandates of the constitution.

Under the first proposition, he recommended the sale of various stocks and bonds owned by the State, amounting to \$6,819,200, and the application of the proceeds to the payment of the debt. This would reduce the principal to \$88,898,912.23, one-third of which is to be assumed by West Virginia. The interest on the other two-thirds, or \$25,982,608.14, would be \$1,555,956.48. He then made various suggestions for the reduction of the expenses of the government, and recommended "an entire change in our system for the levy and collection of taxes." He made a calculation of the necessary expenses of the government, which he set down at \$600,000. This, added to the annual interest on the debt, would give \$2,160,000 as the amount to be raised yearly by taxation, aside from that required for the maintenance of public schools, which, he thought, should be raised by a capitation-tax of two dollars, and by local taxation. On the subject of reform in assessment, he urged simply conformity with the requirements of the constitution, that "taxation shall be equal and uniform, and all property, both real and personal, should be taxed in proportion to its value;" that "no one species of property from which a tax may be collected, shall be taxed higher than any other species of property of equal value;" that "no land shall be assessed above or below its value;" and proceeds to show how these requirements have been systematically disregarded. He declared the re-assessment act of the last session to be "wrong in principle, and unjust and demoralizing in practice," and that "the true system to be adopted, and the only one which will ever solve the difficulty without trenching upon constitutional principles, is that which shall provide for the revision of equalization of assessments among the several townships of counties and the wards of cities, and then the revision of equalization of the assessments among the several counties and corporations of the State."

According to the official statements for the fiscal year, ending September 30, 1872, the public debt at that date amounted to \$45,718,112.23. Deducting one-third for settlement with West Virginia, \$30,478,741.49 remains to be provided for by this State. This is exclusive of \$1,543,669.65 in bonds and stock held by the literary fund. There was a balance in the Treasury at the beginning of the fiscal year, amounting to \$1,084,486.07, and \$3,232,974.70 was received during the year, making an aggregate of \$4,317,460.77. The disbursements of the year amounted to \$3,218,961.74, leaving a balance October 1, 1872, of \$1,098,499.03.

Aside from this matter of public finances, there is little of importance to chronicle in the history of the State for 1872. The Legislature,

which adjourned in April, had been elected on the issue of retrenchment and reform, but its action seems to have given little satisfaction. It passed no general measures of importance, and failed either to reduce public expenses, or to improve the credit of the State. There was no election for State officers, but both parties held conventions to appoint delegates to the national nominating bodies, and to nominate presidential electors. The Republicans declared for the reelection of General Grant, and the Democrats joined the coalition of their party with the "Liberal Republicans," for the support of Horace Greeley. At the election in November, there were 184,879 votes cast, including 42 for O'Connor. The electors pledged to vote for Grant and Wilson for President and Vice-President received 93,415, and those favoring Greeley and Brown received 91,440, making the majority of the former 1,975. The vote of Buchanan County, being cast directly for President and Vice-President, and not for electors, was thrown out. It gave Greeley 214, and Grant 53. Members of Congress were chosen at the same time, and those elected in the 1st, 2d, 3d, and 4th districts, were Republicans, and those in the 5th, 6th, 7th, 8th, and 9th districts, were Democrats. The Legislature now stands, 33 "Conservatives" and 10 Republicans in the Senate, and 99 "Conservatives" and 38 Republicans in the House. There are three negroes in the Senate, and 16 in the House. An amendment to the constitution, proposed by the last Legislature, was ratified by a vote of 40,166 to 20,326. It strikes from the last clause of the 10th article the inhibition on the subject of usury, and remits to the Legislature the power of regulating interest on money.

The public-school system of Virginia is increasing rapidly in efficiency. The number of common schools is now over 3,600, and the number of pupils in attendance above 166,000. The State University is in a flourishing condition, and the Military Institute is rapidly recovering its prestige. The Agricultural and Mechanical College has been organized and put in operation during the year. The land scrip granted by Congress in aid of this institution has been sold at the rate of 90 cents per acre, and \$285,000 has already been obtained from that source. Of this, \$19,000 has been reserved for the purchase of a farm, and the remainder invested in State bonds. The Hampton Normal and Agricultural Institute is doing good service in educating colored youth of both sexes, and preparing them for the vocation of teachers. There are three Asylums for the Insane, and an Institution for the Deaf, Dumb, and Blind, all of which appear to be well managed and efficient. The management of the penitentiary is represented as improving, but the expenses of the institution exceeded its earnings during the year by \$66,950.78. There were, on the 1st of October, 828 convicts within its walls, of whom 357 were hired

out to labor on contract at forty cents each, per day. There is no separate institution for juvenile offenders.

Considerable progress has been made during the year in completing the system of public improvements. The Alexandria & Fredericksburg Railroad has been finished, connecting Richmond and Washington by an "all-rail" line. The Orange, Alexandria & Manassas Railroad Company has been consolidated with the Lynchburg & Danville, and will complete the latter line at once. The Richmond & Danville Railroad Company has leased the North Carolina road, and will complete the communication from Richmond to Atlanta, by 250 miles of new road from Charlotte, N. C., to Atlanta, Ga. The Chesapeake & Ohio Railroad is substantially finished, establishing communication direct from Richmond to Huntington on the Ohio River. The James River & Kanawha Canal, which was intended to unite the waters of the James and the Ohio, has never been completed farther than Buchanan, a distance of 198 miles. The State has expended vast sums on this work, without any adequate return. To enlarge it to the dimensions necessary to make it useful as a channel for commerce, and to complete it to the proposed western terminus, would cost about \$40,000,000. The canal company, with the sanction of the Legislature, has tendered this work to the General Government, on condition that it assumes the responsibility of completing it, but this it is not likely to do.

A decision was rendered in the Supreme Court of Appeals, on the 13th of June, in three cases involving the validity of that provision of the State constitution, and the act of the General Assembly passed in pursuance thereof, which exempt from execution, or other legal process, a homestead to each householder or head of a family, to the value of two thousand dollars. The opinion of the court was delivered by Judge Christian, and concluded as follows: "*The inviolability of contracts*, public and private, is the foundation of all social progress, and the corner-stone of all the forms of civilized society wherever an enlightened jurisprudence prevails. In our system of government it has wisely been placed under the Constitution of the United States, and there it rests secure against all invasion. It only remains for me to say that, after a careful consideration of the important question before us, and deeply impressed with the responsibilities which grow out of it, I am of opinion that the provision of the State constitution, and the act of the General Assembly, passed in pursuance thereof, known as the 'Homestead Exemption Laws,' so far as they apply to contracts entered into, or debts contracted before their adoption, are in violation of the Constitution of the United States, and therefore void."

According to the census of 1870, of the total population (890,056) ten years old and over, there were engaged in all classes of occupa-

tions, 412,665 persons, of whom 337,464 were males and 75,201 females. There were engaged in agriculture, 244,550, including 228,082 males and 16,468 females; in professional and personal services, 98,521, including 47,407 males and 51,114 females; in trade and transportation, 20,181, including 19,992 males and 189 females; in manufactures and mechanical and mining industries, 49,413, including 43,983 males and 5,430 females.

The State contained 8,165,040 acres of improved land, 8,294,734 of woodland, and 1,686,187 of other unimproved land. The cash value of farms was \$218,020,845; of farming implements and machinery, \$4,924,036; total amount of wages paid during the year, including value of board, \$9,753,041; total (estimated) value of all farm-productions, including betterments and additions to stock, \$51,774,801; orchard-products, \$891,281; produce of market-gardens, \$505,117; forest-products, \$686,862; value of home manufactures, \$556,807; of animals slaughtered or sold for slaughter, \$8,875,975; of all live-stock, \$28,187,669.

There were 152,899 horses, 26,903 mules and asses, 188,471 milch-cows, 45,987 working-oxen, 277,285 other cattle, 370,145 sheep, and 674,670 swine. The chief productions were 7,889 bushels of spring, and 7,391,898 of winter, wheat, 582,264 of rye, 17,694,804 of Indian-corn, 6,857,555 of oats, 7,259 of barley, 45,075 of buckwheat, 37,086,864 pounds of tobacco, 183 bales of cotton, 877,110 pounds of wool, 162,102 bushels of peas and beans, 1,293,853 bushels of Irish, and 865,882 of sweet, potatoes, 26,288 gallons of wine, 6,979,269 pounds of butter, 71,743 of cheese, 266,812 gallons of milk sold, 199,883 tons of hay, 11,367 bushels of clover-seed, 12,709 of grass-seed, 10,999 pounds of hops, 180,750 of flax, 9,699 bushels of flax-seed, 245,098 pounds of maple sugar, 329,155 gallons of sorghum, and 11,400 of maple, molasses, 505,239 pounds of honey, and 26,438 of wax.

The total number of manufacturing establishments was 5,933, using 396 steam-engines,

of 8,410 horse-power, and 2,229 water-wheels, of 41,202 horse-power, and employing 26,974 hands, of whom 22,175 were males above sixteen, 2,259 females above fifteen, and 2,540 youth. The total amount of capital invested was \$18,455,400; wages paid during the year, \$5,343,099; value of materials consumed, \$23,832,384; of products, \$38,364,822.

The whole number of newspapers and periodicals was 114, having an aggregate circulation of 143,840, and issuing annually 13,319,578 copies. There were 16 daily, with a circulation of 24,099; seven tri-weekly, circulation 4,800; eight semi-weekly, circulation 7,048; 69 weekly, circulation 75,488; four semi-monthly, circulation 4,520; and 10 monthly, circulation 27,900.

There were 4,171 libraries, having 1,107,813 volumes. Of these, 2,762, with 721,293 volumes, were private; and 1,409, with 386,020 volumes, were other than private, including 12 circulating libraries, with 52,781 volumes.

The total number of religious organizations was 2,582, having 2,405 edifices, with 765,127 sittings, and property valued at \$5,277,368. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.

W

WEST VIRGINIA. The Legislature of this State assembled at Charleston on the 16th of January, 1872, and continued in session forty-five days; during which time a large number of acts were passed, mostly of a private or local interest.

The delegates elected to the Constitutional Convention numbered seventy-eight, of whom sixty-six were Democrats, or Conservatives, and twelve Republicans. They met at Charleston on the same day as the Legislature, January 16, 1872, and organized by electing Samuel Price for President; and continued in session for nearly three months. The new

constitution, as a whole, was submitted to the votes of the members of the convention on the 9th of April, and almost unanimously adopted.

The pen which the framers of this instrument used for affixing their names to it, was made of a large eagle's quill presented to the convention for that purpose, by a delegate from the county of Hardy, where the eagle had been caught. Immediately after signing the instrument, the convention adjourned. The principal features of the new constitution, as compared with those of the preceding, are summarily stated as follows:

"It secures to all the citizens of the State equal rights and privileges; it proscribes no man or class of men; it retaliates no wrong upon any party; it secures the separate existence of West Virginia; it places the independence of the judiciary beyond partisan control; it sacredly preserves the system of free schools; it increases the sources of the irreducible school fund; it secures and enforces proper accountability for school moneys; it establishes a cheap and efficient County Court; it abolishes an intricate and expensive township and county organization; it diminishes the expenses of the government in each of its departments; it secures to the *bona-fide* settler a good title to his lands; it restrains the Legislature from useless and mischievous legislation; it secures the people from the creation of State or county debts; it deprives the Legislature of the power of enacting laws in several specified matters of private or local interest, and in all matters in which a general law can be enacted."

The thirty-seventh section of article 6th provides as follows: "The Legislature shall not pass local or special laws in any of the following enumerated cases, that is to say—for granting divorces; laying out, opening, altering, and working roads or highways; vacating roads, town-plats, streets, alleys, and public grounds; locating or changing county-seats; regulating or changing county or district affairs; providing for the sale of church property, or property held for charitable uses; regulating the practice in courts of justice; incorporating cities, towns, or villages, or amending the charter of any city, town, or village, containing a population of less than two thousand; summoning or impanelling grand or petit juries; the opening or conducting of any election or designating the place of voting; the sale or mortgage of real estate belonging to minors or others under disability; chartering, licensing, or establishing ferries or toll-bridges; remitting fines, penalties, or forfeitures; changing the law of descent; regulating the rate of interest; authorizing deeds to be made for land sold for taxes; releasing taxes; releasing title to forfeited lands; the Legislature shall provide by general laws, for the foregoing, and all other cases for which provision can be so made; and in no case shall a special act be passed where a general law would be proper, and can be made applicable to the case, nor in any other case in which the courts have jurisdiction, and are competent to give the relief asked for."

Strenuous efforts were made, by several members of the convention, to have the negroes deprived of their right to vote by the new constitution. Not succeeding in this, they strove to have negroes declared ineligible to office, although they had actually been eligible during the preceding three years. The convention rejected the proposition. Section 4, article 4, "on elections and officers," makes

no distinction of color, but provides: "No person, except citizens entitled to vote, shall be elected or appointed to any State, county, or municipal office." The advocates of the measure renewed their efforts on the last day of the session, urging that, at the election to be held on the ratification or rejection of the new constitution, a section declaring white citizens alone to be eligible to office should be submitted to the people, as a question to be voted upon separately. After a long and excited debate, which was reported to have been "characterized by more bitterness of feeling and wider difference of opinion than any other during the session of the convention," the controverted section was finally adopted by a majority of more than one-half—yeas 50, nays 15. It forms the last section of the schedule annexed to the constitution, and provides as follows: "Section 28. At the time of the submission of this constitution to a vote of the people, there shall be submitted, as a separate proposition, the following: 'Any white citizen entitled to vote, and no other, may be elected, or appointed to any office.'" The following section was also made a part of the constitution:

SECTION 50. The Legislature may provide for submitting to a vote of the people, at the general election to be held in 1876, or any general election thereafter, a plan or scheme of proportional representation in the Senate of this State; and, if a majority of the votes cast at such election be in favor of the plan submitted to them, the Legislature shall, at its session succeeding said election, rearrange the senatorial districts in accordance with the plan so approved by the people.

Concerning the liability of West Virginia for her proportional share in the public debt of Virginia, there was much contrariety of sentiments manifested in the convention. The constitution of 1862 had a section relating to West Virginia's liability for such indebtedness, and its eventual payment. A number of delegates maintained that a like section should be inserted also in the new instrument, contending that its omission would injure the honor and credit of the State, as if she intended to repudiate her debt, and it might even have for its consequence the forfeiture of the condition upon which Congress gave its consent to her separate existence as a State. Others denied all this, and averred that the liability of West Virginia for her share in the debt of Virginia, and its proportional amount, rest on legal grounds, with which the Constitutional Convention has nothing to do, but belong exclusively to the Legislature; and that the insertion or omission of such a section in the new constitution could not alter the true position of the State in that respect. Some insisted on the propriety of omitting in the new constitution the declaration of the said liability; especially as the State of Virginia, within the previous year, had assumed alone to decide the whole matter, and, so far as she might be concerned with her creditors, car-

ried her decision into execution—on which the following statement was made before the convention by one of its members: "At the very moment that proceedings were pending between the two States for the adjustment of the principles upon which their respective portions of that liability should rest, and when a disposition had been manifested by West Virginia to meet with fairness and good faith the responsibilities of her position, the State of Virginia took the subject under her entire control, assumed to be the sole judge, and to determine what her proportion and what our proportion of that debt should be, and to compel her bondholders, under the penalty of a repudiation of their debts, to accept the distribution which she had chosen arbitrarily to make of the respective liabilities of the two States. Under this arrangement, she issued new bonds for two-thirds of her debt, and gave a deferred certificate representing the third, for which she chose to regard West Virginia as liable, and for the payment of which deferred certificate she disclaims all responsibility until a settlement shall take place between herself and West Virginia. These certificates have since been thrown upon the market, are quoted at the stock-boards as West Virginia certificates, and have sunk to a low state of depreciation, already resulting in a loss of nearly one-third of their debts to the bondholders."

The final result, ascertained by a vote of 42 to 26, was, that the above-mentioned section of the old constitution should be entirely omitted in the new. This instrument, in article 10, section 4, simply authorizes the Legislature to contract debts for some specified purposes, among others, "to redeem a previous liability of the State." Thereby the new constitution recognizes the obligation of West Virginia for whatever she may justly owe to the State of Virginia as her share in the latter's debt; and declares her willingness to pay it when properly ascertained.

The State of Virginia claims, and in her arrangement with her creditors, as above stated, has actually assumed, that the proportional share of her debt chargeable to West Virginia is one-third of the whole, or above \$16,000,000; whereas the commissioners appointed by West Virginia to investigate the subject, after having examined the public records, have officially reported its amount, in their judgment, to be less than \$1,000,000.

The fourth Thursday (22d) of August, 1872, was appointed as the day of a general election for the ratification or rejection of the constitution and schedule. The constitution was ratified by a majority of 4,534. Total vote, 81,656.

The members of the Legislature elected under this constitution are required to meet at the seat of government on the third Thursday (19th) of November, 1872. The term of service of the delegates first elected is to expire on November 1, 1874; the regular sessions being now biennial.

The term of office of the Governor, Secretary of State, State Superintendent of Free Schools, Auditor, Treasurer, and Attorney-General, is fixed by the new constitution at four years, to commence on the 4th day of March, 1873.

The term of office of the four Judges of the Supreme Court of Appeals is twelve years; the term of office of the nine Judges of the nine Circuits, into which the State shall be divided, is eight years.

Some Liberal Republicans and Liberal Democrats of West Virginia met together at Parkersburg, on April 18, 1872, and held a conference, in which it was resolved "that the Liberal Republicans of West Virginia, who may attend the Cincinnati Liberal Republican Convention, be requested to use all honorable means to secure the nomination of Chief-Justice Chase to the presidency."

A similar resolution was adopted requesting the Liberal Democrats, who may be in attendance as delegates to the Reunion Reform Convention, which meets at the same time and place, to use their influence for the nomination of the Chief-Justice. A platform was adopted, liberal in character, which briefly covers the following points:

The perpetuity and sovereignty of the American Union; the restoration of local self-government; the preservation and coördination of the three departments of the Government—executive, legislative, and judicial; an acceptance in good faith of the last amendments to the Constitution; the adjustment of our tariff laws to a revenue standard, with such discriminations only as the general interests of the country may require; amnesty for all past political offences; protection of the rights of labor; a speedy return of the currency to a specie standard; the accession of neighboring states when it can be done without interference with national obligations and without force or fraud; the protection of American citizens, whether native or naturalized, from the despotism of foreign governments; and the inviolability of the national debt.

The platform concludes with an appeal to all patriotic citizens to unite to protect the Union of the States, and for the restoration of peace, progress, and prosperity, to the entire people.

The Republican party assembled in State Convention at Grafton, on the 23d of May, when they chose delegates to attend the Republican National Convention at Philadelphia.

The import of the resolutions which were then adopted by the convention is summarily stated as follows: they "set forth the prosperity of the country, the reduction of the public debt, the maintenance of peaceful relations at home and abroad, the economical administration of the Government, and the integrity of public officials; favor the continued reduction of taxation, the gradual payment of the public debt, Grant's civil-service reform,

the restoration of good-will in the reconstructed States, the jealous guarding of national honor with foreign powers; also declaring that the last three amendments to the Federal Constitution shall forever remain inviolate. No passive policy, no disguises assumed by malcontents, no false pretence of disappointed men, can alienate the Republican party; praising the economical collection and disbursement of the revenues; eulogizing General Grant, and instructing delegates to use all honorable means to secure his renomination."

No candidates for Governor and other State officers were nominated by the Republicans of West Virginia at this convention.

The Democratic and Conservative party held their State Convention at Parkersburg on the 30th of May, "to nominate candidates for Governor, four Judges of the Supreme Court of Appeals, Auditor, Treasurer, Attorney-General, and State Superintendent of Free Schools; also to form an electoral ticket, and select delegates to represent the State in the Democratic National Convention." The convention was largely and fully attended.

The nominations of the various candidates for State officers were made, with the following results: For Governor, Johnson N. Camden, of Wood County; for Attorney-General, Henry Mason Matthews, of Greenbrier County; for Auditor, Edward A. Bennett, of Marion County; for Treasurer, John L. Burdett, of Kanawha County; for State Superintendent of Free Schools, Benjamin W. Byrne, of Clay County. Mr. Bennett and Mr. Burdett were the incumbents of the offices to which they were respectively renominated.

The following platform was unanimously adopted:

The Democratic and Conservative party of West Virginia, in convention assembled, present to the voters of the State the following declaration of principles as applicable to our political affairs:

1. We congratulate the people upon the faithful redemption of all the pledges upon which the Democratic party was placed in power in West Virginia.

2. We heartily indorse the Democratic State administration, and point to its honesty and efficiency as a full guarantee of our continued fidelity to the interests of the State and people.

3. That, in the opinion of this convention, the elements of opposition to the present national Administration should be consolidated in the approaching presidential campaign, without prejudice to the unity and perpetuity of the Democratic organization.

4. That, with full confidence in the wisdom and patriotism of the National Democratic Convention soon to assemble at Baltimore, we pledge the Democracy of West Virginia to abide its action or recommendation, and to express their approval thereof at the polls.

5. We pledge to the nominees of this convention our earnest and active support.

6. We indorse the proposed new constitution of the State of West Virginia, and recommend its ratification by the people, without distinction of party.

The Governor of West Virginia, John J. Jacob, regarded as belonging to the Democratic party, presented himself to the people as an independent candidate for reelection, in

competition with the regular nominee of that party. During the campaign preceding the election of August 22d, he addressed public meetings at several places. The Republicans, who had no candidate of their own for the office, he having retired, warmly supported the reelection of Mr. Jacob; their principal object in this being, it was stated, to defeat the ratification of the new constitution.

At the general election on August 22d, the new constitution was ratified, as above stated, and the whole Democratic State ticket elected, except the Governor, Mr. Jacob having been reelected by a majority of 2,698 over Mr. Camden. Mr. Jacob received 42,988 and Mr. Camden 40,805 votes. The majorities by which the nominees of the Democratic ticket for the other State offices were elected were large.

Candidates for Congress were voted for at the election in August, although the new constitution, on the authority of which that election was held, did not order it for Congressmen, but only for State, county, and other local officers, in case the instrument was ratified by the people. The day for the election of Congressmen, appointed by the State constitution of 1862, and sanctioned by Congress, was the fourth Thursday of October, on which account the Constitutional Convention did not provide for such election, as it could not alter its day, the matter being beyond its power, and reserved exclusively to the Legislature by the Federal Constitution. Candidates for Congress were subsequently nominated, and voted upon also, at the election on the fourth Thursday of October, and some of them at both of those two elections. For these reasons, and others relating to the manner of voting, and to the election returns concerning those candidates, the matter seems to be enveloped in such doubt that the Governor has felt himself justified in refusing to issue election certificates. After the reassembling of the Legislature in November, 1872, one of the Senators introduced a bill entitled "An act to extend the time for ascertaining and certifying the result of the election held on the twenty-fourth day of October, 1872, for representatives of this State to the Congress of the United States." This bill was passed by both Houses, and vetoed by the Governor, who returned it to the Senate. In the communication which accompanied it he said: "It is a matter of regret to me personally that the first exercise of this power in this State should be connected with a question about which there exists wide differences of opinion among the people." He adds, among other things, that "the subject, under the circumstances, is not within the jurisdiction of the Legislature; that there was no necessity for this legislation; that the returns of the election of October 24th, for the whole State, except three counties, were in his office;" and that "even if elections were then held in those three coun-

ties, and a full vote cast, the general result could by no possibility be changed." After considerable discussion on the Governor's message, the bill was passed again over the Governor's veto, by both Houses on the same day: in the Senate by a vote of 18 to 9, and in the House, of 37 to 19.

The November election resulted in favor of the Republican electoral ticket. The Grant electors received 32,815 votes, and the Greeley electors 29,451; Republican majority, 2,864.

The receipts and expenditures of the State during the year ending October 1, 1872, were as follows:

Balance in the Treasury, October 1, 1871.....	\$136,677 77
Received during the fiscal year ending September 30, 1872.....	741,556 16
Total.....	\$878,233 93
Expended during the fiscal year ending September 30, 1872.....	586,781 90
Balance in Treasury, October 1, 1872.....	\$291,452 03
Amount due school fund and general school fund, October 1, 1871.....	273,180 66
Leaving in the State Treasury, October 1, 1872.....	\$10,271 37

The estimated expenditures of the State, under the new constitution, are set down, for 1873-'74, at \$277,245.88, and \$225,696, respectively; showing, in each case, a saving of more than \$100,000 in comparison with the disbursements annually made for general State purposes for several years past.

For the support of free schools, a large amount of money is annually raised in West Virginia. The State fund distributed this year amounts to \$232,215. Adding to this the money raised by township levies, reckoned to be at least double that sum, makes a total of about \$700,000; some \$200,000 of this money belong to the fund for building school-houses; which leaves about \$500,000 for the support of free schools, or an average of \$2,000 for each district in the State. The number of youths enrolled for 1872, in the State, was 170,081, of which number about one-half attend school.

The University of West Virginia is under the exclusive control of the State. It has a permanent endowment of \$100,000. One of its most interesting features is the "Cadets' Corps." The commandant, under whose direction and conduct this "corps" has been placed, is an officer of the United States Army, detailed for that service. He recommends an increase in the number of cadets, the additional cost required by such increase being inconsiderable.

The State Hospital for the Insane is overcrowded. Of 150 patients, in whose behalf applications for admission were made within the year, 87 were admitted, and 63 refused for want of room.

The Institution for the Deaf and Dumb and the Blind is under excellent management, and in successful operation. There were, in all, 67 pupils in attendance during the year, of whom 55 were deaf-mutes, and 12 blind.

In the State penitentiary there remained 109 convicts in confinement on the 1st of October, 1872. Their number on the 1st of September, 1871, was 105, and 92 were received into the prison in the course of the year. During the same period, 27 were discharged, 10 pardoned, 6 escaped, of whom two were recaptured, and 7 died.

The Legislature, by an arrangement previously agreed upon between the two Houses, adjourned on the 21st of December, 1872, to meet again on the 10th of January, 1873.

According to the census of 1870, of the total population (308,424) ten years old and over, there were engaged in all classes of occupations, 115,229 persons, of whom 107,076 were males, and 8,153 females. There were engaged in agriculture, 73,960, including 73,725 males, and 235 females; in professional and personal services, 16,699, including 9,686 males, and 7,068 females; in trade and transportation, 6,897, including 6,888 males and 9 females; in manufactures and mechanical and mining industries, 17,673, including 16,827 males and 846 females.

The State contained 2,580,254 acres of improved land, 4,864,405 of woodland, and 1,588,785 of other unimproved land. The cash value of farms was \$101,604,881; of farming implements and machinery, \$2,112,987; total amount of wages paid during the year, including value of board, \$1,908,788; total (estimated) value of all farm productions, including betterments and additions to stock, \$23,379,692; orchard products, \$848,773; produce of market-gardens, \$69,974; forest-products, \$363,668; value of home manufactures, \$615,412; of animals slaughtered or sold for slaughter, \$4,914,792; of all live stock, \$17,175,420. There were 90,479 horses, 2,189 mules and asses, 104,434 milch-cows, 18,937 working-oxen, 178,809 other cattle, 552,327 sheep, and 268,081 swine. The chief productions were 3,385 bushels of spring, and 2,480,148 of winter, wheat, 277,748 of rye, 8,197,865 of Indian-corn, 2,413,749 of oats, 50,363 of barley, 82,916 of buckwheat, 2,046,452 pounds of tobacco, 1,598,541 of wool, 31,449 bushels of peas and beans, 1,053,507 of Irish, and 46,984 of sweet, potatoes, 6,093 gallons of wine, 5,044,475 pounds of butter, 82,429 of cheese, 144,895 gallons of milk sold, 224,164 tons of hay, 3,939 bushels of clover-seed, 3,868 of grass-seed, 1,081 pounds of hops, 82,276 of flax, 2,893 of flax-seed, 490,606 of maple-sugar, 780,829 gallons of sorghum, and 20,209 of maple, molasses, 376,997 pounds of honey, and 9,917 of wax.

The total number of manufacturing establishments was 2,444, using 509 steam-engines, of 17,186 horse-power, and 683 water-wheels, of 10,195 horse-power, and employing 11,673 hands, of whom 10,728 were males above sixteen, 287 females above fifteen, and 657 youths. The total amount of capital invested was \$11,084,520; wages paid during the year, \$4,322,-

164; value of materials consumed, \$14,503,701; of products, \$24,102,201.

The whole number of newspapers and periodicals was 59, having an aggregate circulation of 54,482, and issuing annually 4,012,400 copies. There were 4 daily, with a circulation of 5,192; 2 tri-weekly, circulation 550; 48 weekly, circulation 43,390; 2 semi-monthly, circulation 3,100; 3 monthly, circulation 3,200.

There were 1,728 libraries, having 372,745 volumes. Of these, 1,090, with 220,562 volumes, were private; and 638, with 152,183 volumes, were other than private, including three circulating libraries, with 1,700 volumes.

The total number of religious organizations was 1,529, having 1,018 edifices, with 297,315 sittings, and property valued at \$1,835,720. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	395	62,350

WISCONSIN. The annual session of the Wisconsin Legislature began on the 10th of January, and closed on the 25th of March. That body was composed of 23 Republicans and 10 Democrats in the Senate, and 60 Republicans and 40 Democrats in the Assembly. Its work was unusually difficult, on account of the number of general laws required by an amendment of the constitution, which prohibited a large class of special legislation. Among the general laws passed were those providing for the incorporation of towns and villages, railroad companies, religious societies, and companies for manufacturing and other purposes. The general railroad act carefully defines and limits the powers and duties of the companies, and holds them strictly amenable to the State authorities. An act authorizing municipal corporations to aid in the construction of railroads, by the issue of bonds, limits the amount to be issued, together with all other indebtedness of the town or city, to ten per cent. of the valuation of taxable property therein. Such issue of bonds can be made only with the approval of a majority of the legal voters obtained at an election, of which

at least thirty days' notice has been given. An amendment to the constitution, limiting the power of municipalities to contract debts to five per cent. of their valuation, was proposed by joint resolution, but must receive the approval of the next Legislature, and the sanction of the people at the election of 1873, before it becomes part of the organic law. An amendment of the constitution, proposed by the preceding Legislature, increasing the number of judges of the Supreme Court from three to five, was approved, and provision made for submitting it to a vote of the people. The general act for the incorporation of manufacturing and other companies provides that any number of persons may unite under articles of association, for almost every industrial purpose, and defines specifically their responsibilities and powers. A new law was passed making provision for the government of hospitals for the insane, and laying down all general regulations for the reception and treatment of patients.

An act, which occupied a large share of attention, was entitled "An act to provide against the evils resulting from the sale of intoxicating liquors." It provides that no one shall sell these liquors except under a license obtained by giving a bond "for the payment of all damages, to any person or persons, which may be inflicted upon or suffered by them, either in person or property, or means of support, by reason of so obtaining a license, selling, or giving away intoxicating liquors, or dealing therein; and such bond may be sued or recovered upon for the use of any person or persons, or their legal representatives, who may be injured by reason of the selling or giving away of intoxicating liquors by the person or his agent so obtaining the license." It is made unlawful "for any person to become intoxicated, and any person found in a state or condition of intoxication shall, on conviction thereof, be punished therefor by being held in custody by order of the court, before which such person may be so convicted, or by imprisonment in the county jail, not less than one day, nor more than sixty days, and may, in addition thereto, in the discretion of the court, be required to pay the costs of prosecution, and may be retained in jail, or in custody, until such costs are fully paid." Among the other provisions of the law were the following:

SECTION 5. Every person who shall, by the sale or giving away of intoxicating liquors with or without a license, cause the intoxication of any other person, shall be liable for, and compelled to pay a reasonable compensation to any city, town, or village, or to any person who may take charge of and provide for such intoxicated person, and two dollars per day in addition thereto for every day such intoxicated person shall be kept, in consequence of such intoxication, which sum may be recovered before any court having competent jurisdiction.

SEC. 6. Every husband, wife, child, parent, guardian, employer, or other person, who shall be injured in person or property, or means of support, by

any intoxicated person, or in consequence of the intoxication of any person, shall have a right of action in his or her own name, severally or jointly, against any person or persons who shall, by selling, or giving away intoxicating liquors, have caused the intoxication, in whole or in part, of such person or persons, and any person who shall have caused such intoxication, as aforesaid, shall be liable for all damages sustained, and for exemplary damages, and a married woman shall have the same right to bring suits and to control the same as a *feme sole*, and all damages recovered by a minor under this act shall be paid either to such minor or to his or her parent, guardian, or next friend, as the court shall direct, and the unlawful sale or giving away of intoxicating liquors shall work a forfeiture of all rights of the lessee or tenant under any lease or contract of rent upon premises when such unlawful sale or giving away shall take place, and all suits for damages under this act may be by any appropriate action in any of the courts of this State having competent jurisdiction.

Separate penalties by fine and imprisonment are provided for the violation of each provision of the act.

Among other acts passed were one authorizing cities and villages to establish free public libraries, and one exempting private property from seizure and sale for municipal debts. A large number of propositions were discussed, which failed to pass. Among these was one for a convention to revise the constitution, and others embodying amendments to the constitution, providing for biennial sessions of the Legislature and minority representation. Bills for the establishment of an Insurance Bureau, a Board of Immigration, and a State Superintendent of Forestry, also failed to pass.

There was no election for State officers in Wisconsin this year. At the presidential election, 192,305 votes were cast, including 834 "scattering," most of which were for O'Connor for President. The Grant and Wilson ticket received 104,992, and that for Greeley and Brown 86,477; giving the former a majority of 18,515. Eight Representatives in Congress were chosen at the same time, of whom those from the 1st, 2d, 3d, 6th, 7th, and 8th districts were Republicans, and those from the 4th and 5th districts were Democrats.

The new Legislature consists of 21 Republicans, 10 Democrats, and two Liberal Republicans in the Senate, and 60 Republicans, 36 Democrats, and four Independents, in the House. The constitutional amendment in favor of increasing the number of judges of the Supreme Court was rejected by a vote of 16,272 in its favor, and 29,755 against it.

The material condition of the State is very promising. The public debt on the 30th of September was: \$2,252,057, consisting of \$18,100 of outstanding bonds, \$2,233,900 of certificates of indebtedness, and a small amount of currency certificates. Of the certificates of indebtedness, \$1,559,700 belonged to the school fund, \$111,006 to the University fund, \$50,600 to the Agricultural College fund, and \$512,600 to the Normal School fund. At the beginning of the fiscal year, October 1, 1871, there was an unexpended balance of \$329,845.82 in the

Treasury; during the year the receipts amounted to \$1,829,797.82, and the disbursements to \$1,920,534.58; and, at the close of the year, a balance of \$239,109.11 remained unexpended. The valuation of taxable property for the year amounted to \$390,454,875, and the amount raised by taxation was \$765,291.55, the rate being 1½ mills on a dollar. The estimated revenue for 1873 is \$1,087,291.55, and the expenses \$1,027,972.55. The trust funds of the State amount to \$3,776,185.15, distributed as follows: School fund, \$2,482,771.28; University fund, \$206,983.88; Normal School fund, \$880,371.79; Agricultural College fund, \$206,058.20. The amount of public land still held by the State is 2,089,715.75 acres, valued at from 75 cents to \$3 per acre. Over 350,000 acres were sold during the year.

There are in the State 423,717 children between the ages of four and twenty. Of these, 266,789 attended the public schools during some portion of the year. There are 5,103 school districts in the State, not including the cities. The average number of days during which schools were maintained was 153. The number of teachers required was 5,881; average monthly wages of male teachers in the country, \$43.33; of female teachers, \$27.04; average monthly wages of male teachers in cities, \$98.20; of female teachers, \$37.60. There are 4,979 public school-houses, capable of accommodating 312,612 pupils. The value of the school-houses is \$3,611,607, the value of sites \$513,089, and the value of apparatus \$87,468. The total amount expended for school purposes during the year was \$2,004,154.56, against \$1,938,284 in 1871. At the opening of the fall term of the State University, there were 203 male and 142 female students in attendance. There are three normal schools in operation—one at Platteville, one at Whitewater, and one at Oshkosh, and a fourth is in process of construction at River Falls. The number of students at the normal schools is 850. Among the private educational institutions of the State are Beloit College, Galesville University, Lawrence University, Milton College, Milwaukee Female College, Racine College, Ripon College, and the Wisconsin Female College.

There is an Institute for the Blind at Janesville, which has been in operation twenty-three years. Its expenses for the past year were \$23,218.59. Eighteen pupils were admitted and 13 dismissed during the year, the whole number in attendance being 76, of whom 43 were males and 33 females. In addition to the elementary branches of learning, they are instructed in various industrial occupations. The Institute for the Deaf and Dumb, at Delavan, has been in operation twenty years. During the past year the cost of maintaining it was \$34,174.34. The whole number of pupils connected with the institution during the year was 164, of whom 144 were remaining at the close. The sign language is used as the

medium of instruction. Industrial pursuits are taught here also.

The Industrial School for Boys, located on the Fox River, near Waukesha, was opened in 1860, and is designed for the reformation of juvenile offenders against the law. The number of inmates at the beginning of the year was 239, two of whom were girls, and the number at the end of the year was 273. The number received during the year was 107; 85 were returned to their parents, 23 were placed out, 10 escaped, and one died. The expenses of the institution amounted to \$36,538. Every inmate is taught some useful occupation, and receives intellectual and moral training as well.

The Soldiers' Orphans' Home was established at Madison in 1866, and during the last fiscal year had 228 children under its care, supported at a cost of \$30,000. There has been a lack of harmony among its trustees, and serious charges have been made regarding its management. An investigation into the matter is likely to be ordered by the Legislature of 1873.

The State Hospital for the Insane is situated about four miles from Madison, and has been in operation thirteen years. At the beginning of the last fiscal year it had 173 male and 182 female inmates. During the year 92 males and 74 females were admitted, and 83 males and 65 females were discharged; leaving, on September 30th, 182 males and 191 females. Of the 148 set down as discharged, 60 had recovered, 26 were improved in condition, 37 were unimproved, and 25 had died. The expense of maintaining the institution for the year was \$105,975.78. A fire on the 8th of August caused considerable damage to the buildings. The estimated expenses of the current year, including those for needed repairs and improvements, amount to \$129,500. The Northern Hospital for the Insane, at Oshkosh, is not yet completed. The amount thus far appropriated for land, buildings, etc., is \$388,000. Additional appropriations for its completion are asked for, amounting to \$255,850.

The State-prison contained, at the beginning of the last fiscal year, 191 convicts, and at the close 186, seven of whom were females. Ninety-four were received and 100 discharged during that period. The convicts are employed, for the most part, in workshops within the institution itself. The receipts of the year amounted to \$113,446.17, of which \$58,993.47 was paid from the State Treasury, and less than \$50,000 was derived from the labor of the prisoners. It is nearly twenty years since capital punishment was abolished in Wisconsin, and of the result Governor Washburn says:

In July next, twenty years will have elapsed since the death penalty was abolished in this State. The experiment met with strong opposition from a large portion of the people of the State, who predicted that a large increase of crime would result from the change. The prediction, happily, has not been verified, and the facts which I am about to state conclusively show that no State in this Union can boast greater exemption from crime than Wisconsin.

With a population of 1,200,000, representing almost every nationality, and two-fifths of foreign birth, statistics show that crime, instead of increasing with the growth of the State, has actually diminished. This is in a great degree due to a high-toned public sentiment, which causes the violated laws to be promptly vindicated.

Since the abolition of the death penalty there have been tried, convicted, and sentenced to the penitentiary for life, 71 persons in all. Of that number, 36 now remain, the rest having died, been pardoned, or discharged by proper authority.

There can be no doubt that the change in the law has rendered punishment much more certain, and I but express the opinion of those who have most carefully considered the question, as well as my own, when I state that, but for that change in the law, at least one-half of those heretofore convicted would have escaped all punishment, so difficult is conviction when the penalty is death. In the five years that have elapsed from 1848 to 1853, I have no knowledge of more than one person having suffered the extreme penalty of the law. This was not because of lack of offences, but of the extreme difficulty of conviction.

In the year 1854, the number of convictions for the crime of murder was three; in 1855, three; in 1856, three; in 1857, three; in 1858, five; in 1859, none; in 1860, two; in 1861, none; in 1862, two; in 1863, eight; in 1864, none; in 1865, five; in 1866, one; in 1867, four; in 1868, five; in 1869, two; in 1870, four; in 1871, three; in 1872, one. I have taken some pains to ascertain what the conduct has been, since discharged from prison, of those convicted of the crime of murder, who have been pardoned, and I have failed to learn of any instance where the party had rendered himself amenable to the law. On the contrary, so far as known, they have proved honest and peaceable citizens—extremely careful and circumspect in their intercourse with their fellow-men.

Rapid progress has been made during the year toward a completion of the great railroad system of the State. The Milwaukee & St. Paul Railroad Company has completed a direct line from Milwaukee to Chicago, and is to extend it westward to the Mississippi; the Chicago & Northwestern is rapidly pushing forward to the Mississippi, and connects with the West Wisconsin at Elroy; the Green Bay & Lake Pepin line has been extended from New London to the West Wisconsin road, at Merrillon, a distance of over one hundred miles; the Lake-Shore line is in operation to Sheboygan, and is to be extended to Manitowoc; the Milwaukee & Northern has been completed to Menasha, and will soon be opened to Green Bay; the Sheboygan & Fond du Lac has extended its line to Princeton; a narrow-gauge railroad is in process of construction from Galena, Ill., to Platteville; the Wisconsin Central Railroad Company is rapidly completing its line through the centre of the State to Lake Superior, and has leased the Milwaukee & Lake-Shore and the Manitowoc & Mississippi roads, which will give it a continuous line from Lake Superior to Milwaukee.

According to the census of 1870, of the total population (751,704), ten years old and over, there were engaged in all classes of occupations, 292,808 persons, of whom 267,273 were males and 25,535 females. There were engaged in agriculture, 159,687, including 158,300 males and 1,387 females; in professional

and personal services, 58,070, including 37,898 males and 20,172 females; in trade and transportation, 21,534, including 21,343 males and 192 females; in manufactures and mechanical and mining industries, 58,517, including 49,738 males and 3,784 females.

The State contained 5,899,343 acres of improved land, 3,437,442 of woodland, and 2,378,536 of other unimproved land. The cash value of farms was \$300,414,064, of farming implements and machinery, \$14,239,864; total amount of wages paid during the year, including value of board, \$8,186,110; total (estimated) value of all farm productions, including betterments and additions to stock, \$78,027,032; orchard-products, \$819,268; produce of market-gardens, \$226,665; forest-products, \$1,327,618; value of home manufactures, \$338,423; of animals slaughtered or sold for slaughter, \$11,914,643; of all live-stock, \$45,310,882. There were 252,019 horses, 4,195 mules and asses, 308,377 milch-cows, 53,615 working-oxen, 381,802 other cattle, 1,069,228 sheep, and 512,778 swine. The chief productions were 24,375,435 bushels of spring, and 1,230,909 of winter, wheat, 1,325,294 of rye, 15,083,998 of Indian-corn, 20,180,016 of oats, 1,645,019 of barley, 408,897 of buckwheat, 960,813 pounds of tobacco, 4,090,670 of wool, 888,425 bushels of peas and beans, 6,646,129 of Irish, and 2,220 of sweet, potatoes, 9,357 gallons of wine, 22,473,636 pounds of butter, 1,591,798 of cheese, 2,059,105 gallons of milk sold, 1,287,657 tons of hay, 2,906 bushels of clover-seed, 13,016 of grass-seed, 4,620,155 pounds of hops, 497,398 of flax, 112,019 bushels of flax-seed, 507,192 pounds of maple-sugar, 74,478 gallons of sorghum, and 81,218 of maple, molasses, 299,341 pounds of honey, and 9,945 of wax.

The total number of manufacturing establishments was 7,013, using 926 steam-engines, of 30,509 horse-power, and 1,288 water-wheels, of 33,714 horse-power, and employing 43,910 hands, of whom 40,296 were males above sixteen, 2,114 females above fifteen, and 1,500 youth. The total amount of capital invested was \$41,981,872; wages paid during the year, \$13,575,642; value of materials consumed, \$45,851,266; of products, \$77,214,326.

The whole number of newspapers and periodicals was 190, having an aggregate circulation of 343,885, and issuing annually 28,762,920 copies. There were 14 daily, with a circulation of 43,250; 2 tri-weekly, circulation 3,200; 3 semi-weekly, circulation 6,850; 160 weekly, circulation 266,000; 2 semi-monthly, circulation 1,900; 9 monthly, circulation 22,185.

There were 2,883 libraries, having 905,811 volumes. Of these, 1,551, with 527,181 volumes, were private, and 1,332, with 378,680 volumes, were other than private, including 39 circulating libraries, with 38,867 volumes.

The total number of religious organizations was 1,864, having 1,466 edifices, with 423,015 sittings, and property valued at \$4,890,781. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.

WOODEN RAILWAYS. The substitution of timber for iron permanent way, which constitutes the great feature of the Canadian wooden railways, is due to Mr. J. B. Hulbert, an American engineer, who commenced works of this class during the civil war with the Confederate States, by laying down temporary lines, and renewing roads which had been destroyed. The experience gained during the war gave sufficient promise to warrant the trial at least of similar permanent roads, and, after a short line, 6 miles in length, had been built, and worked for a considerable time, another was commenced, 47½ miles long, between Carthage (New York) and Harrisville, and was opened for traffic in 1868. In addition to this a third line was laid down in Canada, in the province of Quebec, and known as the Quebec & Gosford Wooden Railway. This line is 26 miles long, but its extension for 100 miles is intended. Another, the Sorel, Drummond & Athabasca Counties Railway, 60 miles long, is finished, and several short branches are about to be made, while the Levis & Kennebec, Wooden Railway, in the province of Quebec, is in progress. This line will also be 60 miles in length, with 40 miles of extension to be made at a future time.

The traffic upon all of these lines is of course very light, and would not have warranted the construction of the cheapest possible form of railway in which iron permanent way was employed; nevertheless, three through-trains a day are on an average run over the railways already opened, and carry passengers and freight at least equal to what are conveyed over many lines upon which a large construction capital has been expended. Moreover, a fair speed, varying from 18 to 20 miles an hour for passenger-trains, and from 12 to 16 miles for freight-trains, can always be secured, and the amount of adhesion obtained, with the 30-ton engines now running, is sufficient to take any

required load up the gradients, which are severe. Thus on one of the lines, where 20-ton engines are employed, from 60 to 80 tons can be taken up gradients of 1 in 60, while there is no difficulty on far steeper inclines, of 1 in 21, in taking up 20-ton trains with engines weighing 14 tons. Experience has also shown that the wooden rails remain in at least as good a condition in winter as iron ones, and with the use of the snow-plough there need be no check to the traffic even when the snow lies on the ground to a depth of 3 or 4 ft.

In the Levis & Kennebec Railway a somewhat heavier form of construction has been adopted than was considered necessary for the earlier lines. The width of embankments at formation level is nowhere less than 14 ft., and that of cuttings varies from 16 to 22 ft., but the amount of earthwork upon the line is comparatively small, as very steep gradients and sharp curves have been adopted. The permanent way consists of cross-sleepers laid upon ballast 1 ft. deep, and 2 ft. wider than the length of the transverse sleepers, which are of tamarac or hemlock, 8 ft. long, and 8 in. in diameter at their smaller end. The rails themselves are of maple, 14 in. by 7 in., cut in lengths of 14 ft., and resting on edge upon the sleepers; the face of the rails is slightly rounded. The sleepers are placed 2 ft. apart, and notches are cut in their upper sides, into which the rails are laid and kept in place by wedges cut from the logs from which the rails are formed.

Although the employment of timber instead of iron forms the chief item of saving in these wooden railways, the utmost economy is observed throughout the whole construction, while the quantity of rolling-stock is reduced to the smallest amount possible for accommodating the traffic. On the Levis & Kennebec Railway, only two locomotives, weighing 30 tons each in running order, are at present to

be ordered, and the rest of the rolling-stock will consist of 2 first-class cars to carry each 40 passengers, 2 second-class with seats for 60 passengers; 2 luggage-cars; 4 cattle-cars; 10 freight box, and 80 platform cars, 2 snow-ploughs, and a few minor pieces.

Including the whole of this rolling-stock, the contract cost per mile of the line is \$6,600. The total cost of the permanent way is \$950.50 per mile, divided as follows; 760 rails 14 ft. long, 7 in. by 4 in., sawn and ready for laying, 60 cents each; 4,800 transverse sleepers, 8 ft. long, 12½ cents; and 9,200 wedges, 1 cent each. The cost of laying the permanent way is \$700 per mile, of which \$500 is expended in placing the ballast, etc., and \$200 in laying and adjusting the track. The average cost per mile of trestle-work, bridges, stations, platforms, water-tanks, turn-tables, and crossings, is \$1,250, and that of grading, \$2,700, of which \$2,300 go to the construction of earthworks, drains, culverts, etc. The prices of the locomotives and stock are as follows:

Engines and tenders, each.....	\$10,000
First-class cars.....	2,000
Second-class cars.....	1,000
Luggage-cars.....	600
Freight-cars.....	500
Cattle-trucks.....	500
Post-office cars.....	600
Platform-cars.....	320
Hand-trucks.....	120
Snow-ploughs.....	1,000

The price of labor upon the line averages 90 cents per day of ten hours, and the cost of earthwork is 30 cents, and rock-cutting from \$5 to \$9 per cubic yard. Timber costs, in logs 12 ft. long, and 14 in. diameter, black spruce, 25 cents per log, tamarac, 43 cents, white and yellow pine, 30 cents. Squaring the logs adds 25 cents to their prices. The cost of timber and the rates of wages fix the prices of trestle-work at \$5 per running foot, and those of wooden bridges complete and over 20 ft. span, at \$35 per lineal ft.

- Colorado.** (See *Territories of the United States*.)—Colorado River, exploration of, 337.
- Colored National Convention in New Orleans,** 775.

COLTON, REV. HENRY MARTYN.—Obituary, 619.

COLVOORSESS, Captain GEORGE M., U. S. N.—Obituary, 620.

COLWELL, STEPHEN.—Birth, death, 112; works, 112; career, 112, 113.

COMBE, THOMAS, M. A.—Obituary, 647.

Comet (BIELA'S).—Discovery of, 118; confirmation of Schiaparelli's theory concerning meteoric showers, 118; observations by Mr. Poyson, 118; views of a writer in the *Cornhill Magazine*, 118.

Commerce of the United States.—General commerce of the country, 114; summaries of the last two fiscal years, 114; respective amounts of each year, 114; foreign commerce for two years, 114; entrances and clearances, 114; commerce at New York, 114; imports at New York for a series of years, 114; tables of monthly summaries for four years, at New York, 114; entered for consumption, 114; entered for warehousing, 115; free goods, 115; specie, 115; total imports, 115; withdrawal from warehouse, 115; classified imports, 115; receipts of customs at New York, 115; monthly exports from New York to foreign ports for four years, 115; foreign, free, 116; foreign, dutiable, 116; specie and bullion, 116; quarterly summary of exports from New York, 116; committee of investigation and retrenchment appointed in the Senate, 134.

Congregationalists.—Plan agreed upon by which the churches in the West may participate more directly in the work of the Society, 116; collections for the American Home Missionary Society, 116; missionary work, 116; the Woman's Board of Missions, 117; receipts of the American Congregational Union, 117; receipts of the American Board of Commissioners for Foreign Missions, 117; cost of missions, 117; summary of missions, 117; laborers employed, 117; number of churches, 117; educational department, 117; work done, 117; colleges, 117; work of the Society at home, 117; in foreign missions, 117; work among the Indians, 118; meeting of the Union of Ontario and Quebec; statistics, 118; annual meeting of the Union of England and Wales, 118; conference in London of Baptists and Congregationalists, 118; meeting of the Union of Scotland, 118; statistics of Congregational churches in 1872, 118.

Congress, United States.—Commencement of the session, 119; list of members, 119; resolution calling upon the President for information relative to the suspension of the laws in South Carolina, 119; object of the resolution, 120; large numbers of citizens arrested for alleged offences, 120; resolution answered yesterday in the President's message, 120; the resolution asks for details, 120; no report made by the committee, 120; resolution lost, 120.

A committee on insurrectionary States proposed, 121; no such States, 121; such a committee appointed and continued at a previous session, 121; the evils seem to continue in spite of the best efforts of the committee, 121; not a side-wind to continue a committee, 121.

Special committee on telegraphy proposed, 121; the Post-Office Committee the proper one, 121; a matter involving millions of dollars, 121; immense patronage which is contemplated, 122; every post-office to be a telegraph-station, 122; all to come under the control of the Post-Office Department, 122; referred to Committee on Appropriations, 122.

Petition of colored citizens of Brooklyn, 123; petition relative to Howard University, 123; an end should be put to this outrage, 123.

Motion to fix the time of adjournment, 123; amendment offered, 123; proceedings suspended, 124.

Resolution of inquiry relative to the expenditures of the Government, 124; laid over, 124.

Resolution to provide for an immediate reduction of taxation, etc., 124; lost, 124.

Resolution relative to civil-service reform offered, 125; laid on the table, 125.

Resolution that the President open negotiations for the purchase of Cuba offered, 125; laid on the table, 125.

Resolution to recognize the thirteenth, fourteenth, and fifteenth amendments to the Constitution as valid, offered, 125; adopted, 125.

In the Senate, resolution relative to the defalcation of Paymaster Hodge offered, 126; amendment offered for the appointment of a committee to inquire into the expenditures of all branches of the service of the United States, 126; should follow up the investigations begun in regard to the use of patronage, 126; no unusual thing for appointments to be held up in this body until other appointments are made, 126; remedies to be suggested against robberies by officials, 126; throughout the land an impression that corruption exists in the public service, 127; what is the precise point of discussion here? 127; what is the most effectual method to purify each department? 127; where shall you draw the line between appointing a man on account of his political status, or some other reason? 127; the point of the present question, 127; subject postponed, 128.

In the Senate, a resolution to appoint a standing committee of investigation and retrenchment, 128; this committee should be vested with the same powers as were conferred on the joint select committee, 128; motion made so to amend, 128; better be appointed as all committees are appointed, 128; let this committee stand like all others, 128; every one knows what retrenchment means, 128; why have a division here on this subject? 129; the committee, as first proposed, will have cognizance of nothing but what shall be referred to it specifically, 129; I want to vest the power originally in the committee, so they shall have it without their attention being particularly called to a subject, 129; this is merely a technical difference, 129; presidential campaign opened in form, 130; attempt to open the eyes of the people to the evil times, 130; this Administration will compare with any previous one in integrity, 130; the objections to the amendment are surprising, 130; a committee on retrenchment with such powers was organized five years ago, 131; for years, without a dissenting voice, the Senate has been conferring such powers, 131; we are standing at the threshold of a great moral revolution in our political life, 131; such power has never been committed to a standing committee of this body as the amendment proposes, 132; the drift of this debate is a reflection on the Republican party, 132; my object is to uncover and denounce every abuse, 132; whence this bugbear that is raised before our eyes? 133; a reflection on the Republican party! how so? 133; amendment rejected, 133; resolution adopted, 133.

Amendment moved as an independent proposition, 133; astonished at the position taken by some members of this body, 133; the resolution is in aid of purifying the public service, 134; I cannot permit those with whom I act to be put in a false position, 134; no final action taken on the resolution as an independent proposition, 134.

In the Senate, the committee on retrenchment proposed, 134; have any of these persons urged this inquiry on the Senate? 134; if not, can such a committee satisfy the country? 134; no Senator in this body opposed to the most searching inquiry, 135; the Senator is evading the question, 135; will this committee do their duty? 135; every one voted for this measure, 135; rules of parliamentary usage, 135; how do Senators vote on the subject of investigating these abuses? 136; where are the Senators who were in favor of this thorough investigation? 136; not one is on the committee, 136; original amendment to the resolution, 136; what foundation is there for the assertion that no Senator who sustains the inquiry is on the committee? 137; assertions of fraud in the public service, 137; a statement of facts, 137; who gave this a party turn? 138; no more legitimate subject of inquiry can be made than the connection of the patronage of the Government with the freedom of suffrage, 138; motion to amend the amendment agreed to, 139; the amendment agreed to, 139.

In the Senate, a bill for the removal of legal and political disabilities imposed by the fourteenth amendment to the Constitution, 140; features of the bill, 140; the interest of the country demands its passage, 140; necessary to extend relief much further than it would have been justifiable a short time since, 140; amendment offered, 140; wiser to end the matter and pass the bill, 141; let us be just before we are generous, 141; this is a great peace-offering to the country, 141; amendment offered relative to social equality, 141; half the people of Georgia excluded from equal rights, 142; colored persons prefer the separation from the whites, 142; a vindication of inequality as a principle or a rule, 142; I intend to see that, under the institutions of his country, the colored man is equal everywhere, 142; in hotels and on railroads all are subject to the regulations of the proprietors and companies, 143; I object to this great Government descending to the business of regulating the hotels and common taverns of the country, 143; the amendment read, 143; the treatment which this bill has received, 144; the time has come when these disabilities ought to be removed, 142; the amendments hazard the bill, 144; a majority can pass the amendment, but the bill requires two-thirds, 145; why endanger it by pressing the amendment? 145; we have in Mississippi just such a law as the colored people are content with, 145; the individual disqualifications as to holding office should be considered, 145; this is a safe and sound measure of public policy, 146; amendments rejected, 146; other amendments to except members of Congress moved, 147; rejected, 147; amendment not to remove legal disabilities, 147; rejected, 147; amendment to limit the backward effect of the bill, so as not to validate the election of any person at the time ineligible, 148; agreed to, 148; bill reported to the Senate, and the civil rights amendment renewed, 148; the amendment is the most flagrant violation of the Constitution that has ever been proposed in the Senate, 148; these amendments are calculated to defeat the bill, and they are voted for by those heralded as friends of amnesty, 149; the amnesty bill should be a proper one, 149.

Slavery in its original pretension reappears in this debate, 149; extent to which the equality of the slave has been recognized, 149; this is not enough, 149; the denial of any right is a wrong that darkens all the rest, 149; rights denied, 149; two excuses show how groundless is this pretension, 149; the first excuse is

simply misrepresentation, 150; the other excuse finds equality in separation, 150; vain to argue that there is no denial of equal rights when the separation is enforced, 150; without the amendment, the original civil rights law is imperfect, 150; unite now in an act of justice to a much-oppressed race, 150; duty to these millions is foremost, 151; strong reasons why it should be united with amnesty, 151.

Some suggestions respecting this amendment, 151; it declares all citizens entitled to the equal enjoyment of the privileges of inns, churches, etc., 151; no one desires this, 151; it imposes penalties for any violation of this equal enjoyment, 151; churches and cemeteries established exclusively for each color should remain so, 152; who is to collect the penalty of a whole congregation? 152; enormous penalties, 152; is the amendment within the constitutional power of the Government? 152; it should be properly amended, 153; no sound principle is sacrificed by granting amnesty, 153; this amendment is an unfriendly act, 153.

In the House, the rules suspended to put upon its passage a bill to remove legal and political disabilities, 153; features of the bill, 153, 154; bill passed, 154.

In the Senate, the House amnesty bill taken up, 154; last bill of the House, the most liberal one, 154; this is not the best recommendation of the bill, 154; the point of order, 155; why not vote on the amendment to the other bill? 155; no men more undeserving of amnesty can be found, 155; the first bill should be proceeded with, 155; the question of order, 155; one-half a bill passed by the requisite vote, and the other half not passed, 156; the amendment has never been referred to a committee, 156; under what clause of the Constitution is it brought forward? 156; difference between privilege and protection, 156; what says the constitutional amendment? 157; this amendment is a plain usurpation of power that does not belong to Congress, 157; the fourteenth amendment, 157; any proposition to grant universal amnesty is a violation of the spirit of the amendment, if not its letter, 158; what is amnesty? 158; expediency is the principal argument in its favor, 158; you cannot conciliate the authors of the rebellion, 158; put the question on the ground of high principle, 158; troubles may occur from decade to decade, 159; I want peace with the South on correct principles, 159; grant universal amnesty, and the next step will be to pension the rebel soldiers, 159. If the authors of the rebellion are to become your companions on this floor, shall not the Confederate dead become the companions of your soldiers in Arlington? 159; why have we had this impassioned denunciation of amnesty this morning? 160; only account for it in one way, 160; beginning of the great campaign of 1872, 160; how is the rebel debt to be paid in the face of your fourteenth amendment? 160; at a loss to understand this Administration and its supporters, 160; throwing a tub to the whale, 161; the source of the language "appropriate legislation," 161; what is appropriate legislation? 161; the argument strikes down every State government in this Union as completely as if every State constitution were annihilated, 162; what is the argument? 162; I protest against any such interpretation, 162; is there no such thing as State rights? 162; this is the same old speech which has often been heard in the swamps of Indiana, 163.

What is the whole meaning of this question? 163; it is the experience of all civilized nations, that the completest amnesty is the best, 163; can it be said that the

rebellion has gone entirely unpunished, 164; how do the Southern people stand? 164; you may say they deserved it all, 164; the pending bill not laid on the table as moved, 164; amendment to the amendment moved, 165; omits all regulation of churches, 165; the remedy is inadequate, 165; meaning of the last clause of the first section of the fourteenth amendment, 165; what is meant by the equal protection of the laws? 165; application of the amendment to churches, 165; right of churches to exclude persons, 166; amendment to the amendment lost, 166; other amendments moved, 166; lost, 167; other amendments moved relative to color, and lost, 167, 168; every person opposed to amnesty is voting for these amendments, 168; want to see the peace of this country restored, 168; aiming to hit the Chinese, 168; amendment rejected, 169; other amendments offered and rejected, 169, 170; moved to except members of Ku-klux Klan from amnesty, 170; adopted, 170; this bill, with the general amendment proposed, is unconstitutional, 170; the bill is now elevated and consecrated, 170; the effect of these tactics has been to defeat both civil rights and amnesty, 170; and yet we are charged with being false to human rights, 171; the two subjects have a natural relation, 171; the bill lost, 171.

Motion made to take up the House bill for the removal of political disabilities, 171; the bill, 171; motion to insert the civil rights bill after the enacting clause, 171; reasons, 172; amendment to the amendment to remove all legal and political disabilities agreed to, 172; amendment requiring an oath of allegiance moved and agreed to, 173; motion to strike out all the original amendment lost, 173; moved to limit the operation of the bill in relation to cemeteries and benevolent institutions, 173; adopted, 173; amendment as amended rejected, 174; civil rights bill moved as an addition to the amnesty bill, 174; amendment agreed to, 174; bill reported and rejected, 174.

In the Senate, a bill to amend the act to enforce the rights of citizens to vote in the several States, etc., 174; object to extend the authority to appoint inspectors of elections and deputy-marshals, 174; authorizes judges to appoint these supervisors, 175; whenever any two citizens request it, 175; moved to strike out the word "circuit," and insert "district judge," 175; too great labor for the few circuit judges, 176; examples, 176; this bill applies to every precinct in the country, 177; the appointment of ten or twelve thousand election officers to be made by nine circuit judges, 177; they strike down the whole power of the State over elections, 177; how was the first bill put through the Senate? 178; amendment rejected, 178; no provision for the punishment of officers for oppression, 178; object of the Senate in the passage of the original act, 179; amendment offered and read, 179; rejected, 180; amnesty amendment offered, 180; notice of civil rights amendment of amnesty adopted, 180; civil rights bill moved as an amendment to the pending amendment, 181; rejected, 182; amendment rejected, 183; amendment to add the amnesty bill rejected, 183; amendment to add the civil rights bill to the bill moved, 183; moved to strike out so much as relates to schools and cemeteries, 183; what provision of the Constitution authorizes the passage of such a bill? 183; a case in court, 183; appeal to the Senator to withdraw his amendment, 183; amendment withdrawn, 183; other amendments, 183; bill passed, 183.

In the House, the proceedings considered, 183; bill rejected, 184.

In the Senate, the election law moved as an amendment to the Appropriation Bill, 184; not in order, 184; let the amendment be passed over and printed, 184; request refused, 184; chair rules the amendment in order, 184; how does this amendment come here printed? 185; has a caucus been held on this thing? 185; a most unexpected proceeding, 185; the chair has decided the amendment in order, 186; if this is in order, what amendment would not be in order? 186; appeal from the decision, 186; laid on the table, 187; motion to postpone the bill indefinitely, 187; a painful vote, 187; sharp practice, 187; beware before you adopt such a rule as this, 187; the bill for civil rights in order under the ruling, 188; motion to add the civil rights bill, 188; what is the object of an appropriation bill? 188; within two days of adjournment, 188; agreements that have been made do not relate to amendments, 189; some misunderstanding, 190; let us vote on the amendments, 190; have been here nearly seventeen hours, 190; motion to postpone lost, 190; moved to add civil rights bill, 190; ruled out of order, 191; decision of the chair sustained, 191; original amendment agreed to, 191; bill passed, 191; bill ordered to be printed, and conference committee appointed, 191.

In the House, Senate amendments considered, 192; motion to non-concur, 192; the question is, Shall election by the bayonet be substituted for election by ballot? 192; let the bill be killed, rather than liberty should perish, 192; resolution to non-concur and appoint a conference committee adopted, 192; committee appointed, 192; report, 192; proceedings of the committee, 193; agreements, 193; the parliamentary history of this bill, 194; shall the majority of the members of this House have the right to consider and act upon a great appropriation bill in the mode provided in the rules? 194; time spent in conference, 194; nothing in this act which forbids the arrest of any man without process of law, 195; inaugurating a treason in this hall, 195; action of the Thirty-fifth Congress, 195; when we come to act upon an important appropriation bill, what do we find? 196; report of the committee recommitted to the committee of conference, 196; new conference appointed, 196; report submitted, 196; changes made, 196; it is an unconstitutional bill, 197; it is infamous, 197; report of the committee agreed to, 198; Senate also concurs, 198.

In the Senate, a bill to extend the provisions of the act to enforce the fourteenth amendment considered, 198; inquiries suggested, 198; evidence relative to outrages in the Southern States, 199; summary of offences committed, 199, 200; acts of men who have no countenance in society, 200; evidence of its political character, 200; views of the minority on this subject, 200; causes assigned for these outrages, 200; withdraw the power from the President to suspend the writ of *habeas corpus*, and no man can answer for the scenes that will follow, 201; this bill simply continues the power of the President, 201; who can doubt that Congress has acted wisely in investing the President with this power? 201; do affairs at the South make it prudent to continue the power? 201; does the public safety require it? 202; outrages, 202; are the property-holders of the South responsible for these things? 202; indicting the whole class of property-holders in the South, 202; they regard the whole policy of the Republican party as having been hostile to them, 203.

Practically the bill proposes to give the President

power to elect himself by force, 203; it is one of a series of acts looking to this object, 203; President's response in justification for declaring martial law in South Carolina, 204; he was asked to communicate what offences, if any, 204; report of the minority of the committee, 204, 205; what is to prevent any State, or city, or county, from being put under martial law? 206; martial law is still maintained in nine counties, 206; bill reported without amendment, 206; not a charge of violence made for three hundred miles on the Mississippi front since 1863, 206; the charge repelled that justice is not administered in Mississippi, 207; you still persevere in your unhallowed warfare on the down-trodden people, 207; yet they tell us the Republican party wants peace, 207; an organized society existing in nine States of the Union, 208; its character is completely established, 208; its machinery is murder, arson—crimes without name, 208; motion to lay the bill on the table lost, 209; the bill is unauthorized by the Constitution, 209; the power can only be exercised when the exigency has arisen, 209; most dangerous power that can be conferred, 209; does the public safety require the interposition of Congress? 210; reasons for voting in favor of the bill, 210; act of 1795, 210; who may suspend the writ? 210; is this fourth section constitutional? 211; this right is to be a precedent on the side of liberty or on the side of despotism, 211; can Congress authorize the President to suspend the writ on the happening of certain events of which he is to be the judge? 211; what is the power of Congress? 212; it is proposed to pass this bill when a presidential election is pending, 212; it is for the legislative department of the Government to determine when the public safety requires the suspension of the writ, 213; constructive rebellion should be condemned as constructive treasons are now, 213; what does the bill propose? 214; the right to the writ is the heritage of freemen, 214; bill passed, 214.

In the House, a motion to suspend the rules and take up the bill lost, 215; apportionment of Representatives, 215; amnesty bill passed, 216; Congress adjourns, 216.

CONKEY, WALTER M.—Obituary, 638.

CONKLING, ROSCOE.—Senator from New York, 119; on defalcation of Hodge, 128; opposes motion to take up amnesty bill, 154.

Connecticut.—A Temperance Convention, 216; nomination of candidates for State officers, 216; platform, 216; convention of the Labor Reform party, 217; candidates nominated, 217; resolutions adopted, 217; Republican Convention, 217; nominations, 217; platform, 217, 218; results of the election, 219; finances, 219; revenue and expenditures, 219; tax for the coming year, 219; taxable property, 219; town and city indebtedness, 219; savings-banks, 219; State banks, 219; insurance companies, 219; losses of Connecticut insurance companies by the Chicago fire, 219, 220; life-insurance companies doing business in the State, 220; school fund, 220; free school law and school statistics, 220; Normal School, 220; State scholarships at Yale College, 220; the government of Yale College placed in the hands of the alumni, 220; accommodations for the insane, 220; School for Imbeciles, 220; American Asylum for Deaf and Dumb, 220; statistics relating to the blind, 220; Industrial School for Girls, 220; Reform School for Boys, 221; statistics relating to the same, 221; penitentiary, 221; the Governor's views on the pardoning power, 221; amelioration of the penitentiary system, 221; recom-

mendations by an examining committee, 221; statistics of crime, 221; number of births, 222; of marriages, 222; of divorces, 222; of deaths, 222; railroads, 222; fisheries, 223; election of United States Senator, 223; action on the question of two capitals, 223; resolutions adopted by the Democratic and Liberal Republican parties, 223; statistics of manufactures, 223; of churches, 223; of libraries, 223; of newspapers, 223; cotton manufactures, 231, 232.
